Brent Bonet

CrewGuru

July 11, 2015, Brent worked with Steven in different groups

I worked with Steven for most of the last year where he spearheaded the start of an AngularJS project. While he was moved to another team, he's just across the hall where we discuss technology and techniques. Over and over again I just generally shake my head and marvel at what a genius he is. Javascript, Angular, Gulp whatever, he's inventive, inquisitive, masterful. It is a joy to work with him.

Cory Klein

Senior Software Engineer at Sauce Labs

February 26, 2014, Steven was senior to Cory but didn't manage directly

Steven has great focus and experience and is known on the team for his dedication in implementing solid and high-profile additions to the product. Working with Steven has been a pleasure, and I often went to him for constructive feedback on design and implementation decisions.
