RISK FACTORS

A CROWDFUNDING INVESTMENT HAS CERTAIN ELEMENTS OF RISK DIFFERENT FROM AND/OR GREATER THAN THOSE ASSOCIATED WITH OTHER INVESTMENTS. THE HIGHER DEGREE OF RISK MAKES CROWDFUNDING INVESTMENT SUITABLE ONLY FOR INVESTORS (i) WHO HAVE A STABLE LEVEL OF ANNUAL INCOME AND NET WORTH, (ii) WHO CAN AFFORD TO BEAR THOSE RISKS, AND (iii) WHO HAVE NO NEED FOR LIQUIDITY FROM THESE INVESTMENTS. EACH INVESTOR SHOULD CONSIDER CAREFULLY THE RISK FACTORS ASSOCIATED WITH THIS INVESTMENT, INCLUDING, WITHOUT LIMITATION, THE FOLLOWING, AND SHOULD CONSULT HIS OR HER OWN LEGAL, TAX, AND FINANCIAL ADVISORS WITH RESPECT THERETO. INVESTORS UNABLE OR UNWILLING TO ASSUME THE FOLLOWING RISKS, SHOULD NOT CONSIDER AN INVESTMENT IN THIS OFFERING.

Risk Related to the Company's Business and Industry

The Company is a newly formed single asset holding entity with no operating history.

The Company was incorporated under the laws of California on March 6, 2017. Accordingly, we have little history upon which an in-depth evaluation of our prospects and future performance can be made. Our proposed operations are subject to all business risks associated with new enterprise. You should consider the Company's business, operations and prospects in light of the risks, expenses and challenges faced as a startup company.

As developer of a multi-family residential project, our business depends on developing and maintaining close and productive relationships with our contractor, vendors and service providers.

We depend on our contractor to complete the construction at favorable prices. Many factors outside our control, including, without limitation, raw material shortages, labor disputes, transportation disruptions or weather conditions, could adversely affect our contractor's ability to deliver to us quality property at favorable prices in a timely manner. Furthermore, financial or operational difficulties with a particular contractor or vendor could cause that vendor to increase the cost of the materials and service or decrease the quality of the service we purchase from it.

The Company relies on agreements with third parties to provide construction services, goods, and technology necessary to enable us to complete the project construction

Our ability to implement and complete the development project depends, in part, on services, goods, and technology owned or controlled by third parties. These third parties may become unable to or refuse to continue to provide these services, goods, technology, or intellectual property rights on commercially reasonable terms consistent with our business practices, or otherwise discontinue a service important for us to continue to complete our project. If we fail to replace these services, goods, technologies, or intellectual property rights in a timely manner or on commercially reasonable terms, our operating results and financial condition could be harmed.

Changes in raw material and manufacturing input prices could adversely affect our business and results of operations.

Raw material costs and labor are a significant operating expense. The cost of raw materials and labor can be volatile and are susceptible to rapid and substantial increases due to factors beyond our control, such as changing economic conditions, political unrest and supply and demand considerations. For example, labor, a key manufacturing input, has historically had significant price volatility. Price increases and general volatility could adversely affect our business and results of operations.

Investors will depend on the ability of the Managing Members.

Investors will depend upon the ability of Managing Members to manage the Company and carry out other delegated functions of the project. The management team of the Managing Members will not be required to devote all of their business time to the Company. There can be no assurances that the Managing Members will be successful in selecting, hiring, training and/or retaining additional professionals that have the skill sets necessary to assist the Managing Members to achieve the Company's investment goals. In addition, investors herein will not be provided an opportunity to evaluate additional professionals, if any, hired by the Managing Members.

Although dependent on certain key personnel, the Company does not have any key man life insurance policies on any such people.

While the Company is dependent on Hugh Wang and Lu Yang in order to conduct its operations and execute its business plan, the Company has not purchased any insurance policies with respect to those individuals in the event of their death or disability. Therefore, if either Hugh Wang or Lu Yang die or become disabled, the Company will not receive any compensation to assist with such person's absence. The loss of such person would have a significantly adverse effect on the Company and its operations.

Property liability claims could adversely impact our business and reputation.

Our business exposes us to potential structure liability risk, as well as warranty claims that are inherent in the design, manufacture, sale and use of our habitable units. In the event our finished housing unit actually or allegedly fail to perform as expected and we are subject to such claims above the amount of insurance coverage, outside the scope of our coverage, or for which we do not have coverage, our results of operations, as well as our reputation, could be adversely affected.

Cyclical and seasonal fluctuations in the economy, may have an effect on our real estate development business.

Both cyclical and seasonal fluctuations in housing market and interest rate may affect our business. Housing market can head to a severe downturn during recession or financial crisis. Seasonal fluctuation in interest rate may affect the mortgage loan market that may dampen the demand for housing and may cause sharp fluctuations in home prices.

The Company may become subject to legislation and regulation regarding building code change, and compliance with any new rules could be difficult and costly.

The government entities at federal, state and city level may enact new rule and standard on new home construction, public utilities and clean air that relate to public safety and climate change. If such legislation is enacted, we could incur increased energy, environmental and other costs and capital expenditures to comply with the limitations.

The amount of capital the Company is attempting to raise in this offering may not be enough to sustain the Company's current business plan.

In order to achieve the Company's property development goal, the Company will need to procure additional funds from construction lender in addition to the amount raised in the offering. There is no guarantee the Company will be able to raise such funds on acceptable terms or at all. If we are not able to raise sufficient capital in the future, we may not be able to

execute to our construction plan and we may be forced to cease operations and sell or otherwise transfer all or substantially all of our operating assets, which could cause a Purchaser to lose all or a portion of his or her investment.

The Company is not a public company and so we are not subject to Sarbanes-Oxley regulations that requires the financial controls and safeguards required of public companies.

As a private company, we do not have the internal infrastructure necessary, and are not required, to complete an attestation about our financial controls that would be required under Section 404 of the Sarbanes-Oxley Act of 2002. There can be no assurance that there are no significant deficiencies or material weaknesses in the quality of our financial controls.

Risk Relating to the Construction and Operation of the Property Development

The Company depends, in part, on our third-party contractor and its subcontractors to carry out the construction of the proposed project.

The failure or inability of the contractors and its subcontractors to comply with the specifications and requirements of our construction plan could result in cost overrun or delay and could adversely affect our reputation. Our third-party contractors and its subs are required to maintain the quality of our project and to comply with our project specifications and requirements for certain certifications. Our third-party contractors and its subs are also required to comply with all federal, state and local laws with respect to safety standards. The failure of our contractor and its subs conforming to industry quality standards could materially and adversely affect our reputation in the marketplace and result in product liability claims and severe economic loss.

Cost Overruns and Unexpected Events; Timing of Completion.

Cost overruns may be encountered as a result of numerous factors, including not only the delay in the construction of the project and the failure of certain contracted parties to complete their work in accordance with the contracted amount, necessitating the substitution of subcontractors and potential increases in pricing. Furthermore, unforeseen issues may be encountered that otherwise require an increase in the total acquisition/renovation budget that have not otherwise been reserved for in the contingency fund. An estimate of the total cost of the project, including, a projected timeline and cost estimates, is indicated above. If any of these overruns, failures or delays actually occur, capital expenditures on the project may exceed such estimates and the additional costs could have an adverse effect on future performance.

For example, laws, rules and regulations concerning matters such as, but not limited to, zoning, other land use restrictions, safety regulations, disability laws, environmental protection or required additional equipment or features could have a material adverse effect on the financial results of the Company. No assurance can be given that existing or future federal, state and local statutes, rules and regulations will not materially adversely affect the financial results of the Company.

Purchasers should be aware of the long-term nature of their investment in the Company. Each Purchaser in this Offering will be required to represent that it is purchasing the Securities for its own account, for investment purposes and not with a view to resale or distribution thereof.

Neither the Offering nor the Securities have been registered under federal or state securities laws, leading to an absence of certain regulation applicable to the Company.

No governmental agency has reviewed or passed upon this Offering, the Company or any Securities of the Company. The Company also has relied on exemptions from securities registration requirements under applicable state securities laws. Investors in the Company, therefore, will not receive any of the benefits that such registration would otherwise provide. Prospective investors must therefore assess the adequacy of disclosure and the fairness of the terms of this offering on their own or in conjunction with their personal advisors.

Upon or shortly after release of such funds to the Company, the Securities will be issued and distributed to you.

Purchasers will be unable to declare the Security in “default” and demand repayment.

Unlike convertible notes and some other securities, the Securities do not have any “default” provisions upon which the Purchasers will be able to demand repayment of their investment. The Company has ultimate discretion as to whether or not to convert the Securities upon a future equity financing and Purchasers have no right to demand such conversion.

The Securities have numerous transfer restrictions and will likely be highly illiquid, with no secondary market on which to sell them. The Securities are not equity interests, have no ownership rights, have no rights to the Company’s assets or profits and have no voting rights or ability to direct the Company or its actions.
