Veriglif, the world's first global consumer data ecosystem

Jul 2018 – Present · 11 mos

Provo, Utah Area

Veriglif is the global Verified Data Network that allows all data stakeholders to connect, transact, and thus maximize the value of consumer data assets. It is the world's first global consumer data ecosystem that helps unlock the full value of consumer data through increased data veracity, velocity, variety, and volume.

Built on the IBM Hyperledger private enterprise Blockchain. This data network is driven by creating a single-source Universal ID for individuals based on their digital datagraph to verify identity and allow for the linkage of related data at the individual level from any source, globally.

CTO and Director

Potentiate

Dark Horse - Crypto Investment Allocation Modelling

Jan 2018 – Nov 2018 · 11 mos

Singapore

The dark horse crypto platform is an investment allocation strategy that has been proven to beat traditional cap weighted and equal weighted allocation strategies over the past 3 years. Currently in the final stages of development, the platform will support two allocation strategies. The first is a hybrid between cap weight and equal weight and the other is a single ... See more

Stonegate - Crypto Mining Optimisation

Dec 2017 – Nov 2018 · 1 yr

London, United Kingdon

Stonegate runs a small crypto mine and has developed software designed to improve the returns from mining through algorithmic-ally optimising which currency to mine, which mining pool to join and what fee structure elect, and other secret sauce every 15 minutes. This solution means faster entry into the best performing scenarios thus generating greater retu... See more
