Overview

Not all childcare centers are created equally! Introducing Cornerstone Kids, a new type of daycare where 'Healthy Kids and Families are our Main Concern' Our environment significantly reduces bacterium, viruses, or other microorganism as small and viscous as the flu virus that can cause diseases which creates a healthier environment – this Cornerstone Kids' healthier environment solution is not found in existing daycare buildings.

Cornerstone Kids is in the planning stages of building our first 10,000-square foot state-of-the-art, ecofriendly childcare facility on approximately 1.75 acres in Aiken South Carolina which is intended to become the prototype facility for 200 nationwide childcare franchise centers. What's unique is our focus on all aspects of health at the most critical time for a child as they first start to learn. Our healthy kids initiative, which is the backbone of our company, focuses on four key areas; Environment Health, Mental Health and Learning, Family Values and Nutrition.

Cornerstone Kids has outsourced the design and construction of its Aiken, South Carolina location and its projected 200 additional franchise locations to national award winning Insulsteel™ Building Sciences, LLC, headquartered in Charleston, South Carolina. Insulsteel provides architectural, engineering and manufacturing systems for constructing High Performance buildings for both the residential and commercial building markets.

Insulsteel has designed the EcoShell™, which is an innovative building enclosure system that significantly reduces energy costs, withstands hurricane winds up to 200 MPH, provides thermal insulation values equivalent to 400% greater than traditional wood framing and can meet commercial building code requirements for U.L. two-hour rated firewalls. The U.S. Green Building Council (USGBC) named Insulsteel as the Top U.S. Builder with revenues under \$100 million. The U.S. Department of Energy (D.O.E.) has named Insulsteel to its "Top 1% of US Builders" in recognition of constructing ZERO ENERGY Buildings.

Since 2014, the US Environmental Protection Agency has named Insulsteel as a "Partner" in the EPA Indoor AirPLUS program. The Partner Program recognizes leading organizations who promote safer, healthier, and more comfortable indoor environments.

Cornerstone Kids research has determined that no other U.S. building enclosure system compares to Insulsteel's high-performance standards in building design, construction costs and most importantly, a safe environment for our kids' health, well-being, and cognitive development.

Cornerstone Kids Protects Developing Brains and Bodies

- Did you know that there are no public health standards for the indoor air quality your child is exposed to inside a childcare building?
- What chemicals are in the air and dust in your daycare?
- Do these common chemicals in childcare centers have health effects at the levels they are present in the air and dust?
- Cornerstone Kids is challenging the industry standard for childcare facilities.

Cornerstone Kids Protects Kids' Brains

- Did you know ... the air inside a typical daycare impairs your child's ability to learn?
- A groundbreaking recent study showed thinking ability [doubled](#) in a building with healthy air! Kids learn better in healthy buildings.
- At Cornerstone Kids, healthy air means a healthy mind.

Cornerstone Kids Means a Healthier Kid!

- Kids in daycare get sick. A lot. This is hard on parents and hard on kids. But did you know that a healthy building means your child will get sick less often? Cornerstone Kids' focus on fresh air makes a world of difference - you can expect your child to get sick half as often as in a typical childcare building, with fewer ear infections mean fewer antibiotics prescriptions, and fewer lost days of work.
- Kids in daycare have more infections, are prescribed more antibiotics, and visit the doctor more often than kids who stay home. Cornerstone Kids doesn't believe it has to be this way.
- Kids in daycare get an average of 3-10 ear infections annually. This is four times the incidence of children staying home.
- Colds, asthma symptoms, allergy, and coughing is lower in well ventilated childcare centers.
- Good HVAC filtration reduced transmission of viruses like the flu.

Cornerstone Kids are Less Likely to Experience Asthma Symptoms

- Almost 9% of children in the US have asthma. Asthma triggers are common in most buildings. These include allergens like pet dander, pollen, bacteria, and mold. Fragrances can trigger symptoms, as can VOCs from cleaning products and the materials and furnishings inside a building.

At Cornerstone Kids, added asthma triggers simply do not exist. Our facilities are designed to:

- Be fragrance-free. Our signature smell is ... no smell. Building materials, furnishings, and toys are all low emitting materials designed for kids' health.
- Eliminate allergens. Air filters clean pollen and bacteria from the air children breathe, shoes are removed at the door preventing allergens from being tracked in, and our healthy buildings prevent mold from colonizing in the first place.
- Be clean, naturally. We use non-toxic cleaners and integrated pest management that is safe for adults, safe for kids.

Cornerstone Kids Drink Pure, Clean Water

- At Cornerstone Kids, we filter all our drinking water with third-party independently certified water filtration systems that remove up to 15 of the most worrisome emerging contaminants. Our filters also remove chemicals, bacteria, and viruses linked with adverse health effects, such as Cryptosporidium, Giardia, lead, volatile organic chemicals (VOCs) and MTBE (methyl tertiary-butyl ether), that may be present in drinking water.¹ At Cornerstone Kids, our water is fit for a kid.

Environmental Chemicals and Child Development

- Cornerstone Kids' outside-in healthy design keeps these chemicals out of the air and dust in our facilities, and out of your child's body. How do we do it? Consider a few of our proven strategies:

- We start with an innovative building design that is net-zero energy, is airtight, and is constantly ventilated with a state-of-the-art filtration system for continuous *fresh* and *clean* air exchange. This keeps outdoor pollutants outside our doors.

How can we continuously demonstrate our superior Cornerstone Kids environment?

- [Foobot](#) is a smart air quality monitor which can be connected to any iOS or Android device to analyze your indoor air quality and help you track down any pollutants. It has sensors for particulate matter, gas pollutants, temperature, and humidity.
- [Cubesensors](#) track almost everything at home that would affect health and efficiency. It monitors indoor temperature, barometric pressure, ambient light and sound levels, as well as indoor air quality and relative humidity.
- [Corvus](#) is a continuous, wireless VOC monitor for Indoor Air Quality (IAQ) containing sensors for temperature, barometric pressure and humidity. Corvus utilizes high sense PID technology detecting volatile organic compounds (VOCs) down to low parts-per-billion (ppb) levels.

It is anticipated that the Company will be able to initially acquire the Property for Two Hundred Fifty Thousand Dollars (\$250,000) and is currently under contract with a Letter of Intent. After acquisition, the Company will need to construct certain improvements on the Property to conduct the Business, as intended, the total costs of which are estimated to be approximately \$250 per square foot or Two Million Five Hundred Thousand Dollars (\$2,500,000). To fund most the Construction Costs.

Investors can join us to build our first proto-type childcare center. Preferred stock is priced at \$100 per share. If we raise the full \$1,000,000 this will represent 10% of our preferred shares

Each holder of the Shares will receive Company's 3 Promises to Pay.

1st Promise to Pay (Return of investment plus 10% annually)

A cumulative, but non-compounded, preferred return, on his/her/its aggregate investment amount (*or such unreturned portion thereof*) at a fixed rate, per annum, equal to ten percent (10%) until such time as Company pays each of the holders of the Shares their principle investment back;

- For the avoidance of doubt, it should be noted that on a Reg CF investment of ten thousand dollars (\$10,000) Company will make annual interest 1st Promise to Pay payments of one thousand dollars (\$1,000) until such time as the Company pays back the original principal balance to the Reg CF investor. (i.e. return of Principal plus 10% annual interest)

2nd Promise to Pay (Profit sharing on franchise revenue)

Reg CF investors will be paid twenty five percent (25%) on all franchise/license payment funds, if any, received by Company (assuming \$1,000,000 is raised through Reg CF, if less it is proportional). 2nd Promise to Pay will be paid annually to the Reg CF investors as a group with each individual investor receiving a proportional amount equal to the individual investor's Reg CF investment.

- For the avoidance of doubt, it should be noted that if Company receives one million dollars (\$1,000,000) in franchise/license payments in a year, Company will make a 2nd Promise to Pay payment of two hundred and fifty thousand dollars (\$250,000) to the Reg CF investors as a group to be divided proportionally to each investor based upon their percentage of the Reg CF investment. For example, if a Reg CF investor invests ten thousand dollars (\$10,000) or one percent (1%) of the Reg CF investment then this investor will receive one percent (1%) or two thousand five hundred dollars (\$2,500).

3rd Promise to Pay (Equity ownership in the Company)

In the event Company is sold Reg CF investors as a group will be paid ten percent (10%) of Company's net sales proceeds (assuming \$1,000,000 is raised through Reg CF, if less it is proportional)

- For the avoidance of doubt, it should be noted that if Company's Common A-1 Shareholders sell Company and its franchise/license rights receiving fifty million dollars (\$50,000,000) as

Company net sales proceeds, then the Reg CF investors as a group will be paid ten percent (10%) or five million dollars (\$5,000,000) of Company's net sales proceeds to be divided proportionally to each investor based upon their percentage of the Reg CF investment. For example, if a Reg CF investor invests ten thousand dollars or one percent (1%) of the Reg CF investment then this investor will receive one percent (1%) or fifty thousand dollars (\$50,000).

This first Reg CF crowdfunding campaign is the start of our project. To be successful we intend to use these funds to purchase the land and start constructing the first prototype center and raise another round of financing through a Reg A+ Offering for up to \$4M. Our goal is to have the first facility operational by the end of 2017.

Business Plan

Building a Health-Conscious Childcare Center

Cornerstone Kids, Inc. (the Cornerstone Kids") projects opening 200+ franchised/licensed nationwide locations over the next 5 – 10 years. Beginning with this Reg CF Offering, Company projects it will open its first location followed immediately by a Charleston, South Carolina franchised/licensed facility (the "Business").

Cornerstone Kids value proposition is *Healthy Kids & Families are our Main Concern*. Cornerstone Kids, Board of Directors are sparing no expense building a 1 of a kind state-of-the-art clean air, green, clean water facility capable of withstanding sustained winds up to 200 miles per hour where our Cornerstone Kids (our "Kids") can spend up to 12 hours daily in a lovingly safe nurturing 1 of a kind environment.

Each of the proposed 200+ Cornerstone Kids facilities will offer an environment that is a pathogen free airtight facility removing airborne contaminants as small and viscous as the flu virus creating a healthier environment which should result in healthier kids which should result in less missed work days for their parents.

With the exception of Cornerstone Kids' facilities, Childcare facilities are similar in every U.S. city. Historically, parents make their childcare decisions based on price and location. Childcare competitors will find it difficult to compete with the Cornerstone Kids' facility where the health and well-being of each of our Kids and their families is now a major benefit inviting comparison. Families will quickly learn about the Cornerstone Kids' facility and its many benefits from media reports and word of mouth from parents within their community. This Network Effect will make it difficult for 'Old Standard' childcare facilities to compare. By any standard used to measure the comparison, Cornerstone Kids sets the standard higher thereby creating a Network Effect of excellence within the United States' community of families. Cornerstone Kids projects parental decision making parameters, all over the country, will morph from price and location to the following:

"if everything else is equal and our child is safer, drinks clean water, breathes fresh contaminant free air in a green energy building with green certified safe furnishings offering the after-school activities used currently by our family while offering a fresh hot dinner for four at the end of each workday why wouldn't we want our child to enroll in Cornerstone Kids".

100 of the 163 open Cornerstone Kids' spots are filled with the families of the 100 children each paying a \$500 spot deposit. Cornerstone Kids anticipates all 163 spots will be filled with a paid waiting list in place prior to the Cornerstone Kids Aiken Grand Opening.

Early Education using the Khan Academy

Cornerstone Kids parents will have, as a free after-school elective, the use of Khan Academy Khan as a curriculum tool. Our computer lab will always be open and available for a few minutes or more as each child's parent decides the proper time allocation for their child.

Microsoft founder and world's richest man Bill Gates discovered Khan Academy while searching for educational support for his children. The Gates' Foundation is a major donor to the Khan Academy as is AT&T, Google, The Disney Company and 100's more. Khan Academy offers courses in math, science, music, computer programming and computer science as well as other core subjects. For pre-k Khan Academy offers Duck, Duck, Moose – their early learning curriculum. For Infants and Toddlers, we will use the Creative Curriculum program from Teaching Strategies. Cornerstone Kids will work with parents to set their kids course structure. Remembering the earlier we start the greater the advantage.

Khan Academy online finds each student's true starting point. Kids are often too embarrassed to ask for help slipping further behind each week. Khan Academy fulfills the need for individualized learning.

After School Activities

Cornerstone Kids parents hustle every day, leveraging their after-work hours, juggling their commute and after-school activities with their kids. Cornerstone Kids offers a hot healthy dinner for our families at the end of each workday. We provide ballet, gymnastics, music lessons, martial arts, theater, and more after-school programs incorporating these activities into the time before our parents pick up their kids. Parents can drive safely not worrying about being late or having time for their kids to change their clothes to make the start of after-school ballet class. Our after-school activities can be completed before parent pick-up.

Constructed from the Ground Up with the Highest Quality Standards

Some kids spend up to 12 hours a day in childcare facilities whose environment does not care for their health. Aiken Cornerstone Kids air quality standards incorporate The Department of Energy's 'ZERO Energy' policies; EPA's airPLUS and Smart Ventilation programs for new construction with environmental improvements meaning an airtight facility for your kids removing airborne contaminants as small and viscous as the flu virus creating the healthiest childcare environment for your Kids.

Cornerstone Kids plans to outsource the design and construction of its Aiken South Carolina location and its projected 200+ additional nationwide franchise locations to award winning Insulsteel™ headquartered in Charleston, South Carolina. Insulsteel provides architectural, engineering and manufacturing of commercial buildings.

Insulsteel Building Enclosures offers the EcoShell™, which is an innovative building enclosure system that withstands hurricane winds up to 200 MPH, provides thermal insulation values equivalent to R-40 – R-58 (4-times greater than traditional wood framing) and can meet commercial requirements for a two-hour rated firewall. The EPA has awarded Insulsteel buildings with its incomparable Indoor "airPLUS" air quality certification. No other U.S. building material system is known to meet Insulsteel's high-quality, low-cost performance standards.

Building the First Prototype Facility

Company is under contract to purchase land at 102 Dominion Drive Aiken, South Carolina for Two Hundred Fifty Thousand Dollars (\$250,000) (the "**Acquisition Cost**"). After acquisition, the Company will need to construct certain improvements on the Property to conduct the Business, as intended, the total costs of which are estimated to be approximately 250 per square foot or Two Million Five Hundred

Thousand Dollars (\$2,500,000) (the “**Construction Costs**”). To fund most the Construction Costs the Company intends to sell certain additional Preferred Shares (as defined below) in a subsequent offering (the “**Construction Cost Offering**”) to be conducted after the subject Offering is closed.

Insulsteel is an energy and environmental building innovation company that provides client architectural and interior design, structural engineering, off-site manufacturing and construction. Insulsteel creates healthy, safe and energy efficient buildings for residential and commercial market sectors. Insulsteel provides clientele with buildings that are cost effective to build; environmentally sound and structurally superior to traditional buildings in energy efficiency, indoor air quality (IAQ) and total cost of ownership (TCO).

We believe investing in Cornerstone Kids is a wonderful opportunity to help contribute towards building a new type of daycare facility focused on providing a healthy environment, family facility and early childhood education with access to the Khan Academy. This is the first of a planned 200 facilities. To compensate our investors, there are three parts to the investment offering:

Equity ownership in the Company, A return of your investment with 10% annual interest and profit sharing on all revenue from franchising our business. Please see the Overview beginning on page 6 for more details.

I hope you will join us on this exciting venture!

Offering

There are three parts to our offering:

Equity

We are offering investors the opportunity to purchase 1,000 non-voting, Series A-1 Preferred Shares of the Cornerstone Kids, Inc (the "Shares") at \$100 per share. The target investment amount is \$100,000, or one percent (1%) of the total shares outstanding. Over-subscription of this offering can reach \$1,000,000, which collectively would represent a ten percent (10%) ownership interest in Cornerstone Kids. Our valuation is based on comparisons to other companies in this market. Successful subscription to this offering will allow us to begin planning and acquire the land for the first prototype Cornerstone Kids childcare facility. Please see 3rd Promise to Pay below.

Preferred Return

In addition to the ownership of preferred Stock, each investor receives a Preferred Return as defined below as our first promise to pay.

Profit Sharing

Once the company begins to franchise the business, Investors will also receive profit sharing. Please see 2nd Promise to pay below.

Each holder of the Shares will receive Company's 3 Promises to Pay.

1st Promise to Pay (Return of investment plus 10% annually)

A cumulative, but non-compounded, preferred return, on his/her/its aggregate investment amount (*or such unreturned portion thereof*) at a fixed rate, per annum, equal to ten percent (10%) until such time as Company pays each of the holders of the Shares their principle investment back;

- For the avoidance of doubt, it should be noted that on a Reg CF investment of ten thousand dollars (\$10,000) Company will make annual interest 1st Promise to Pay payments of one thousand dollars (\$1,000) until such time as the Company pays back the original principal balance to the Reg CF investor. (i.e. return of Principal plus 10% annual interest)

2nd Promise to Pay (Profit sharing on franchise revenue)

Reg CF investors will be paid twenty five percent (25%) on all franchise/license payment funds, if any, received by Company (assuming \$1,000,000 is raised through Reg CF, if less it is proportional). 2nd Promise to Pay will be paid annually to the Reg CF investors as a group with each individual investor receiving a proportional amount equal to the individual investor's Reg CF investment.

- For the avoidance of doubt, it should be noted that if Company receives one million dollars (\$1,000,000) in franchise/license payments in a year, Company will make a 2nd Promise to Pay payment of two hundred and fifty thousand dollars (\$250,000) to the Reg CF investors as a group to be divided proportionally to each investor based upon their percentage of the Reg CF investment. For example, if a Reg CF investor invests ten thousand dollars (\$10,000) or one percent (1%) of the Reg CF investment then this investor will receive one percent (1%) or two thousand five hundred dollars (\$2,500).

3rd Promise to Pay (Equity ownership in the Company)

In the event Company is sold Reg CF investors as a group will be paid ten percent (10%) of Company's net sales proceeds (assuming \$1,000,000 is raised through Reg CF, if less it is proportional)

- For the avoidance of doubt, it should be noted that if Company's Common A-1 Shareholders sell Company and its franchise/license rights receiving fifty million dollars (\$50,000,000) as Company net sales proceeds, then the Reg CF investors as a group will be paid ten percent

(10%) or five million dollars (\$5,000,000) of Company's net sales proceeds to be divided proportionally to each investor based upon their percentage of the Reg CF investment. For example, if a Reg CF investor invests ten thousand dollars or one percent (1%) of the Reg CF investment then this investor will receive one percent (1%) or fifty thousand dollars (\$50,000).

Notes

Note *1: Each of the authorized shares of “preferred stock” of the Company above (*together, the “Preferred Shares”*) has certain unique rights (e.g. *priority with respect to the payment of dividends, etc.*) as identified in the Articles of Incorporation, which are subject to change pursuant to the terms of the Company Organizational Documents.

Each holder of the Shares will be entitled to receive a cumulative, but non-compounded, preferred return, on his/her/its aggregate investment amount (*or such unreturned portion thereof; see below*) at a fixed rate, per annum, equal to ten percent (10%) until such time as Company pays each of the holders of the Shares their principle investment back.

Such amounts will be paid by the Company in the order, proportion and priority provided in the Shareholder Agreement (*an “Interest Payment” and collectively the “Interest Payments”*):

- Ten percent (10%) interest on the initial investment amount will be paid by Company to holders of Preferred Shares (*a “Non-Liquidating Preferred Payment”*); and
- If either the Company as a whole is sold or substantially all of the assets of the Company are sold, the holders of Preferred Shares will, as a group, be entitled to receive their initial investment amount plus ten percent (10%) interest on their initial investment amount by Company (*a “Liquidating Preferred Payment”*).

For the avoidance of doubt, it should be noted that: (a) **any and all Preferred Payments made by the Company will be paid to the holders of ALL classes of Preferred Shares, not just the Shares made part of the Offering.**

Principal Security Holders

Below is a description of the current security holders of the Issuer with 20% or greater ownership.

Name of Holder	Class of Security	Number of Securities Held	% of voting power prior to the Offering
Lynne Fleming	Common A-1 Voting	22,500	100%
Jennifer Spencer	Common A-2	22,500	
Mia Nothaus	Common A-2	22,500	
Danielle Salivia	Common A-2	22,500	

How may the rights of the securities being offered be materially limited, diluted or qualified by the rights of any other class of securities identified above? **Common A-1 is only one class of security with voting rights. Additional common or preferred stock may be issued and dilute all existing shareholders.**

Are there any differences not reflected above between the securities being offered and each other class of security of the issuer? **Yes, Preferred stock is non-voting and the current issued A-1 common stock is voting stock with control over decision making.**

How could the exercise rights held by the principal shareholders identified above effect the purchasers of the securities being offered? **The founders hold a majority of the shares and voting rights which provides them the ability to take actions on behalf of all shareholders. This includes management decisions, debt instruments, declaring a dividend and the future sale or closing of the business. The shareholders from this offering will have a minority interest.**

How are the securities being offered valued? **Valuation has been determined by comparisons to companies in this market, and based on future revenue projections using a discounted cash flow method.**

What are the risks to purchasers of the securities relating to minority ownership in the issuer? **The founder will have a majority of the shares and voting rights after the offering is completed. This provides them the ability to make management decisions which are in the best interest of the company and shareholders.**

What are the risks to purchaser associated to corporate actions: (including additional issuance of securities, issuer repurchase of securities, a sale of the issuer or assets of the issuer, or transactions with related parties? **Should the company need additional capital this may come in the form of Debt which would be senior to all equity positions in the company. If a new equity offering is made, the company will issue more shares which may dilute the value of existing shares. It's possible, depending on the circumstances, that the new equity could have provisions more favorable than the existing class. At the current time none of these future financings are contemplated by management.**

LEGAL PROCEEDINGS

The Issuer is not aware of any material legal proceeding in which the Issuer, any of its affiliates, or any of its property is currently a party or subject to legal proceedings.

Risk Factors

Below is a discussion of the specific risk factors associated with an investment in the Issuers securities. Additional, more general risks factors are part of the Jumpstart Micro disclosure on the Funding Portal.

A crowdfunding investment involves risk. An investor should not invest any funds in this Offering

unless he or she can afford to lose his or her entire investment. In making an investment decision, investors must rely on their own examination of the Issuer and the terms of the Offering, including the merits and risks involved. These Securities have not been recommended or approved by any federal or state securities commission or regulatory authority. Furthermore, these authorities have not passed upon the accuracy or adequacy of this document. The SEC does not pass upon the merits of any Securities offered or the terms of the Offering, nor does it pass upon the accuracy or completeness of any offering document or literature. These Securities are offered under an exemption from registration; however, the SEC has not made an independent determination that these securities are exempt from registration.

Company/Business Risk

A significant capital infusion is necessary, and subsequent capital infusions may be necessary, in order to make the Company's plan with respect to the Business viable. Specifically speaking, in order for the Company's plan with respect to the Business viable as intended, the Company will need to receive the full amount of the current Offering as well as the full amount of the Construction Cost Offering discussed above, there can be no assurance that the Company will be successful in raising such funds. If the Company does not receive the full amount of the current Offering and the Construction Cost Offering, or is otherwise unable to raise the necessary capital to fund the Construction Costs, the Company's business will be materially adversely affected and you will recognize a loss of your investment in the Shares.

The Company is a newly formed entity with no significant assets and no prior existing business which has been formed for the sole purpose of acquiring the Property and conducting the Business. As a result, the sole material asset of the Company will be its interest in the Property (and the proprietary rights *(if any)* in the products and services offered in connection with the Business). Any investment in a company which only owns a single asset will be materially affected by the value of such asset and any substantial decline in the value of such asset would be detrimental to the holding company. Accordingly, the Company's investments are not diversified and the Company is subject to a greater risk of loss than if its investments were diversified. If the value of the Property is materially adversely affected and/or fails to monetize as anticipated, it will be materially detrimental to the success and profitability of the Company and you will recognize a loss of all or a part of your investment in the Shares.

There can be no assurance that the proposed Business will be profitable. Accordingly, there is no guarantee that the Company will ever realize any significant operating revenues, or that its operations ever will be profitable and you may lose all, or a substantial part, of your investment in the Shares.

The Company anticipates that the aggregate investment proceeds received from the Offering and from any and all outside capital contributions received by the Company, together with the proceeds from the Business, will be more than sufficient to fully cover all expenses of the Business (*i.e. Property Purchase, Construction Costs, Offering Expenses, the Initial Operating Costs and the Ongoing Expenses*) resulting, ultimately, in certain dividends being made to investors. In the event that these assumptions prove to be inaccurate the Company may fail and/or you may recognize a loss of all or a part of your investment in the Shares.

The Company's operations and viability will be highly dependent on the efforts of certain existing key personnel of the Company. If the Company were to lose the services of such existing key personnel, or any of them for whatever reason, and it was unable to locate suitable replacements the Company's business and profitability may be materially adversely affected and you may recognize a loss of all or a part of your investment in the Shares.

The success of the Company will depend, in material part, on the acceptance of its business model by parents with children in the Aiken South Carolina area. To the extent the business model is materially compromised, the Company's (*and ultimately the Business'*) operations and profitability may be materially adversely affected and you may recognize a loss of your investment in the Shares.

Market Risk

The Company believes that the business model it intends to offer as part of its Business is, and will be, unique not yet seen in the childcare markets and will exist in a product class of its own with distinct franchise potential. However, the Company's intended business model within the childcare space, can be highly competitive. Given the potentially significant competition in the subject market, there is no guaranty that the proposed Business will be successful or franchised in the long run.

In producing its business model, the Company will depend on the years of successful operation of its key founders Lynne Fleming and Jennifer Spencer. However, as the childcare space is highly regulated and extremely competitive there is no guarantee that the business model and the successful history of Fleming and Spencer will result in a profitable and franchised business. Certain regulations and competition for qualified employees may result in the Company being forced to pay unbudgeted compliance and staffing costs. In either case, the Company's (*and ultimately the Business*) operations and profitability may be materially adversely affected and you may recognize a loss of your investment in the Shares

Investment Risk

An investment in the Shares involves a high degree of risk and there is no guaranty that the Company will be profitable. As a result, you may suffer a substantial (or even a complete) loss of your investment in the Shares. ACCORDINGLY, YOU SHOULD NOT PURCHASE SHARES IF YOU CANNOT AFFORD THE LOSS OF YOUR ENTIRE INVESTMENT.

The holders of the Shares will have no voting rights and, accordingly, will have little no effective control over, or direct input into, the management or decisions of the Company.

Illiquid Investment; Long-term Nature of Investment:

The Company has not registered, is not under any obligation to register, and does not intend to register the Shares with any regulatory authorities at any time in the future. As a result, the Shares are, and will be, extremely illiquid which materially impairs the ability of the holders of Shares to easily dispose of them should the need arise. Further, there currently is no market for the Shares and it is highly unlikely that any such market will develop in the near future. Although it may be possible, after a period of time, under certain limited circumstances and subject to the terms of the Shareholder Agreement, to dispose of the Shares, you should not expect a market for the Shares will exist at any time in the future. Accordingly, due to the restrictions on transferability of, and the lack of any market for, the Shares an investment in the Shares is long-term and you will probably will not be able to liquidate your investment in the Shares in the event of an emergency or for any other reason (*at least not in a timely manner and/or without a substantial loss of your investment*).

While the Company intends to pay certain Preferred Payments and other dividends in the future, there can be no assurance that cash flow and/or profits from the Business (or otherwise) will allow such payments to be made.

The Offering Price of the Shares has been arbitrarily established by the Company based upon its present and anticipated financing needs with respect to the Business and bears no relationship to the Company's present financial condition, assets, book value, projected earnings, or any other generally accepted valuation criteria.

Additional Risk

In addition, there are multiple Offerings to reach the full amount needed for the business. As such, there is no guaranty the Company will realize the full amount of the Offering. To the extent the Company is not able to sell all of the Shares and, as a result, does not have the necessary capital to establish and maintain the Business as intended, it could have a material adverse effect on the Company's (*and ultimately the Business*) operations and profitability and you may recognize a loss of your investment in the Shares.

Limited Voting Rights and Control:

The holders of the Shares will have very limited voting rights and, accordingly, will have little to no effective control over, or direct input into, the management or decisions of the Company.

Arbitrary Determination of Offering Price:

The Offering Price of the Shares has been arbitrarily established by the Company based upon its present and anticipated financing needs with respect to the Business and bears no material relationship to the Company's present financial condition, assets, book value, projected earnings, or any other generally accepted valuation criteria.

The foregoing is a summary of certain risks associated with the Company and its business **AND IS NOT INTENDED TO BE COMPLETE.**
