Target market

The unique SinuSave formula allows it to be marketed OTC for Kids 3 plus and for all ages in traditional pharmacies, health and nutritional stores, supermarket chain pharmacies, wellness product catalogs, U.S. armed forces supply route and through E-Commerce and social media. Packaged in a 50 mL bottle; 66% more than any decongestant nasal spray and by comparison conveys greater value to the consumer while supporting sales channel margins. • SinuSave is currently in 120 Ingles Markets (Superstore) Pharmacies, 64 Bartell Drug Stores, via SHOP tab (Shopify API) at SinuSave.com, Natural Food and Health and Wellness stores in Texas and Central Florida and independent pharmacies in Maryland and Arizona. • Amazon Seller site is planned for Q1 2020. All-Natural, Health and Wellness and DRUG FREE are among the fastest growing categories on Amazon. There is room for extraordinary growth in this category as there is limited promotional noise on Amazon. Plan is to concentrate the majority of 2019 on e-commerce. We will consider hiring a national sales force to concentrate on retail brick and mortar Spring 2020. Coast to Coast Pharmaceuticals, Inc., a Canadian brand development retail pharmacy management firm covering 8,000 doors is under contract to promote SinuSave throughout all provinces. SEO and SEM via paid media active; e-commerce orders increasing. Adjust media spend based upon testing results. Develop Amazon on-line content strategy. Increase presence, target through paid influencers. Our Twitter, Google, Instagram, Facebook, Pinterest and Google AdWords campaigns are operational. Additional targets are Oral Surgeons, ENTs, OTOs, chiropractors, massage therapists and Mom bloggers. CBD plus Essential Oils nasal spray; two Patents Pending!

Risks and Challenges

Description: These securities have limited channels for resale. You should not bid unless you can afford to lose the entire amount. After the pitch closes, we can't refund your investment; returns may never be paid. There are as many as 100 OTC brands identified by IRI, including Afrin, Zicam, Sinex, Primatene and FLONASE. There are other nasal spray products on the market that are not direct competitors because they contain drugs. Consumer education to gain acceptance as part of their daily personal hygiene routine is a major key to success. Nonetheless, natural products and wellness are fully mainstream among all ages as they seek alternatives to drugs for dozens of physical and mental conditions. Those seeking to improve wellness through healthy living are our target market. There is no guarantee that sales and revenue goals will be achieved in the

time frame projected or at all. That being said, the MARKET AND UNMET HEALTH NEED as noted in Drug Store News reports as of Feb. 2017 the nasal spray category revenue through pharmacy sales is \$1.2Bn. Sinusitis affects about 1 in 7 adults in the United States. The nasal hygiene category is growing significantly as people become more aware that keeping their nose clean is as important as the daily brushing and flossing their teeth. • According to the American Rhinologic Society 46 million people suffer at least one episode of acute sinusitis a year. • The increase in sinus infections is widely accepted as being due to increased pollution, urban sprawl, and increased resistance to antibiotics. • The leading decongestant drug remedies each reach sales exceeding \$200 million annually. We have two patents pending including CBD!

Will your bidders have voting rights in the future?: No

Voting rights description:

Have you failed to comply with SEC reporting requirements now or in the past?: No

Reports failed description:

Has anyone in your company triggered a security trading bad actor disqualification?: No

Trading disqualification description:

Third party transactions description: \$51,000 related party loan from Louis Lobel; this loan does not accrue interest and is payable at a future date to be determined by management.

Have the United States Postal Service restrained you due to a scheme for obtaining money through the mail?: No

Postal restraint description:

Give people faith: Used as part of your daily personal hygiene routine SinuSave helps provide significant health & wellness benefits without harmful drugs.

Pitch Story

Title: Sinusave-The Drug Free Nasal Congestion Solution

Introduction: SinuSave is the only Patented ALL-NATURAL - DRUG FREE - Saline Free DAILY nasal wash safe for use by ages 3 plus to keep sinuses clean.

Story: A few years ago I visited a friend who is an Oral and Maxillofacial surgeon. He noted my nasal congestion and asked what I was using for relief; which was Afrin. He said I was suffering from Rebound Effect; i.e.; no matter how much I used or how often I sprayed Afrin up my nose it was doing no good at all. He asked that I try an all-natural essential oil formulation he created for his surgery practice as a mucus solvent and means to dissolve dried blood in post-op patient nasal cavities because they complained about saline burning the surgery area. After a few minutes my sinuses began to clear; in two days I was off Afrin and breathing clear all day; I sleep through the night and no longer wake up coughing from post nasal drip and my "Dry Mouth" is gone. My sinus headaches diminished to almost nothing. I loved the product so much I bought the patent, trademark, domain and all IP. I have since created four unique formulations; four new trademarks and; two new patents are pending adding more moisturize and pure CBD oil. I use SinuSave twice a day every day. I've not had a cold or flu for the past two + years. I could go on about my own experience however that pales in comparison to the Testimonials on our web site. Our customers report attention-grabbing results and I urge you to read their words; nonetheless this is anecdotal commentary. Our plan is to confirm through formal testing. More than 10,000 units have been delivered to consumers throughout the USA. Clearly they are pleased to have a true all-natural, saline free ABSOLUTELY DRUG FREE product to help them Breathe Easier. SinuSave has been approved by the New Hope Network to exhibit at the Natural Product Expos. At \$9 per fl. oz. MSRP, SinuSave presents significant value to the consumer and investor.

Category: Health+Beauty

Production Plan

Location: United States

Description: All SinuSave formulations have been in production since March 2018. Batches are in lots of 10,000 units. Manufacturing has been done in an FDA certified facility in the mid-Atlantic. Turnaround time for lots up to 40,000 units is 30 business days ARO. Reduction of COGS will be a priority after this funding round. Production is being moved to FDA lab in Naples, FL. COGS will be reduced by 55%. Our inventory levels vary depending on SKU mix sales reports. Nominal SKU mix is currently 40% Regular Strength, 30% Extra Strength, 20% Air Traveler and 10% For KIDS. Percentages are expected to change as we become more established in the travel industry and pediatrics. Current shelf life is 24 months. Stability testing is on-going for eventual shelf life of 48 months which will make inventory management more efficient.
