PROTECTIVE TECHNOLOGIES, INC.

Protecting Life In The Public Space...Invisibly

OUR NEW REALITY

Acts of terror from gun and blast violence are happening with greater frequency than ever before...in places we never thought possible... where we work, live, and play.

Hundreds of Billions of Dollars are spent on Security Measures to prevent such violence, yet no technology has been able to invisibly protect life within the public space as events unfold.

Until now...

OUR NEW REALITY

The FBI identified 213 active shooter incidents that occurred in the United States between 2000 and 2016.

A total of 785 individuals were killed, and a total of 689 individuals were wounded.

70.0% of the shooting incidents occurred in either a commerce/business or educational environment,

SURVEILLANCE AND SCREENING - NO LONGER ADEQUATE

**The Security industry is a growing market,
with approximately 400 billion dollars in
world wide sales annually.**

A NEW LAYER OF PROTECTION IS NEEDED

The security industry said we had a 'brilliant idea!' ... integrate state-of-the-art ballistic barriers into commercial furnishings to invisibly protect the public from ballistic violence when it occurs.

So we did.

Today our award-winning technology is not only found hidden within commercial furnishings from leading manufacturers, our brand is recognized worldwide by the security industry for providing an innovative, and much needed, layer of protection never before available.

LEADERSHIP

‘Visionary’ and ‘Innovator’ are used to describe Jeff from time-to-time. Although he much prefers to sum up his perspective on disrupting the security industry by simply stating ‘there has got to be a better way’.

Starting his career with the military engineering and product development divisions of Honeywell and General Electric, Jeff gained invaluable operational and sales experience that led to subsequent leadership roles within companies in the medical device and contract furnishings industry.

Leading the way has always been Jeff’s strong suit. Protecting lives from acts of terror is his passion.
