Important Disclaimer:

As the Issuer is a new company with a limited history of operation, lacking of material assets and has conducted no prior sales of securities except to its founders and initial shareholders, the reliability, accuracy and appropriateness of the valuation methods used in this section in determining the valuation of the securities being offered is not guaranteed. The valuation methods used in this section do not infer that the Issuer assumes any fiduciary duties and should not be construed as financial, legal or tax advice. Valuation of Our Series A Preferred Stock

We have not undertaken any efforts to produce a valuation of the Company. The information set forth in this Offering Statement with respect to issuance of the Shares, pricing, and other related information assumes a purchase price of \$10.00 per Share. This purchase price has been determined by the Issuer without any arm's-length negotiations and does not necessarily bear any relationship to market value, assets, book value or potential earnings of the Fund or any other recognized criteria of value.

We are offering Series A Preferred Stock at \$10.00 per share and we believe that the price is fair and the valuation is based on the consideration of the followings:

- i. **Cash Flow Forecasts.** The cash flows that our investment properties will generate in the coming 5 years with assumptions and forecast of future market rent, vacancy and collection loss, and operating expenses.
- ii. **Resale Value.** We assume a five-year holding period with a proforma cash flow estimates one additional year. The expected sales price at the end of the fifth year would equal the NOI in the sixth year divided by a market capitalization rate.

Investors should be aware that the above factors merely reflect the opinion of the Company.

In determining the offering price, the Company did not employ investment banking firms or other third-party organizations to make an independent appraisal or evaluation. Accordingly, the offering price should not be considered to be indicative of the actual value of the Securities. The Company makes no representation that the Securities could be resold at this price.

Methods for how the securities may be valued by the issuer in the future:

The future valuation of our preferred/common stock or securities to be issued will be primarily based on changes in market / rental values of the portfolio of our real estate properties as well as factors including economic, social and demographic changes. This may be carried out using either one or more of the following approaches:

- Sales Comparison Approach
- Income Capitalization Approach
- Cost Approach

During the valuation process, we will also consider the trends in the real estate price (e.g. actual sales prices, information from neighbors, real estate experts, brokers, sales and mortgage registries, income levels in the area, demand and supply conditions of the market, published land prices and tax rates, regional development plans, availability of mortgage loan facilities, etc), conditions of the property (e.g. structure, age, geographical conditions, location, accessibility to public roads, schools, facilities, utilities, presence of unfavorable facilities, etc).

The Board of Directors will, from time to time, review the use of valuation methods in valuing our securities to ensure a fair and reasonable estimations in different situations and different corporate stages. For example, if the Company grows in size with significant assets accumulated, valuations based on our assets could be an appropriate approach to value the Company and the securities to be issued. The Company may hire independent third parties to assist in the assessment of the valuation of value the Company and the securities to be issued in the future.

22. What are the risks to purchasers of the securities relating to minority ownership in the issuer?

- Purchasers of the securities in this offering have limited rights to demand distributions (e.g. dividends) from the Issuer.
- The majority owner may make a decision that the Purchasers consider bad and puts Purchaser's interest in the Issuer at risk.

- Although, as Series A Preferred Stock holders, the Purchasers would be entitled to a share of any proceeds from a sale of the entire business, the Purchasers may not veto the sale even though the price of sale is below its fair valuation. Moreover, a sale can be structured in a way to avoid any payout to minority owners, such as a sale of assets over time with the proceeds reinvested in another business.
- Since the securities in this offering are not publicly traded and are subject to restrictions on resale or transfer including holding period requirements, the securities in this offering are illiquid.
- The Purchasers of the securities offered are entitled no voting rights and therefore they are not entitled to exert influence in the affairs of the company or the composition of its board of directors.
- The Purchasers of the securities offered are entitled no anti-dilution rights (other than proportionate adjustments for stock splits and similar events) and therefore future equity financings may dilute their ownership percentage in the issuer.

23. What are the risks to purchasers associated with corporate actions:

a. Additional Issuances of Securities

Purchasers of the securities offered are entitled no anti-dilution rights (other than proportionate adjustments for stock splits and similar events) and therefore future equity financings may dilute their ownership percentage in the issuer.

b. Issuer Repurchases of Securities

The issuer could be authorized to repurchase the company's issued securities subject to the approval by the company's board of directors. Purchasers of the securities may not impede the issuer's right to repurchase its securities from other shareholders. Moreover, the repurchase could be made at a price much lower than company's business value or its fair valuation, which could be indicative of the resale price of the securities thereafter.

c. A Sale of the Issuer or of Assets of the Issuer

Although as Series A Preferred Stock holders the Purchasers would be entitled to a share of any proceeds from a sale of the entire business, the Purchasers may not veto the sale even though the price of sale is below its fair valuation. Moreover, a sale can be structured in a way to avoid any payout to minority owners, such as a sale of assets over time with the proceeds reinvested in another business.

d. Transactions with Related Parties

Transactions with related parties are transactions between the issuer or any of its subsidiaries and a connected person. These transactions include both capital and revenue nature transactions. They may be one-off transactions or continuing transactions. Purchasers should be aware that these transactions may create conflicts of interests between themselves and the Issuer.

24. Describe the material terms of any indebtedness of the issuer:

The Issuer has no material terms of any indebtedness.

25. What other exempt offerings has the issuer conducted within the past three years?

N/A

26. Was or is the issuer or any entities controlled by or under common control with the issuer a party to any transaction since the beginning of the issuer's last fiscal year, or any currently proposed transaction, where the amount involved exceeds five percent of the aggregate amount of capital raised by the issuer in reliance on Section 4(a)(6) of the Securities Act during the preceding 12-month period, including the amount the issuer seeks to raise in the current offering, in which any of the following persons had or is to have a direct or indirect material interest:

In addition to historical consolidated financial information, the following discussion contains forward-looking statements that reflect our plans, estimates, and beliefs. Our actual results could differ materially from those discussed in the forward-looking statements. Factors that could cause or contribute to these differences include those discussed below and elsewhere in this Form C, particularly in "Risk Factors."

E*Hedge Group, Inc. (DBA "Oprine Opportunity Funds, Inc. ") was incorporated on July 26, 2019 and as of September 18, 2019, the period where our financial statements covered, we had yet begun operations other than those associated with general start-up and organizational matters. As of September 18, 2019, we did not purchase any real estate assets or enter into any agreements to do so.

As of September 18, 2019, we didn't record any revenues.

As of September 18, 2019, we had total operating expenses of \$0,

As of September 18, 2019, our net income was \$0.

Cash flows

As of September 18, 2019, the cash flow generated from operating activities was \$0. As of September 18, 2019, the cash flow from investing activities was \$0 while the cash flow generated by financing activities was \$0.

Our historical results and cash flows are not representative of what investors should expect in the future.

Our principal sources of liquidity are our cash and cash equivalents and cash generated from operations. Cash and cash equivalents consist primarily of cash on deposit with banks. As of September 18, 2019, the Company had cash and cash equivalents equal to \$0.

As of September 18, 2019, the Company does not have any liabilities, material indebtedness nor any contingent liabilities.

Discussion of our operational plan and financing

We intend to use the proceeds of this offering to originate, invest in and manage a diversified portfolio of commercial real estate properties, joint venture subsidiaries, and other real-estate assets located in Opportunity Zones, as designated by the Tax Cuts and Jobs Act (TCJA). We may also invest in assets that are deemed to be Qualified Business or Property that is not real property, although we generally do not intend to, unless the Fund is unable to find suitable real property located in Opportunity Zones or otherwise needs to make such alternative investments to maintain its status as an Opportunity Fund and those assets will not exceed 20% of our total assets. The company will continue to operate in a manner that will allow us to qualify as an Opportunity Fund under the TCJA.

In order to do so, we are required to raise additional funding and therefore, we plan to raise extra capital through extra rounds of Regulation Crowdfunding offerings and/or Regulation D (506c) offerings. We will also use debt instrument, primarily bank mortgage to finance this project. If we cannot raise enough capital in this offering, or cannot borrow money on the terms we expect, the Company will probably dissolve.

The Company expects to fund its operations and capital expenditure requirements from future operating cash flows, cash and cash equivalents, proceeds from this offering and credit facilities. We need to raise additional funds through public or private equity offerings or debt financings, but there can be no assurance that we will be able to do so on acceptable terms or at all.

New business developments or other unforeseen events may occur, resulting in the need to raise additional funds. There can be no assurances regarding the business prospects with respect to any other opportunity. Any other development would require us to obtain additional financing.

The Company is seeking a minimum of \$1,000 in this offering. In addition to a Regulation D (506c) offering, we expect that the Company's with the proceeds of the offering would be enough to finance its operation in the next 12 months.

The proceeds of this offering are crucial to our financial condition and liquidity, and will provide us the capital and increase the probability to secure and acquire investment projects in the coming years.

Appendix A - BUSINESS AND ANTICIPATED BUSINESS PLAN

Company Overview

E*Hedge Group (Doing Business As: Oprine Opportunity Funds, Inc.) is a recently organized corporation formed to originate, invest in and manage a diversified portfolio of commercial real estate properties, joint venture subsidiaries, and other real-estate assets located in Opportunity Zones, as designated by the Tax Cuts and Jobs Act (TCJA). We may also invest in assets that are deemed to be Qualified Business or Property that is not real property, although we generally do not intend to, unless the Fund is unable to find suitable real property located in Opportunity Zones or otherwise needs to make such alternative investments to maintain its status as an Opportunity Fund and those assets will not exceed 20% of our total assets. The company will continue to operate in a manner that will allow us to qualify as an Opportunity Fund under the TCJA.

The company is organized with the express purpose to qualify as an Opportunity Zone Fund, and as such, company management may decide to adjust the offering terms, operating structure in order to become or remain compliant as an Opportunity Fund.

Investment Strategy

We seek to invest in Opportunity Zone Properties located in certified Qualified Opportunity Zones (QOZ) through a Qualified Opportunity Fund. We will also focus on emerging growth markets related to high growth small and medium sized enterprises located within qualified opportunity zones in addition to real estate investments. We strive to help investors optimize tax-free investment profits while aiding communities hit by hardship.

Where most QOFs invest exclusively in real estate and offer modest returns, our Fund is unique in that we invest in businesses and other ventures in both emerging and established markets, such as financial services, medical, real estate (e.g., qualified opportunity zone businesses), and seek to offer a much higher ROI to our investors. Oprine Opportunity Funds was developed with the premise that investors who wish to invest in property and qualified opportunity zone emerging growth companies have an opportunity to do so in a tax-efficient manner.

The companies real estate focus will revolve around significant capital appreciation opportunities, such as those requiring development, redevelopment or repositioning and those located in Opportunity Zone markets with high growth potential. The company will hold 90% of its assets in qualified opportunity zone properties. We may also enter into one or more joint ventures, as related to co-ownership arrangements for the acquisition, development or improvement of properties or real businesses within designated opportunity zones.

Investment Objectives

We expect to use substantially all the net proceeds from this offering to acquire properties that are appropriate for our investment strategy and our investment objectives.

Our investment objectives are:

- Acquire high-quality real-estate assets/projects located in Opportunity Zones

- To invest in Qualified Opportunity Zone Business to capture emerging growth business opportunities in accordance with the tax advantages offered under the Tax Cuts and Jobs Act;
- Acquire properties encumbered by existing tenancy;
- Achieve long-term growth and tax efficiency;
- Acquire or invest in properties in need of large-scale or cosmetic renovation;
- To invest in Qualified Opportunity Zone Business to capture emerging growth business opportunities in accordance with the tax advantages offered under the Tax Cuts and Jobs Act;
- Potential Structural Changes

Our corporate structure may be modified to a Real Estate Investment Trust or a limited liability company structure as the company's management and the Manager may seek to readjust or modify our investment objectives without shareholder consent in order to ensure that the Fund is able to satisfy the requirements for qualifying as an Opportunity Zone Fund. Except as otherwise explicitly noted below, the discussion in this offering document assumes that we may make a REIT election. You should review the discussion of "U.S. Federal Income Tax Considerations" below regarding our tax classification and certain other tax considerations relating to an investment in the Fund.

Market Opportunity: An Overview of the Opportunity Zones Program

Opportunity Zones are census tracts nominated by governors and certified by the Treasury into which investors can invest in new projects to spur economic development in exchange for certain federal capital gains tax advantages. With each state designating up to 25% of their state as qualified opportunity zones, the 2017 Distressed Community Index (DCI) reports that 52.3 million Americans currently live in economically distressed communities with more than a quarter of those residents at or below poverty levels. As of June 14, 2018, submissions have been approved for all 50 states, the District of Columbia and five U.S. possessions. One in six Americans currently reside within qualified opportunity zones whom will benefit along with future generations through newly passed legislation.

These opportunity zones were designated following the passage of the Tax Cuts and Jobs Act which was enacted into law by President Trump and congress on December 22, 2017. Under the Code (Sections 1400Z-1 and 1400Z-2) tax incentives are provided to investors for placing funds in qualified opportunity zone real estate projects or qualified opportunity zone businesses through investment vehicles called Opportunity Funds. This new investment vehicle is designed to help direct resources to the distressed communities throughout the United States. Furthermore the program allows investors to defer, reduce, and eliminate federal tax on various capital gains by investing gains into an Opportunity Fund.

The Qualified Opportunity Zones statute, Internal Revenue Code Section 1400Z-2, offers three specific tax benefits for investing in low-income communities through an investment in a QOF:

1. A temporary deferral. The taxpayer may defer the inclusion of capital gains in taxable income if the capital gains are timely reinvested in a Qualified Opportunity Fund. The deferred gain must be

recognized on the earlier of the (a) date on which the investment in the QOF is disposed of or (b) December 31, 2026.

2. An increase in tax basis in the QOF. The taxpayer's outside tax basis in the QOF is initially set at zero, but is increased by 10% of the qualified investment amount if the QOF interest is held by the taxpayer for at least 5 years; by an additional 5% of the qualified investment amount if held for at least 7 years. These adjustments to outside tax basis may have the effect, for example, of reducing gain on sale of the QOF interest by the amount of these tax basis adjustments.

3. A permanent exclusion of gain. If the investment in the QOF is held by the taxpayer for at least 10 years, the taxpayer may elect to treat the basis of such property (i.e., the outside tax basis in the QOF) as equal to the fair market value of such investment on the date that the investment is sold or exchanged. This election will have the effect of excluding all gain recognized on the sale of the QOF investment. If the QOF investment will generate a loss, the taxpayer can eschew the election and recognize the loss.

To receive the most potentially favorable tax treatment under Code Section 1400Z-2, investors are incentivized to hold their interest in an Opportunity Fund over the long-term, providing the most potential tax-related upside to those who hold their investment for 10 years or more.

Appendix B - RISK FACTORS

You should not invest any funds in this offering unless you can afford to lose your entire investment.

In making an investment decision, Investors must rely on their own examination of the Companies and the terms of this offering, including the merits and risks involved. These securities have not been recommended or approved by any federal or state securities commission or regulatory authority. Furthermore, these authorities have not passed upon the accuracy or adequacy of this document.

The U.S. Securities and Exchange Commission does not pass upon the merits of any securities offered or the terms of this offering, nor does it pass upon the accuracy or completeness of any offering document or literature related to this offering.

These securities are offered under an exemption from registration; however, the U.S. Securities and Exchange Commission has not made an independent determination that these securities are exempt from registration.

Additional statement:

There are numerous risks to consider when making an investment such as this one and financial projections are just that - projections. Returns are not guaranteed. Conditions that may affect your investment include unforeseen operational costs, changes in market conditions, and potential disasters that are not covered by insurance.

These are the risks that relate to the Company:

RISKS RELATING TO THIS OFFERING AND OWNERSHIP OF OUR SERIES A PREFERRED STOCK

The Series A Preferred Stock is equity and is subordinated to our existing and future indebtedness.

The shares of Series A Preferred Stock are equity interests in Oprine Opportunity Funds, Inc. and do not constitute indebtedness. As such, the shares of Series A Preferred Stock will rank junior to all indebtedness and other non-equity claims on the company with respect to assets available to satisfy claims on the company, including in a liquidation of the company. Our existing and future indebtedness may restrict payment of dividends on the Series A Preferred Stock. Additionally, unlike indebtedness, where principal and interest would customarily be payable on specified due dates, in the case of preferred stock like the Series A Preferred Stock (1) dividends are payable only if declared by the company and (2) as a corporation, we are subject to restrictions on payments of dividends and redemption price out of lawfully available assets. Further, the Series A Preferred Stock places no restrictions on our business or operations or on our ability to incur indebtedness or engage in any transactions, subject only to the limited voting rights.

Dividends on Series A Preferred Stock are non-cumulative.

Dividends on the Series A Preferred Stock are non-cumulative. Consequently, if the company does not authorize and declare a dividend for any dividend period prior to the related dividend payment date, holders of the Series A Preferred Stock would not be entitled to receive any such dividend, and such unpaid dividend will cease to accrue and be payable. We will have no obligation to pay dividends accrued for a dividend period after the dividend payment date for such period if the company has not declared such dividend before the related dividend payment date, whether or not dividends are declared for any subsequent dividend period with respect to the Series A Preferred Stock or any other series of our preferred stock.

General market conditions and unpredictable factors could adversely affect market prices for the Series A Preferred Stock.

There can be no assurance about the market prices for the Series A Preferred Stock. Several factors, many of which are beyond our control, may influence the market value of the Series A Preferred Stock, including:

- our past and future dividend practice;
- our creditworthiness as determined by nationally recognized statistical rating organizations which can change;
- interest rates;
- the credit, mortgage and housing markets, the markets for securities relating to investment management, and advisory services with respect to financial institutions generally;
- the market for similar securities; and
- economic, financial, geopolitical, regulatory or judicial events that affect us or the financial markets.

Accordingly, the Series A Preferred Stock that an investor purchases, whether in this offering or in the secondary market, may trade at a price lower than that at which it was purchased.

There may be future sales or other dilution of our equity, which may adversely affect the market price of the Series A Preferred Stock when issued.

We are not restricted from issuing additional common shares or preferred stock, including any securities that are convertible into or exchangeable for, or that represent the right to receive, common shares or Series A Preferred Stock or any substantially similar securities. The market price of our Series A Preferred Stock could decline as a result of sales of common shares or Series A Preferred Stock or similar securities in the market made after this offering or the perception that such sales could occur. The conversion of some or all of the Series A Preferred Stock will dilute the ownership interest of existing and future common shareholders. Any sales in the public market of our common shares issuable upon such conversion could adversely affect prevailing market prices of the outstanding common shares and the Series A Preferred Stock. This may also encourage short selling or arbitrage trading activity by market participants since the conversion of the Series A Preferred Stock could depress the price of our equity securities.

An active, liquid trading market for our Series A Preferred Stock may not develop, and you may not be able to sell your preferred stock. The Series A Preferred stock is a new issue with no established trading market.

Prior to this offering, there has been no public market for our preferred stock. An active trading market for shares of our preferred stock may never develop or be sustained following this offering. If an active trading market does not develop, you may have difficulty selling your shares at an attractive price, or at all.

Even if a secondary market for the Series A Preferred Stock develops, it may not provide significant liquidity and transaction costs in any secondary market could be high. As a result, the difference between bid and asked prices in any secondary market could be substantial. Further, because the shares of Series A Preferred Stock do not have a stated maturity date, investors seeking liquidity in the Series A Preferred Stock may be limited to selling their Series A Preferred Stock in the secondary market.

Holders of Series A Preferred stock will have limited voting rights.

Holders of the Series A Preferred Stock have no voting rights with respect to matters that generally require the approval of voting shareholders. However, holders of preferred stock, including the Series A Preferred Stock, will have the right to vote separately as a class on certain matters that may affect the preference or special rights of the preferred stock; provided that if certain matters would affect the preference or special rights of the Series A Preferred Stock but not all then outstanding series of preferred stock if any, the Series A Preferred Stock will have also the right to vote separately.

Our ability to pay dividends on our Series A preferred stock may be limited.

Our payment of dividends on our Series A preferred stock in the future will be determined by company management in its sole discretion and will depend on business conditions, our financial condition, earnings and liquidity, and other regulatory factors.

Any indentures and other financing agreements that we enter into in the future may limit our ability to pay cash dividends on our capital stock, including the Series A preferred stock. In the event that any of our indentures or other financing agreements in the future restricts our ability to pay dividends in cash on the Series A preferred stock, we may be unable to pay dividends in cash on the Series A preferred stock unless we can refinance the amounts outstanding under those agreements.

RISKS RELATED TO OUR BUSINESS

We are subject to certain operational risks, including, but not limited to, customer or employee fraud and data processing system failures and errors.

Employee errors and employee and customer misconduct could subject us to financial losses or regulatory sanctions and seriously harm our reputation. Misconduct by our employees could include hiding unauthorized activities from us, improper or unauthorized activities on behalf of our customers or improper use of confidential information. It is not always possible to prevent employee errors and misconduct, and the precautions we take to prevent and detect this activity

may not be effective in all cases. Employee errors could also subject us to financial claims for negligence.

We may maintain a system of internal controls and insurance coverage to mitigate against operational risks, including data processing system failures and errors and customer or employee fraud. If our internal controls fail to prevent or detect an occurrence, or if any resulting loss is not insured or exceeds applicable insurance limits, it could have a material adverse effect on our business, financial condition and results of operations.

We rely heavily on our executive management team and key employees, and we could be adversely affected by the unexpected loss of their services.

Our success depends in large part on the performance of our key personnel, as well as on our ability to attract, motivate and retain highly qualified and other skilled employees. Competition for employees is intense, and the process of locating key personnel with the combination of skills and attributes required to execute our business plan may be lengthy. We may not be successful in retaining our key employees, and the unexpected loss of services of one or more of our key personnel could have a material adverse effect on our business because of their skills, knowledge of our primary markets, years of industry experience and the difficulty of promptly finding qualified replacement personnel. If the services of any of our key personnel should become unavailable for any reason, we may not be able to identify and hire qualified persons on terms acceptable to us, or at all, which could have a material adverse effect on our business, financial condition, results of operations and future prospects.

The company has a limited operating history.

The Company has an operating history in less than one year. The Company's growth will largely be attributable to new investments and such growth may never be realized. There can be no assurance that as the Company can execute its growth strategy it will not experience net losses in the future, which could have an adverse effect on the Company's results of operations, financial condition and prospects.

If our enterprise risk management framework is not effective at mitigating risk and loss to us, we could suffer unexpected losses and our results of operations could be materially adversely affected.

Our enterprise risk management framework seeks to achieve an appropriate balance between risk and return, which is critical to optimizing stockholder value. We have established processes and procedures intended to identify, measure, monitor, report and analyze the types of risk to which we are subject, including operational, regulatory compliance and reputational. However, as with any risk management framework, there are inherent limitations to our risk management strategies as there may exist, or develop in the future, risks that we have not appropriately anticipated or identified. If our risk management framework proves ineffective, we could suffer unexpected losses and our business and results of operations could be materially adversely affected.

Because we have a limited operating history, you may not be able to accurately evaluate our operations.

We have had limited operations to date and the company has not generated revenues. Therefore, we have a limited operating history upon which to evaluate the merits of investing in our company. Potential investors should be aware of the difficulties normally encountered by new companies and the high rate of failure of such enterprises. The likelihood of success must be considered in light of the problems, expenses, difficulties, complications and delays encountered in connection with the operations that we plan to undertake. These potential problems include, but are not limited to, unanticipated problems relating to the ability to generate sufficient cash flow to operate our business, and additional costs and expenses that may exceed current estimates. We expect to incur significant losses into the foreseeable future. We recognize that if the effectiveness of our business plan is not forthcoming, we will not be able to continue business operations. There is no history upon which to base any assumption as to the likelihood that we will prove successful, and it is doubtful that we will generate any operating revenues or ever achieve profitable operations within the following year. If we are unsuccessful in addressing these risks, our business will most likely fail.

Our sole officer and director does not have any prior experience conducting a best-efforts offering .

Our sole executive officer and director does not have any experience conducting a best-effort offering like this one. Consequently, we may not be able to raise any funds successfully. If we are not able to raise sufficient funds, we may not be able to fund our operations as planned, and our business will suffer and your investment may be materially adversely affected.

Our directors and executive officers beneficially own a significant portion of our capital stock and have substantial influence over us.

Our directors and executive officers, as a group, beneficially owned the majority of our outstanding capital stock as of July 26, 2019. As a result of this level of ownership, our directors and executive officers have the ability, by taking coordinated action, to exercise significant influence over our affairs and policies. The interests of our directors and executive officers may not be consistent with your interests as a stockholder. This influence may also have the effect of delaying or preventing changes of control or changes in management.

RISKS RELATED TO OUR INDUSTRY AND REGULATION

There is no assurance that we will be successful in qualifying as an Opportunity Fund under the TCJA.

We were organized with the express purposes of qualifying as an Opportunity Zone Fund under the TCJA. However, the TCJA is a relatively new law and its provisions regarding Opportunity Funds are as yet untested. In addition, future legislation or guidance from the IRS may negatively affect our ability to qualify as an Opportunity Fund. As of the date of this offering, we have located only a few potential investments in Opportunity Zones. Therefore, you should not assume that we will be successful in achieving our investment objectives.

If we are unable to find suitable investments in Opportunity Zones, we may not be able to achieve our investment objectives or pay distributions.

Our ability to achieve our investment objectives and to pay distributions depends upon the performance of our company in the acquisition of suitable investments in Opportunity Zones and the ability of the company to source investment opportunities for us. The more money we raise in this offering, the greater our challenge will be to invest all of the net offering proceeds on attractive terms, and in particular to ensure that the company holds at least 90% of its assets in opportunity zone qualified real estate assets and properties. Except for investments that may be described in supplements to this offering prior to the date you subscribe for our shares, you will have no opportunity to evaluate the economic merits or the terms of our investments before economic merits or the terms of our investments before making a decision to invest in the company. You must rely entirely on the management abilities of the company. We cannot assure you that we will be successful in obtaining suitable investments on financially attractive terms or that, if the company makes investments on our behalf, our objectives will be achieved. If we, are unable to find suitable investments in Opportunity Zones promptly, we may hold the proceeds from Opportunity Zones promptly, we may hold the proceeds from this offering in an interest-bearing account or invest the proceeds from this offering in short-term assets in a manner that is consistent with our qualification as an Opportunity Fund, and we may also otherwise make such alternative investments to maintain our status as an Opportunity Fund. If we would continue to be unsuccessful in locating suitable investments, we may ultimately decide to liquidate the company. In the event we are unable to timely locate suitable investments, we may be unable or limited in our ability to pay distributions and we may not be able to meet our investment objectives.

Future disruptions in the financial markets or deteriorating economic conditions could adversely impact the commercial real estate market as well as the market for equity-related investments generally, which could hinder our ability to implement our business strategy and generate returns to you.

We intend to originate and acquire a diversified portfolio of real estate investments located in Opportunity Zones. We may make our investments through majority-owned subsidiaries, some of which may have rights to receive preferred economic returns. Economic conditions greatly increase the risks of these investments. The success of our business is significantly related to general economic conditions and, accordingly, our business could be harmed by an economic slowdown our business could be harmed by an economic slowdown and downturn in real estate values, property sales and leasing activities.

Our ability to implement our investment strategy is dependent, in part, upon our ability to successfully conduct this offering through a crowdfunding platform, which makes an investment in us more speculative.

We will conduct this offering primarily through a crowdfunding platform, which will be owned by a third party. Only a limited number of opportunity zone investments have been offered through the crowdfunding platforms prior to this offering. The success of this offering, and our ability to implement our business strategy, is dependent upon our ability to sell our shares to investors through the crowdfunding platform. If we are not successful in selling our shares through the crowdfunding platform, our ability to raise proceeds through this offering will be limited and we may not have adequate capital to implement our investment strategy.

If we do not successfully implement a liquidity transaction, you may have to hold your investment for an indefinite period.

Although we presently intend to complete a transaction providing liquidity to shareholders after approximately ten to twelve years from the closing of the offering, our corporate charter does not require our management to pursue such a liquidity transaction. Market conditions may delay the commencement of a liquidation or other type of liquidity transaction such as a merger or sale of assets, beyond ten to twelve years of the closing of the offering.

If our management does determine to pursue a liquidity transaction, we would be under no obligation to conclude the process within a set time. If we adopt a plan of liquidation, the timing of the sale of assets will depend on the equity value of securities and real estate, while factoring in financial markets, economic conditions in the areas in which investments are located, and the U.S. federal income tax effects on shareholders, that may prevail in the future. We cannot guarantee that we will be able to liquidate all assets. After we adopt a plan of liquidation, we would likely remain in existence until all our investments are liquidated. If we do not pursue a liquidity transaction, or delay such a transaction due to market conditions, your shares may continue to be illiquid and you may, for an indefinite period of time, be unable to convert your investment to cash easily and could suffer losses on your investment.

We have minimal operating capital, no significant assets and no revenue from operations.

We have minimal operating capital and for the foreseeable future will be dependent upon our ability to finance our operations from the sale of equity or other financing alternatives. There can be no assurance that we will be able to successfully raise operating capital. The failure to successfully raise operating capital, and the failure to attract qualified equity and real estate investment opportunities is dependent on several factors. A failure to mitigate these factors and to acquire sufficient investor purchase commitments, could result in our bankruptcy or other event which would have a material adverse effect on us and our shareholders. We have no significant assets or financial resources, so such adverse event could put your investment dollars at significant risk.

We rely on third-party banks and on third-party computer hardware and software. If we are unable to continue utilizing these services, our business and ability to service the corresponding project loans and equity investments may be adversely affected.

The company and the crowdfunding platform rely on third-party depository institutions to process our transactions, including payments of any corresponding loans and equity investments, processing of subscriptions under this offering and distributions to our shareholders. Under the Automated Clearing House (ACH) rules, if we experience chargebacks, we may be subject to sanctions and potentially disqualified from using the system to process payments. If the crowdfunding platform cannot continue to obtain such services elsewhere, or if it cannot transition to another processor quickly, our ability to process payments will suffer and your ability to conduct operations may be delayed or impaired.

As Internet commerce develops, federal and state governments may adopt new laws to regulate Internet commerce, which may negatively affect our business.

As Internet commerce continues to evolve, increasing regulation by federal and state governments becomes more likely. Our and the crowdfunding platform business could be negatively affected by the application of existing laws or the enactment of new laws applicable to our business. The cost to comply with such laws or regulations could be significant and would increase our operating expenses, which could negatively impact our ability to acquire expenses, which could negatively impact our ability to acquire real estate and equity investments in qualified opportunity zone businesses. In addition, federal and state governmental or regulatory agencies may decide to impose taxes on services provided over the Internet. These taxes could discourage the use of the Internet as a means of raising capital, which would adversely affect the viability of the offering.

Maintenance of our Investment Company Act exemption imposes limits on our operations, which may adversely affect our operations.

We intend to continue to conduct our operations so that neither we nor any of our affiliates is required to register as an investment company under the Investment Company Act. We anticipate that we will hold equity securities and real estate assets described below (i) directly, (ii) through wholly-owned subsidiaries, (iii) through majority-owned joint venture subsidiaries, and, (iv) to a lesser extent, through minority-owned joint venture subsidiaries. We intend, directly or through our affiliates, to originate, invest in and manage a diversified portfolio of opportunity zone real estate properties and businesses. We expect to use substantially all of the net proceeds from this offering to originate, acquire and structure a diversified portfolio of real estate properties.

The Investment Company Act defines a majority-owned subsidiary of a person as a company 50% or more of the outstanding voting securities of which are owned by such person, or by another company which is a majority-owned subsidiary of such person.

The Investment Company Act further defines voting security as any security any security presently entitling the owner or holder thereof to vote for the election of directors of a company.

We treat companies in which we may own at least a majority of the outstanding voting securities as majority owned subsidiaries. We also treat subsidiaries of which we or our wholly-owned or majority-owned subsidiary is the manager (in a manager- managed entity) or managing member (in a member-managed entity) or in which our agreement or the agreement of our wholly-owned or majority-owned subsidiary is required for all major decisions affecting the subsidiaries (referred to herein as "Controlled Subsidiaries"), as majority-owned subsidiaries even though none of the interests issued by such Controlled Subsidiaries meets the definition of voting securities under the Investment Company Act.

We reached our conclusion on the basis that the interests issued by the Controlled Subsidiaries are the functional equivalent of voting securities. We have not asked the SEC staff for concurrence of our analysis, our treatment of such interests as voting securities, or whether the Controlled Subsidiaries, or any other of our subsidiaries, may be treated in the manner in which we intend, and it is possible that the SEC staff could disagree with any of our determinations.

If the SEC staff were to disagree with our treatment of one or more companies as majority-owned subsidiaries, we would need to adjust our strategy and our assets. Any such adjustment in our strategy could have a material adverse effect on us.

Certain of our subsidiaries may rely on the exclusion provided by Section 3(c)(5)(C) under the Investment Company Act. Section 3(c)(5)(C) of the Investment Company Act is designed for entities “primarily engaged in the business of purchasing or otherwise acquiring mortgages and other liens on and interests in real estate.” This exclusion generally requires that at least 55% of the entity’s assets on an un-consolidated basis consist of qualifying real estate assets and at least 80% of the entity’s assets consist of qualifying real estate assets or real estate-related assets. These requirements limit the assets those subsidiaries can own and the timing of sales and purchases of those assets. To classify the assets held by our subsidiaries as qualifying real estate assets or real estate-related assets, we will rely on no-action letters and other guidance published by the SEC staff regarding those kinds of assets, as well as upon our analyses (in consultation with outside counsel) of guidance published with respect to other types of assets. There can be no assurance that the laws and regulations governing the Investment Company Act status of companies similar to ours, or the guidance from the SEC or its staff regarding the treatment of assets as qualifying real estate assets or real estate-related assets, will not change in a manner that adversely affects our operations. In fact, in August 2011, the SEC published a concept release in which it asked for comments on this exclusion from regulation. To the extent that the SEC staff provides more specific guidance regarding any of the matters bearing upon our exemption from the need to register or exclusion under the Investment Company Act, we may be required to adjust our strategy accordingly. Any additional guidance from the SEC staff could further inhibit our ability to pursue the strategies that we have chosen.

Furthermore, although we intend to monitor the assets of our subsidiaries regularly, there can be no assurance that our subsidiaries will be able to maintain their exclusion from registration. Any of the foregoing could require us to adjust our strategy, which could limit our ability to make certain investments or require us to sell assets in a manner, at a price or at a time that we otherwise would not have chosen.

This could negatively affect the value of our shares, the sustainability of our business model and our ability to make distributions.

Registration under the Investment Company Act would require us to comply with a variety of substantive requirements that impose, among other things:

- limitations on capital structure;
- restrictions on specified investments;
- restrictions on leverage or senior securities;
- restrictions on
- unsecured borrowings;
- prohibitions on transactions with affiliates; and
- compliance with reporting, record keeping, voting, proxy disclosure and other rules and regulations that would significantly increase our operating expenses. If we were required to register as an investment company but failed to do so, we could be prohibited from engaging

in our business, and criminal and civil actions could be brought against us. 'Registration with the SEC as an investment company would be costly, would subject us to a host of complex regulations and would divert attention from the conduct of our business, which could materially and adversely affect us. If we purchase or sell any assets to avoid becoming an investment company under the Investment Company Act, our net asset value, the amount of funds available for investment and our ability to pay distributions to our shareholders could be materially adversely affected.
