The prospectus should be read carefully before investing in the Fund.

## New acquisition: Rental home community near Atlanta, GA

This investment fits into our broader strategy to invest in affordably-priced rental housing across the Sunbelt.

We've invested roughly \$1.4 million to acquire seven brand new single-family homes within the Ambling Grove community of Decatur, Georgia, with plans to acquire a total of 59 rental townhomes in the community over the next year. A component of the greater Atlanta metro area, Decatur is located about 20 minutes east of downtown.

At a strategic level, this investment fits within our affordably-priced [Sunbelt](#) apartment / rental housing thesis. From millennials to retirees, a broad group of Americans has been taking part in a migration from northern to southern states over the past decade, driving continued demand for well-priced, well-located real estate, and supporting steady returns for disciplined investors.

As we reiterated in our [second quarter flagship portfolio update](#) we believe that this long-term trend has only been further accelerated by the pandemic. In an economy where remote work is becoming the norm for more and more people, we expect that an increasing share of the population won't need to live in expensive gateway cities and will instead seek out locations that offer lower living costs and more agreeable climates.

This acquisition was made by a joint venture between two Fundrise sponsored funds, the Fundrise Interval Fund, which invested roughly \$1,230,500, and the Growth eREIT VII, which invested \$136,700.

## Strategy

This investment follows a Value-Add strategy.

## Business plan

By acquiring the brand-new (vacant) homes in batches and leasing them up ourselves to assemble a stabilized community, we intend to get a better price, and therefore a better potential return, than if we had purchased a "finished product."

Our initial investment at Ambling Grove is an all-cash purchase of seven finished townhomes within the community, which is still under construction. Our intent is to acquire and lease up additional batches of roughly eight townhomes per month as they deliver, eventually taking ownership of 59 homes within the community.

**This phased buying structure should result in much more efficient deployment of investors' capital,** as opposed to holding cash for several months while waiting for an entire community to be built, and then acquiring it all at once.

Our intent with this and other investments in single-family rental home communities is to be a long-term investor, building a scaled portfolio that generates consistent rental income, while at the same time being positioned to capture what we believe will be outsized price appreciation thanks to a confluence of demographic factors driving demand across the Sunbelt. While the properties of course look different than multifamily apartments, the underlying investment thesis is ultimately very similar.

We have engaged a leading property manager of single-family rental communities across the US.

We expect the aggregate purchase price of all 59 townhomes in the completed community will be roughly \$11.5 million. While we acquired the homes in an all-cash transaction, we intend to use portfolio-level financing, with the aim of increasing expected returns and freeing up cash to deploy elsewhere.

## Why we invested

- **Healthy local economy:** Between 2010 and 2019, the Atlanta area's population grew at nearly triple the rate of the national average, according to the U.S. Census. As the area continues to grow, affordability is becoming a top concern, making neighboring areas like Decatur attractive to both renters and homebuyers.
- **Social distancing-friendly:** We believe the privacy provided by the community's spacious townhomes will be particularly attractive to renters seeking an additional level of social distancing, or who simply need more living space as norms around work and school shift.
- **Institutional-quality asset:** This deal is structured so as to allow us to acquire tranches of townhomes in regular batches throughout the year, directly from a nationally recognized homebuilder. Once our investment in the 59 townhomes is complete, we will have added an institutional-quality asset of ready-to-rent homes to our portfolio, consisting entirely of brand-new construction.

## New acquisition: Rental home community near Fort Worth, TX

This investment fits into our broader strategy to invest in affordably-priced rental housing across the Sunbelt.

**Caption for all images:** Image of a representative home from a development by the same builder.

We've invested \$489,700 to acquire two brand new single-family homes within the Lasater Ranch Crossing community of Crowley, Texas, about 20 minutes south of downtown Fort Worth, with plans to acquire a total of 48 rental homes in the community over the next year.

At a strategic level, this investment fits within our affordably-priced [Sunbelt](#) apartment / rental housing thesis. From millennials to retirees, a broad group of Americans has been taking part in a migration from northern to southern states over the past decade, driving continued demand for well-priced, well-located real estate, and supporting steady returns for disciplined investors.

As we reiterated in our [second quarter flagship portfolio update](#), we believe that this long-term trend has only been further accelerated by the pandemic. In an economy where remote work is becoming the norm for more and more people, we expect that an increasing share of the population won't need to live in expensive gateway cities and will instead seek out locations that offer lower living costs and more agreeable climates.

This acquisition was made by a joint venture between two Fundrise sponsored funds, the Fundrise Interval Fund, which invested roughly \$440,700 and the Growth eREIT VII, which invested \$49,000.

## Strategy

This investment follows a Value-Add strategy.

## Business plan

By acquiring the brand-new (vacant) homes in batches and leasing them up ourselves to assemble a stabilized community, we intend to get a better price, and therefore a better potential return, than if we had purchased a "finished product."

Our initial investment at Lasater Ranch is an all-cash purchase of two finished homes within the community, which is still under construction. Our intent is to acquire and lease up additional batches of roughly 11 homes per month as they deliver, eventually taking ownership of 48 homes within the community. **This phased buying structure should result in much more efficient deployment of investors' capital**, as opposed to holding cash for several months while waiting for an entire community to be built, and then acquiring it all at once.

Our intent with this and other investments in single-family rental home communities is to be a long-term investor, building a scaled portfolio that generates consistent rental income, while at the same time being positioned to capture what we believe will be outsized price appreciation thanks to a confluence of demographic factors driving demand across the Sunbelt. While the properties of course look different than multifamily apartments, the underlying investment thesis is ultimately very similar.

We have engaged a leading property manager of single-family rental communities across the US.

We expect the aggregate purchase price of all 48 homes in the completed community will be roughly \$11 million. While we acquired the homes in an all-cash transaction, we intend to use portfolio-level financing, with the aim of increasing expected returns and freeing up cash to deploy elsewhere.

## Why we invested

- **Growing local economy:** The Dallas-Fort Worth metro area as a whole continues to rank among the nation's fastest-growing regions, [having added 19% to its population since 2010](#), far outpacing the nationwide increase of about 6% over the same period. Additionally, in 2020, [the Dallas area proved to be the second largest market in the country for Fortune 500 companies, based on revenue](#), behind only New York.
- **Social distancing-friendly:** We believe the privacy provided by the community's fully detached and individual homes will be particularly attractive to renters seeking an additional level of social distancing, or who simply need more living space as norms around work and school shift.
- **Institutional-quality asset:** This deal is structured so as to allow us to acquire tranches of homes in regular batches throughout the year, directly from a nationally recognized homebuilder. Once our investment in the 48 homes is complete, we will have added an institutional-quality asset of ready-to-rent homes to our portfolio, consisting entirely of brand-new construction.

## New acquisition: Rental home community near San Antonio, TX

This investment fits into our broader strategy to invest in affordably-priced rental housing across the Sunbelt.

We've invested roughly \$1.7 million to acquire eight brand new single-family homes within the Lasater Ranch Crossing community of Converse, Texas, about 20 minutes east of downtown San Antonio, with plans to acquire a total of 60 rental homes in the community over the next year.

At a strategic level, this investment fits within our affordably-priced [Sunbelt](#) apartment / rental housing thesis. From millennials to retirees, a broad group of Americans has been taking part in a migration from northern to southern states over the past decade, driving continued demand for well-priced, well-located real estate, and supporting steady returns for disciplined investors.

As we reiterated in our [second quarter flagship portfolio update](#), we believe that this long-term trend has only been further accelerated by the pandemic. In an economy where remote work is becoming the norm for more and more people, we expect that an increasing share of the population won't need to live in expensive gateway cities and will instead seek out locations that offer lower living costs and more agreeable climates.

This acquisition was made by a joint venture between two Fundrise sponsored funds, the Fundrise Interval Fund, which invested roughly \$1,567,000 and the Growth eREIT VII, which invested \$174,000.

## Strategy

This investment follows a Value-Add strategy.

## Business plan

By acquiring the brand-new (vacant) homes in batches and leasing them up ourselves to assemble a stabilized community, we intend to get a better price, and therefore a better potential return, than if we had purchased a “finished product.”

Our initial investment at Savannah Place is an all-cash purchase of eight finished homes within the community, which is still under construction. Our intent is to acquire and lease up additional batches of roughly ten homes per month as they deliver, eventually taking ownership of 60 homes within the community. **This phased buying structure should result in much more efficient deployment of investors' capital**, as opposed to holding cash for several months while waiting for an entire community to be built, and then acquiring it all at once.

Our intent with this and other investments in single-family rental home communities is to be a long-term investor, building a scaled portfolio that generates consistent rental income, while at the same time being positioned to capture what we believe will be outsized price appreciation thanks to a confluence of demographic factors driving demand across the Sunbelt. While the properties of course look different than multifamily apartments, the underlying investment thesis is ultimately very similar.

We have engaged a leading property manager of single-family rental communities across the US.

We expect the aggregate purchase price of all 60 homes in the completed community will be roughly \$13.1 million. While we acquired the homes in an all-cash transaction, we intend to use portfolio-level financing, with the aim of increasing expected returns and freeing up cash to deploy elsewhere.

## Why we invested

- **Growing local economy:** Converse is part of the greater San Antonio metropolitan area and only a 20 minute drive from San Antonio's downtown. The San Antonio metro area as a whole ranks among the nation's fastest-growing, having added nearly 17% to its population since 2010 according to the US

Census, far outpacing the national average of about 6%.

- **Social distancing-friendly:** We believe the privacy provided by the community's fully detached and individual homes will be particularly attractive to renters seeking an additional level of social distancing, or who simply need more living space as norms around work and school shift.
- **Institutional-quality asset:** This deal is structured so as to allow us to acquire tranches of homes in regular batches throughout the year, directly from a nationally recognized homebuilder. Once our investment in the 60 homes is complete, we will have added an institutional-quality asset of ready-to-rent homes to our portfolio, consisting entirely of brand-new construction.
