The U.S. Securities and Exchange Commission does not pass upon the merits of any securities offered or the terms of the offering, nor does it pass upon the accuracy or completeness of any offering document or literature.

These securities are offered under an exemption from registration; however, the U.S. Securities and Exchange Commission has not made an independent determination that these securities are exempt from registration.

5b. Discuss the material factors that make an investment in the US or so exclusive or risky.
We are a multinational company, our nature has based a "risk concern" system.

Archaeus was incorporated in October 2017. It is a relatively new company, with no history upon which an evaluation of its past performance and future prospects can be made. Our auditor has issued a "going concern" opinion on our financial statements, which means they are not sure that we will be able to succeed as a business without additional financing. As of December 31, 2020, the date of our last reviewed financial statements, we have not yet generated profits. The Company's ability to continue as a going concern in the next twelve months is dependent upon its ability to obtain capital financing from investors sufficient to meet current and future obligations and deploy such capital to produce profitable operating results.

We depend on social institutions more and more to create trust, and we need to give more people a chance to succeed. Our success also depends on being able to recruit and combine to create key performance. If trust in the performance of our leaders of institutions could decline, which could in turn affect our economic system.

CONCLUSION TO QUESTION 1: not generated accurately and the fact only those factors that are unique to the cases themselves should be taken as the terms of the model, and the effects are caused not repeat the pattern whenever it is repeated in the future. This means that the model is not to be repeated.
