Rhino Hide Bulletproof Wall Filler

Apr 2018 – Present · 2 yrs 5 mos

Sagle Idaho

If a shooter can't get into a classroom through a bulletproof door, and they can't shoot or break through the walls, then they can't harm our kids. A typical bullet can penetrate as many as 8 wall sections before the projectile is stopped. Students need a way to instantly shelter in place

Rhino Hide is a completely new category of product made from a 2-part composite-reinforced liquid that can be poured into small holes at the top of any standard wall. The wall is filled, and the liquid chemically cures in a few hours to a hard consistency. The formulated composite in this new patented product make the walls or structures it is filled with, impervious to ...[see mor](#)
