\$100,000 in Convertible Promissory Notes

\$1,000.00 per Note

SUMMARY

The following summary is qualified in its entirety by the detailed information appearing elsewhere in this investment memorandum. See “Risk Factors” for information to be considered by prospective investors.

Biopropulsion LLC (the “Company”), an Oregon limited liability company, has developed two revolutionary technologies. One, termed the “Clean Air Now” technology, significantly reduces carbon dioxide emissions from vehicles. The second, termed the “Carbon Alternative Now” technology, allows for energy storage using compressed air at greater efficiencies than what is currently available. The Company has developed working prototypes of both CAN technology. The Company will use the proceeds from this offering to develop these technologies further.

We are offering a total of \$100,000 worth of convertible promissory notes (the “Notes”). The Notes will be paid, together with accrued interest, on the earlier of December 31, 2020 or a change of more than 50% control or ownership of the Company. In the event that prior to such date the Company raises capital in excess of \$1,000,000, the balance of the Note will convert into equity of the Company at a conversion rate of 80% of the price per membership unit in such financing.

RISK FACTORS

A crowdfunding investment involves risk. You should not invest any funds in this offering unless you can afford to lose your entire investment.

In making an investment decision, investors must rely on their own examination of the issuer and the terms of the offering, including the merits and risks involved. These securities have not been recommended or approved by any federal or state securities commission or regulatory authority. Furthermore, these authorities have not passed upon the accuracy or adequacy of this document.

The U.S. Securities and Exchange Commission does not pass upon the merits of any securities offered or the terms of the offering, nor does it pass upon the accuracy or completeness of any offering document or literature.

These securities are offered under an exemption from registration; however, the U.S. Securities and Exchange Commission has not made an independent determination that these securities are exempt from registration.

For purposes of this section, the terms “we,” “us,” and “our” refer to Biopropulsion LLC (the “Company”), and the term “you” refers to Purchaser. You are urged to consider carefully, with your advisers, all of the risks described below before deciding whether to purchase the Note. Each of the risks identified below could have a material adverse effect on your investment in the Note and may result in the loss of your entire investment.

Nothing contained in these Risk Factors is or may be relied on as a promise or representation as

to any future performance or event. These Risk Factors speak only as of the date of this Agreement, and we have no duty to update these Risk Factors. These Risk Factors do not purport to contain all information that might be required to evaluate your decision to purchase the Note, and you must conduct your own independent analysis.

These Risk Factors contain forward-looking statements that are based on our expectations, assumptions, estimates, and projections about our business and its future. These forward-looking statements involve risks and uncertainties that could cause actual results to differ materially from those described in these Risk Factors. In addition to the risks specifically identified in these Risk Factors, we may face additional risks and uncertainties not presently known to us or that we currently deem immaterial, which risks or uncertainties may ultimately have a material adverse effect on your investment.

No person has been authorized to give any information or to make any representation other than those contained in this memorandum. You should not rely on any information or representations other than those contained in this Offering Statement.

Company Risks

1. We have a limited operating history. Our business is recently formed and has a limited operating history. We face the general risks associated with any new business operating in a competitive industry, including the ability to fund our operations from unpredictable cash flow and capital-raising transactions. There can be no assurance that we will achieve our anticipated investment objectives or operate profitably.
2. Our ability to repay the Note is dependent on the success of the technology We will be able to repay the Note in full only if development of the technologies is successful, which may be dependent on the Company securing additional funds for development. There is no certainty that the Company will be able to secure such funds or that the technologies will be able to be successfully deployed. Consequently, you may lose your entire investment in the Note.
3. We have no financial statements. We currently have no actual financial statements. Consequently, your ability to assess our financial condition, our results of operations, and our cash flow is severely limited. We encourage you to consult with your legal and financial advisors to determine whether you have sufficient financial information to evaluate the merits and risks of purchasing the Note.
4. Any financial projections that may have been disclosed to you (in writing, orally, or otherwise) were for illustrative purposes only. Any financial projections that may have been disclosed to you, were based on a variety of estimates and assumptions which may not be realized, and are inherently subject to significant business, economic, legal, regulatory, and competitive uncertainties, most of which are beyond our control. There can be no assurance that any projections that may have been disclosed to you will be realized, and actual results may differ materially from such projections.
5. We will need to raise additional financing. Our ability to implement our business plan will depend on our ability to obtain additional financing in the future. We intend to borrow additional funds from persons on terms that are substantially similar to the terms of the Note, as well as raising additional funds through the issuance of equity and senior debt. However, we cannot assure you that we will be able to do this or that additional financing will be available on terms favorable to us. If adequate funds are not available on

acceptable terms, our ability to continue and grow our businesses would be dependent on the cash from your loan and on the cash flow, if any, from our operations, which may not be sufficient.

6. Our success depends on the skills and expertise of Thom Gambaro (“Executive Team”). Our success substantially depends on the skills, talents, abilities, and continued services of the Executive Team. There is no guarantee that Executive Team will manage our business successfully. We do not carry life or disability insurance on the Executive Team. The loss of the services of the Executive Team, for any reason, may have a material adverse effect on your investment.
7. You will not have any right to control management. You will be a creditor of the Company without any right to control the management of the Company. Thom Gambaro in his capacities as our manager will have complete control over all of the decisions related to our business. Thom Gambaro could cause the Company to take actions over your objections. Additionally, Thom Gambaro will not be obligated to cause the Company to pursue any alternative course of action that may be suggested or advocated by you.
8. There will be significant restrictions on your ability to assign the Note. The Note is nonnegotiable, and you may not assign the Note to any person. Additionally, federal and state securities laws may place additional restrictions on your ability to transfer your units. Because of these restrictions, you may be unable to liquidate your investment in the event of an emergency or for any other reason. As a result, you should purchase the Note only if you are prepared to hold the Note for an indefinite period of time, or at least until the maturity date of the Note.
9. This offering has not been reviewed or approved by the government. No government agency or authority has reviewed or approved this Agreement or any of the documents provided to you relating to this memorandum, including these Risk Factors. Further, no government agency or authority will review or approve any of the documents provided to you if the Note is converted into units of the Company. You are expected to conduct your own review and analysis before deciding whether to purchase the Note.
10. An investment in the Note has tax consequences. The tax consequences of purchasing the Notes are may vary depending on your particular tax situation. We strongly encourage you to consult with your legal and tax advisors to determine the tax implications of purchasing the Note.

OFFERING

Biopropulsion, LLC, an Oregon limited liability company (“Issuer”), is offering up to \$100,000 in convertible promissory Notes (the “Notes”) in increments of \$1,000.00, the proceeds of which will be used to develop and commercialize the CAN Technologies, and for general purposes. The Notes bear simple interest at a rate of eight percent per annum, which will accrue until the earlier of December 31, 2020 or conversion of the Notes. The Notes are general obligations of the Issuer. The Notes will convert in to equity of the Issuer upon a subsequent financing of the Issuer of \$1,000,000, with the Notes converting into equity at a discount of 20% to the price of the units offered in such round.

The offering deadline is April 15, 2018 (“Offering Deadline”); if the target offering amount of \$5,000 (the “Target Amount”) is not achieved by the Offering Deadline (and the Issuer does not

extend the Offering Deadline), purchase commitments will be canceled and returned. The Issuer will accept purchases in excess of the Target Amount and sell Notes up to an aggregate Offering amount of \$100,000.

USE OF PROCEEDS

The Issuer has developed, installed and tested a technology that significantly reduces carbon dioxide emissions in vehicular emissions and a technology that allows for efficient generation of electricity from compressed air (collectively, the “CAN Technologies”). The Issuer will use the proceeds from the sale of the Notes to (a) further develop and test the CAN Technologies, including the development and testing of additional prototypes and other emission reduction applications of the CAN Technologies, (b) secure the intellectual property of the CAN Technologies, and (c) fund corporate operations.

ABOUT THE ISSUER

The Issuer is a limited liability company organized under the laws of the State of Oregon, and was formed for the sole purpose of developing the CAN Technologies.

The Issuer is:

- Organized under the laws of the State of Oregon.
- Not subject to the requirement to file reports pursuant to Section 13 or Section 15(d) of the Securities Exchange Act of 1934.
- Not an investment company registered or required to be registered under the Investment Company Act of 1940.
- Not ineligible to rely on this exemption under Section 4(a)(6) of the Securities Act as a result of a disqualification specified in Rule 503(a) of Regulation Crowdfunding.
- Has filed with the Commission and provided to investors, to the extent required, the ongoing annual reports required by Regulation Crowdfunding during the two years immediately preceding the filing of this offering statement (or for such shorter period that the issuer was required to file such reports).
- Not a development stage company that (a) has no specific business plan or (b) has indicated that its business plan is to engage in a merger or acquisition with an unidentified company or companies.

Neither the Issuer nor any of its predecessors has previously failed to comply with the ongoing reporting requirements of Rule 202 of Regulation Crowdfunding.

The Company has no directors. The Issuer’s sole member is Thom Gambaro. The Issuer’s Manager is Thom Gambaro (*see “About the Founder” below*).

ABOUT THE TECHNOLOGY

The Company has two promising technologies in its portfolio. First, it has the “Clean Air Now” technology, invented by Biopropulsion LLC, that has the potential to significantly reduce carbon dioxide emissions in auto exhaust. Initial test results on a 1992 5-Series BMW equipped with a prototype incorporating the technology show a 75% reduction in carbon dioxide emissions from the vehicle’s tailpipe. The prototype can be used while the vehicle is in motion and does not appear to significantly increase the fuel consumption of the vehicle or otherwise degrade the performance of the vehicle. This technology uses ordinary “off-the-shelf” components and does not require any unique or difficult to obtain materials. It can be easily installed on most vehicles,

and once fully developed and tested, can be quickly and broadly deployed by trained installers, thereby having a significant impact in the reduction of tailpipe emissions on a grand scale

Second, it has the Carbon Alternative Now technology, invented by Biopropulsion LLC, which offers the method to generate electricity using compressed air, thereby allowing intermittent renewable energy, such as wind or solar, to serve as a baseload resource. Upon widespread deployment, this method could eliminate two billion metric tons of CO₂ per year in the U.S. alone. The Company is also exploring how the technology can be used to charge electric vehicles.

ABOUT THE FOUNDER

The Founder of BioPropulsion LLC, Thom Gambaro has developed two processes prior to the CAN Technologies. The first process was called the “Sea-to-Steam” process that produced heat from sea water intended to be a renewable resource for the coal fired electric power plants to replace coal. PGE was interested however BTU for BTU the “Sea-to-Steam” process could not at the time undersell coal.

The second process that was developed was a process to convert “Mammal Urine” to “Mammal Fuel”. The largest waste product currently on planet Earth is “Mammal Urine” and the “Mammal Fuel” process produced Hydrogen as a fuel that could be used industrially. The process worked in the lab; however, funds to prove commercial viability were not secured.

Together, the CAN Technologies have the potential to have an impact on the attainment of greenhouse gas reductions agreed upon by representatives from 194 countries at the Paris Accord. This development has enormous potential worldwide.
