NOTE: The term “accredited investor” means any person who comes within any of the categories set forth in Rule 501(a) of Regulation D, or who the seller reasonably believes comes within any of such categories, at the time of the sale of the securities to that person. The term “member of the family of the purchaser or the equivalent” includes a child, stepchild, grandchild, parent, stepparent, grandparent, spouse or spousal equivalent, sibling, mother-in-law, father-in-law, son-in-law, daughter-in-law, brother-in-law, or sister-in-law of the purchaser, and includes adoptive relationships. The Investors generally do not control day-to-day business decisions or management of the issuer and the Investors’ interests may conflict with those of the principal shareholders and there is no guarantee that the company will develop in a way that is advantageous to the Investors.

21. How are the securities being offered being valued? Include examples of methods for how such securities may be valued by the issuer in the future, including during subsequent corporate actions.

Important Disclaimer:

As the Issuer is a company lacking of material assets and has conducted no prior sales of securities except to its founders and initial shareholders, the reliability, accuracy and appropriateness of the valuation methods used in this section in determining the valuation of the securities being offered is not guaranteed. The valuation methods used in this section do not infer that the Issuer assumes any fiduciary duties and should not be construed as financial, legal or tax advice. In addition, such valuation methods should not be relied upon as the only valuation methods. The Issuer cannot guarantee the reliability, accuracy and appropriateness of these valuation methods.

We strongly encourage you to consult with qualified business financial analysis professionals, attorneys, or tax advisors prior to making any investment decisions.

Valuation of Our Membership Units

The valuation of our membership units is the sum of two valuation components, namely Valuation Derived from Revenue Multiple and Valuation Derived from Qualitative Factors.

Valuation Derived from Revenue multiple

Because we are incurring operating losses and negative operating cash flows as we are in the stage of growing and investing in our business, we believe revenue multiple is a reasonable valuation metric for estimating our value.

Our projected revenue in fiscal year 2018 is estimated to be \$174,577, a growth of 20% compared to fiscal year 2017 (2017 revenue: \$145,481) . We use a revenue multiple of 20x, which is arbitrarily estimated by our management. Although this could be considered as a high revenue multiple, we believe it is reasonable as we expect our revenue will grow in the coming years, due to our plan to increase marketing efforts and the fact that we are still in the growing stage.

**Valuation Derived from Revenue multiple = \$174,577 x 20
= \$3,491,540**

Valuation derived from Qualitative Factors

The intangible value of the Company is mainly derived from:

- **the professions and experience of Dr. Shad L. Morris, the Founder & CEO of the Company**

Dr. Shad Morris, DMD is a sleep medicine specialist in Saint George, UT and has been practicing for 17 years. Dr. Morris co-founded Premier Sleep Solutions in 2002, when Dr. Morris began observing the toll that obstructive sleep apnea (OSA) was taking on the oral health of his patients. Dr Morris was also chosen as Head Dentist in NFLPA Meeting.

- **Customer Relationships**

We have repeat customers that continue to return for slumberBUMP products. These customers also recommend slumberBUMP products to their relatives and friends, who may become our new customers. We believe such customer relationships have intangible value since we can expect the customers to continue to do business with us.

Valuation derived from the above qualitative factors are estimated to be **\$1.5 million**. Investors should be aware that extra valuation is just an arbitrarily estimated number, which is not supported by any scientific or calculated by any valuation economics or financial models, nor is verified by any independent qualified valuer.

Total Valuation of the Company = Valuation derived from Revenue Multiple + Valuation derived from Qualitative Factors

$$\begin{aligned}
 &= \$3,491,540 + \$1,500,000 \\
 &= \$4,991,540 \\
 &= \$99.83 / \text{membership units}^* \\
 &\approx \$100 / \text{membership units (Actual Offering Price)}
 \end{aligned}$$

** based on 50,000 membership units issued prior to offering*

Despite the above effort, investors should be aware that the above factors and valuation method merely reflects the opinion of the Board of Directors, and does not necessarily bear any relationship to the Company's book value, assets, earnings or other generally accepted valuation criteria. Furthermore, In determining the offering price, the Board of Directors nor the company did not employ investment banking firms or other third-party organizations to make an independent appraisal or evaluation. Accordingly, the offering price should not be considered to be indicative of the actual value of the Securities.

Methods for how the securities may be valued by the issuer in the future:

We may apply the following valuation methods for the future valuation of our securities to be issued:

- Revenue or Earnings multiples of companies similar and comparable to us.
- Recent comparable valuations of companies similar and comparable to us.
- Potential value at exit, the value can be based either on recent M&A transactions in the sector
- Discounted cash flow method ("DCF")

22. What are the risks to purchasers of the securities relating to minority ownership in the issuer?

- Purchasers of the securities in this offering have limited rights to demand distributions (e.g. dividends) from the Issuer.
- The majority owner may make a decision that the Purchasers consider bad and puts Purchaser's interest in the Issuer at risk.
- Although, as Membership Units holders, the Purchasers would be entitled to a share of any proceeds from a sale of the entire business, the Purchasers may not veto the sale even though the price of sale is below its fair valuation. Moreover, a sale can be structured in a way to avoid any payout to minority owners, such as a sale of assets over time with the proceeds reinvested in another business.
- Since the securities in this offering are not publicly traded and are subject to restrictions on resale or transfer including holding period requirements, the securities in this offering are illiquid.
- Although the Purchasers of the securities offered are entitled voting rights, as minority shareholders, they may not have enough voting power to exert influence in the affairs of the company or the composition of its board of directors.
- The Purchasers of the securities offered are entitled no anti-dilution rights (other than proportionate adjustments for stock splits and similar events) and therefore future equity financings may dilute their ownership percentage in the issuer.

23. What are the risks to purchasers associated with corporate actions:

a. Additional Issuances of Securities

Purchasers of the securities offered are entitled no anti-dilution rights (other than proportionate adjustments for stock splits and similar events) and therefore future equity financings may dilute their ownership percentage in the issuer.

b. Issuer Repurchases of Securities

The issuer could be authorized to repurchase the company's issued securities subject to the approval by the company's board of directors. Purchasers of the securities may not impede the issuer's right to repurchase its securities from other shareholders. Moreover, the repurchase could be made at a price much lower than company's business value or its fair valuation, which could be indicative to the resale price of the securities thereafter.

c. A Sale of the Issuer or of Assets of the Issuer

Although as Membership Units holders the Purchasers would be entitled to a share of any proceeds from a sale of the entire business, the Purchasers may not veto the sale even though the price of sale is below its fair valuation. Moreover, a sale can be structured in a way to avoid any payout to minority owners, such as a sale of assets over time with the proceeds reinvested in another business.

d. Transactions with Related Parties

Transactions with related parties are transactions between the issuer or any of its subsidiaries and a connected person. These transactions include both capital and revenue nature transactions. They may be one-off transactions or continuing transactions.

Purchasers should be aware that these transactions may create conflicts of interests between themselves and the Issuer.

24. Describe the material terms of any indebtedness of the issuer:

None.

25. What other exempt offerings has the issuer conducted within the past three years?

None.

26. 28. Describe the financial condition of the issuer, including, to the extent material, liquidity, capital resources and historical results of operations.

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our consolidated financial statements and related notes that appear in this Form C. In addition to historical consolidated financial information, the following discussion contains forward-looking statements that reflect our plans, estimates, and beliefs. Our actual results could differ materially from those discussed in the forward-looking statements. Factors that could cause or contribute to these differences include those discussed below and elsewhere in this Form C, particularly in "Risk Factors."

IMPORTANT: THE FOLLOWING FINANCIAL FIGURES ARE UNAUDITED.

Revenues

Revenues in 2017 was \$145,481, increased by \$15,677, or 12% compared to \$129,804 in 2016. The increase was primarily due to an increase in sales of our sleeping aid products.

Cost of Goods Sold and Operating Expenses

Cost of Goods Sold

Our cost of goods sold consists primarily of the direct expenses associated with the production of our products.

Cost of goods sold in 2017 was \$64,887, increased by \$17,241, or 36% compared to \$47,640 in 2016. The increase was primarily due to an increase in sales and hence the associated direct costs.

Operating Expenses

Our operating expenses include expenses related to the operation of our business such as outside services, salaries and wages, bank charges and merchant fees, shipping and delivery cost and, legal and professional fees.

Our total operating expenses in 2017 was \$103,519, decreased by \$57,461, or 36% compared to \$160,980 in 2016. The decreased was primarily due to a decrease in utilization of outside services, as well as a reduction in payroll.

Net Loss

Net loss for the 12 months ended December 31, 2017 was \$22,924.

Net loss for the 12 months ended December 31, 2016 was \$78,816.

The decrease in net loss was primarily due to an increase in sales and lower operating expenses in fiscal year 2017.

Cash flows

In 2017, net cash used by operating activities was \$22,924, versus \$78,816 in 2016. The improvement of operating cash flow was due to an increase of our cash received from customers and a decrease in cash paid to suppliers, vendors, and employees.

We didn't record any cash flow due to investing activities in both 2017 and 2016.

Cash flow provided by financing activities was \$25,858 in 2017 and \$77,026 in 2016, both were due to owner contributions.

For purposes of the statement of cash flows, the Company considers cash in bank accounts and cash on hand as cash and cash equivalents.

The above historical results and cash flows are not representative of what investors should expect in the future.

Liquidity and Capital Resources

Our principal sources of liquidity are our cash and cash equivalents and cash generated from operations. Cash and cash equivalents consist primarily of cash on deposit with banks, petty cash and undeposited funds.. Cash and cash equivalents totaled \$10,209 as of December 31, 2017 and \$7,275, (including undeposited funds of \$1,877) as of December 31, 2016.

The Company does not have an accounts receivable balance as of December 31, 2017 and 2016.

Related Party Transactions

There are transactions recorded in the Owner's Equity Account which are transfers to and from related party companies (Premier Dental and Premier Industries) as well as transfers to and from the owners. Slumber Bump, LLC's founder & owner, Shad Morris, owns both Premier Dental and Premier Industries. Please refer to *Appendix D - Financial Statements and Review Report - NOTES TO UNAUDITED FINANCIAL STATEMENTS AS OF DECEMBER 31, 2017 AND 2016, NOTE 2 - RELATED PARTY TRANSACTIONS*.

The Company expects to fund its operations and capital expenditure requirements from operating cash flows, cash and cash equivalents, proceeds from this offering and credit facilities, if any. We may raise additional funds through public or private equity offerings or debt financings, but there can be no assurance that we will be able to do so on acceptable terms or at all.

New business developments or other unforeseen events may occur, resulting in the need to raise additional funds. There can be no assurances regarding the business prospects with respect to any other opportunity. Any other development would require us to obtain additional financing.

Although the Company expects that there will be a growth in revenue in the coming years, investors should be aware that historical results and cash flows are not representative of the future.

The Company are seeking a minimum of \$50,000 in this offering, which would improve the Company's liquidity and balance sheet, but whether or not receiving these funds and any other additional funds is not necessary to the viability of the business in the next 12 months and we expect that the Company's available cash together with the proceeds of the offering would be enough to finance its operation in the next 12 months.

Appendix A - BUSINESS AND ANTICIPATED BUSINESS PLAN

What is SlumberBUMP™?

SlumberBUMP™ is the leader in Alternative-Conservative Therapy for Snoring and Sleep Disordered Breathing. Snorers are often told to sleep on their sides rather than on their backs. Here's why: sleeping flat on the back causes the tongue to collapse into the airway, which obstructs breathing and creates those not-so-adorable snoring noises. Side-sleeping is a better position because it keeps the airway open and allows snorers to breathe freely. Changing sleep positions can make a huge difference and be an incredibly easy snoring fix.

Maintaining a side-sleeping position often requires a little encouragement as we all unconsciously shift positions while we sleep. That's where slumberBUMP™ can help. For those struggling with sleep apnea sleep, positional therapy can help.

Mission Statement

SlumberBUMP™'s mission is to not only improve the quality and quantity of life, but to build and strengthen, as well as to repair relationships with people who often times suffer as much or more as the person with snoring and/or sleep disordered breathing.

How Does It Work?

The SlumberBUMP™ is an ultra-lightweight, breathable sleep belt that trains individuals to sleep comfortably on their side so breathing can return to normal. Featuring an inflatable air pocket, the sleep belt is easily worn around the chest and keeps snorers from rolling over throughout the night. Often, the device only needs to be worn for 30-60 days until side-sleeping feels natural.

SlumberBUMP™ Positional Sleep Trainer

SlumberBUMP™ can help with:

- Snoring
- Sleep Apnea
- Sleep Disordered Breathing

The slumberBUMP™ positional sleep trainer is effective for about 8 out of 10 people who are mild to moderate snorers. It's also highly effective to be used along with other treatments like CPAP Therapy or Oral Appliance Therapy. slumberBUMP™ is most effective for those who are positionally

dependent snorers, meaning, if one mostly snore while they sleep on their back, but stop when they roll over, slumberBUMP™ should work for them.

The Creator Behind the Product

Dr. Shad Morris, DMD is a sleep medicine specialist in Saint George, UT and has been practicing for 17 years. He graduated from Southern Illinois University School Of Dental Medicine in 2001 and practices sleep medicine.

As a member of the American Academy of Dental Sleep Medicine for the past seven years, Dr. Shad Morris has treated sufferers of sleep apnea, CPAP intolerance, and snoring. Overwhelmingly, what he saw in his patients was a shared sense of frustration.

Dr. Shad L. Morris co-founded Premier Sleep Solutions in 2002, when Dr. Morris began observing the toll that obstructive sleep apnea (OSA) was taking on the oral health of his patients. In particular, a friend and dental patient whom he treated suddenly passed away in his sleep from obstructive sleep Apnea one night due to not wearing his CPAP.

Dr. Morris decided he wanted to help save lives by treating OSA. The development of slumberBUMP™, a device helps OSA patients to sleep comfortably on their side, is another important milestone in the journey of fighting OSA. Today, apart from being the founder and inventor of inventor of the slumberBUMP™, Dr. Morris is also the owner of three sleep-focused practices.

Dr. Morris's involvement in sleep medicine turned from primarily screening for sleep apnea to now having very close relationships with sleep physicians and allied health professionals in the community in treating this disease.

Dr. Shad Morris Chosen as Head Dentist in NFLPA Meeting

Dr. Shad Morris was the lead sleep dentist at the NFLPA's PAF/Living Heart Foundation Health Screening at the NFLPA Annual Meeting in Las Vegas. Dr. Morris impressed everyone who was involved with his dedication, professionalism and attention to detail as well as his demonstration of digital scanners.

Five-Year Plan Moving Forward

The five-year plan with SlumberBUMP™ is to continue research and development in technology and innovation with other products that will enhance and complement the treatment of snoring and sleep disordered breathing. In the meantime, being able to treat and help make a difference in the lives of hundreds of thousands of millions of people who will be buying the SlumberBUMP™ product.

The funds raised will be used to market and educate current and future users of SlumberBUMP™. Beginning with the United States, then Europe and Australia where we are currently distributing SlumberBUMP™. Eventually, to the rest of the world.

Along with further solidifying my team with other essential key leaders and employees that will be needed to handle the exponential growth of the company.

Funds Needed

Appendix B - RISK FACTORS

RISKS RELATING TO OUR BUSINESS

We rely on the leadership and services of our founder and Chief Executive Officer, Dr. Shad L. Morris, and our inability to retain his services could adversely affect our business and financial conditions, operating results and business prospects.

Dr. Shad L. Morris is our founder and Chief Executive Officer. Dr. Shad L. Morris is the controlling shareholder following the Offering. We believe that Dr. Shad L. Morris, who invented slumberBUMP, is the driving force for our business growth and brand recognition, on account of his expertise, experience and leadership. Our sustained business growth in the future will continue to depend on the leadership and involvement of Dr. Shad L. Morris. We may not be able to identify and engage a professional as suitable as Dr. Shad L. Morris and may not be able to replace him easily, or at all.

Our business depends significantly on the reputation of Dr. Shad L. Morris and any negative publicity and allegations in the media against Dr. Shad L. Morris could materially and adversely affect our business and financial conditions, operation results and business prospects.

Patients may buy our products on account of the reputation of Dr. Shad L. Morris, our founder and Chief Executive Officer, and as such, our brand awareness is, to a certain extent, built upon the reputation of Dr. Shad L. Morris. Therefore any negative publicity of or media coverage about or any other negative impact on the reputation of Dr. Shad L. Morris could have a negative impact on our reputation or brand image, which could in turn materially and adversely affect our business and financial conditions, operating results and business prospects.

We may be unable to price slumberBUMP products at our desired margins as a result of any decrease in our bargaining power or changes in market conditions

We set prices for our slumberBUMP products primarily based on the estimated costs incurred in the production of a part plus a profit margin that varies depending a number of factors. We periodically review our costs of production and set prices for our slumberBUMP products. Our ability to set favourable prices at our desired margins and to accurately estimate costs, among other factors, has a material impact on our profitability. We cannot assure you that we will be able to maintain our pricing or bargaining power or that our gross profit margin will not be driven down by market conditions or other factors. In the event that we see higher pressure on pricing due to increasing competition from other manufacturers, continual decrease in prices of our customers' products in the end market, or if we lose bargaining power due to weaker demand for slumberBUMP products, we may need to lower the prices and margins of our products. Moreover, we may be unable to accurately estimate our costs or pass on all or part of any increase in our costs of production to our customers. As a result, our results of operations could be materially and adversely affected.

If our products are manufactured improperly, our reputation, business, financial condition and results of operation may be materially and adversely affected

We are exposed to risks inherent in the production, packaging, sale and marketing of our products, such as unsafe, ineffective or defective products, and insufficient or improper labelling of products.

If any of these happens, we may be subject to product recall or withdrawal for such products and exposure to lawsuits relating to such products.

slumberBUMP products are required to meet certain quality standards. However, we cannot eliminate the risk of errors, defects or failure. We may fail to detect or cure quality defects due to a number of factors, many of which are outside our control, including human error or malfeasance by our quality control personnel, tampering by third parties, and quality issues with the raw materials we purchase or produce. Failure to detect quality defects in our products could result in patient injury, product recalls or withdrawals, product returns, licences revocation or fines, or other problems that could seriously harm our reputation and business, expose us to liability, and materially and adversely affect our business, financial condition and results of operations.

We may not be able to adequately protect our intellectual property, which could harm the value of our brands and adversely affect our business and operation.

We may face claims of infringement that could interfere with the use of our proprietary know-how, concepts, technologies, or trade secrets. Defending against such claims may be costly and, if we are unsuccessful, we may be prohibited from continuing to use such proprietary information in the future or be forced to pay damages, royalties or other fees for using such proprietary information, any of which could negatively affect our sales, profitability and prospects.

Defend against third-party allegations of intellectual infringement may be costly

We may encounter litigation by third parties based on claims that our products or activities infringe the intellectual property rights of others or that we, our employees or consultants have misappropriated the trade secrets of others. It is difficult to predict how such disputes would be resolved. The prosecution and defence of intellectual property rights are costly and will divert management personnel from their normal responsibilities. We may not prevail in any such litigation or proceedings.

The use of our products may lead to injuries and we may face product liability and other claims exposure for which we may not be able to obtain adequate insurance.

Failure to use our products for their intended purposes, failure to use or care for them properly, or their malfunction, or, in some limited circumstances, even correct use of our products, could result in serious bodily injury.

In cases of product liability and other claims arising in tort, or claims for indirect and consequential loss, we may become subject to one or more product liability claims that, individually or together, could adversely affect our operations, financial condition and operating results. These claims could be expensive to defend and require the expenditure of significant resources and we cannot guarantee that our insurance coverage would be sufficient to cover the payment of any potential claim. Any claim brought against us in excess of available insurance coverage, or any claim or product recall that results in significant expense or adverse publicity against us, could have a material adverse effect on our business, operating results and financial condition.

Our research and development activities may not result in the successful development of new products, applications of existing products, product formulation, or production methods or techniques

Our future growth and prospects are dependent on our ability to successfully develop new products, applications of existing products, product formulation, or production methods or techniques, which can be affected by many factors beyond our control. These include failure to meet the safety, efficacy or other standards and requirements during testing and clinical trials, or failure to obtain regulatory approvals. We commit substantial efforts, funds and other resources to our research and development. However, the new product development process is complex, uncertain, time-consuming and costly. If our research and development activities do not result in the successful development of any new products, applications of existing products, product formulation, or production methods or techniques, we will not be able to recover the related costs of such research and development activities and will need to write-off the relevant capitalised development costs, which could materially and adversely affect our financial condition and results of operation.

We may not be able to fully comply with regulatory requirements and certain certifications which are material to our business

slumberBUMP™ is a device designed for helping people who snore to sleep. We cannot guarantee that our products are fully comply with regulatory requirements. In addition, slumberBUMP products, which could be required to obtain certain certifications from local or foreign authorities before it can be sold to retail customers. We cannot assure you that we will be able to comply with these regulatory requirements and certifications. If this happens, our operations, business, and our reputation may be adversely affected as a result. To comply with these regulatory requirements and certification, there may be significant additional costs and expenses involved, which may also adversely affect our results of operations.

Dependence on outside manufacturers and suppliers

We depend heavily on various manufacturers and suppliers to manufacture our products and provide raw materials for producing or products. If there is any delay in delivery, or failure to meet our expectations and requirements, our business could be seriously affected. Currently, we rely on outside manufacturers and suppliers for most of our products. In the event that any of our suppliers or manufacturers should become too expensive or suffer from quality control problems or financial difficulties, we would have to find alternative sources, but we cannot guarantee that we can find alternative sources timely or at the same cost level.

Advertising and increased marketing effort may not lead to higher sales or increase in our revenue

To increase public awareness of our business and enhance our brand, one of our business strategies is to advertise and run marketing campaigns on social media and Youtube. Nonetheless, despite our efforts and substantial costs incurred in these marketing effort and advertisements, it may not necessarily lead to higher sales of our products or increase in our revenue.

We may be unable to efficiently manage our inventory risks

If we fail to manage our inventory effectively, we may be subject to a heightened risk of inventory obsolescence, a decline in inventory values and significant inventory write-offs. High inventory levels may also require us to commit substantial capital resources, preventing us from using that capital for other important purposes. Any of the above may materially and adversely affect our results of operations and financial condition.

Our net cash outflow from operating activities may affect our liquidity

We cannot assure you that we will not experience any period of net cash outflow from operating activities in the future. Our liquidity in the future will to an extent depend on our ability to maintain adequate cash inflows from operating activities primarily generated from our trade and other accounts receivables. Should there be any significant deterioration in the quality of our trade and accounts receivable portfolio, our liquidity and cash flows from operating activities could be materially and adversely affected.

We may not be able to successfully implement our business plan

Details of our business plan are set out in the section headed “BUSINESS AND ANTICIPATED BUSINESS PLAN” in this offering statement. The successful implementation of our business plan depends on a number of factors including, among others, continued growth of the market for our products in the US and overseas, the availability of funds, market competition and relevant government policies. We cannot assure you that our business plans can be implemented successfully as we have contemplated, or at all. Any delays or failure to successfully implement these business plan could result in the loss or delayed receipt of revenue, an increase in financing costs or the failure to grow our business. Implementing our business plans also involves significant expenses, including sales and marketing costs and the cost of acquiring additional property and equipment. Unexpected expenses could prevent us from implementing our business plan within our budget or at all, which may materially and adversely affect our business, financial condition and results of operations.

Our implementation of our business plan may result in disproportionate increase in staff costs if there is any failure or delay in implementing any part of the business plan

As disclosed under section headed “BUSINESS AND ANTICIPATED BUSINESS PLAN”, we may recruit additional prospective and/or experienced employees in the coming years. As a result, it is expected our staff costs will increase in order to facilitate our business strategies. In the event that there is a failure or delay in implementing any part of our business plan, there will be a disproportionate increase in staff costs, which will in turn materially and adversely affect our financial performance.

Our sales of slumberBUMP products in the US is subject to seasonality and our results of operations are subject to fluctuations

Our business is subject to risks associated with seasonality. Sales of our products in the US may also fluctuate during the course of a financial year for a number of other reasons. For example, we may experience higher sales during and after our marketing and promotional campaigns. Therefore, our product sales in the US may fluctuate from period to period, and comparison of sales and operating results between different periods within a single financial year may not be meaningful and should

not be relied upon as indicators of our performance. In addition, seasonal consumption patterns may cause our operating results and financial condition relating to our product sales in the US to fluctuate from period to period.

We may be unable to secure additional funds in the future to fund our operations or expansion plans

Our expansion plans may be altered due to any changes in circumstances, the development of our business, unforeseen contingencies or new opportunities. If our expansion plans change, additional external debt or equity financing may be needed. If we are unable to obtain such funding at all or on acceptable terms, we may be unable to expand our business and our operations will be materially and adversely affected. Our ability to such funding depends on various factors, some of which are beyond our control, such as prevailing condition of the capital market, credit availability, interest rates and the performance of our business. If we are unable to obtain additional funding in a timely manner on terms that are satisfactory to us, our business, results of operations and expansion plan may be materially and adversely affected.

Our historical operating results may not be indicative of future performance, and we may not be able to achieve or sustain the historical level of growth for revenue and profitability

Our historical results and growth may not be indicative of our future performance and we may not be able to sustain our growth at a similar rate in the future. Our revenue, expenses and operating results may vary from period to period in response to a variety of factors beyond our control. In such an event, our historical financial statements may not be comparable with our financial statements for any given future financial period, or as on any given date in the future and as such, our operating results and financial performance may be adversely affected.

Restrictions on transferability of securities

Restrictions on transferability of securities will limit the ability of purchasers to transfer their Securities. Specially, the Securities being offered may not be transferred by any purchaser of such Securities during the one year period beginning when the Securities were issued, unless certain conditions are met, as described in *Restrictions on Transfer of the Securities Being Offered* on this Form C.

The Securities offered hereby will be “restricted securities” within the meaning of the Securities Act and, consequently, will be subject to the restrictions on transfer set forth in the Securities Act and the rules and regulations promulgated thereunder. In addition, the Securities are subject to restrictions on transfer under applicable state securities laws under which such securities are sold in reliance on certain exemptions or under the provisions of certain qualifications. As restricted securities, the securities may not be sold in the absence of registration or the availability of an exemption from such registration requirements.

We cannot assure that we will pay dividends.

We do not currently anticipate declaring and paying dividends to our shareholders in the near future. It is our current intention to apply net earnings, if any, in the foreseeable future to increasing its capital base and marketing. Prospective investors seeking or needing dividend income or liquidity should therefore not purchase shares of our Membership Units. We cannot assure that we will ever have sufficient earnings to declare and pay dividends to the holders of our Membership Units, and in any event, a decision to declare and pay dividends is at the sole discretion of our board of directors.

You can't easily resell the securities.

There are restrictions on how you can resell your securities. More importantly, there is no market for these securities, and there might never be one. It's unlikely that the company will ever go public or get acquired by a bigger company. That means the money you paid for these securities could be tied up for a long time.

Our failure to maintain effective internal controls over financial reporting could have an adverse impact on us.

We are required to establish and maintain appropriate internal controls over financial reporting. Failure to establish those controls, or any failure of those controls once established, could adversely impact our public disclosures regarding our business, financial condition or results of operations. In addition, management's assessment of internal controls over financial reporting may identify weaknesses and conditions that need to be addressed in our internal controls over financial reporting or other matters that may raise concerns for investors. Any actual or perceived weaknesses and conditions that need to be addressed in our internal control over financial reporting, disclosure of management's assessment of our internal controls over financial reporting

or disclosure of our public accounting firm's attestation to or report on management's assessment of our internal controls over financial reporting may have an adverse impact on the price of our Membership Units.

To Management
Slumber Bump, LLC
St George, Utah

We have reviewed the accompanying financial statements of Slumber Bump, LLC, which comprise the balance sheets as of December 31, 2017 and December 31, 2016, and the related statements of income and retained earnings and cash flows for the year then ended, and the related notes to the financial statements. A review includes primarily applying analytical procedures to management's financial data and making inquiries of company management. Accordingly, we do not express such an opinion.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement whether due to fraud or error.

Accountant's Responsibility

Our responsibility is to conduct the review engagement in accordance with Statements on Standards for Accounting and Review Services promulgated by the Accounting and Review Services Committee of the AICPA. Those standards require us to perform procedures to obtain limited assurance as a basis for reporting whether we are aware of any material modifications that should be made to the financial statements for them to be in accordance with accounting principles generally accepted in the United States of America. We believe that the results of our procedures provide a reasonable basis for our conclusion.
