By allowing people to access the inexpensive, simple, fast, accurate test kits, millions of people would have more chance to get their treatments early and therefore, save lives.

Additionally, the TB and Lung cancer rapid tests are huge, billions of tests are needed per year; therefore financial opportunities are enormous!

Note that we, Pace Diagnostics, own a portfolio of proprietary materials, filed patents and licensed IPs. We have filed the products' patents in various countries and will continue to file more countries where we plan to sell our products.

Since we meet a significant community need, we wanted the larger community to invest in our company.

We're launching an equity crowdfunding campaign where you can own part of our company.

Please note that this is an equity investment, NOT a rewards crowd funding donation. Everyone can reserve a spot now through Wefunder platform.

Early equity investment will provide you great potential for possible financial gains!

Here is our campaign link:

<https://wefunder.com/pacediagnostics>

Click on it and invest now, as little as few hundreds. We are looking forward for you to join our company community and be part of our team!

Please share this email and our campaign link with friends.

Thanks.

Marianne Nguyen
