BUSINESS AND ANTICIPATED BUSINESS PLAN

7. Describe in detail the business of the issuer and the anticipated business plan of the issuer.

THE COMPANY

H & G, Science Inc ("H&G", "H&G Science"). aims to facilitate the safe and effective treatment of diseases. We have provisional patent filings and intellectual property that facilitates both novel drug discovery and the commercial-scale extraction and purification of natural and synthetic therapeutic compounds. Our current primary focus is in the use of tocotrienols to prevent and treat cancer and other diseases. Tocotrienols, most easily obtained from naturally occurring red palm, have been indicated as anti-cancer agents, radiation protecting agents, and preventive agents against many other diseases and ailments. We are positioned to be the first and possibly only supplier of the highly-purified isoforms needed for optimum efficacy in this market.

The company members are:

Ed Glicken, CEO – Ed has a formal background as an attorney and is actively involved in relationships with key researchers and practitioners in natural cancer therapy, radiation protection and anti-inflammatory development. Ed has negotiated agreements with key commercial-scale supply and manufacturing operations, as well as key clinical practitioners positioned to run studies needed for effective market entry.

Kevin Henretta, CTO – Kevin has a formal background in chemistry and 20 years of experience developing large-scale purification and extraction technologies. Kevin is a leading expert on tocotrienol extraction and purification, as well as other natural and synthetic product purification techniques.

TOCOTRIENOLS

It is common for naturally occurring compounds to exhibit valuable anti-disease behavior, and tocotrienols are not the first to potentially enter the anti-cancer market. Taxol, now one of the leading standard-of-care cancer treatment agents, originated as a natural extract from the bark of the Pacific yew tree. As concerns grew over sustainability of the natural compound, the industry developed synthetic alternatives, which provided the added

benefit of intellectual property protection through patents (naturally occurring compounds cannot be patented for oral administration). The result is a host of synthetic Taxol derivatives that are quite toxic, with side effects that are considered intolerable to many patients and practitioners. Tocotrienol, which has been proven to be completely side effect free, is in a unique position to avoid a similar fate due to the massive palm oil industry that produces a byproduct containing enough tocotrienol to supply the potential world market. Intellectual property protection, which has already started, is obtained through development of proprietary approaches to the extraction and purification of the compounds, formulations with other therapeutic agents, and semi-synthetic modifications to the tocotrienol molecules.

THE OPPORTUNITIES

H&G Science is currently negotiating supplying its unique isoform extractions for multiple clinical interest areas as described in the below sections.

- ***RADIATION PROTECTION & CANCER TREATMENT (Colorectal): Major U.S. Cancer Center –***
 - We are involved in ongoing discussions with a leading rectal cancer specialist who has conducted his own animal studies and seen the exciting radio-protectant properties of tocotrienols first-hand. He also demonstrated that tocotrienols, while protecting healthy cells from the harms of ionizing radiation, act to sensitize tumors to radiation treatments. He has submitted a proposal to team with us and perform a formal clinical trial with his patients to demonstrate the radiation-sensitizing effect of gamma-tocotrienol on colon cancer tumors.
 - The preferred administration mode for this study is expected to yield valuable intellectual property in the form of patent filings on the this unique use of gamma-tocotrienol for treating colon cancer tumors, and ultimately treating many other forms of cancer with the tocotrienol isoforms.
- ***CANCER TREATMENT (Pancreatic): Major U.S. Cancer Center –***
 - Leading MD/PhD, is ready to enter Phase Ib/II clinical trials on the use of delta-tocotrienol for the prevention of pancreatic cancer metastasis after surgical tumor removal. Phase Ia data has shown that delta-tocotrienol, when administered alongside the current standard of care, dramatically decreases the risk of pancreatic cancer recurrence in patients who have undergone tumor removal and colon resection surgery. Further data indicates that when administered as a maintenance dose, tocotrienol can delay or eliminate relapse in treated patients.
 - Any clinical trial data substantiating this will be usable for further research and business opportunities. In return for funding the clinical trial and supplying the tocotrienol, H&G will secure an exclusive right to already filed patents on the use of delta-tocotrienol in this application and secure an exclusive right to mass produce the tocotrienol necessary for supplying the treatment to market.
- ***RADIATION PROTECTION (Cardiac Fluoroscopy/General Fluoroscopy): Major U.S. Health Center***
 - We have received a formal proposal to run Phase I/II human clinical trials on tocotrienol as radiation protection agents for patients undergoing cardiac imaging procedures. This particular opportunity presents an ability to more directly market an over-the-counter supplement to everyday consumers for protection against environmental radiation, as well as a more targeted single or double-dose regimen for patients undergoing these radiation intensive procedures and diagnostic screenings.
 - The initial target market will be practitioners and patients of the procedure, but a potential consumer over-the-counter health supplement business would most likely be enabled in the years to follow. Pharmaceutical versions could potentially become standard protocol for all radiation producing testing procedures from x-rays to fluoroscopy.

8. Discuss the material factors that make an investment in the issuer speculative or risky:

RISK FACTORS

A crowdfunding investment involves risk. You should not invest any funds in this offering unless you can afford to lose your entire investment.

In making an investment decision, investors must rely on their own examination of the issuer and the terms of the offering, including the merits and risks involved. These securities have not been recommended or approved by any federal or state securities commission or regulatory authority. Furthermore, these authorities have not passed upon the accuracy or adequacy of this document.

The U.S. Securities and Exchange Commission does not pass upon the merits of any securities offered or the terms of the offering, nor does it pass upon the accuracy or completeness of any offering document or literature.

These securities are offered under an exemption from registration; however, the U.S. Securities and Exchange Commission has not made an independent determination that these securities are exempt from registration.

Risk Factors

The SEC requires the company to identify risks that are specific to its business and its financial condition. The company is still subject to all the same risks that all companies in its business, and all companies in the economy, are exposed to. These include risks relating to economic downturns, political and economic events and technological developments (such as hacking and the ability to prevent hacking). Additionally, early-stage companies are inherently more risky than more developed companies. You should consider general risks as well as specific risks when deciding whether to invest.

These are the risks that relate to the Company:

Trademark, Copyright and Intellectual Property

Our trademarks, copyrights and other intellectual property could be unenforceable or ineffective

Intellectual property is a complex field of law in which few things are certain. It is possible that competitors will be able to design around our intellectual property, find prior art to invalidate it, or render the patents unenforceable through some other mechanism. If competitors are able to bypass our trademark and copyright protection without obtaining a sublicense, it is likely that the Company's value will be materially and adversely impacted. This could also impair the Company's ability to compete in the marketplace. Moreover, if our trademarks and copyrights are deemed unenforceable, the Company will almost certainly lose any potential revenue it might be able to raise by entering into sublicenses. This would cut off a significant potential revenue stream for the Company.

The cost of enforcing our trademarks and copyrights could prevent us from enforcing them.

Trademark and copyright litigation has become extremely expensive. Even if we believe that a competitor is infringing on one or more of our trademarks or copyrights, we might choose not to file suit because we lack the cash to successfully prosecute a multi-year litigation with an uncertain outcome; or because we believe that the cost of enforcing our trademark(s) or copyright(s) outweighs the value of winning the suit in light of the risks and consequences of losing it; or for some other reason. Choosing not to enforce our

trademark(s) or copyright(s) could have adverse consequences for the Company, including undermining the credibility of our intellectual property, reducing our ability to enter into sublicenses, and weakening our attempts to prevent competitors from entering the market. As a result, if we are unable to enforce our trademark(s) or copyright(s) because of the cost of enforcement, your investment in the Company could be significantly and adversely affected.

Legal Protection of Our Intellectual Property.

Competitors may infringe our patents. To counter infringement or unauthorized use, we may be required to file infringement claims, which can be expensive and time-consuming. In addition, in an infringement proceeding, a court may decide that a patent of ours is not valid or is unenforceable, or may refuse to stop the other party from using the technology at issue on the grounds that our patents do not cover its technology. An adverse determination of any litigation or defense proceedings could put one or more of our patents at risk of being invalidated or interpreted narrowly and could put our patent applications at risk of not issuing. Interference proceedings brought by the United States Patent and Trademark Office may be necessary to determine the priority of inventions with respect to our patent applications or those of our collaborators or licensors. Litigation or interference proceedings may fail and, even if successful, may result in substantial costs and be a distraction to our management. We may not be able to prevent misappropriation of our proprietary rights, particularly in countries where the laws may not protect such rights as fully as in the United States. Furthermore, because of the substantial amount of discovery required in connection with intellectual property litigation, there is a risk that some of our confidential information could be compromised by disclosure during this type of litigation. We may not prevail in any litigation or interference proceeding in which we are involved. Even if we do prevail, these proceedings can be very expensive and distract our management.

Potential Inadvertent Infringement of The Intellectual Property Rights of Others.

Our success depends in part on avoiding the infringement of other parties' patents and proprietary rights. In the United States, patent applications filed in recent years are confidential for 18 months, while older applications are not published until the patent issues. As a result, there may be patents of which we are unaware, and avoiding patent infringement may be difficult. We may inadvertently infringe third-party patents or patent applications. These third parties could bring claims against us that, even if resolved in our favor, could cause us to incur substantial expenses and, if resolved against us, could additionally cause us to pay substantial damages. Further, if a patent infringement suit were brought against us, we could be forced to stop or delay research, development, manufacturing or sales of our product(s) in the country or countries covered by the patent we infringe, unless we can obtain a license from the patent holder. Such a license may not be available on acceptable terms, or at all, particularly if the third party is developing or marketing a product competitive with ours. Even if we were able to obtain a license, the rights may be nonexclusive, which would give our competitors access to the same intellectual property. We also may be required to pay substantial damages to the patent holder in the event of an infringement. Under some circumstances in the United States, these damages could be triple the actual damages the patent holder incurs. If we have supplied infringing products to third parties for marketing or licensed third parties to manufacture, use or market infringing products, we may be obligated to indemnify these third parties for any damages they may be required to pay to the patent holder and for any losses the third parties may sustain themselves as the result of lost sales or damages paid to the patent holder. Any successful infringement action brought against us may also adversely affect marketing of our product(s) in other markets not covered by the infringement action. Furthermore, we may suffer adverse consequences from a successful infringement action against us even if the action is subsequently reversed on appeal, nullified through another action or resolved by settlement with the patent holder. The damages or other remedies awarded, if any, may be significant. As a result, any infringement action against us would likely delay the regulatory approval process, harm our competitive position, be very costly and require significant time and attention of our key management and technical personnel.

Intellectual Property.

Our success depends in part on our ability to obtain and maintain intellectual property protection for our product(s) as well as our technology and know-how. Our policy is to seek to protect our product(s) and our technologies by, among other methods, filing United States and foreign patent applications related to our proprietary technology, inventions and improvements that are important to the development of our products. Some of these patents will be, or have been, filed by the institutions we will be utilizing to conduct our clinical trials. The patent positions of companies like ours are generally uncertain and may involve complex legal and factual questions. Our ability to maintain and solidify our proprietary position for our technology will depend on our success in obtaining effective patent claims and enforcing those claims once granted. We do not know whether any of these patent applications will result in the issuance of any patents. Issued patents and those that may issue in the future may be challenged, invalidated, rendered unenforceable or circumvented, which could limit our ability to stop competitors from marketing related products. In addition, the rights granted under any issued patents may not provide us with competitive advantages against competitors with similar compounds or technologies. Furthermore, our competitors may independently develop similar technologies or duplicate any technology developed by us in a manner that does not infringe our patents or other intellectual property.

Confidentiality of Trade Secrets.

In addition to patent protection, we also rely on protection of trade secrets, know-how and confidential and proprietary information. To maintain the confidentiality of trade secrets and proprietary information, we have entered into confidentiality agreements with our employees, consultants and collaborators upon the commencement of their relationships with us. These agreements require that all confidential information developed by the individual or made known to the individual by us during the course of the individual's relationship with us be kept confidential and not disclosed to third parties. Our agreements with employees also provide that inventions conceived by the individual in the course of rendering services to us will be our exclusive property. Individuals with whom we have these agreements may not comply with their terms. In the event of the unauthorized use or disclosure of our trade secrets or proprietary information, these agreements, even if obtained, may not provide meaningful protection for our trade secrets or other confidential information. To the extent that our employees, consultants or contractors use technology or know-how owned by others in their work for us, disputes may arise as to the rights in related inventions. Adequate remedies may not exist in the event of unauthorized use or disclosure of our confidential information. The disclosure of our trade secrets would impair our competitive position and could have a material adverse effect on our operating results, financial condition and future growth prospects.

Key Personnel, Service Providers, and Company Control

Importance of Key Personnel.

Our success is highly dependent on the continued services of a limited number of skilled managers and scientists. The loss of any of these individuals could have a material adverse effect on us.

The loss of one or more of our key personnel, or our failure to attract and retain other highly qualified personnel in the future, could harm our business.

To be successful, the Company requires capable people to run its day to day operations. As the Company grows, it will need to attract and hire additional employees in sales, marketing, design, development, operations, finance, legal, human resources and other areas. Depending on the economic environment and the Company's performance, we may not be able to locate or attract qualified individuals for such positions when we need them. We may also make hiring mistakes, which can be costly in terms of resources spent in recruiting, hiring and investing in the incorrect individual and in the time delay in locating the

right employee fit. If we are unable to attract, hire and retain the right talent or make too many hiring mistakes, it is likely our business will suffer from not having the right employees in the right positions at the right time. This would likely adversely impact the value of your investment.

We rely on third parties to provide services essential to the success of our business.

We rely on third parties to provide a variety of essential business functions for us, including manufacturing, shipping, accounting, legal work, public relations, advertising, retailing, and distribution. It is possible that some of these third parties will fail to perform their services or will perform them in an unacceptable manner. It is possible that we will experience delays, defects, errors, or other problems with their work that will materially impact our operations and we may have little or no recourse to recover damages for these losses. A disruption in these key or other suppliers' operations could materially and adversely affect our business. As a result, your investment could be adversely impacted by our reliance on third parties and their performance.

Third party providers.

We rely on third-party service providers to operate our token platform, website and fundraising. Any interruption or downtime in these third-party services, could have a negative impact on our ability to raise additional funds. The inability to secure a new platform or any disruption in the availability of our platform could lead to downtime of our website and or platform, which could materially adversely affect our business, prospects and operating results. Unless we become completely independent of third-party services, we remain subject to the risk that third-party providers will be unable to meet our needs.

Reliance on third parties to perform clinical data collection and analysis.

We rely on third parties to perform data collection and analysis with respect to our clinical trials, which may result in costs and delays that prevent us from successfully commercializing our product(s). We do not have the personnel resources to conduct all of the activities relating to the collection and analysis of data from our clinical trials. We rely and will continue to rely on clinical investigators, third-party clinical research organizations and consultants to perform many of these functions.

100% of our Common Stock is owned by our CEO and CTO.

As of the date of this Offering Circular, Ed Glick, our CEO, and Kevin Henretta, our Chief Technology Officer, own 100% of the shares of our issued and outstanding Common Stock, thus combined controlling 100% of our voting power. This concentration of ownership and voting power may have the effect of delaying or preventing a change in control, which may not be in the best interest of our other stockholders.

TocoCoin Tokens have no voting rights.

Because the TocoCoin Tokens have no voting rights, investors will not be able to participate in any stockholder votes, including, the election of any directors.

Cybercrime and Reliance on New Technologies

The Company is vulnerable to hackers and cyber-attacks.

As our business relies on the internet to, among other things, issue and transfer Tokens, we may be vulnerable to hackers who may access the data of our investors and the issuer companies that utilize our platform. Further, any significant disruption in service on H & G Science, Inc. or in its computer systems

could reduce the attractiveness of the platform and result in a loss of investors and companies interested in using our platform. Further, we rely on a third-party technology provider to provide some of our back-up technology. Any disruptions of services or cyber-attacks either on our technology provider or on H & G Science, Inc. could harm our reputation and materially negatively impact our financial condition and business.

If we are unable to satisfy data protection, security, privacy, and other government-and industry-specific requirements, our growth could be harmed.

There are a number of data protection, security, privacy and other government- and industry-specific requirements, including those that require companies to notify individuals of data security incidents involving certain types of personal data. Security compromises could harm our reputation, erode user confidence in the effectiveness of our security measures, negatively impact our ability to attract new users, or cause existing users to stop using our Platform or our partners' Platform(s).

Risks related to ERC-20 Smart Contracts.

TocoCoin Tokens are ERC-20 smart contracts. An ERC-20 smart contract is a cryptographic asset issued on the Ethereum blockchain that implements basic features in order to be compatible with existing software such as digital wallets. There are certain technology risks associated with the ownership of ERC-20 smart contracts which do not exist with typical certificated securities. Third parties could hack digital wallet providers resulting in the loss of TocoCoin Tokens held by investors. Among other cyberbreaches of digital wallet providers, in April 2018, digital wallet provider myetherwallet.com's servers were hacked, and users were unknowingly directed to a phishing site that resembled the wallet provider, resulting in the theft of tokens such users deposited into the digital wallets. Other technology risks include, but are not limited to the following: • The smart contracts may contain software weaknesses or bugs; • If your crypto-wallet credentials are lost or stolen, your TocoCoin Tokens will be unrecoverable and will be permanently lost; • Incorrectly transferred TocoCoin Tokens may be irretrievable; • Third parties may hack the TocoCoin Token sale process, your crypto-wallet or the Company's systems; and • There could be errors or other problems with the Ethereum protocol on which the TocoCoin Tokens are built. If any of the above conditions exist or arise, it could adversely affect the receipt, transferability and value of TocoCoin Tokens, or the total loss of TocoCoin Tokens. The Company shall maintain on its website best practices for storing and maintaining crypto-wallets that hold TocoCoin Tokens.

Risk of software weaknesses.

TocoCoin Tokens and the related software and technology and technical concepts and theories are still in an early development stage and unproven, and there is no warranty that the process for receiving and ownership of TocoCoin Tokens will be uninterrupted or error-free and there is an inherent risk that the software, TocoCoin Tokens and related technologies and theories could contain weaknesses, vulnerabilities or bugs causing, inter alia, the partial or complete loss of TocoCoin Tokens.

Errors in source code or latent terms not disclosed to the investors.

To the extent the source code and algorithm setting the rights and the features of the TocoCoin Tokens contains errors or latent terms not disclosed to the investors, or use unsafe algorithms, these errors and hidden terms may result in losses to investors and substantially dilute the value of the TocoCoin Tokens. While it is our policy to replace any TocoCoin Tokens that are lost as a result of programming errors or latent terms, if such TocoCoin Tokens are replaced, and the lost TocoCoin Tokens are recovered by a third party, the same would result in the dilution of the outstanding TocoCoin Tokens.

Risk of loss of your credentials.

Your TocoCoin Tokens will be held in a crypto-wallet. Your crypto-wallet stores your private key and public keys. Public keys allow outside parties to transmit cryptocurrencies into your digital wallet. Private keys allow you to receive, hold, access and transfer TocoCoin Tokens. Accordingly, loss of requisite private key(s) associated with your wallet will result in your inability to access your TocoCoin Tokens, and they will be unrecoverable. Moreover, any third party that gains access to such private key(s), including by gaining access to login credentials of a hosted wallet service you use, may be able to misappropriate your TocoCoin Tokens. Any errors or malfunctions caused by or otherwise related to the wallet you choose to receive and store TocoCoin Tokens, including your own failure to properly maintain or use such wallet, may also result in the loss of your TocoCoin Tokens.

Incorrect or fraudulent token transactions may be irreversible.

Digital security transactions are irrevocable and stolen or incorrectly transferred TocoCoin Tokens may be irretrievable. Token transactions are not, from an administrative perspective, reversible without the consent and active participation of the recipient of the transaction. In theory, token transactions may be reversible with the control or consent of a majority of processing power on the network. Once a transaction has been verified and recorded in a block that is added to the blockchain, an incorrect transfer of a TocoCoin Token or a theft of a TocoCoin Token, generally will not be reversible and you may not be capable of seeking compensation for any such transfer or theft. It is possible that, through computer or human error, or through theft or criminal action, TocoCoin Tokens could be transferred in incorrect amounts or to unauthorized third parties, or to uncontrolled accounts. For example, if TocoCoin Tokens are sent to a contract that is not ERC-20 compatible, the transaction will not be rejected because the contract will not recognize the incoming transaction, and the TocoCoin Tokens could therefore get stuck in limbo and essentially be lost. Although the Company shall maintain on its website best practices for storing and maintaining crypto-wallets that hold TocoCoin Tokens, the failure to precisely follow the procedures for buying, receiving and transferring TocoCoin Tokens, including, for instance, providing an incorrect wallet address, or providing an address that is not ERC-20 compatible, may result in the loss of your TocoCoin Tokens.

Cybercrime.

The acquisition and management of TocoCoin Tokens is inherently subject to the risk of cybercrime that is difficult to manage and mitigate. This may result in concerted attempts and even successful attempts to hack the TocoCoin Token sale process and the Sites and software used to manage contributions received in respect of TocoCoin Tokens. The TocoCoin Token sale process may be subject unauthorized access, hacking and/or theft of TocoCoin Tokens. Any unauthorized access or cybercrime may result in theft or loss or inability to access subscriptions, impacting the ability to issue TocoCoin Tokens.

Breaches of our systems.

Any breach of ours, our partners and/or our third-party providers' (systems), databases, or other information may have a significant legal and monetary impact on our business and reputation.

Assumed Risks of Digital Assets

The prices of blockchain assets are extremely volatile. Fluctuations in the price of digital assets could materially and adversely affect our business, and the Tokens may also be subject to significant price volatility.

A decrease in the price of a single blockchain asset may cause volatility in the entire blockchain asset industry and may affect other blockchain assets including the Tokens. For example, a security breach that affects investor or user confidence in Bitcoin may also cause the price of the Tokens and other blockchain assets to fluctuate.

The TocoCoin Tokens may be subject to registration under the Exchange Act if we have assets above \$10 million and more than 2,000 holders of TocoCoin Tokens, which would increase our costs and require substantial attention from management.

Companies with total assets above \$10 million and more than 2,000 holders of record of its equity securities, or 500 holders of record of its equity securities who are not accredited investors, at the end of their fiscal year, must register that class of equity securities with the SEC under the Exchange Act. The Company could trigger this requirement as a result of the Offerings and be required to register the TocoCoin Tokens with the SEC under the Exchange Act, which would be a laborious and expensive process. Furthermore, if such registration takes place, the Company will have materially higher compliance and reporting costs going forward.

The tax treatment of TocoCoin Tokens is uncertain and there may be adverse tax consequences for purchasers upon certain future events.

Because the TocoCoin Tokens represent Class A Non-Voting Preferred Stock, we believe they will be treated as securities for US tax purposes. The IRS, however, could make a determination that digital assets are not taxed in the same manner as securities, in which case the purchase and issuance of TocoCoin Tokens could result in unexpected tax treatment. Therefore, each purchaser should seek his, her or its own tax advice in connection with an investment in TocoCoin Tokens.

The further development and acceptance of blockchain networks, which are part of a new and rapidly changing industry, are subject to a variety of factors that are difficult to evaluate.

The growth of the blockchain industry in general, as well as cryptocurrencies and digital securities, is subject to a high degree of uncertainty. The factors affecting the further development of the cryptocurrency and digital security industry, as well as blockchain networks, include, without limitation:

- Worldwide growth in the adoption and use of BTC, ETH and other blockchain technologies;
- Government and quasi-government regulation of BTC, ETH and other blockchain assets and their use, or restrictions on or regulation of access to and operation of blockchain networks or similar systems;
- The maintenance and development of the open-source software protocol of the Ethereum network;
- General economic conditions and the regulatory environment relating to cryptocurrencies; or
- A decline in the popularity or acceptance of BTC, ETH or other blockchain-based tokens or coins, would adversely affect our results of operations. The slowing or stopping of the development, general acceptance and adoption and usage of blockchain networks and blockchain assets may deter or delay the acceptance of TocoCoin Tokens.

Some market participants may oppose the development of blockchain-based systems and tokens like the TocoCoin Token.

Many participants in the system currently used in the private equity markets may oppose the development of alternative systems. The market participants who may oppose such a system may include market participants with significantly greater resources, including financial resources and political influence, than we have. Our ability to operate could be adversely affected by any actions of any such market participants

that result in additional regulatory requirements or other activities that make it more difficult for us to operate, which could have a material adverse effect on our business or the TocoCoin Token.

The prices of blockchain assets are extremely volatile. Fluctuations in the price of digital assets could materially and adversely affect our business, and the TocoCoin Tokens may also be subject to significant price volatility.

The prices of blockchain assets such as BTC have historically been subject to dramatic fluctuations and are highly volatile, and the market price of TocoCoin Tokens may also be highly volatile. Several factors may influence the market price of the TocoCoin Tokens, including, but not limited to: • Global blockchain asset supply; • Global blockchain asset demand, which can be influenced by the growth of retail merchants' and commercial businesses' acceptance of blockchain assets like cryptocurrencies as payment for goods and services, the security of online blockchain asset exchanges and digital wallets that hold blockchain assets, the perception that the use and holding of blockchain assets is safe and secure, and the regulatory restrictions on their use; • Investors' expectations with respect to the rate of inflation; • Interest rates; • Currency exchange rates, including the rates at which digital assets may be exchanged for fiat currencies; • Fiat currency withdrawal and deposit policies of blockchain asset exchanges on which the TocoCoin Tokens may be traded and liquidity on such exchanges; • Interruptions in service from or failures of major blockchain asset exchanges on which the TocoCoin Tokens may be traded; • Investment and trading activities of large investors, including private and registered funds, that may directly or indirectly invest in us, TocoCoin Tokens or other blockchain assets; • Monetary policies of governments, trade restrictions, currency devaluations and revaluations; • Regulatory measures, if any, that affect the use of blockchain assets such as the TocoCoin Tokens; • Global or regional political, economic or financial events and situations; or • Expectations among blockchain asset participants that the value of the TocoCoin Tokens or other blockchain assets will soon change. A decrease in the price of a single blockchain asset may cause volatility in the entire blockchain asset industry and may affect other blockchain assets including TocoCoin Tokens. For example, a security breach that affects investor or user confidence in BTC and ETH may affect the industry as a whole and may also cause the price of TocoCoin Tokens and other blockchain assets to fluctuate.

Risks association with the Ethereum protocol.

Because TocoCoin Tokens are based on the Ethereum blockchain, any malfunction, breakdown or abandonment of the Ethereum protocol may result in the loss of or inability to transfer TocoCoin Tokens. The Ethereum network is prone to periodic congestion during which transactions could be delayed or lost. Individuals may also intentionally spam the Ethereum network in an attempt to gain an advantage in purchasing cryptographic tokens. That may result in a situation where block producers may not include an investors transaction at the time such investor expects, or an investor's transaction may not be included at all. Moreover, advances in cryptography, or technical advances such as the development of quantum computing, could present risks by undermining or vitiating the cryptographic consensus mechanism that underpins the Ethereum protocol. Also, legislatures and regulatory agencies could prohibit the use of current and/or future cryptographic protocols which could adversely impact the ability to transfer the TocoCoin Tokens, resulting in a significant loss of value of the TocoCoin Tokens.

Cryptocurrency exchanges and other trading venues are relatively new and, in most cases, largely unregulated and, therefore, may be subject to fraud and failures.

When cryptocurrency exchanges or other trading venues are involved in fraud or experience security failures or other operational issues, such events could result in a reduction in cryptocurrency prices or confidence. Cryptocurrency market prices depend, directly or indirectly, on the prices set on exchanges

and other trading venues, which are new and, in most cases, largely unregulated as compared to established, regulated exchanges for securities, commodities or currencies. For example, during the past three years, a number of bitcoin exchanges have closed due to fraud, business failure or security breaches. In many of these instances, the customers of the closed exchanges were not compensated or made whole for partial or complete losses of their account balances. While smaller exchanges are less likely to have the infrastructure and capitalization that may provide larger exchanges with some stability, larger exchanges may be more appealing targets for hackers and “malware” (i.e., software used or programmed by attackers to disrupt computer operation, gather sensitive information or gain access to private computer systems) and may be more likely targets of regulatory enforcement actions. We do not maintain any insurance to protect from such risks, and do not expect any insurance for customer accounts to be available (such as federal deposit insurance) at any time in the future, putting customer accounts at risk from such events.

It may be illegal now, or in the future, to acquire, own, hold, sell or use BTC, ETH, or other cryptocurrencies, participate in the blockchain or utilize similar digital assets in one or more countries.

Although currently BTC, ETH, and other cryptocurrencies, the blockchain and digital assets generally are not regulated or are lightly regulated in most countries, including the United States, one or more countries may take regulatory actions in the future that could severely restrict the right to acquire, own, hold, sell or use these digital assets.

Such restrictions may adversely affect the holders of TocoCoin Tokens. Our failure to comply with existing or future regulations, including federal securities laws that apply to subsequent sales of tokens, including transfers on trading platforms that may be operating without compliance with applicable federal securities laws, could result in an enforcement action against us by the SEC, the criminal liability of our principals or civil liabilities being imposed against us, which could result in our requirement to pay substantial penalties or damages, or otherwise have a material adverse effect on our business.

The regulatory regime governing blockchain technologies, cryptocurrencies, TocoCoin Tokens and coin offerings is uncertain, and new regulations or policies may materially adversely affect the value or transferability of the TocoCoin Tokens.

Regulation of tokens (including TocoCoin Tokens) and token offerings such as this, cryptocurrencies, blockchain technologies, and cryptocurrency exchanges currently is undeveloped and likely to rapidly evolve, varies significantly among international, federal, state and local jurisdictions and is subject to significant uncertainty. Various legislative and executive bodies in the United States and in other countries may in the future, adopt laws, regulations, guidance, or other actions, which may severely impact the value or transferability of TocoCoin Tokens. Failure by us or the holders of TocoCoin Tokens to comply with any laws, rules and regulations, some of which may not exist yet or are subject to interpretation and may be subject to change, could result in a variety of adverse consequences, including civil penalties and fines. As blockchain networks and blockchain assets have grown in popularity and in market size, federal and state agencies have begun to take interest in, and in some cases, regulate, their use and operation. In the case of virtual currencies, state regulators like the New York Department of Financial Services have created new regulatory frameworks. Others, as in Texas, have published guidance on how their existing regulatory regimes apply to virtual currencies. Some states, like New Hampshire, North Carolina, and Washington, have amended their state's statutes to include virtual currencies into existing licensing regimes. Treatment of virtual currencies continues to evolve under federal law as well. The Department of the Treasury, the Securities Exchange Commission, and the Commodity Futures Trading Commission (“CFTC”), for example, have published guidance on the treatment of virtual currencies. The IRS released guidance treating virtual currency as property that is not currency for US federal income tax purposes, although there is no indication yet whether other courts or federal or state regulators will follow this

classification. Both federal and state agencies have instituted enforcement actions against those violating their interpretation of existing laws.

Additional Financing

Risks of borrowing.

We may have to seek loans from financial institutions. Typical loan agreements might contain restrictive covenants which may impair our operating flexibility. A default under any loan agreement could result in a charging order that would have a material adverse effect on our business, impact our business operations, negatively impact our financial condition, and/or reduce our profitability.

Foreign Securities Laws.

Prior to accepting any subscriptions from residents of foreign jurisdictions, we intend to consult with local counsel to ensure we accept any such subscription in compliance with local law. If, however, we accept any subscriptions and fail to comply with local law, it may subject the Company to regulatory actions in such foreign jurisdictions.

Our financial statements include a going concern note.

As a going concern, our ability to continue for the next twelve months is dependent upon our ability to generate sufficient cash flows from operations to meet our obligations, and/or to obtain additional capital financing from our investors and/or third parties. No assurance can be given that we will be successful in these efforts. These factors, among others, raise substantial doubt about our ability to continue for a reasonable period of time.

Management discretion as to use of proceeds.

Our success will be substantially dependent upon the discretion and judgment of our management team with respect to the application and allocation of the proceeds of this Offering. The use of proceeds described below is an estimate based on our current business plan. We, however, may find it necessary or advisable to re-allocate portions of the net proceeds reserved for one category to another, and we will have broad discretion in doing so.

Limited liquidity and possible manipulation of digital based assets.

To our knowledge, there is currently no formal licensed marketplace for the resale of TocoCoin Tokens. To the extent any future exchanges are registered with the SEC, we may apply for listing on one or more such exchanges, and for registration of TocoCoin Tokens for listing and trading on an exchange under Section 12(b) of the Securities Exchange Act. However, there is no guarantee that the SEC will license any cryptosecurities exchanges, that any licensed exchange will accept TocoCoin Tokens for listing, that we will be able to satisfy the registration requirements of the Securities Exchange Act of 1934 for listing and trading on an exchange, or that there will be demand for the TocoCoin Tokens. In addition, it is difficult to predict if we will ever be acquired by a larger company. Therefore, investors should assume that they may not be able to liquidate their investment for some time.

This Offering is being conducted on a “best efforts” basis and requires only a \$25,000.00 minimum amount to be raised. As a result, we may not be able to raise enough funds to fully implement our business plan and our investors may lose their entire investment.

Target Offering	5,000	\$25,000	\$23,000

The Offering is on a “best efforts” basis and *requires only a \$25,000.00 minimum amount to be raised*. If we are not able to raise sufficient funds, we may not be able to fund our operations as planned, and our growth opportunities may be materially adversely affected. This could increase the likelihood that an investor may lose their entire investment.

Limited operating history and no substantial profit or substantial operating revenue.

We have limited assets, a limited operating history, and minimal operating revenue to date. We are still working on developing various features of our platform. Thus, our proposed business is subject to all the risks inherent in new business ventures. The likelihood of success must be considered in light of the expenses, complications, and delays frequently encountered with the start-up of new businesses and the competitive environment in which start-up companies operate.

Highly Regulated Sectors

Product improvements.

In order to compete, we need to rapidly make updates to our product offerings as the market demands. The development of such components and enhancements to our platform will require significant capital funding, expertise of management and time and effort in order to be successful. It is possible that one or more of these contemplated enhancements may never be developed or released. Even if successfully developed and released, such enhancements may not be successful and may not result in an increase in revenue.

Government regulation, legislation, and censorship.

We are subject to local and international laws and regulations. Changes in current or future regulation or legislation could significantly increase the cost of operation, or even preclude it. An increase in government censorship of the internet could have a negative impact on our business.

Clinical Trials.

Much of the initial investment funds are allocated to conducting FDA-regulated clinical trials. While we aim to be diligent in adhering to all required timelines, practices, and filings, as well as designing multiple studies across many areas for the best chance of success, there is no guarantee that the results of the clinical studies will open the door for successful market entry.

While some areas of proposed clinical research have already shown positive results through past studies performed by third parties, there are some areas of proposed research that are only positioned on successful laboratory and, in some cases, animal data.

Development Stage Company.

We are a development stage company without significant revenues or profits. We cannot ensure that our clinical testing will be successful, that regulatory approval will be obtained, or that we will be able to successfully market, license and/or sell our product(s). We also cannot ensure that we will not encounter unexpected difficulties, which will have a material adverse effect on us, our operations or our properties.

FDA Compliance.

Our research, development, testing, manufacturing, marketing, and distribution of our product(s) are, and will continue to be, subject to extensive regulation, monitoring, and approval by FDA and other government agencies, potentially in ways that we cannot currently predict.

Liability Claims.

Our profitability will be affected if we incur product liability claims in excess of our insurance coverage. The testing and marketing of medical products, even after FDA approval, have an inherent risk of product liability.

Drug Reimbursement, Pricing and Regulations.

Our ability to generate revenue from our product will depend on reimbursement and drug pricing policies and regulations. We cannot be sure that reimbursement in the United States, Europe or elsewhere will be available under the prevailing health care legislation, and if reimbursement should become available, that it will not be decreased or eliminated in the future. If reimbursement is not available or is available only at limited levels, we may not be able to successfully commercialize our product(s). We are unable to predict what additional legislation or regulation, if any, relating to the health care industry or third-party coverage and reimbursement may be enacted in the future or what effect this legislation or regulation would have on our business.

Foreign Regulatory Approval.

Failure to obtain regulatory approval in foreign jurisdictions would prevent our product from being marketed abroad.

Regulation of Our Manufacturing Process.

Our manufacturing process is subject to a variety of federal, state and local laws, rules and regulations related to the discharge or disposal of toxic, volatile or other hazardous chemicals. Although we believe that we are in material compliance with these laws, rules and regulations, the failure to comply with present or future regulations could result in fines being imposed on us, suspension of production or cessation of operations. Third parties may also have the right to sue to enforce compliance. Moreover, it is possible that increasingly strict requirements imposed by environmental laws and enforcement policies could require us to make significant capital expenditures. The operation of a manufacturing plant entails the inherent risk of environmental damage or personal injury due to the handling of potentially harmful substances, and there can be no assurance that we will not incur material costs and liabilities in the future because of an accident or other event resulting in personal injury or unauthorized release of such substances to the environment. In addition, we generate hazardous materials and other wastes that are disposed of at various offsite facilities. We may be liable, irrespective of fault, for material cleanup costs or other liabilities incurred at these disposal facilities in the event of a release of hazardous substances by such facilities into the environment.

The Subscription Agreement and the Company's Amended and Restated Certificate of Incorporation include exclusive venue provisions, and the Subscription Agreement provides that investors waive the right to a jury trial in connection with any action, suit or counterclaim arising out of the Subscription Agreement.

By executing a Subscription Agreement for this Offering, investors shall be agreeing to waive their constitutional right to have any disputes, claims, or controversies arising out of or relating to the Subscription Agreement or their investment in us, including, but not limited to, claims under US federal securities laws, decided by a jury. Pursuant to the Subscription Agreement and the Company's Amended and Restated Certificate of Incorporation, investors will also be agreeing that the State of Minnesota shall be the sole and exclusive forum for, among other things, (i) any derivative action or proceeding brought on behalf of the Company; (ii) any action asserting a claim of breach of a fiduciary duty owed by any director, officer or other employee of the Company to the Company or the Company's stockholders; (iii) any action asserting a claim arising pursuant to any provision of the Minnesota Business Corporation Act;

A percentage of gross revenue as determined by gross income reported on the most recent yearly IRS tax filing. The exact formula for calculating gross revenue from the IRS form: _____:

The percentage of Revenue distributed to holders of TocoCoin Tokens shall increase over six years, with a maximum distribution of six percent (6%) in aggregate to all holders of TocoCoin Tokens. Distributions will begin with zero (0%) of the Company's revenue shared with holders of TocoCoin Tokens for the taxable year 2020. Distributions will take place annually, no later than June 30 of the year following the applicable IRS reporting year. Each year following the tax year 2020 shall increase distributions of revenue by one percent (1%), until the maximum distribution amount of six percent (6%) revenue is distributed in aggregate to all 15,000,000 tokens. The holders of Class A Non-Voting Preferred Stock and the holders of TocoCoin Tokens have no voting rights, except as provided under Minnesota law.

While the TocoCoin Tokens are a digital representation of the Class A Non-Voting Preferred Stock, each is a different class of security and are therefore not fungible with each other. There are no differences between the ownership or transferability of TocoCoin Tokens and Class A Non-Voting Preferred Stock, except TocoCoin Tokens, which are in the form of an ERC-20 Smart contract, are transferable electronically with the approval of our transfer agent.

We do not currently intend to issue digital securities representing Class A Common Shares.

Terms of the TocoCoin Tokens under the Smart Contract

The TocoCoin Tokens are smart contracts based on the ERC-20 standard, modified to address the requirements of securities law and to limit the ability of wallet holders or any persons other than the stock transfer agent to transfer or otherwise change the number of TocoCoin Tokens in a wallet. The smart contract may be changed only by the stock transfer agent by providing the transfer agent with a signed notarized sworn affidavit attached to a letter explaining the loss and providing a new Ethereum wallet address. The smart contract has no transfer functionality that can be accessed by a securities holder. Therefore any vulnerabilities, including bugs, errors or hacks, can be fixed by issuing a new smart contract to the affected securities holders. Because the TocoCoin Tokens represent our Class A Non-Voting Preferred Stock, there is no limitation embedded in the smart contract on the number of TocoCoin Tokens that can be created. The overall potential number of TocoCoin Tokens will be a function of corporate law, and will be increased in accordance with laws of the state of Minnesota and our Certificate of Incorporation and Bylaws. Under the terms of the smart contract, a single TocoCoin Token may be divided into fractions of a TocoCoin Token, as when and as allowed by the Transfer Agent and applicable local, state, and federal laws. We will enter into a Service Agreement with Securrency to provide software and services relating to the recording of the issuance, transfer and registration of the TocoCoin Tokens and associated holders through their platform.

To effect a transfer, the applicable broker-dealer will confirm that a requested transfer is permitted under applicable securities law, verify the purchase agreement terms, and obtain the seller and purchaser wallet addresses. The Transfer Agent will then obtain verification from Prime Trust that the transfer is permitted pursuant to applicable KYC/AML laws, and if so, shall approve the transfer and enter the new investor data into the stock ledger. Each holder shall have control of their own private key for their digital wallet that holds their TocoCoin Tokens. If a holder desires to transfer their TocoCoin Tokens, the smart contract will communicate with the Transfer Agent, _____, which shall be required to confirm the transfer and record it in the transfer ledger, prior to completion of the transfer.

By investing \$100.00 or more (“bonus qualifying funds”) in the TocoCoin Token at early bird tiers listed below, an investor will receive bonus Tokens at the following rate:

- The next \$20,000 (\$10,005 to \$30,000) of bonus qualifying funds raised will receive 75% bonus Tokens.
- The next \$20,000 (\$30,005 to \$50,000) of bonus qualifying funds raised will receive 60% bonus Tokens.
- The next \$50,000 (\$50,005 to \$100,000) of bonus qualifying funds raised will receive 50% bonus Tokens.

18. How may the rights of the securities being offered be materially limited, diluted or qualified by the rights of any other class of security identified above?

19. Are there any differences not reflected above between the securities being offered and each other class of security of the issuer? ☒ Yes ☐ No

The security being offered will not have voting rights, and will be delivered via token.

20. How could the exercise of rights held by the principal shareholders identified in Question 6 above affect the purchasers of the securities being offered?

The token holder rights are clearly defined herein. All other rights are owned by the Shareholders all of whom are also Officers and Directors of the Company and operate the Company on a day to day basis. Shareholders may take actions, the benefit(s) of which may inure solely to the Shareholders and not to token holders. For illustrative and example purposes only, and not intended to be a complete list, the Shareholders can sell their shares, transfer or sell control of the Company, merge or dissolve the Company, borrow monies, sell additional common or preferred shares, enter into contracts, buy or sell assets, pay, prepay or not pay any obligation including the tokens, initiate litigation or arbitration and any number of other permitted Shareholder or Officer actions acts that could potentially impact token holders differently than the Shareholders. herself or her relatives at the high range of what is reasonable, pre-paying expenses, investing in new business or new equipment, leasing expensive cars, etc., a majority owner can spend enough that there are rarely any profits to be distributed. So long as the expenses are not grossly unreasonable, the investor, probably, won't be able to force the company to allow you to share in any of the current income of the company.

No right to participate in any management decisions of the company. The majority owner may make a decision that the investor think is bad and puts your interest in the company at risk. The investor may see the majority owner running the company into the ground. The investor can try to convince him that it is the wrong decision, but he doesn't have to take your calls.

The investor has limited rights, if any, to have your interest bought out. You may want to cash out your interest and do other things with the money. State law may give you the right to force the company to buy you out, but these rights are limited.

While the investor would be entitled to a share of any profits on sale of the entire business, a sale can be structured in a way to avoid any payout to minority owners, such as a sale of assets over time with the proceeds reinvested in another business.

Please see Question # 13 for details.

23. What are the risks to purchasers associated with corporate actions including:

- **Additional issuances of securities:**

Following the investor's investment in the Company, the Company may sell interest to additional investors, which will dilute the percentage of financial interest of the investor in the Company. The Investor might have the opportunity to increase its investment in the Company in such transaction, but such opportunity cannot be assured. The amount of additional capital needed by the Company, if any, will depend upon the maturity and the objectives of the Company.

- **Issuer repurchases of securities:**

The company may have the authority to repurchase its securities from shareholders, which may serve to decrease any liquidity in the market for such securities, decrease the percentage interests held by other similarly situated investors to the Investor, and create pressure on the investor to sell its securities to the Company concurrently.

- **A sale of the issuer or of assets of the issuer:**

As a purchaser of the company's securities, the Investor will have limited or no ability to influence a potential sale of the Company or a substantial portion of its assets. Thus, the investor will rely upon the executive management of the Company and the Board of Directors of the Company to manage the Company so as to maximize value for shareholders.

- **Transactions with related parties:**

The Investor should be aware that there will be occasions when the Company may encounter potential conflicts of interest in its operations. On any issue involving conflicts of interest, the executive management and the Board of Directors of the Company will be guided by their good faith judgment as to the Company's best interests. The Company may engage in transactions with affiliates, subsidiaries or other related parties, which may be on terms which are not arm's-length, but will be in all cases consistent with the duties of the management of the Company to its shareholders. By acquiring any interest in the company, the investor will be deemed to have acknowledged the existence of any such actual or potential conflicts of interest and to have waived any claim with respect to any liability arising from the existence of any such conflict of interest.

FINANCIAL CONDITION OF THE ISSUER

27. Does the issuer have an operating history? ☒ Yes ☐ No

The past two years have been spent solidifying key relationships with researchers, practitioners, and institutions related to the clinical research opportunities outlined in the Anticipated Business Plan. By continuing to engage in active conversation and planning, providing small sample amounts of tocotrienol material to researchers for animal studies/initial drug discovery, and facilitating necessary filings and proposals, H&G Science has been able to position itself for optimized monetization of successful clinical trial outcomes.

At the time of this document (February 2019), H&G Science has detailed cost proposals on performing Phase I/II clinical trials for the three opportunities outlined in the Business Plan. The company also has made arrangements to provide the tocotrienol material needed to run the trials, thus securing its position as the preferred manufacturer upon market entry. Furthermore, the company has negotiated options, where appropriate, on intellectual property arising from the clinical research to monetize the final product as well as manufacture the active ingredient(s).

28. Describe the financial condition of the issuer, including, to the extent material, liquidity, capital resources and historical results of operations.
