I've known Jordan for years and watched his progress. What he and his team have done is nothing short of extraordinary and I want to continue to ride along the journey with them! Their impressive history of being #1 in the Charlotte Fast50 and Top-50 in the Inc. 5000 is just the beginning for the Clothing2.0 team. My NuFabrx knee sleeve has helped me accomplish many physical feats that would have otherwise been much more challenging. The combination of compression and medicine is a game changer.

Invested \$80,000 this round & \$200,000 previously

Bradley Dylan Seese VP of Manufacturing

Larry Kass VP of QC and Regulatory

Lily Lin, PhD PhD Drug Delivery Scientist

Putting Medicine in Clothing

We put medicine in clothing.

Clothing 2.0 is a state of the art drug delivery system, that incorporates leading OTC and topical ingredients directly into washable yarn, clothing and textile products with repeated release over time.

- What if athleisure wear had moisturizer infused in it?
- What if a Nike Sock had Icy-Hot infused?
- What if a t-shirt could treat eczema?

Our mission is to revolutionize the way medicine is delivered by infusing the very yarn that goes into wearable garments with over 30 tested medicines and pharmaceuticals.

The Healthwear Revolution has arrived.

WE INFUSE YARN WITH MEDICINE.

Prompted by a trip to the dermatologist, bad skin, and a recommendation to wash his pillowcase 2-3 times per week, our CEO Jordan Schindler knew there must be a better solution.

We are now the power behind leading brands in the textile and pharmaceutical sectors.

Why Can't Clothing Be Medicine?

We are the only company in the world that infuses doses of proven medicines, vitamins and supplements into yarn to create laundry-safe, reusable healthy garments and textiles. We call it Clothing 2.0.

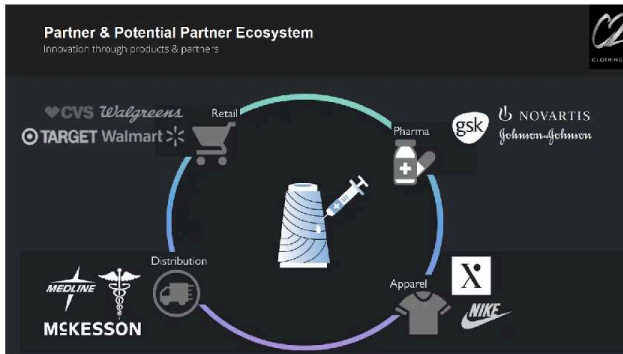

Our idea is simple: What if medication delivery was as easy as putting on a sock?

Our Partners: Have the opportunity to offer customers the thing that matters most—their health.

By differentiating their products with game-changing innovation Clothing 2.0 empowers affiliated organizations with proven medications and supplements.

For Consumers: Clothing 2.0 represents a simpler, more effective way to take control of your health and wellness. Get healthy all day and night through your clothing, sleepwear and other textile products. You already get dressed; it's as easy as that.

NUFABRX: Our Flagship Brand Partnership

C2 technology adds value to a wide variety of products including clothing, apparel, uniforms, bedding, sleepwear, medical and post-surgical fabrics, bandages and wraps, and products for pets.

Each product uses leading ingredients, with clinically demonstrated benefits to improve the lives of your consumers.

Nufabrx, a leader in Healthwear, is leading the charge as a prime example of the power of Clothing 2.0's technology and vision for the future.

NUFABRX, Powered by Clothing 2.0's Patented Technology, Already a National Brand

NUFABRX Has Already Won Over Consumers and Professional Athletes

“
The feels so good on my wrist & so well and does the job. It definitely helps with the swelling and increases from flexural arthritis. It's a godsend for the pain. I'm going to buy another one for the other wrist. **”**
- Kim D.

“
I received this as a sample product. I was very surprised at the comfort of this compression sleeve. I've tried too many to count that obviously didn't work. I did try wear it for 24 hours at work, on my feet, no break, this proved really, how pain, and comfort. I am very pleased with the product. **”**
- Jay M.

“
I really like the Nufabrx capsaicin infused compression socks. It fits well with a nice firm grip, so it gives a good amount of support. I have Plantar Fasciitis and these sleeves have really helped with the pain of standing and walking. I get daily. I am on my feet at work for long periods of time and have suffered from foot pain for a couple of years now and have tried multiple products to get relief. These have really made a huge difference in how I feel and the end of a long day. **”**
- Page B.

“
We have had this for over a month now and love it. It really seems to be helpful with pain. My daughter and I have both used it and have had success with it. I would recommend this product to anyone. **”**
- Lucy K.

C2
CLOTHING 2.0

Clothing 2.0: Scientifically Proven Superiority

Clothing2 revolutionizes treatment delivery by infusing medicine directly into fabric, offering consistent dosing akin to creams or patches but with greater convenience.

Our garments retain medicinal efficacy through 15+ washes, demonstrating robust longevity. Adhering to rigorous safety standards, all products are FDA registered and produced in GMP-compliant cleanrooms, ensuring top-quality, reliable healthwear solutions.

C2's North Carolina Innovation Center features cleanrooms, manufacturing, and our in-house R&D laboratories.

We even have a laboratory partnership with the University of North Carolina at Charlotte to further push the boundaries of effective treatment.

Clothing2's technology ushers in a new era of healthwear, merging textile innovation with medical treatment. Envision a future where a hat could combat hair loss, or shirts and pants accelerate burn healing.

Just imagine...

1. **Pain Relief:** What if we could integrate Ketoprofen into joint braces for targeted pain management?
2. **Skin Health:** Or Infuse Nicotinamide into facial wear to alleviate acne symptoms?
3. **Inflammation Reduction:** Weave Diclofenac into ankle wraps to diminish swelling post-injury?
4. **Cellulite Treatment:** Blend Caffeine into leggings for a continuous anti-cellulite effect?
5. **Maternity Care:** Or Incorporate Vitamin E or shea butter into maternity clothing for skin nourishment?

The possibilities are endless.

Our Clinical Trial Proved that Clothing2 is the Future

Clothing 2.0's revolutionary infusion technology introduces a groundbreaking solution for foot pain and leg swelling with its capsaicin-impregnated compression socks, proven effective in a clinical study.

In partnership with NUFABRX, the capsaicin-infused socks in question uniquely combines the pain-relieving properties of capsaicin with the swelling-reducing benefits of compression technology.

The results highlighted:

- Significant reductions in foot and ankle pain
- Improvements in quality of life, and...
- A preference for medicine infused socks over traditional medications.

These socks not only alleviate pain but also enhance mobility, offering a substantial lifestyle improvement for users.

This innovation represents a lucrative opportunity for investment in a market ripe for effective, user-friendly pain relief solutions.
