Overview

We envision a world where there are no communication barriers between cultures. GlobeChat unifies people throughout the world, regardless of where they live or the language they speak. By removing language barriers, GlobeChat will be the basis of a world connected by similarities in age, gender, career, politics, music, sports, and all manner of hobbies and interests. Acquisition targets are numerous - but the real end game is a platform that truly connects the world.

Given the Company's limited operating history, the Company cannot reliably estimate how much revenue it will receive in the future, if any.

Since then, we have:

- Received a US Trademark for "GlobeChat"
- Finalist - 2016 Startup Battle in London, UK (#2 of 350 companies globally)
- \$1M+ raised outside of Wefunder

Liquidity & Capital Resources

To-date, the company has been financed with \$1,011,635 in equity.

We plan to use the proceeds as set forth in this Form C under "Use of Funds". We don't have any other sources of capital in the immediate future.

We will likely require additional financing in excess of the proceeds from the Offering in order to perform operations over the lifetime of the Company. Except as otherwise described in this Form C, we do not have additional sources of capital other than the proceeds from the offering. Because of the complexities and uncertainties in establishing a new business strategy, it is not possible to adequately project whether the proceeds of this offering will be sufficient to enable us to implement our strategy. This complexity and uncertainty will be increased if less than the maximum amount of securities offered in this offering is sold. The Company intends to raise additional capital in the future from investors. Although capital may be available for early-stage companies, there is no guarantee that the Company will receive any investments from investors.

Runway & Short/Mid Term Expenses

GlobeChat, Inc. cash in hand is \$1,800, as of September 4th, 2020. Over the last three months, revenues have averaged \$0/month, cost of goods sold has averaged \$0/month, and operational expenses have averaged \$100/month, for an average burn rate of \$100 per month. Our intent is to be profitable in 12 months. In the next 90 days we will be launching our social app, and will be charging \$4.99 per user, per month, for our premium option. We anticipate ~4% of downloads of the application will result in a paid premium membership. While we cannot guarantee it, we believe that our revenues will increase but our expenses will remain the same for the next 6 months.

INSTRUCTIONS TO QUESTION 28: The discussion must cover each year for which financial statements are provided. For issuers with no prior operating history, the discussion should focus on financial milestones and operational, liquidity and other challenges. For issuers with an operating history, the discussion should focus on whether historical results and cash flows are representative of what investors should expect in the future. Take into account the proceeds of the offering and any other known or pending sources of capital. Discuss how the proceeds from the offering will affect liquidity, whether receiving these funds and any other additional funds is necessary to the viability of the business, and how quickly the issuer anticipates using its available cash. Describe the other available sources of capital to the business, such as lines of credit or required contributions by shareholders. References to the issuer in this Question 28 and these instructions refer to the issuer and its predecessors, if any.
