FAN OWNED CLUB, INC

Notes to Financial Statements

NOTE 1 - SUMMARY OF ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

Organization

Fan Owned Club, Inc. (the "Company") was incorporated on March 6, 2019 as a Delaware Corporation for the general purpose of engaging in any lawful activity for which corporations may be organized under the law of the State of Delaware. The Company's year end is December 31.

The Company is formed to enable United States soccer fans to purchase a minority ownership interest in a European professional soccer club. The Company will provide investors with unique insider access to the management and operations of a professional team including opportunities to interact with front office staff, coaches and players, as well as the chance to benefit financially from the future successes of the club.

Basis of Presentation and Use of Estimates

The Company's financial statements are prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America. These require the use of estimates and assumptions that affect the assets and liabilities reported in the financial statements, as well as amounts included in the notes thereto, including discussion and disclosure of contingent liabilities. Although the Company uses its best estimates and judgments, actual results could differ from these estimates as future confirming events occur.

Equity Method of Accounting for Investments

The Company uses the equity method of accounting for investments in entities in which it has a controlling interest. Under the equity method of accounting, an investment in the common stock shall be shown in the balance sheet of the Company as a single amount. Also, the Company's share of earnings or losses from the investment shall be shown in the Statement of Operations as a single amount.

Deferred Syndication Expenses

Financial Accounting Standard Board Accounting Standards Codification number 340-10-S99-1, *Other Assets and Deferred Costs*, allows specific, incremental costs directly related to securities offerings to be deferred and charged against the gross proceed of the offering. The Company defers applicable syndication expenses based on this criteria. The Company will write off all deferred syndication expenses if a securities offering is aborted.

Fair Value Measurements

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability in the principal or most advantageous market in an orderly transaction between market participants on the measurement date. The Company determines the fair values of its assets and

liabilities based on a fair value hierarchy that includes 3 levels of inputs that may be used to measure fair value. The 3 levels are as follows:

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date.

Level 2 inputs are those other than quoted prices that are observable for the asset or liability, either directly or indirectly.

Level 3 inputs are unobservable inputs for the asset or liability. Unobservable inputs reflect the Company's own assumptions about the inferences that market participants would use in pricing the asset or liability (including assumptions about risk). Unobservable inputs are developed based on the best information available in the circumstances and may include the Company's own data.

Income Taxes

The Company is a C Corporation under the Internal Revenue Code and a similar section of the state code.

All income tax amounts reflect the use of the liability method under accounting for income taxes. Income taxes are provided for the tax effects of transactions reported in the financial statements and consist of taxes currently due plus deferred taxes arising primarily from differences between financial and tax reporting purposes. Current year expense represents the amount of income taxes paid, payable or refundable for the period.

Deferred income taxes, net of appropriate valuation allowances, are determined using the tax rates expected to be in effect when the taxes are actually paid. Valuation allowances are recorded against deferred tax assets when it is more likely than not that such assets will not be realized. When an uncertain tax position meets the more likely than not recognition threshold, the position is measured to determine the amount of benefit or expense to recognize in the financial statements.

The Company's income tax returns are subject to review and examination by federal, state and local governmental authorities. As of June 30, 2019, there is no year open to examination with federal, state and local governmental authorities. To the extent penalties and interest are incurred through an examination, they would be included in the income tax section of the statement of operations and comprehensive loss.

Recent Accounting Pronouncements

Fair Value Measurement - In August 2018, the FASB issued ASU 2018-13, *Disclosure Framework (Topic 820) - Changes to the Disclosure Requirement for Fair Value Measurement*. This guidance removes or modifies various disclosures relating to the activity or reconciliation of Level 1, Level 2 and Level 3 fair value measurements. It is effective for interim and annual periods beginning after December 15, 2019. Management will evaluate this guidance and the impact it will have on the financial statements.

NOTE 2 - RISKS AND UNCERTANTIES

The Company generated no revenue for the period ended December 31, 2019. The Company is currently in the process of securing investor capital and commencing operations.
