Content Caching

Enabled

Enabling this option will cache all contents, which includes both static and dynamic content. Currently cache is kept up to the TTL specified, or can be manually purged.

Default Cached Content's TTL

This includes any content that is cached, including both dynamic and static contents.

30 days

Exception Rules

Following are the exception rules for the caching for this site, from here you can disable specific type of caching on certain paths, or change the TTL of the same.

Match Type	Exception Path	Exception Rule	Custom TTL	
Prefix ▾	<input type="text" value="Enter a regular expression to match the path"/>	Disable Caching ▾	NA	<button>Add Exception</button>

Purge Cache

Purge

This will purge all cache, if any, for this site, which includes both Static and Dynamic content. Once the cache is purged, it is again re-generated, as per the request.
