Building disruptive innovative businesses and products, advancing our lives and the lives of others.

I began running businesses when i was 19, founded an ad agency at 22, founded my first tech startup at 26 in '99, opened international offices in over 6 countries by 27, sold that company at 28, bought it back at 31 only to sell it again at 33. Throughout I continued to build, acquire, invest, brand, grow, sometimes keep and sometimes sell companies.

When not working I like helping my wife in her Dog Rescue initiatives, helping families in need and helping Israel in any way I can. Work is a means to help solve the worlds problems in hunger, education, human rights and animal rights.
