## Offering Statement

Respond to each question in each paragraph of this part. Set forth each question and any notes, but not any instructions thereto, in their entirety. If disclosure in response to any question is responsive to one or more other questions, it is not necessary to repeat the disclosure. If a question or series of questions is inapplicable or the response is available elsewhere in the Form, either state that it is inapplicable, include a cross reference to the responsive disclosure, or omit the question or series of questions.

Be very careful and precise in answering all questions. Give full and complete answers so that they are not misleading under the circumstances involved. Do not discuss any future performance or other anticipated event unless you have a reasonable basis to believe that it will actually occur within the foreseeable future. If any answer requiring significant information is materially inaccurate, incomplete or misleading, the Company, its management and principal shareholders may be liable to investors based on that information.

*To calculate total voting power, include all securities for which the person directly or indirectly has or shares the voting power, which includes the power to vote or to direct the voting of such securities. If the person has the right to acquire voting power of such securities within 60 days, including through the exercise of any option, warrant or right, the conversion of a security, or other arrangement, or if securities are held by a member of the family, through corporations or partnerships, or otherwise in a manner that would allow a person to direct or control the voting of the securities (or share in such direction or control — as, for example, a co-trustee) they should be included as being "beneficially owned." You should include an explanation of these circumstances in a footnote to the "Number of and Class of Securities Now Held." To calculate outstanding voting equity securities, assume all outstanding options are exercised and all outstanding convertible securities converted.*

#### BUSINESS AND ANTICIPATED BUSINESS PLAN

7. Describe in detail the business of the issuer and the anticipated business plan of the issuer.

For a description of our business and our business plan, please refer to the attached [Appendix A, Business Description & Plan](#)

*INSTRUCTION TO QUESTION 7: Wefunder will provide your company's Wefunder profile as an appendix (Appendix A) to the Form C in PDF format. The submission will include all Q&A items and "read more" links in an un-collapsed format. All videos will be transcribed.*

*This means that any information provided in your Wefunder profile will be provided to the SEC in response to this question. As a result, your company will be potentially liable for misstatements and omissions in your profile under the Securities Act of 1933, which requires you to provide material information related to your business and anticipated business plan. Please review your Wefunder profile carefully to ensure it provides all material information, is not false or misleading, and does not omit any information that would cause the information included to be false or misleading.*

#### RISK FACTORS

**The U.S. Securities and Exchange Commission does not pass upon the merits of any securities offered or the terms of the offering, nor does it pass upon the accuracy or completeness of any offering document or literature.**

**These securities are offered under an exemption from registration; however, the U.S. Securities and Exchange Commission has not made an independent determination that these securities are exempt from registration.**

8. Discuss the material factors that make an investment in the issuer speculative or risky:

Our business is subject to a wide range of laws and regulations for last mile mobility, many of which are evolving, and failure to comply with such laws and regulations could harm our business, financial condition, and results of operations.

Illegal, improper, or otherwise inappropriate activity of SunVessel users, whether or not occurring while utilizing our platform, could expose us to liability. Likewise, we could also be subject to claims from users or third parties who are harmed whether or not our platform is in use, which could adversely affect our business, brand, financial condition, and results of operations.

Our SunVessels and stations may experience quality problems from time to time, which could result in product recalls, injuries, litigation, enforcement actions, and regulatory proceedings and could adversely affect our business, brand, financial condition, and results of operations.

If we are unable to efficiently grow and further develop our SunVessel network, which may not grow as we expect or become profitable over time, and manage the related risks, our business, financial condition and results of operations could be adversely affected.

Users have multiple alternative transportation solutions which could adversely affect our business, financial condition, and results of operations. Many of these alternatives have greater financial, technical, marketing, research and development, manufacturing and other resources, greater name recognition, longer operating histories, or a larger user base than we do.

We primarily rely on Amazon Web Services to deliver our offerings to users on our platform, and any disruption of or interference with our use of Amazon Web Services could adversely affect our business, financial condition, and results of operations.

We rely on third-party manufacturer partners, and if we cannot manage our

relationships with such third parties and other risks related to our relationships, our business, financial condition, and results of operations could be adversely affected.

We rely on third-party payment processors to process payments made by our users, and if we cannot manage our relationships with such third parties and other payment-related risks, our business, financial condition, and results of operations could be adversely affected.

The Company may never receive a future equity financing or elect to convert the Securities upon such future financing. In addition, the Company may never undergo a liquidity event such as a sale of the Company or an IPO. If neither the conversion of the Securities nor a liquidity event occurs, the Purchasers could be left holding the Securities in perpetuity. The Securities have numerous transfer restrictions and will likely be highly illiquid, with no secondary market on which to sell them. The Securities are not equity interests, have no ownership rights, have no rights to the Company's assets or profits and have no voting rights or ability to direct the Company or its actions.

Our future success depends on the efforts of a small management team. The loss of services of the members of the management team may have an adverse effect on the company. There can be no assurance that we will be successful in attracting and retaining other personnel we require to successfully grow our business.

INSTRUCTION TO QUESTION 8: Avoid generalized statements and include only those factors that are unique to the issuer. Discussion should be tailored to the issuer's business and the offering and should not repeat the factors addressed in the legends set forth above. No specific number of risk factors is required to be identified.

### Management's Discussion and Analysis of Financial Condition and Results of Operations

You should read the following discussion and analysis of our financial condition and results of operations together with our financial statements and the related notes and other financial information included elsewhere in this offering. Some of the information contained in this discussion and analysis, including information regarding the strategy and plans for our business, includes forward-looking statements that involve risks and uncertainties. You should review the "Risk Factors" section for a discussion of important factors that could cause actual results to differ materially from the results described in or implied by the forward-looking statements contained in the following discussion and analysis.

We are the next generation transportation amenity, building smart furniture to seamlessly charge and intuitively connect compatible light electric vehicles inside the places people call home.

SunVessel's mission is to change the way we move. To do so we will be the leader in providing next generation transportation experiences. Our objective is to be the most profitable and differentiated company in our industry. We also want to continue building our team by providing highly skilled jobs in hardware, robotics, design, and software engineering to folks in our local markets.

Given the Company's limited operating history, the Company cannot reliably estimate how much revenue it will receive in the future, if any.

Since then, we have:

- Robust team of designers & engineers from MIT, FIU, U of M, and Babson College with decades of experience building world class experiences

## Related Party Transaction

Refer to Question 26 of this Form C for disclosure of all related party transactions.

## Liquidity & Capital Resources

To-date, the company has been financed with \$96,000 in SAFEs and a Reg CF raise for \$52,100 (April 2020).

We plan to use the proceeds as set forth in this Form C under "Use of Funds". We don't have any other sources of capital in the immediate future.

We will likely require additional financing in excess of the proceeds from the Offering in order to perform operations over the lifetime of the Company. We plan to raise capital in the next 12 months. Except as otherwise described in this Form C, we do not have additional sources of capital other than the proceeds from the offering. Because of the complexities and uncertainties in establishing a new business strategy, it is not possible to adequately project whether the proceeds of this offering will be sufficient to enable us to implement our strategy. This complexity and uncertainty will be increased if less than the maximum amount of securities offered in this offering is sold. The Company intends to raise additional capital in the future from investors. Although capital may be available for early-stage companies, there is no guarantee that the Company will receive any investments from investors.

## Runway & Short/Mid Term Expenses

SunVessel Corp. cash in hand is \$10,730, as of March 2021. Over the last three months, revenues have averaged \$0/month, cost of goods sold has averaged \$0/month, and operational expenses have averaged \$1,036/month, for an average burn rate of \$1,036 per month. Our intent is to be profitable in 24 months.

Over this period our operations have been concentrated on the research and development of our product and offering.

The company expects expenses to increase as we continue to develop our product and offering. No revenues are expected in the next 3-6 months.

We will also continue our fund raising and business development efforts which could serve as sources of capital.

*INSTRUCTIONS TO QUESTION 28: The discussion must cover each year for which financial statements are provided. For issuers with no prior operating history, the discussion should focus on financial milestones and operational, liquidity and other challenges. For issuers with an operating history, the discussion should focus on whether historical results and cash flows are representative of what investors should expect in the future. Take into account the proceeds of the offering and any other known or pending sources of capital. Discuss how the proceeds from the offering will affect liquidity, whether receiving these funds and any other additional funds is necessary to the viability of the business, and how quickly the issuer anticipates using its available cash. Describe the other available sources of capital to the business, such as lines of credit or required contributions by shareholders. References to the issuer in this Question 28 and these instructions refer to the issuer and its predecessors, if any.*
