What is Rhino Hide Made of?

Rhino Hide is a proprietary blend of 2-part polyurethane and cost-reducing aggregate.

- We offer 3 blends to meet various price points and strength needs
- Includes an additive to improve flame resistance
- "Part A" is red and "Part B" is yellow so when they are completely blended it makes Rhino Hide Orange

How is Rhino Hide Installed?

Rhino Hide is filled into special poly liners that are pre-inserted into the wall to protect internal components and eliminate internal wall stresses.

- **Do-it-Yourself:** We offer DIY kits
 - Can be mixed and poured by hand in small amounts
- **Industrial:** We offer metered mixing equipment
 - Includes dual computer-controlled servo pumps
 - Disposable mixing nozzles for easy cleaning
 - Operates on 120VAC (no air required)

How will the Business Operate?

Rhino Hide Inc. will perform development, testing, marketing, sales, and training in Sagle, Idaho.

300+ certified installers and distributors are being recruited to act as our extended customer service arm throughout the United States.

- Certified installers are being selected from companies with experience in fields such as insulation, concrete, and sheetrock
- This extends our sales reach and improves our growth trajectory
- Improves the quality of customer service
- Certified Installers must be licensed and bonded, reducing our liability

These are forward-looking projections that cannot be guaranteed

What are the revenue streams?

Installation Equipment

- Metered mixing pumps
- · Tank heaters, stirrers, handling
- \$2.4 Million in revenue first year after sales start

Bulletproof Wall Filler

- 330-gallon, 55-gallon, 5-gallon
- 3 blends available

Federal Education Budget Allocations

How Big is the Market?

At an average cost of \$15,000 to secure a classroom with Rhino Hide, we can estimate that the total available market size is \$39 billion, in the US alone.

The Federal budget for school safety and improvements is \$8.7 Billion. Federal money only accounts for 10% of the overall funding while State and Local make up the other 90%, making the overall budget for Safety and improvements \$87 Billion. That's \$620,000 per school per year!

Other Markets Include:

- DIY Shelters
- Rapid-Deploy Barriers
- Community Storm Shelters
- Theaters
- Police Buildings and Vehicles
- **Government Buildings**

\$16.3 Billion \$11.3 Billion \$8.7Billion \$6.4 Billion \$14.2 Billion Safety and Improvements **Head Start Programs** Other/Misc Funding **Title 1 Funding Special Education School Lunch Programs**

All data from The National Center for Education (NCES)

\$14 Billion

What could it Mean for North Idaho?

Within 5 years we expect to have at least 300 active Certified Installers across the US

1 Average-Sized Installation per installer – per Year:

- \$75M in sales revenue to Rhino Hide Inc.
- Would create an estimated 300 jobs (150 in the Sandpoint area)

4 Average-Sized Installations per Year:

- \$300M in sales revenue to Rhino Hide Inc.
- Would create an estimated 800 jobs (400 in the Sandpoint area)

Traction

Over \$450,000 of investment raised

- StartEngine Title III Regulation Crowdfunded
- 961 Investors, 5 advisors, 4 Board Members

Over \$7.5M+ in Sales Requests

- 205 companies signed up to be certified installers
- Letter of Intent to Purchase: Rhino Hide will be used in the construction of over 2000 mobile shelters being deployed by the Southern Border-Patrol.
- Sales Request and Test: Fortune 500 company in St. Louis will use Rhino Hide to protect employees

School safety is an immense and rising market with tremendous potential, but more importantly, we can make a meaningful contribution to end the widespread school shooting problem now.

Together our team has the experience and the drive to develop the products and build the business. We can employ our skills to make considerable positive change.
