

EDWARD R. DAMIANO
Department of Biomedical Engineering, Boston University
44 Cummington Mall, Boston, MA 02215
phone: (617) 353-9493, fax: (617) 358-2835, email: edamiano@bu.edu

EDUCATION —

Ph.D. Applied Mechanics, Rensselaer Polytechnic Institute, Troy, NY, December 1993

M.S. Mechanical Engineering, Washington University, St. Louis, MO, May 1989

B.S. Biomedical Engineering, Rensselaer Polytechnic Institute, Troy, NY, August 1987

EXPERIENCE —

October 2015 – present	Beta Bionics, Inc. <i>President and CEO</i>	Boston, MA
February 2015 – present	Boston University <i>Professor</i>	Boston, MA Department of Biomedical Engineering
September 2004 – February 2015	Boston University <i>Associate Professor</i>	Boston, MA Department of Biomedical Engineering
March 1998 – August 2004	University of Illinois at Urbana-Champaign <i>Assistant Professor</i>	Urbana, IL Bioengineering Program
August 1997 – August 2004	University of Illinois at Urbana-Champaign <i>Assistant Professor</i>	Urbana, IL Department of Mechanical and Industrial Engineering
November 1994 – August 1997	University of Virginia <i>Postdoctoral Fellow</i>	Charlottesville, VA Department of Biomedical Engineering
March 1994 – September 1994	University of Utah <i>Postdoctoral Research Associate</i>	Salt Lake City, UT Department of Bioengineering
September 1990 – December 1993	Rensselaer Polytechnic Institute <i>Teaching Assistant</i>	Troy, NY Mathematical Sciences and Mechanical Engineering Departments
July 1989 – August 1990	Arthur D. Little, Inc. <i>Engineering Consultant</i>	Cambridge, MA Environmental, Health and Safety Practice

ACADEMIC ADMINISTRATIVE POSITIONS —

September 2007 – May 2011	Boston University <i>Director, NIH QBP Training Grant</i>	Boston, MA Department of Biomedical Engineering
September 2005 – September 2010	Boston University <i>Director, BME Graduate Admissions</i>	Boston, MA Department of Biomedical Engineering
September 2004 – May 2009	Boston University <i>Director, Computational Simulation Facility</i>	Boston, MA Department of Biomedical Engineering

JOURNAL PUBLICATIONS —

RUSSELL, S.J., HILLARD, M.A., BALLIRO, C., MAGYAR, K.L., SELAGAMSETTY, R., SINHA, M., GRENAN, K., MONDESIR, D., EHKLASPOUR, L., ZHENG, H., DAMIANO, E.R., EL-KHATIB, F.H. ISSUED PATENTS —

- DAMIANO, E.R. & EL-KHATIB, F.H. (2005) Fully automated control system for type 1 diabetes. International PCT application # PCT/US2006/018620 (Priority date: May 13, 2005; PCT filed May 15, 2006).

PENDING PCT APPLICATIONS —

- EL-KHATIB, F.H. RUSSELL, S.J. & DAMIANO, E.R. (2015) Glucose control system with automatic adaptation of glucose target. Provisional application (Priority date: August 7, 2015).
- RAMEY, K, EL-KHATIB, F.H. & DAMIANO, E.R. (2015) Infusion system including multiple medicament infusion port. Provisional application (Priority date: July 8, 2015).
- EL-KHATIB, F.H. & DAMIANO, E.R. (2014) Offline glucose level control based on preceding periods of online glucose level control. Provisional application # 61/933,996 (Priority date: January 31, 2014).
- RAMEY, K., DAMIANO, E.R. & EL-KHATIB, F.H. (2013) Device for bridging infusion sources with sites of infusion in a multi-channel infusion system. Provisional application # 61/895,279 (Priority date: October 24, 2013).
- RAMEY, K., DAMIANO, E.R. & EL-KHATIB, F.H. (2013) An infusion set for infusing two or more medicaments via an array of multiple catheters or cannulas. Provisional application # 61/895,288 (Priority date: October 24, 2013).
- RAMEY, K., DAMIANO, E.R. & EL-KHATIB, F.H. (2013) Manifold for the transfer of medicaments from different vials without mischanneling. Provisional application # 61/932,835 (Priority date: October 24, 2013).
- EL-KHATIB, F.H., DAMIANO, E.R. & RUSSELL, S.J. (2010) Blood glucose control system. International PCT application # PCT/US2011/58688 (Priority date: October 31, 2010; PCT filed October 31, 2011).

US FDA INVESTIGATIONAL DEVICE EXEMPTIONS —

- *A Study Testing Static and Dynamic Glucose Target Settings in Our Bionic Pancreas*. (2015) Investigational Device Exemption Application #G150142, approved July 29, 2015 by the US Food and Drug Administration. Indications for use: Intended to provide autonomous control of blood glucose in

adult subjects with type 1 diabetes in an outpatient setting using subcutaneous infusion of insulin and glucagon. Sponsor: E.R. Damiano (prepared by F.H. El-Khatib).

- *The Bionic Pancreas System.* (2015) Investigational Device Exemption Application #G150130, approved July 10, 2015 by the US Food and Drug Administration. Indications for use: Intended to provide autonomous control of blood glucose in adult subjects with type 1 diabetes in an outpatient setting using subcutaneous infusion of insulin and glucagon. Sponsor: E.R. Damiano (prepared by F.H. El-Khatib).
- *The Bionic Pancreas System.* (2014) Investigational Device Exemption Application #G140045, approved April 23, 2014 by the US Food and Drug Administration. Indications for use: Intended to provide autonomous control of blood glucose in adult subjects with type 1 diabetes in an outpatient setting using subcutaneous infusion of insulin and glucagon. Sponsor: E.R. Damiano (prepared by F.H. El-Khatib).
- *Testing a Wearable Bionic Endocrine Pancreas in the Diabetes Camp Setting.* (2013) Investigational Device Exemption Application #G130065, approved April 8, 2013 by the US Food and Drug Administration. Indications for use: Intended to provide autonomous control of blood glucose in adolescent subjects with type 1 diabetes in an outpatient setting using subcutaneous infusion of insulin and glucagon. Sponsor: E.R. Damiano (prepared by F.H. El-Khatib). Supplemental application #G130065/S003, approved April 18, 2014, extended IDE #G130065 to pre-adolescent subjects with type 1 diabetes.
- *A Wearable Closed-Loop Glucose Control System.* (2012) Investigational Device Exemption Application #G120255, approved November 30, 2012 by the US Food and Drug Administration. Indications for use: Intended to provide autonomous control of blood glucose in adult subjects with type 1 diabetes in an outpatient setting using subcutaneous infusion of insulin and glucagon. Sponsor: E.R. Damiano (prepared by F.H. El-Khatib).
- *An Inpatient Closed-Loop Glucose Control System.* (2012) Investigational Device Exemption Application #G120259, approved November 30, 2012 by the US Food and Drug Administration. Indications for use: Intended to provide automated control of blood glucose in pediatric and adult subjects with type 1 diabetes using subcutaneous infusion of either insulin only or insulin and glucagon. Sponsor: E.R. Damiano (prepared by F.H. El-Khatib).
- *A Closed-Loop Glucose Control System for Type 1 Diabetes.* (2010) Investigational Device Exemption Application #G100062, approved April 30, 2010 by the US Food and Drug Administration. Indications for use: Intended to provide autonomous control of blood glucose in pediatric and adult subjects with type 1 diabetes using subcutaneous infusion of insulin and glucagon. Sponsor: E.R. Damiano (prepared by F.H. El-Khatib).
- *Closed-Loop Glucose Control for Automated Management of Type 1 Diabetes.* (2008) Investigational Device Exemption Application #G080012, approved February 21, 2008 by the US Food and Drug Administration. Indications for use: Intended to provide automated control of blood glucose in adult subjects with type 1 diabetes using subcutaneous infusion of insulin and glucagon. Sponsor: E.R. Damiano (prepared by F.H. El-Khatib).

GRANTS RECEIVED —

- *Final clinical studies for submission of a pre-market approval application to the FDA for a bionic pancreas that automates type 1 diabetes management.* (2015–16) National Institutes of Health (NIDDK, UC4 DK108612, PI: E.R. Damiano), \$1,498,323.
- *Administrative Supplement to: A multicenter outpatient trial of a bihormonal bionic pancreas.* (2015–16) National Institutes of Health (NIDDK, DP3 DK101084, PI: E.R. Damiano), \$257,000.
- *An outpatient feasibility study of an insulin-only bionic pancreas for type 1 diabetes.* (2015–16) Leona M. and Harry B. Helmsley Charitable Trust (Research Grant, PI: E.R. Damiano), \$775,061.
- *The Set-point Study: Evaluating Effects of Changing Glucose Target on Bionic Pancreas Performance.* (2015–16) Leona M. and Harry B. Helmsley Charitable Trust (Research Grant, PI: S.J. Russell, subcontract PI: E.R. Damiano), \$364,428 (subcontract).
- *Testing a bionic pancreas in an outpatient study in preadolescent children with type 1 diabetes at the Clara Barton/Joslin Camps.* (2014) Leona M. and Harry B. Helmsley Charitable Trust (Research Grant, PI: E.R. Damiano), \$743,230.
- *A multicenter outpatient trial of a bihormonal bionic pancreas.* (2013–15) National Institutes of Health (NIDDK, DP3 DK101084, PI: E.R. Damiano), \$2,880,000.
- *Testing a bihormonal bionic pancreas in an outpatient study in children with type 1 diabetes at the Clara Barton/Joslin Camps.* (2013) Leona M. and Harry B. Helmsley Charitable Trust (Research Grant, PI: E.R. Damiano), \$694,210.
- *Transitional studies of a bionic pancreas for out-patient diabetes management.* (2013–16) National Institutes of Health (NIDDK, R01 DK097657, PI: E.R. Damiano), \$2,455,122.
- *Clinical trials of a closed-loop control system for type 1 diabetes management.* (2009–13) National Institutes of Health (NIDDK, R01 DK085633, PI: E.R. Damiano), \$2,046,225.
- *Subcutaneous continuous glucose monitoring and intravenous dosing of insulin and dextrose for automated glycemic control in the in-patient setting: A clinical trial in the MGH CRC.* (2011–2012) Wallace H. Coulter Translational Partners Grant (PI: E.R. Damiano), \$100,000.
- *In-patient trials of automated glucose control in children with type 1 diabetes.* (2010–2011) Leona M. and Harry B. Helmsley Charitable Trust (Research Grant, PI: E.R. Damiano), \$1,026,694.
- *Selecting insulin analogs for closed-loop control using multiplex pharmacokinetic profiling.* (2010–2012) Leona M. and Harry B. Helmsley Charitable Trust (Research Grant, PI: S.J. Russell, subcontract PI: E.R. Damiano), \$38,639 (subcontract).
- *Development and preclinical testing of a closed-loop control system for in-patient blood-glucose regulation.* (2010–2011) Wallace H. Coulter Translational Partners Grant (PI: E.R. Damiano), \$100,000.
- *Closed-loop glucose control for automated management of type 1 diabetes.* (2007–2011) Juvenile Diabetes Research Foundation (Clinical Investigations Research Grant, PI: E.R. Damiano), \$1,942,156.
- *Development and preclinical testing of a closed-loop control system for blood-glucose regulation in the ICU.* (2009–2010) Wallace H. Coulter Translational Partners Grant (PI: E.R. Damiano), \$100,000.
- *Investigations into the vasoprotective role of combined insulin and free-radical scavenger therapies in the treatment of diabetes.* (2008–09) Dean’s Catalyst Award, Boston University (PI: E.R. Damiano), \$10,000.
- *Bridge funding for BU/MGH closed-loop control trial.* (2008–2009) Wallace H. Coulter Translational Partners Grant (PI: E.R. Damiano), \$35,000.
- *Closed-loop blood-glucose regulation in type 1 diabetes: A clinical trial.* (2007) Wallace H. Coulter Translational Partners Grant (PI: E.R. Damiano), \$50,000.
- *Automated hemodynamic analysis in microvessels using μ -particle image velocimetry.* (2006–09) National Institutes of Health (NHLBI, R21 HL082870, PI: E.R. Damiano), \$437,544.
- *Micro-viscometric studies of the ESL in microvessels.* (2004–09) National Institutes of Health (NHLBI, R01 HL076499, PI: E.R. Damiano), \$1,141,315.
- *Engineering a robust fully automated closed-loop control unit for glucose regulation in type 1 diabetes.* (2006–07) Wallace H. Coulter Translational Partners Grant (PI: E.R. Damiano), \$100,000.

- *The mechano-electrochemical behavior of the capillary glycocalyx.* (2001–07) National Science Foundation CAREER Award (BES-0093985, PI: E.R. Damiano), \$375,000.
- *The development of a semi-empirical basis to study microhemofluidics in post-capillary venules.* (2003–04) Whitaker Foundation Transitional Funding Award (TF-02-0024, PI: E.R. Damiano), \$80,000.
- *The role of the capillary glycocalyx in microvascular permeability, rheology, and exchange.* (1999–2002) Whitaker Foundation Biomedical Engineering Research Grant (RG-98-0524, PI: E.R. Damiano), \$210,000.
- *The application of mixture theory to some fluid–structure interaction problems arising in biomechanics.* (1998–99) UIUC Campus Research Board (PI: E.R. Damiano), \$16,000.
- *The role of the glycocalyx in microvascular rheology.* (1996–98) National Institutes of Health, Individual National Research Service Award (HL-09501, PI: E.R. Damiano, Sponsors: T.C. Skalak & B.R. Duling), \$58,500.

GIFTS RECEIVED —

Total Raised (since November 2011): \$1,676,721

GO BIONIC Challenge (from July 1, 2014–December 31, 2014): \$1,229,455

- *Gift from The Appleby Foundation.* February 2015, \$25,000.
- *Various gifts \leq \$5,000.* July 2014–December 2014, \$217,691.
- *Gift from Adam Hess.* December 2014, \$10,000.
- *Gift from The Frederick Banting Foundation.* December 2014, \$300,000.
- *Gift from Kirk Ramey.* December 2014, \$80,000.
- *Gift from The Brian and Joelle Kelly Family Foundation (Courtesy of Brian Kelly).* December 2014, \$25,000.
- *Gift from Horace W. Goldsmith Foundation (Courtesy of Chuck Slaughter).* December 2014, \$200,000.
- *Gift from Madden Charities (Courtesy of John Madden).* December 2014, \$50,000.
- *Gift from The Walter Foundation (Courtesy of Bob Walter).* October 2014, \$20,000.
- *Gift from William Kleh.* October 2014, \$10,000.
- *Gift from Todd Abbrecht.* October 2014, \$20,000.
- *Gift from Jeff Greenacre.* September 2014, \$45,000.
- *Gift from The Thomas J. Long Foundation (Courtesy of Jill Rapier).* September 2014, \$100,000.
- *Gift from Len Ely.* September 2014, \$6,540.
- *Gift from The Clarie Friedlander Family Foundation (Courtesy of Peter Klein).* August 2014, \$20,000.
- *Gift from The Indian River Community Foundation (Courtesy of Phillip and Stephanie Lambert).* August 2014, \$35,000.
- *Gift from Jeff Greenacre.* August 2014, \$25,000.
- *Gift from Todd Abbrecht.* August 2014, \$20,000.
- *Gift from Janice and Bill Grigsby.* July 2014, \$5,225.
- *Gift from Tom Cronin.* July 2014, \$15,000.
- *Gift from The National Christian Foundation (Courtesy of Loren and Michael Gordon).* March 2014, \$25,000.
- *Gift from Joyce and Steve Tadler.* February 2014, \$50,000.
- *Various gifts \leq \$5,000.* November 2013–June 2014, \$19,554.
- *Gift from Joyce and Steve Tadler.* October 2013, \$50,000.
- *Various gifts \leq \$5,000.* February–October 2013, \$8,935.
- *Gift from the W. W. Whitlock Foundation.* February 2013, \$10,000.
- *Gift from The Frederick Banting Foundation.* January 2013, \$125,000.
- *Various gifts \leq \$5,000.* December 2012–January 2013, \$1,790.

- *Gift from The Frederick Banting Foundation.* September 2012, \$63,000.
- *Gift from The Frederick Banting Foundation.* April 2012, \$50,000.
- *Gift from Ralph Faber.* January 2012, \$35,000.
- *Various gifts \leq \$5,000.* November 2011, \$5,975.
- *Gift from Deborah and Frank Pine.* November 2011, \$10,000.

HONORS AND AWARDS —

- Elected to the American Institute for Medical and Biological Engineering College of Fellows, 2015
- Artificial Pancreas Research Award, Diabetes Technology Society, 2014
- Named to the 2014 “HealthLeaders 20,” HealthLeaders Media, 2014
- Selected to deliver the 2014 University Lecture, Boston University, 2014
- Selected to deliver the 2014 Kleh Distinguished Lecture, Boston University London Centre, 2014
- Finalist in the inaugural “Invented Here” event, Museum of Science, Boston, MA, 2011
- CAREER Award, National Science Foundation, 2001–07
- Named to “Incomplete List of Teachers Ranked Excellent by their Students,” University of Illinois, 2001
- Individual National Research Service Award, National Institutes of Health, 1996–98
- Cardiovascular Research Center Fellowship, University of Virginia, 1995–96
- Poster Award, Second World Congress of Biomechanics, 1994

PROPOSAL AND PANEL REVIEW —

Panel member for National Institutes of Health, 2013 NIDDK Workshop on Research Supported by the Special Statutory Funding Program for Type 1 Diabetes Research, June 2013.

Ad hoc reviewer for National Institutes of Health, IMPACT study section, June 2011.

Ad hoc reviewer for National Institutes of Health, EMNR-K study section: Translational Studies in Diabetes, Obesity & Endocrinology, November 2011.

Ad hoc reviewer for National Institutes of Health, Pilot and Feasibility Clinical Research Grants in Diabetes, Endocrine and Metabolic Diseases (R21), November 2011.

Ad hoc reviewer for National Science Foundation, U.S. Civilian Research and Development Foundation.

NSF CAREER Panel, Nano and Bio Mechanics of Materials Program, Civil and Mechanical System Division, Engineering Directorate, National Science Foundation, Washington, D.C., November 2005.

Biofluids Panel, Office of Biological and Physical Research, National Aeronautics and Space Administration, Washington, D.C., March 2003.

Biofluids Panel, Office of Biological and Physical Research, National Aeronautics and Space Administration, Washington, D.C., August 2001.

MANUSCRIPT REVIEW —

American Journal of Physiology: Heart and Circulatory Physiology; Anesthesiology; Annals of Biomedical Engineering; Biophysical Journal; Biorheology; Cardiovascular Research; Circulation; Circulation Research; Diabetes; Diabetes Care; Diabetes Technology and Therapeutics; IEEE Transactions on Biomedical Engineering; Journal of Biomechanical Engineering; Journal of Biomechanics; Journal of Fluid Mechanics; Journal of the Society for Industrial and Applied Mathematics; Journal of Thrombosis and Haemostasis; Journal of Vestibular Research; Microcirculation; Microvascular Research; New England Journal of Medicine; Physics in Medicine and Biology; Physics of Fluids; Proceedings of the National Academy of Sciences (USA); Science Translational Medicine

EDITORIAL CONTRIBUTIONS —

Co-Editor of special symposium issue entitled, “Glucagon: Physiology and Pharmacotherapy”, with Co-Editors J.R. Castle, S.J. Russell, W.K. Ward, in *Journal of Diabetes Science and Technology*, Volume 4, Issue 6, November 2010.

CHAired SESSIONS AT SCIENTIFIC MEETINGS —

Vascular Sessions, “Microvascular Glycocalyx and Molecular Fluid–Structure Interaction”, Co-Chair with T.W. Secomb, at *Fifth World Congress of Biomechanics*, Munich, Germany, June 2006.

Vascular Sessions, “Biomechanics of the Endothelial Surface Layer in the Microcirculation”, Co-Chair with T.W. Secomb, at *ASME Summer Bioengineering Conference*, Key Biscayne, FL, June 2003.
Soft Tissue Mechanics Sessions, “Soft Tissues of the Head and Neck”, Co-Chair with J. Wayne, at *ASME Summer Bioengineering Conference*, Sun River, OR, June 1997.

COMMITTEE ASSIGNMENTS —

- Member, University Lecture Committee, Office of the Provost, Boston University, 2015–present
- Member, Graduate Committee, Biomedical Engineering Department, Boston University, 2011–present
- Chair, Graduate Admissions Committee, Biomedical Engineering Department, Boston University, 2005–2010
- Member, Search Committee for the Director of the Animal Care Program, Office of the Provost, Boston University, 2009–2010
- Member, Biomedical Engineering Executive Committee, Biomedical Engineering Department, Boston University, 2005–09
- Member, Biomedical Engineering Chair Search Committee, College of Engineering, Boston University, 2007–08
- Member, Faculty Search Committee, Biomedical Engineering Department, Boston University, 2007–08
- Member, Mechanical Engineering Chair Search Committee, College of Engineering, Boston University, 2006–07
- Member, Faculty Search Committee, Biomedical Engineering Department, Boston University, 2006–07
- Chair, Faculty Search Committee, Biomedical Engineering Department, Boston University, 2005–06
- Member, Graduate Admissions Committee, Biomedical Engineering Department, Boston University, 2004–05
- Member, Undergraduate Programs Committee, Mechanical and Industrial Engineering Department, University of Illinois at Urbana-Champaign, 1997–2000

TEACHING HISTORY —

- Boston University – Continuum Mechanics for Biomedical Engineers (AM/BE 521, graduate); Numerical Methods and Modeling in Biomedical Engineering (BE 703, graduate); Biomedical Transport Phenomena (BE 736, graduate); Fundamentals of Fluid Mechanics (BE 436)
- University of Illinois at Urbana-Champaign – Introduction to Biomechanics and Biofluid Dynamics (ME 393, graduate); Fluid Mechanics of Convective Heat Transfer (ME 308, graduate); Introductory Gas Dynamics (ME 211); Senior Mechanical Engineering Design Project (ME 280)
- Rensselaer Polytechnic Institute – Statics and Dynamics; Strength of Materials; Calculus and Analytic Geometry; Introductory Vector Calculus

GRADUATE-STUDENT PLACEMENT —

POTTER, D. R. Postdoctoral Research Associate, Department of Physiology, University of Maastricht

EL-KHATIB, F. H. Senior Research Associate, Department of Biomedical Engineering, Boston University

STACE, T. M. Senior Lecturer, School of Mathematics and Physics, University of Queensland, Queensland, Australia

LONG, D. S. Lecturer, Department of Engineering Science and the Auckland Bioengineering Institute, University of Auckland, Auckland, New Zealand

GRADUATE-STUDENT AND POSTDOCTORAL ADVISING —

Senior Research Scientists and Research Associates —

SELAGAMSETTY, R., RAMEY, K., MCKEON, K., EL-KHATIB, F. H., JIANG, J.

Postdoctoral Advising —

ROY, B. C., EL-KHATIB, F. H.

Theses and Ph.D. Dissertations Accepted —

- SAVERY, M. D. (2011) Ph.D. Dissertation: Quantitative analysis of the hydrodynamic integrity of the microvascular glycocalyx in healthy and transgenic mice.
- POTTER, D. R. (2009) Ph.D. Dissertation: A comparison of the hydrodynamically relevant endothelial glycocalyx *in vivo* and *in vitro* using microparticle image velocimetry.
- EL-KHATIB, F. H. (2005) Ph.D. Dissertation: System identification and adaptive closed-loop glucose control in a type 1 diabetic swine model.
- LONG, D. S. (2004) Ph.D. Dissertation: Theoretical and experimental investigations of microvascular hemodynamics *in vivo* using micro-particle image velocimetry.
- EL-KHATIB, F. H. (2001) M.S. Thesis: A non-Newtonian model of pulsatile blood flow in a cylindrical tube. M.S. thesis, University of Illinois at Urbana-Champaign, Urbana, Illinois.
- STACE, T. M. (1999) Honors Thesis: An electrochemical model of the diffusion of charged molecules through the capillary glycocalyx. Honours thesis, University of Western Australia, Perth, Australia. *Awarded "Year 2000 Malcolm Baron Imperial College Prize for best engineering honours thesis in any discipline of engineering" by the Imperial College Alumni Association, Perth.*

Doctoral Committee Member —

Shamit Shrivastava (Biomedical Engineering, Boston University); Alon Singer (Biomedical Engineering, Boston University); James G. Truslow (Biomedical Engineering, Boston University); Jesse Lock (Biomedical Engineering, Boston University); Michele D. Savery (Biomedical Engineering, Boston University); Catherine Calabro (Biomedical Engineering, Boston University); Prashant Bansal (Biomedical Engineering, Boston University); Michele D. Savery (Biomedical Engineering, Boston University); Daniel R. Potter (Molecular Biology, Cell Biology, Biochemistry Program, Boston University); Andrew Golden (Biomedical Engineering, Boston University); Steven Meyers (Biomedical Engineering, Boston University); Wynter J. Duncanson (Biomedical Engineering, Boston University); Kenneth Halvorsen (Biomedical Engineering, Boston University); Kenneth Chrobak (Biomedical Engineering, Boston University); Min Tang (Biomedical Engineering, Boston University); Firas H. El-Khatib (Mechanical and Industrial Engineering, University of Illinois at Urbana-Champaign); Dmitri O. Pushkin (Theoretical and Applied Mechanics, University of Illinois at Urbana-Champaign); David S. Long (Mechanical and Industrial Engineering, University of Illinois at Urbana-Champaign)

Masters Committee Member —

Abhishek Jain (Biomedical Engineering, Boston University); Tatiana Laivins (Biomedical Engineering, Boston University); Alex Stetsyuk (Biomedical Engineering, Boston University); Deanna Behrens (Mechanical and Industrial Engineering, University of Illinois at Urbana-Champaign)

OUTREACH ACTIVITIES —

- DAMIANO, E. R. Mathematical solutions for the biomedical sciences. *Nashoba Regional High School*, Bolton, Massachusetts, May 2015.
- DAMIANO, E. R. Mathematical solutions for the biomedical sciences. *Nashoba Regional High School*, Bolton, Massachusetts, May 2014.
- DAMIANO, E. R. Mathematical solutions for the biomedical sciences. *Nashoba Regional High School*, Bolton, Massachusetts, May 2013.
- DAMIANO, E. R. Mathematical solutions for the biomedical sciences. *Nashoba Regional High School*, Bolton, Massachusetts, May 2012.
- DAMIANO, E. R. Mathematical solutions for the biomedical sciences. *Nashoba Regional High School*, Bolton, Massachusetts, May 2011.
- DAMIANO, E. R. Mathematical solutions for the biomedical sciences. *Nashoba Regional High School*, Bolton, Massachusetts, May 2010.
- DAMIANO, E. R. An academic research career in the biomedical sciences. *Acton-Boxborough Regional High School Career Breakfast*, Acton, Massachusetts, December 2009.
- DAMIANO, E. R. An academic research career in the biomedical sciences. *Acton-Boxborough Regional High School Career Breakfast*, Acton, Massachusetts, March 2008.

SOCIETY AFFILIATIONS —

American Diabetes Association (ADA); Biomedical Engineering Society (BMES); Microcirculatory Society (MCS)

INVITED SEMINARS —

- DAMIANO, E. R. The bionic pancreas. *Practical Aspects of Diabetes Care 5th Annual Symposium, Winthrop University Hospital*, Mineola, New York, May 2015.
- DAMIANO, E. R. The bionic pancreas. *2015 Diabetes Summit, GTCbio*, Boston, Massachusetts, April 2015.
- DAMIANO, E. R. The bionic pancreas. *Boston University ENG 50th Celebration*, New York, New York, April 2015.
- DAMIANO, E. R. The bionic pancreas. *2015 AROC Keynote Lecture, The New Jersey Association of Osteopathic Physicians and Surgeons (NJAOPS)*, Atlantic City, New Jersey, April 2015.
- DAMIANO, E. R. The bionic pancreas. *2015 Bay Area Diabetes Summit*, Palo Alto, California, March 2015.
- DAMIANO, E. R. The bionic pancreas. *1st Annual Type 1 Diabetes Summit Keynote Speaker, Maine P-PODS*, Portland, Maine, February 2015.
- DAMIANO, E. R. Bionic pancreas update: Outpatient trials, user features, safety concerns & risk mitigation. *DiabetesMine DData Exchange*, Palo Alto, California, November 2014.
- DAMIANO, E. R. A bionic pancreas for type 1 diabetes: The long-awaited alternative to the ever-elusive cure. *The University Lecture, Boston University*, Boston, Massachusetts, November 2014.
- DAMIANO, E. R. Until there is a cure for type 1 diabetes . . . there is the bionic pancreas. *The Kleh Family Foundation Distinguished Lecture Series, Boston University London Centre*, London, UK, October 2014.
- DAMIANO, E. R. Until there is a cure for type 1 diabetes . . . there is the bionic pancreas. *Boston University College of Engineering 50th Anniversary Alumni Gala Event*, Boston, Massachusetts, September 2014.
- DAMIANO, E. R. Until there is a cure for type 1 diabetes . . . there is the bionic pancreas. *Boston University Board of Trustees Luncheon*, Boston, Massachusetts, September 2014.
- DAMIANO, E. R. The bionic pancreas. *ACA Implementation: The Impact on the Patient with Diabetes Policy Summit*, Washington, DC, September 2014.
- DAMIANO, E. R. Making diabetes management disappear: A bionic pancreas for one and all. *American Diabetes Association Step-Out Breakfast*, Worcester, Massachusetts, July 2014.
- DAMIANO, E. R. (with S. J. Russell) Outpatient glycemic control in type 1 diabetes with a bi-hormonal bionic pancreas. *Grand Rounds Presentation, Eli Lilly and Company*, Indianapolis, Indiana, June 2014.
- DAMIANO, E. R. Making diabetes management disappear: A bionic pancreas for one and all. *Clara Barton Center Annual Event*, Charlton, Massachusetts, May 2014.
- DAMIANO, E. R. Making diabetes management disappear: A bionic pancreas for one and all. *American Association of Diabetes Educators*, Framingham, Massachusetts, May 2014.
- DAMIANO, E. R. Making diabetes management disappear: A bionic pancreas for one and all. *American Diabetes Association Step-Out Breakfast*, Worcester, Massachusetts, April 2014.
- DAMIANO, E. R. Making diabetes management disappear: A bionic pancreas for one and all. *Boston University College of Engineering West Coast Alumni Event*, Palo Alto, California, January 2014.
- DAMIANO, E. R. Redefining the landscape of diabetes management: A bionic pancreas for one and all. *Second Annual Carb DM Event*, Palo Alto, California, November 2013.
- DAMIANO, E. R. Redefining the landscape of diabetes management: A bionic pancreas for one and all. *Translational Medicine Interest Group, Brown University Medical School*, Providence, Rhode Island, October 2013.
- DAMIANO, E. R. Redefining the landscape of diabetes management: A bionic pancreas for one and all. *Endocrine Grand Rounds, Boston University Medical Center*, Boston, Massachusetts, September 2013.
- DAMIANO, E. R. Redefining the landscape of diabetes management: A bionic pancreas for one and all. *Diabetes Day, Greenville Health System*, Greenville, South Carolina, September 2013.
- DAMIANO, E. R. (with S. J. Russell) Redefining the landscape of diabetes management: A bionic pancreas for one and all. *NIDDK Teleconference with Senator Joe Donnelly*, Toronto, Canada, September 2013.
- DAMIANO, E. R. The coming of age of the bionic pancreas. *The Best Diabetes Conference, Charles H. Best Diabetes Centre*, Toronto, Canada, June 2013.
- DAMIANO, E. R. The coming of age of the bionic pancreas. *JDRF South Jersey Chapter Annual Meeting*, Marlton, New Jersey, May 2013.
- DAMIANO, E. R. This is the dawning of the age of the bionic endocrine pancreas. *Inaugural Joslin Symposium: Challenges and Opportunities in Type 1 Diabetes Research*, Boston, Massachusetts, May 2013.
- DAMIANO, E. R. Preliminary results of a bi-hormonal bionic pancreas in an out-patient setting: The Beacon Hill Study. *Second Annual Manning Symposium*, Charlottesville, Virginia, April 2013.
- DAMIANO, E. R. This is the dawning of the age of the bionic endocrine pancreas. *Third Diabetes Summit, GTCbio*, Boston, Massachusetts, April 2013.

- DAMIANO, E. R. Preliminary results of a bihormonal bionic pancreas in an out-patient setting: The Beacon Hill Study. *FDA/NIH/JDRF Public Workshop – “Workshop on Innovation Towards an Artificial Pancreas,”* Bethesda, Maryland, April 2013.
- DAMIANO, E. R. The coming of age of the bionic endocrine pancreas. *Translational Medicine Interest Group, Brown University Medical School,* Providence, Rhode Island, January 2013.
- DAMIANO, E. R. The coming of age of the bionic endocrine pancreas. *Endocrine Grand Rounds, Brigham and Women’s Hospital/Children’s Hospital,* Boston, Massachusetts, November 2012.
- DAMIANO, E. R. Bringing autonomous glucose control systems to the hospital and out-patient settings. *Department of Mechanical and Aerospace Engineering, Princeton University,* Princeton, New Jersey, October 2012.
- DAMIANO, E. R. (with S. J. Russell) Automated glucose control in type 1 diabetes using a bihormonal bionic pancreas. *Biodel Investors’ Meeting,* New York, New York, October 2012.
- DAMIANO, E. R. The coming of age of the bionic endocrine pancreas. *Anesthesia Grand Rounds, Boston University School of Medicine,* Boston, Massachusetts, September 2012.
- DAMIANO, E. R. (with S. J. Russell) Outpatient glycemic control in type 1 diabetes with a bihormonal bionic pancreas. *Eli Lilly and Company,* Indianapolis, Indiana, June 2012.
- DAMIANO, E. R. This is the dawning of the age of the bionic endocrine pancreas. *JDRF Capitol Chapter Annual Meeting,* Washington, DC, June 2012.
- DAMIANO, E. R. Bringing autonomous glucose control systems to the hospital and out-patient settings. *Center for Information and Systems Engineering (CISE) Symposium, Boston University,* Boston, Massachusetts, May 2012.
- DAMIANO, E. R. This is the dawning of the age of the bionic endocrine pancreas. *JDRF New England Chapter, 13th Annual Spring Research Briefing and Reception,* Newton, Massachusetts, April 2012.
- DAMIANO, E. R. The glycocalyx in sickness and in health, . . . until death us do part. *Harvard/MIT Vascular Biology Seminar Series, Harvard Medical School,* Boston, Massachusetts, March 2012.
- DAMIANO, E. R. On the road to a bionic endocrine pancreas. *2011 JDRF Bay State Branch Annual Meeting and Awards Ceremony,* Bethesda, MD, June 2011.
- DAMIANO, E. R. On the road to a bionic endocrine pancreas. *American Institute for Medical and Biological Engineering’s 20th Annual Event,* Washington, DC, February 2011.
- DAMIANO, E. R. On the road to a bionic endocrine pancreas. *JDRF Type 1 Diabetes Research Summit,* Bethesda, MD, January 2011.
- DAMIANO, E. R. Clinical testing of a prosthetic endocrine pancreas: A staged approach for moving from CRC to outpatient studies. *FDA Public Workshop – “Innovations in Technology for the Treatment of Diabetes: Clinical Development of the Artificial Pancreas (an Autonomous System),”* Bethesda, Maryland, November 2010.
- DAMIANO, E. R. On the road to a prosthetic endocrine pancreas. *Pediatrics Grand Rounds, Boston University School of Medicine,* Boston, Massachusetts, May 2010.
- DAMIANO, E. R. (with S. J. Russell) Closed-loop blood-glucose control for type 1 diabetes and critical illness. *Endocrine Grand Rounds, University of Massachusetts Medical School,* Worcester, Massachusetts, May 2010.
