Introduction

Oomi, Inc. is the developer of UNOMi, a software service and platform for animators, video game developers, and other content creators that is designed to facilitate easier and faster production of animated content. The Company sells its suite of software products and features as a subscription, with customers able to purchase the product on a monthly or annual basis.

History

The Company was incorporated in Delaware on September 2, 2016 and was inspired by Obi Onyejekwe's desire to solve problems he observed in the animation and advertising industry. From 2016 to 2018, Obi led the development of UNOMi's 2D and 3D artificial intelligence (AI) lip-syncing software that is currently available on the market. The lip-syncing technology leverages advanced, AI voice recognition that automates many of the most time-consuming aspects of animation production. The voice recognition software understands human speech in multiple languages and allows animators to easily create the speech of multiple 2D and 3D animated characters.

In 2019 Obi and the team started creating a revolutionary markerless motion capture technology. The software will be ready in 2023. UNOMi's motion capture software will give content creators the ability to easily track human movement within their home or studio, which will eliminate the need to rent expensive motion capture studio space and equipment. They believe that large-scale animation studios will be able to drastically reduce costs, allowing them to create more content in a significantly shorter amount of time.

UNOMi started building its Avatar Creator plugin in 2021 and has officially launched the plugin, which is available on Adobe After Effects, Premiere, Final Cut, and Motion. The 3D plugin allows users to easily implement and animate 3D characters and objects quickly and easily. Each UNOMi software will be intuitive, which will eliminate a learning curve for most users.

The Offering

UNOMi is offering investment in Crowd Notes. A Crowd Note is similar to a Simple Agreement for Future Equity security where an investor makes a cash investment in our company but receives company stock at a later date only in connection with a specific event. The Crowd Note is not a debt instrument. The price of the Securities has been determined by the Company and does not necessarily bear any relationship to the assets, book value, or potential earnings of the Company or any other recognized criteria or value.

\$100.00 (Minimum Investment)	\$25,000 (Target Offering Amount)	\$618,000.00 (Maximum Offering Amount)	March 11, 2024 (Offering Deadline)
\$1.00 (Price per Security)	\$25,500 (Principal of Crowd Notes Outstanding if Target Offering Amount Reached)	\$630,360.00 (Principal of Crowd Notes Outstanding if Maximum Offering Amount Reached)	None (Voting Rights)

The amount of Securities outstanding in the table above is inclusive of the two percent (2%) of the total number of Crowd Notes sold by the Issuer in the Offering to which the Intermediary is entitled at the conclusion of the Offering.

RISK FACTORS

IN ADDITION TO THE RISKS DETAILED BELOW, BUSINESSES ARE OFTEN SUBJECT TO RISKS NOT FORESEEN OR FULLY APPRECIATED BY COMPANY MANAGEMENT. IT IS NOT POSSIBLE TO FORESEE ALL RISKS THAT MAY AFFECT US. MOREOVER, THE COMPANY CANNOT PREDICT WHETHER IT WILL SUCCESSFULLY EFFECTUATE THE COMPANY'S CURRENT BUSINESS PLAN. EACH PROSPECTIVE PURCHASER IS ENCOURAGED TO CAREFULLY ANALYZE THE RISKS AND MERITS OF AN INVESTMENT IN THE SECURITIES AND SHOULD TAKE INTO CONSIDERATION WHEN MAKING SUCH ANALYSIS, AMONG OTHER THINGS, THE RISK FACTORS DISCUSSED BELOW.

Risks Related to Our Business & Industry

We have a limited operating history upon which you can evaluate our performance, and accordingly, our prospects must be considered in light of the risks that any new company encounters.

We were organized in 2016 and began developing our first product in 2017. Accordingly, we have a limited history upon which an evaluation of our prospects and future performance can be made. Our proposed operations are subject to all business risks associated with new enterprises. The likelihood of our creation of a viable business must be considered in light of the problems, expenses, difficulties, complications, and delays frequently encountered in connection with the inception of a business, operation in a competitive industry, and the continued development of advertising, promotions, and a corresponding client base. In order to succeed, the Company will need to attract additional capital and additional personnel, and there can be no assurances that the Company will be able to attract the needed capital and personnel.

We have a history of losses. If we do not become profitable or maintain profitability in the future, we may not be able to continue to operate.

We have not been profitable in the past. We have not generated any significant revenues to date. Before we are able to generate any material level of revenues, we will incur significant additional losses. We expect to substantially increase our research and development and sales and marketing and general and administrative expenses. As a result, we will need to generate significant revenues to achieve and maintain profitability in the future. We cannot assure you that we will achieve profitable operations or maintain them if achieved. Failure to achieve or maintain profitability will materially and adversely affect our business.

There can be no assurance that the company will achieve profitability.

There can be no assurance that the Company will achieve profitability. The Company may depend upon funds raised from the sale of its stock and additional financings to finance its operations. The Company believes these amounts will be sufficient to finance its operations. However, no assurance can be given as to (i) the sufficiency of the funds raised from the Offering, (ii) the ability of the Company to raise or borrow additional funds, (iii) if the funds are available, that the terms will be acceptable by the Company, or (iv) the ability of the Company to attain its financial objectives.

If we cannot continue to develop, acquire, market and offer new products and services or enhancements to existing products and services that meet customer requirements, our operating results could suffer.

The process of developing and acquiring new technology products and services and enhancing existing offerings is complex, costly and uncertain. If we fail to anticipate customers' rapidly changing needs and expectations or adapt to emerging technological trends, our market share and results of operations could suffer. We must make long-term investments, develop, acquire or obtain appropriate intellectual property and commit significant resources before knowing whether our predictions will accurately reflect customer demand for our products and services. If we misjudge customer needs in the future, our new products and services may not succeed and our revenues and earnings may be harmed. Additionally, any delay in the development, acquisition, marketing or launch of a new offering or enhancement to an existing offering could result in customer attrition or impede our ability to attract new customers, causing a decline in our revenue, earnings or stock price and weakening our competitive position.

We offer our products on a variety of hardware platforms. Consumers continue to migrate from personal computers to tablet and mobile devices. If we cannot continue adapting our products to tablet and mobile devices, or if our competitors can adapt their products more quickly than us, our business could be harmed. Releases of new devices or operating systems may make it more difficult for our products to perform or may require significant costs in order for us to adapt our solutions to such devices or operating systems. These potential costs and delays could harm our business.

The Company's success depends on the experience and skill of the board of directors, its executive officers and key employees.

In particular, the Company is dependent on its CEO, Obi Onyejekwe. The Company has or intends to enter into an employment agreement with Obi Onyejekwe although there can be no assurance that it will do so or that they will continue to be employed by the Company for a particular period of time. The loss of either Obi Onyejekwe or any member of the

board of directors or executive officer could harm the Company's business, financial condition, cash flow and results of operations.

The Company has indicated that it has engaged in certain transactions with related persons.

Please see the section of this Memorandum entitled "Transactions with Related Persons and Conflicts of Interest" for further details.

Introduction of new technology could harm our business and results of operations.

The expectations and needs of technology consumers are constantly evolving. Our future success depends on a variety of factors, including our continued ability to innovate, introduce new products and services efficiently, enhance and integrate our products and services in a timely and cost-effective manner, extend our core technology into new applications, and anticipate emerging standards, business models, software delivery methods and other technological developments. Integration of our products and services with one another and other companies' offerings creates an increasingly complex ecosystem that is partly reliant on third parties. If any disruptive technology, or competing products, services or operating systems that are not compatible with our solutions, achieve widespread acceptance, our operating results could suffer and our business could be harmed.

We rely on various intellectual property rights, including patents and trademarks in order to operate our business.

Such intellectual property rights, however, may not be sufficiently broad or otherwise may not provide us a significant competitive advantage. In addition, the steps that we have taken to maintain and protect our intellectual property may not prevent it from being challenged, invalidated, circumvented or designed-around, particularly in countries where intellectual property rights are not highly developed or protected. In some circumstances, enforcement may not be available to us because an infringer has a dominant intellectual property position or for other business reasons, or countries may require compulsory licensing of our intellectual property. Our failure to obtain or maintain intellectual property rights that convey competitive advantage, adequately protect our intellectual property or detect or prevent circumvention or unauthorized use of such property, could adversely impact our competitive position and results of operations. We also rely on nondisclosure and noncompetition agreements with employees, consultants and other parties to protect, in part, trade secrets and other proprietary rights. There can be no assurance that these agreements will adequately protect our trade secrets and other proprietary rights and will not be breached, that we will have adequate remedies for any breach, that others will not independently develop substantially equivalent proprietary information or that third parties will not otherwise gain access to our trade secrets or other proprietary rights.

As we expand our business, protecting our intellectual property will become increasingly important. The protective steps we have taken may be inadequate to deter our competitors from using our proprietary information. In order to protect or enforce our patent rights, we may be required to initiate litigation against third parties, such as infringement lawsuits. Also, these third parties may assert claims against us with or without provocation. These lawsuits could be expensive, take significant time and could divert management's attention from other business concerns. The law relating to the scope and validity of claims in the technology field in which we operate is still evolving and, consequently, intellectual property positions in our industry are generally uncertain. We cannot assure you that we will prevail in any of these potential suits or that the damages or other remedies awarded, if any, would be commercially valuable.

The amount of capital the Company is attempting to raise in this Offering is not enough to sustain the Company's current business plan.

In order to achieve the Company's near and long-term goals, the Company will need to procure funds in addition to the amount raised in the Offering. There is no guarantee the Company will be able to raise such funds on acceptable terms or at all. If we are not able to raise sufficient capital in the future, we will not be able to execute our business plan, our continued operations will be in jeopardy and we may be forced to cease operations and sell or otherwise transfer all or substantially all of our remaining assets, which could cause an Investor to lose all or a portion of his or her investment.

Although dependent on certain key personnel, the Company does not have any key man life insurance policies on any such people.

The Company is dependent on Obi Onyejekwe in order to conduct its operations and execute its business plan; however, the Company has not purchased any insurance policies with respect to those individuals in the event of their death or disability. Therefore, if Obi Onyejekwe dies or becomes disabled, the Company will not receive any compensation to assist with such person's absence. The loss of such person could negatively affect the Company and its operations.

The development and commercialization of our products is highly competitive.

We face competition with respect to any products that we may seek to develop or commercialize in the future. Our competitors include major companies worldwide. Many of our competitors have significantly greater financial, technical and human resources than we have and superior expertise in research and development and marketing approved products and thus may be better equipped than us to develop and commercialize products. These competitors also compete with us in recruiting and retaining qualified personnel and acquiring technologies. Smaller or early-stage companies may also prove

to be significant competitors, particularly through collaborative arrangements with large and established companies. Accordingly, our competitors may commercialize products more rapidly or effectively than we are able to, which would adversely affect our competitive position, the likelihood that our products will achieve initial market acceptance and our ability to generate meaningful additional revenues from our products.

We have not prepared any audited financial statements.

Therefore, you have no audited financial information regarding the Company's capitalization or assets or liabilities on which to make your investment decision. If you feel the information provided is insufficient, you should not invest in the Company.

We are subject to income taxes as well as non-income based taxes, such as payroll, sales, use, value-added, net worth, property and goods and services taxes, in both the U.S. [and various foreign jurisdictions].

Significant judgment is required in determining our provision for income taxes and other tax liabilities. In the ordinary course of our business, there are many transactions and calculations where the ultimate tax determination is uncertain. Although we believe that our tax estimates are reasonable: (i) there is no assurance that the final determination of tax audits or tax disputes will not be different from what is reflected in our income tax provisions, expense amounts for non-income based taxes and accruals and (ii) any material differences could have an adverse effect on our financial position and results of operations in the period or periods for which determination is made.

We are not subject to Sarbanes-Oxley regulations and lack the financial controls and safeguards required of public companies.

We do not have the internal infrastructure necessary, and are not required, to complete an attestation about our financial controls that would be required under Section 404 of the Sarbanes-Oxley Act of 2002. There can be no assurance that there are no significant deficiencies or material weaknesses in the quality of our financial controls. We expect to incur additional expenses and diversion of management's time if and when it becomes necessary to perform the system and process evaluation, testing and remediation required in order to comply with the management certification and auditor attestation requirements.

We must comply with various laws and regulations. We rely heavily on our technology and intellectual property, but we may be unable to adequately or cost-effectively protect or enforce our intellectual property rights, thereby weakening our competitive position and increasing operating costs.

To protect our rights in our services and technology, we rely on a combination of copyright and trademark laws, patents, trade secrets, confidentiality agreements with employees and third parties, and protective contractual provisions. We also rely on laws pertaining to trademarks and domain names to protect the value of our corporate brands and reputation. Despite our efforts to protect our proprietary rights, unauthorized parties may copy aspects of our services or technology, obtain and use information, marks, or technology that we regard as proprietary, or otherwise violate or infringe our intellectual property rights. In addition, it is possible that others could independently develop substantially equivalent intellectual property. If we do not effectively protect our intellectual property, or if others independently develop substantially equivalent intellectual property, our competitive position could be weakened.

Effectively policing the unauthorized use of our services and technology is time-consuming and costly, and the steps taken by us may not prevent misappropriation of our technology or other proprietary assets. The efforts we have taken to protect our proprietary rights may not be sufficient or effective, and unauthorized parties may copy aspects of our services, use similar marks or domain names, or obtain and use information, marks, or technology that we regard as proprietary. We may have to litigate to enforce our intellectual property rights, to protect our trade secrets, or to determine the validity and scope of others' proprietary rights, which are sometimes not clear or may change. Litigation can be time consuming and expensive, and the outcome can be difficult to predict.

The Company could be negatively impacted if found to have infringed on intellectual property rights.

Technology companies, including many of the Company's competitors, frequently enter into litigation based on allegations of patent infringement or other violations of intellectual property rights. In addition, patent holding companies seek to monetize patents they have purchased or otherwise obtained. As the Company grows, the intellectual property rights claims against it will likely increase. The Company intends to vigorously defend infringement actions in court and before the U.S. International Trade Commission. The plaintiffs in these actions frequently seek injunctions and substantial damages. Regardless of the scope or validity of such patents or other intellectual property rights, or the merits of any claims by potential or actual litigants, the Company may have to engage in protracted litigation. If the Company is found to infringe one or more patents or other intellectual property rights, regardless of whether it can develop non-infringing technology, it may be required to pay substantial damages or royalties to a third-party, or it may be subject to a temporary or permanent injunction prohibiting the Company from marketing or selling certain products. In certain cases, the Company may consider the desirability of entering into licensing agreements, although no assurance can be given that such licenses can be obtained on acceptable terms or that litigation will not occur. These licenses may also significantly increase the Company's operating expenses.

Regardless of the merit of particular claims, litigation may be expensive, time-consuming, disruptive to the Company's operations and distracting to management. In recognition of these considerations, the Company may enter into arrangements to settle litigation. If one or more legal matters were resolved against the Company's consolidated financial statements for that reporting period could be materially adversely affected. Further, such an outcome could result in significant compensatory, punitive or trebled monetary damages, disgorgement of revenue or profits, remedial corporate measures or injunctive relief against the Company that could adversely affect its financial condition and results of operations.

We rely on agreements with third parties to provide certain services, goods, technology, and intellectual property rights necessary to enable us to implement some of our applications.

Our ability to implement and provide our applications and services to our clients depends, in part, on services, goods, technology, and intellectual property rights owned or controlled by third parties. These third parties may become unable to or refuse to continue to provide these services, goods, technology, or intellectual property rights on commercially reasonable terms consistent with our business practices, or otherwise discontinue a service important for us to continue to operate our applications. If we fail to replace these services, goods, technologies, or intellectual property rights in a timely manner or on commercially reasonable terms, our operating results and financial condition could be harmed. In addition, we exercise limited control over our third-party vendors, which increases our vulnerability to problems with technology and services those vendors provide. If the services, technology, or intellectual property of third parties were to fail to perform as expected, it could subject us to potential liability, adversely affect our renewal rates, and have an adverse effect on our financial condition and results of operations.

Indemnity provisions in various agreements potentially expose us to substantial liability for intellectual property infringement and other losses.

Our agreements with advertisers, advertising agencies, customers and other third parties may include indemnification provisions under which we agree to indemnify them for losses suffered or incurred as a result of claims of intellectual property infringement, damages caused by us to property or persons, or other liabilities relating to or arising from our products, services or other contractual obligations. The term of these indemnity provisions generally survives termination or expiration of the applicable agreement. Large indemnity payments would harm our business, financial condition and results of operations. In addition, any type of intellectual property lawsuit, whether initiated by us or a third party, would likely be time consuming and expensive to resolve and would divert management's time and attention.

Our ability to sell our services is dependent on the quality of our technical support services, and our failure to offer high quality technical support services could have an adverse effect on our sales and results of operations.

Once our services are deployed within our end-customers' operations, end-customers depend on our technical support services to resolve any issues relating to these products. If we do not effectively assist our customers in deploying these services, succeed in helping our customers quickly resolve post-deployment issues, and provide effective ongoing support, our ability to sell additional services to existing customers could be adversely affected and our reputation with potential customers could be damaged. As a result, our failure to maintain high quality support services would have an adverse effect on our business and results of operations.

If we fail to maintain or expand our relationships with our suppliers, we may not have adequate access to new or key technology necessary for our products, which may impair our ability to deliver leading-edge products.

In addition to the technologies we develop, our suppliers develop product innovations at our direction that are requested by our customers. Further, we rely heavily on our component suppliers, such as Apple and Adobe, to provide us with leading-edge components that conform to required specifications or contractual arrangements on time and in accordance with a product roadmap. If we are not able to maintain or expand our relationships with our suppliers or continue to leverage their research and development capabilities to develop new technologies desired by our customers, our ability to deliver leading-edge products in a timely manner may be impaired and we could be required to incur additional research and development expenses. Also, disruption in our supply chain or the need to find alternative suppliers could impact the costs and/or timing associated with procuring necessary products, components and services. Similarly, suppliers have operating risks that could impact our business. These risks could create product time delays, inventory and invoicing problems, staging delays, and other operational difficulties.

Our failure to deliver high quality server solutions could damage our reputation and diminish demand for our products, and subject us to liability.

Our customers require our products to perform at a high level, contain valuable features and be extremely reliable. The design of our server solutions is sophisticated and complex, and the process for manufacturing, assembling and testing our server solutions is challenging. Occasionally, our design or manufacturing processes may fail to deliver products of the quality that our customers require. For example, a vendor may provide us with a defective component that failed under certain heavy use applications. As a result, our product would need to be repaired. The vendor may agree to pay for the costs of the repairs, but we may incur costs in connection with the recall and diverted resources from other projects. New flaws

or limitations in our products may be detected in the future. Part of our strategy is to bring new products to market quickly, and first-generation products may have a higher likelihood of containing undetected flaws. If our customers discover defects or other performance problems with our products, our customers' businesses, and our reputation, may be damaged. Customers may elect to delay or withhold payment for defective or underperforming products, request remedial action, terminate contracts for untimely delivery, or elect not to order additional products. If we do not properly address customer concerns about our products, our reputation and relationships with our customers may be harmed. In addition, we may be subject to product liability claims for a defective product. Any of the foregoing could have an adverse effect on our business and results of operations.

If our customers fail to renew subscriptions in accordance with our expectations, our future revenue and operating results could suffer.

Our products involve subscription-based offerings pursuant to product and service agreements. Revenue from our subscription customers is generally recognized ratably over the term of their agreements, which are typically monthly or annually. Our customers have no obligation to renew their subscriptions for our services after the expiration of their initial subscription period, and customers may not renew their subscriptions at the same or higher level of service, for the same number of seats or for the same duration of time, if at all. Moreover, under certain circumstances, some of our customers have the right to cancel their agreements prior to the expiration of the terms. Our varied customer base combined with the flexibility we offer in the length of our subscription-based agreements complicates our ability to precisely forecast renewal rates. Therefore, we cannot provide assurance that we will be able to accurately predict future customer renewal rates.

Our customers' renewal rates may decline or fluctuate as a result of a number of factors, including their level of satisfaction with our services, our ability to continue enhancing features and functionality, the reliability (including uptime) of our subscription offerings, the prices of offerings and those offered by our competitors, the actual or perceived information security of our systems and services, decreases in the size of our customer base, reductions in our customers' spending levels or declines in customer activity as a result of economic downturns or uncertainty in financial markets, including as a result of the COVID-19 pandemic. If our customers do not renew their subscriptions or if they renew on terms less favorable to us, our revenue may decline.

Failure to obtain new clients or renew client contracts on favorable terms could adversely affect results of operations.

We may face pricing pressure in obtaining and retaining our clients. Our clients may be able to seek price reductions from us when they renew a contract, when a contract is extended, or when the client's business has significant volume changes. They may also reduce services if they decide to move services in-house. On some occasions, this pricing pressure results in lower revenue from a client than we had anticipated based on our previous agreement with that client. This reduction in revenue could result in an adverse effect on our business and results of operations.

Further, failure to renew client contracts on favorable terms could have an adverse effect on our business. Our contracts with clients generally run for several years and include liquidated damage provisions that provide for early termination fees. Terms are generally renegotiated prior to the end of a contract's term. If we are not successful in achieving a high rate of contract renewals on favorable terms, our business and results of operations could be adversely affected.

The products we sell are advanced, and we need to rapidly and successfully develop and introduce new products in a competitive, demanding and rapidly changing environment.

To succeed in our intensely competitive industry, we must continually improve, refresh and expand our product and service offerings to include newer features, functionality or solutions, and keep pace with price-to-performance gains in the industry. Shortened product life cycles due to customer demands and competitive pressures impact the pace at which we must introduce and implement new technology. This requires a high level of innovation by both our software developers and the suppliers of the third-party software components included in our systems. In addition, bringing new solutions to the market entails a costly and lengthy process, and requires us to accurately anticipate customer needs and technology trends. We must continue to respond to market demands, develop leading technologies and maintain leadership in analytic data solutions performance and scalability, or our business operations may be adversely affected.

We must also anticipate and respond to customer demands regarding the compatibility of our current and prior offerings. These demands could hinder the pace of introducing and implementing new technology. Our future results may be affected if our products cannot effectively interface and perform well with software products of other companies and with our customers' existing IT infrastructures, or if we are unsuccessful in our efforts to enter into agreements allowing integration of third-party technology with our database and software platforms. Our efforts to develop the interoperability of our products may require significant investments of capital and employee resources. In addition, many of our principal products are used with products offered by third parties and, in the future, some vendors of non-Company products may become less willing to provide us with access to their products, technical information and marketing and sales support. As a result of these and other factors, our ability to introduce new or improved solutions could be adversely impacted and our business would be negatively affected.

The market is competitive and our success is reliant upon our ability to keep up with rapid technological advances.

We operate in a highly competitive and rapidly changing marketplace with a variety of organizations that offer services competitive with those we offer. The markets for the Company's products and services are highly competitive, and the Company is confronted by aggressive competition in all areas of its business. These markets are characterized by frequent product introductions and rapid technological advances that have substantially increased the capabilities and use of mobile communication and media devices, personal computers, and other digital electronic devices. The Company's competitors may aggressively cut prices or lower their product margins to gain or maintain market share. Principal competitive factors important to the Company include price, product features, relative price/performance, product quality and reliability, design innovation, a strong third-party software and accessories ecosystem, marketing and distribution capability, service and support, and corporate reputation.

Industry consolidation may result in increased competition, which could result in a loss of customers or a reduction in revenue.

Some of our competitors have made or may make acquisitions or may enter into partnerships or other strategic relationships to offer more comprehensive services than they individually had offered or achieve greater economies of scale. In addition, new entrants not currently considered to be competitors may enter our market through acquisitions, partnerships or strategic relationships. We expect these trends to continue as companies attempt to strengthen or maintain their market positions. The potential entrants may have competitive advantages over us, such as greater name recognition, longer operating histories, more varied services and larger marketing budgets, as well as greater financial, technical and other resources. The companies resulting from combinations or that expand or vertically integrate their business to include the market that we address may create more compelling service offerings and may offer greater pricing flexibility than we can or may engage in business practices that make it more difficult for us to compete effectively, including on the basis of price, sales and marketing programs, technology or service functionality. These pressures could result in a substantial loss of our customers or a reduction in our revenue.

Our business could be negatively impacted by cyber security threats, attacks and other disruptions.

Like others in our industry, we continue to face advanced and persistent attacks on our information infrastructure where we manage and store various proprietary information and sensitive/confidential data relating to our operations. These attacks may include sophisticated malware (viruses, worms, and other malicious software programs) and phishing emails that attack our products or otherwise exploit any security vulnerabilities. These intrusions sometimes may be zero-day malware that are difficult to identify because they are not included in the signature set of commercially available antivirus scanning programs. Experienced computer programmers and hackers may be able to penetrate our network security and misappropriate or compromise our confidential information or that of our customers or other third-parties, create system disruptions, or cause shutdowns. Additionally, sophisticated software and applications that we produce or procure from third-parties may contain defects in design or manufacture, including "bugs" and other problems that could unexpectedly interfere with the operation of the information infrastructure. A disruption, infiltration or failure of our information infrastructure systems or any of our data centers as a result of software or hardware malfunctions, computer viruses, cyber attacks, employee theft or misuse, power disruptions, natural disasters or accidents could cause breaches of data security, loss of critical data and performance delays, which in turn could adversely affect our business.

An intentional or unintentional disruption, failure, misappropriation or corruption of our network and information systems could severely affect our business.

Such an event might be caused by computer hacking, computer viruses, worms and other destructive or disruptive software, "cyber attacks" and other malicious activity, as well as natural disasters, power outages, terrorist attacks and similar events. Such events could have an adverse impact on us and our customers, including degradation of service, service disruption. In addition, our future results could be adversely affected due to the theft, destruction, loss, misappropriation or release of confidential customer data or intellectual property. Operational or business delays may result from the disruption of network or information systems and the subsequent remediation activities. Moreover, these events may create negative publicity resulting in reputation or brand damage with customers.

If we do not respond to technological changes or upgrade our websites and technology systems, our growth prospects and results of operations could be adversely affected.

To remain competitive, we must continue to enhance and improve the functionality and features of our websites and technology infrastructure. As a result, we will need to continue to improve and expand our hosting and network infrastructure and related software capabilities. These improvements may require greater levels of spending than we have experienced in the past. Without such improvements, our operations might suffer from unanticipated system disruptions, slow application performance or unreliable service levels, any of which could negatively affect our reputation and ability to attract and retain customers and contributors. Furthermore, in order to continue to attract and retain new customers, we are likely to incur expenses in connection with continuously updating and improving our user interface and experience. We may face significant delays in introducing new services, products and enhancements. If competitors introduce new products and services using new technologies or if new industry standards and practices emerge, our existing websites and our proprietary technology and systems may become obsolete or less competitive, and our business may be harmed. In addition,

the expansion and improvement of our systems and infrastructure may require us to commit substantial financial, operational and technical resources, with no assurance that our business will improve.

Risks Related to Investment in our Securities

THE SECURITIES OFFERED INVOLVE A HIGH DEGREE OF RISK AND MAY RESULT IN THE LOSS OF YOUR ENTIRE INVESTMENT. ANY PERSON CONSIDERING THE PURCHASE OF THESE SECURITIES SHOULD BE AWARE OF THESE AND OTHER FACTORS SET FORTH IN THIS FORM C AND SHOULD CONSULT WITH HIS OR HER LEGAL, TAX, AND FINANCIAL ADVISORS PRIOR TO MAKING AN INVESTMENT IN THE SECURITIES. THE SECURITIES SHOULD ONLY BE PURCHASED BY PERSONS WHO CAN AFFORD TO LOSE ALL OF THEIR INVESTMENT.

Neither the Offering nor the Securities have been registered under federal or state securities laws, leading to an absence of certain regulation applicable to the Company.

No governmental agency has reviewed or passed upon this Offering, the Company or any Securities of the Company. The Company also has relied on exemptions from securities registration requirements under applicable state securities laws. Investors in the Company, therefore, will not receive any of the benefits that such registration would otherwise provide. Prospective investors must therefore assess the adequacy of disclosure and the fairness of the terms of this Offering on their own or in conjunction with their personal advisors.

No Guarantee of Return on Investment

There is no assurance that a Purchaser will realize a return on its investment or that it will not lose its entire investment. For this reason, each Purchaser should read the Form C and all Exhibits carefully and should consult with its own attorney and business advisor prior to making any investment decision.

Purchasers will be unable to declare the Security in “default” and demand repayment.

Unlike convertible notes and some other securities, the Securities do not have any “default” provisions upon which the Purchasers will be able to demand repayment of their investment. With respect to Purchasers who invest less than \$25,000 in the Securities, the Company has ultimate discretion as to whether or not to convert the Securities upon a future equity financing and such Purchasers have no right to demand such conversion. Only in limited circumstances, such as a liquidity event, may such Purchasers demand payment and even then, such payments will be limited to the amount of cash available to the Company.

The Crowd Notes will not be freely tradable until one year from the initial purchase date. Although the Crowd Notes may be tradable under federal securities law, state securities regulations may apply, and each Purchaser should consult with his, her or their attorney.

You should be aware of the long-term nature of this investment. There is not currently and likely will not in the future be a public market for the Crowd Notes. Because the Crowd Notes have not been registered under the Securities Act or under the securities laws of any state or non-United States jurisdiction, the Crowd Notes have transfer restrictions and cannot be resold in the United States except pursuant to Rule 501 of Regulation CF. It is not currently contemplated that registration under the Securities Act or other securities laws will be effected. Transfer of the Crowd Notes is also subject to the prior written approval of the Company, which may be given or withheld in the Company’s sole discretion. Limitations on the transfer of the Crowd Notes may also adversely affect the price that you might be able to obtain for the Crowd Notes in a private sale. Purchasers should be aware of the long-term nature of their investment in the Company. Each Purchaser in this Offering will be required to represent that it is purchasing the Securities for its own account, for investment purposes and not with a view to resale or distribution thereof.

There is no present market for the Securities, and we have arbitrarily set the price.

We have arbitrarily set the price of the Securities with reference to the general status of the securities market and other relevant factors. The Offering price for the Securities should not be considered an indication of the actual value of the Securities and is not based on our net worth or prior earnings. We cannot assure you that the Securities could be resold by you at the Offering price or at any other price.

You will not have a vote or influence on the management of the Company.

All decisions with respect to the management of the Company will be made exclusively by the officers, directors, managers or employees of the Company. You, as a Purchaser of Crowd Notes, will have no ability to vote on issues of Company management and will not have the right or power to take part in the management of the company and will not be represented on the board of directors or managers of the Company. Accordingly, no person should purchase a Security unless he or she is willing to entrust all aspects of management to the Company.

A majority of the Company is owned by a small number of owners.

Prior to the Offering, the current owners of the Company who own 20% or more of the Company’s outstanding equity currently beneficially own up to 76.6% of the Company’s equity. Subject to any fiduciary duties owed to our other owners or

investors under Delaware law, these owners may be able to exercise significant influence over matters requiring owner approval, including the election of directors or managers and approval of significant Company transactions, and will have significant control over the Company's management and policies. Some of these persons may have interests that are different from yours. For example, these owners may support proposals and actions with which you may disagree. The concentration of ownership could delay or prevent a change in control of the Company or otherwise discourage a potential acquirer from attempting to obtain control of the Company, which in turn could reduce the price potential investors are willing to pay for the Company. In addition, these owners could use their voting influence to maintain the Company's existing management, delay or prevent changes in control of the Company, or support or reject other management and board proposals that are subject to owner approval.

The Company may never elect to convert the Securities or undergo a liquidity event.

The Company may never receive a future equity financing or, with respect to those Purchasers who invest less than \$25,000, elect to convert the Securities upon such future financing. In addition, the Company may never undergo a liquidity event such as a sale of the Company or an IPO. If neither the conversion of the Securities nor a liquidity event occurs, the Purchasers could be left holding the Securities in perpetuity. The Securities have numerous transfer restrictions and will likely be highly illiquid, with no secondary market on which to sell them. The Securities are not equity interests, have no ownership rights, have no rights to the Company's assets or profits and have no voting rights or ability to direct the Company or its actions.

Upon conversion of the Crowd Notes, Purchasers who are not "Major Investors" will grant a proxy to vote their underlying securities to the Intermediary or its affiliate, and, thus, will not have the right to vote on any matters coming before the shareholders of the Company for a vote. By granting this proxy you are giving up your right to vote on important matters, including significant corporate actions like mergers, amendments to our certificate of incorporation, a liquidation of our company and the election of our directors.

Upon conversion of the Crowd Notes and by virtue of a provision contained in the Crowd Notes, if you are not a Major Investor, that is, an investor who has purchased at least \$25,000 in principal amount of the Crowd Notes, you will grant a proxy to the intermediary or its affiliate to vote the underlying securities that you will acquire upon conversion on all matters coming before the shareholders for a vote. The intermediary does not have any fiduciary duty to you to vote shares in a manner that is in your best interests. Accordingly, the intermediary may vote its proxy in a manner that may not be in the best interests of you as a security holder. For example, the intermediary may vote the proxy in favor of an amendment to our charter that adversely affects the rights of the holders of your class of securities in order to allow for a new investment to occur where the new investor requires senior rights.

Affiliates of the Company, including officers, directors and existing shareholders of the Company, may invest in this Offering and their funds will be counted toward the Company achieving the Minimum Amount.

There is no restriction on affiliates of the Company, including its officers, directors and existing shareholders, investing in the Offering. As a result, it is possible that if the Company has raised some funds, but not reached the Minimum Amount, affiliates can contribute the balance so that there will be a closing. The Minimum Amount is typically intended to be a protection for investors and gives investors confidence that other investors, along with them, are sufficiently interested in the Offering and the Company and its prospects to make an investment of at least the Minimum Amount. By permitting affiliates to invest in the offering and make up any shortfall between what non-affiliate investors have invested and the Minimum Amount, this protection is largely eliminated. Investors should be aware that no funds other than their own and those of affiliates investing along with them may be invested in this Offering.

The Company has the right to conduct multiple closings during the Offering.

If the Company meets certain terms and conditions an intermediate close of the Offering can occur, which will allow the Company to draw down on a portion of the proceeds of the offering committed and captured during the relevant period. The Company may choose to continue the Offering thereafter. Purchasers should be mindful that this means they can make multiple investment commitments in the offering, which may be subject to different cancellation rights. For example, if an intermediate close occurs and later a material change occurs as the Offering continues, Purchasers previously closed upon will not have the right to re-confirm their investment as it will be deemed completed.

The Company has the right to extend the Offering deadline. The Company has the right to end the Offering early.

The Company may extend the Offering deadline beyond what is currently stated herein. This means that your investment may continue to be held in escrow while the Company attempts to raise the Target Amount even after the Offering deadline stated herein is reached. While you have the right to cancel your investment in the event the Company extends the Offering, if you choose to reconfirm your investment, your investment will simply be held until such time as the new Offering deadline is reached without the Company receiving the Target Amount, at which time it will be returned to you without interest or deduction, or the Company receives the Target Amount, at which time it will be released to the Company to be used as set forth herein. Upon or shortly after release of such funds to the Company, the Securities will be issued and distributed to you.

The Company may also end the Offering early; if the Offering reaches its target Offering amount after 30-calendar days but before the deadline, the Company can end the Offering with five business days' notice. This means your failure to participate in the Offering in a timely manner, may prevent you from being able to participate – it also means the Company may limit the amount of capital it can raise during the Offering by ending it early.

This information involves a number of assumptions and limitations, and you are cautioned not to give undue weight to these estimates. The industry in which we operate is subject to a high degree of uncertainty and risk due to a variety of factors, including those described in the section titled “Risk Factors.”

THE COMPANY

Business & Anticipated Business Plan

*Purchasers are encouraged to review Exhibit B carefully to learn more about the business of the Company, its industry, and its future plans and prospects. **Exhibit B** is incorporated by reference into this Form C.*

California-based UNOMi is a software service for animators, content creators, and video game developers located within the global animation market, encompassing offerings such as software and services and product types like 2D Animation, 3D Animation, Motion graphics, and Stop Motion. We have a suite of software products that we sell on a monthly or annual subscription basis via our website and other channels. Our software is designed to enable users to produce animated content more efficiently.

The Company was incorporated in Delaware on September 2, 2016 and was inspired by Obi Onyejekwe's desire to solve problems he observed in the animation and advertising industry. From 2016 to 2018, Obi led the development of UNOMi's 2D and 3D artificial intelligence (AI) lip-syncing software that is currently available on the market. The lip-syncing technology leverages advanced, AI voice recognition that automates many of the most time-consuming aspects of animation production. The voice recognition software understands human speech in multiple languages and allows animators to easily create the speech of multiple 2D and 3D animated characters.

In 2019 Obi and the team started creating a revolutionary markerless motion capture technology. The software will be ready in 2023. UNOMi's motion capture software will give content creators the ability to easily track human movement within their home or studio, which will eliminate the need to rent expensive motion capture studio space and equipment. They believe that large-scale animation studios will be able to drastically reduce costs, allowing them to create more content in a significantly shorter amount of time.

UNOMi started building its Avatar Creator plugin in 2021 and has officially launched the plugin, which is available on Adobe After Effects, Premiere, Final Cut, and Motion. The 3D plugin allows users to easily implement and animate 3D characters and objects quickly and easily. Each UNOMi software will be intuitive, which will eliminate a learning curve for most users.

UNOMi leverages advanced voice recognition and motion capture technology to automate many aspects of animation production. Our voice recognition software understands human speech in multiple languages. This allows animators to easily create the speech of multiple two-dimensional and three-dimensional animated characters. UNOMi also released an augmented reality (AR)/virtual reality (VR), 3D object plugin for Adobe and Final Cut, called Avatar Creator. Avatar Creator is designed to facilitate the creation and animation of 3D characters and aims to offer a user-friendly experience without the need for special equipment or training. By leveraging our technology, large-scale animation studios may be able to reduce production costs and times, allowing them to create more content in a shorter amount of time.

UNOMi plans to expand on its suite of products and create features that enable customers to easily create content. We plan to develop additional tools for our product. One such anticipated development would allow users to track human movement from a pre-recorded video. UNOMi's upcoming motion capture software, which is set to be released in October 2023, is engineered to give content creators the ability to easily track human movement within their home or studio, eliminating the need to rent expensive motion capture studio space and equipment. UNOMi also has plans to release an update for its 2D Lip Sync product in October 2023.

The Company's primary competitors are Unity, Genies, RADiCAL, DeepMotion, and Reallusion. UNOMi stands out as an AI-driven animation software provider, emphasizing the creation of comprehensive digital personas, especially through its advanced lip-syncing applications. While Unity dominates with its 3D content creation tools and Genies focuses on digital avatars, especially for celebrities, RADiCAL brings AI-powered 3D motion capture to the table. Meanwhile, DeepMotion specializes in Motion Intelligence, and Reallusion offers a diverse suite of animation tools. UNOMi's unique selling point is its user-centric design, eliminating the need for specialized equipment and offering compatibility with popular software platforms. However, to maintain its market position, continuous innovation and adaptation to rapid technological shifts are imperative for UNOMi.

Indemnification is authorized by the Company to directors, officers or controlling persons acting in their professional capacity pursuant to Delaware law. Indemnification includes expenses such as attorney's fees and, in certain circumstances, judgments, fines and settlement amounts actually paid or incurred in connection with actual or threatened actions, suits or proceedings involving such person, except in certain circumstances where a person is adjudged to be guilty of gross negligence or willful misconduct, unless a court of competent jurisdiction determines that such indemnification is fair and reasonable under the circumstances.

DISCUSSION & ANALYSIS OF FINANCIAL CONDITION & RESULTS OF OPERATIONS

Please also see the “ANNUAL REPORT DISCLOSURE INFORMATION” within this Form C and the financial statements attached hereto as Exhibit A. The financial statements are an important part of this Form C and should be reviewed in their entirety.

Results of Operations

We are currently focusing on generating revenue from our portfolio of products as well as making minor updates to our software as needed. We are not certain when or if we will generate profits in the future and intend to devote our resources to marketing and sales in the near future.

The Company does not expect to achieve profitability in the next twelve (12) months and intends to focus on the following: our go to market strategy, hiring out a sales team, developing relationships among influential members of the animation community, and software maintenance.

Material Changes and Trends

The Company has not observed any material changes or trends in its financial condition or results of operations during the time period subsequent to the period for which financial statements have been provided.

Liquidity and Capital Resources

The Offering proceeds are essential to our operations. We plan to use the proceeds as set forth under "Use of Proceeds", which is an indispensable element of our business strategy. The Offering proceeds may have an effect on our liquidity, as we currently have minimal cash on hand which will be augmented by the Offering proceeds and used to execute our business strategy.

Capital Expenditures and Other Obligations

The Company does not intend to make any material capital expenditures in the future.

THE OFFERING

The Company is offering up to 618,000 in principal amount of Crowd Notes for up to \$618,000.00. The Company is attempting to raise a minimum amount of \$25,000.00 in this Offering (the "Minimum Amount"). The Company must receive commitments from investors in an amount totaling the Minimum Amount by March 11, 2024 (the "Offering Deadline") in order to receive any funds. If the sum of the investment commitments does not equal or exceed the Minimum Amount by the Offering Deadline, no Securities will be sold in the Offering, investment commitments will be cancelled and committed funds will be returned to potential investors without interest or deductions. The Company has the right to extend the Offering Deadline at its discretion. The Company will accept investments in excess of the Minimum Amount up to \$618,000.00 (the "Maximum Amount") and the additional Securities will be allocated on a At the Company's discretion.

The price of the Securities does not necessarily bear any relationship to the Company's asset value, net worth, revenues or other established criteria of value, and should not be considered indicative of the actual value of the Securities.

In order to purchase the Securities you must make a commitment to purchase by completing the Subscription Agreement. Purchaser funds will be held in escrow with Silicon Valley Bank, a division of First Citizens Bank & Trust Company, until the Minimum Amount of investments is reached. Purchasers may cancel an investment commitment until 48 hours prior to the Offering Deadline or the Closing, whichever comes first using the cancellation mechanism provided by the Intermediary. The Company will notify Purchasers when the Minimum Amount has been reached. If the Company reaches the Minimum Amount prior to the Offering Deadline, it may close the Offering at least five (5) days after reaching the Minimum Amount and providing notice to the Purchasers. If any material change (other than reaching the Minimum Amount) occurs related to the Offering prior to the Offering Deadline, the Company will provide notice to Purchasers and receive reconfirmations from Purchasers who have already made commitments. If a Purchaser does not reconfirm his or her investment commitment after a material change is made to the terms of the Offering, the Purchaser's investment commitment will be cancelled and the committed funds will be returned without interest or deductions.

In the event that \$75,000 in investments is committed and received by the escrow agent and more than thirty (30) days remain before the Offering Deadline, the Company may conduct the first of multiple closings of the Offering (an "Intermediate Close"), provided all investors receive notice that an Intermediate Close will occur and funds will be released to the Company, at least five (5) business days prior to the Intermediate Close (absent a material change that would require an extension of the offering and reconfirmation of the investment commitment). Investors who committed on or before such notice will have until 48 hours before the Intermediate Close to cancel their investment commitment.

In the event the Company does conduct the first of multiple closes, the Company agrees to only withdraw \$75,000 from escrow and will only conduct the Intermediate Close if more than thirty (30) days remain before the Offering Deadline. The Company may only conduct another Intermediate Close before the Offering Deadline if: (i) the amount of investment commitments made and received in escrow exceeds \$125,000 since the time of the last Intermediate Close; and (ii) more than thirty (30) days remain before the Offering Deadline.

If a Purchaser does not cancel an investment commitment before an Intermediate Close or before the Offering Deadline, the funds will be released to the Company upon closing of the Offering and the Purchaser will receive the Securities in exchange for his or her investment. Any Purchaser funds received after the initial closing will be released to the Company upon a subsequent closing, and the Purchaser will receive Securities in exchange for his or her investment as soon as practicable thereafter.

The Company agrees to return all funds to investors in the event a Form C-W is ultimately filed in relation to this Offering, regardless of any subsequent closes.

Subscription Agreements are not binding on the Company until accepted by the Company, which reserves the right to reject, in whole or in part, in its sole and absolute discretion, any subscription. If the Company rejects all or a portion of any subscription, the applicable prospective Purchaser's funds will be returned without interest or deduction.

The price of the Securities was determined arbitrarily. The minimum amount that a Purchaser may invest in the Offering is \$100.00.

The Offering is being made through MicroVenture Marketplace, Inc., the Intermediary. The following two fields set forth the compensation being paid in connection with the Offering.

Commission/Fees

At the conclusion of the Offering, the Issuer shall pay to the Intermediary a fee consisting of five percent (5%) commission based on the amount of investments raised in the Offering and paid upon distribution of funds from escrow at the time of

closing. The Issuer shall also pay an escrow fee equal to the greater of \$1,000 or 35 basis points of the total amount raised, whichever is greater, upon distribution of funds from escrow at the time of closing.

Stock, Warrants and Other Compensation

The Intermediary will be entitled to receive a number of Crowd Notes of the issuer that is equal to two percent (2%) of the total number of Crowd Notes sold by the Issuer in the Offering related to the purchase and sale of the Securities.

Transfer Agent and Registrar

The Company will act as transfer agent and registrar for the Securities.

THE SECURITIES

We request that you review the Crowd Note and Subscription Agreement in conjunction with the following summary information.

See the “Company Securities Issued & Outstanding” section for details concerning our authorized capitalization.

Definitions

Crowd Note. A Crowd Note is similar to a SAFE (Simple Agreement for Future Equity) security where an investor makes a cash investment in our company but gets company stock at a later date in connection with a specific event. Although the security is called a Crowd Note, the Crowd Note is not a debt instrument.

Discount n/a

Interest Rate n/a

Valuation Cap \$4 million for first \$250,000 invested, \$6 million thereafter

Major Investor. An investor who invests at least \$25,000 in this Offering.

Qualified Equity Financing. The first sale (or series of related sales) by us of our preferred stock following the closing of this Offering from which we receive gross proceeds of not less than \$618,000.00 (excluding the aggregate amount of securities converted into preferred stock in connection with such sale (or series of related sales)).

Conversion Price. The lower of:

(A) the product of (1) one minus any applicable Discount, and (2) the price paid per share for preferred stock by the investors in the Qualified Equity Financing, or

(B) the quotient resulting from dividing (1) the Valuation Cap by (2) the total number of our shares of capital stock that are outstanding on a fully diluted basis (assuming for this purpose the exercise, exchange, or conversion of all securities exercisable or exchangeable for, or convertible into, our capital stock), immediately prior to the closing of the Qualified Equity Financing.

Conversion Shares. Shares of our preferred stock that are issued in connection with the Qualified Equity Financing.

Shadow Series. A series of our preferred stock that is identical in all respects to the shares of preferred stock issued in the Qualified Equity Financing (e.g., if the Company sells Series A Preferred Stock in the Qualified Equity Financing, the shadow series would be Series A-1 Preferred Stock), except that the liquidation preference per share of the shadow series shall equal the Conversion Price and the following additional differences will apply:

(i) shadow series shareholders will grant their vote on any matter that is submitted to a vote or for the consent of the stockholders of our company (except for on matters required by law) by irrevocable proxy; and

(ii) shadow series shareholders will receive quarterly business updates from the company through the Intermediary’s platform but will have no additional information or inspection rights (except with respect to such rights which are required by law).

Corporate Transaction. The:

(i) closing of the sale, transfer, or other disposition of all or substantially all of our assets,

(ii) consummation of the merger or consolidation of our company with or into another entity (except a merger or consolidation in which the holders of capital stock of our company immediately prior to such merger or consolidation continue to hold at least 50% of the voting power of the capital stock of our company or the surviving or acquiring entity),

(iii) closing of the transfer (whether by merger, consolidation or otherwise), in one transaction or a series of related transactions, to a person or group of affiliated persons (other than an underwriter of our securities), of securities of our company if, after such closing, such person or group of affiliated persons would hold 50% or more of the outstanding voting stock of our company (or the surviving or acquiring entity), or

(iv) initial public offering, liquidation, dissolution or winding up of our company; provided, however, that a transaction shall not constitute a Corporate Transaction if its sole purpose is to change the state of our incorporation or to create a holding company that will be owned in substantially the same proportions by the persons who held our securities immediately prior to such transaction.

Outstanding Principal. The price paid for the Crowd Note plus any unpaid accrued interest.

Events Triggering Conversion of Crowd Notes

If you are a Major Investor, then the specified event upon which the Crowd Note would convert into capital stock of our company is a Qualified Equity Financing.

If you are not a Major Investor, then the Crowd Note will only convert into capital stock of our company upon the earlier of (i) our company's election to convert your Crowd Note, or (ii) a Corporate Transaction that occurs after a Qualified Equity Financing.

If the Crowd Note converts into equity in connection with a Qualified Equity Financing, then we will convert the Crowd Note into a number of Conversion Shares equal to the quotient obtained by dividing the outstanding principal amount of the Crowd Note by the Conversion Price.

The issuance of Conversion Shares will be on the same terms and conditions applicable to the stock sold in the Qualified Equity Financing. However, any investor who is not a Major Investor will receive a Shadow Series of preferred stock upon conversion of such investor's Crowd Note.

Corporate Transaction and Corporate Transaction Payment

In the event of a Corporate Transaction, you will receive an amount equal to two times (2X) your Outstanding Principal. If there are not enough funds to pay you and other Crowd Note investors in full, then proceeds from the respective transaction will be distributed with equal priority and pro rata among the Crowd Note investors in proportion to their Outstanding Principal.

Termination of Crowd Note

The Crowd Notes will terminate upon the earlier of: (a) a conversion of the entire Outstanding Principal under the Crowd Notes into Conversion Shares; or (b) the payment of amounts due to the investor pursuant to a Corporate Transaction.

Transfer Restrictions

Any Securities sold pursuant to Regulation CF being offered may not be transferred by any Purchaser of such Securities during the one-year holding period beginning when the Securities were issued, unless such Securities are transferred: 1) to the Company, 2) to an accredited investor, as defined by Rule 501(d) of Regulation D promulgated under the Securities Act, 3) as part of an IPO or 4) to a member of the family of the Investor or the equivalent, to a trust controlled by the Purchaser, to a trust created for the benefit of a member of the family of the Investor or the equivalent, or in connection with the death or divorce of the Investor or other similar circumstances. "Member of the family" as used herein means a child, stepchild, grandchild, parent, stepparent, grandparent, spouse or spousal equivalent, sibling, mother-in-law, father-in-law, daughter-in-law, son-in-law, sister-in-law, brother-in-law, and includes adoptive relationships. Remember that although you may legally be able to transfer the Securities, you may not be able to find another party willing to purchase them.

Prior to making any transfer of the Securities or any Securities into which they are convertible, such transferring Purchaser must either make such transfer pursuant to an effective registration statement filed with the SEC or provide the Company with an opinion of counsel stating that a registration statement is not necessary to effect such transfer.

In addition, the Purchaser may not transfer the Securities or any Securities into which they are convertible to any of the Company's competitors, as determined by the Company in good faith.

IPO Lock Up

Furthermore, upon the event of an initial public offering, the equity interest into which the Crowd Notes are converted will be subject to a lock-up period and may not be sold for up to 180 days following such initial public offering.

No Voting Rights, No Shareholders Agreement, No Anti-Dilution Rights

The Crowd Notes do not have any voting rights. Further, upon conversion of the Crowd Notes into Conversion Shares, shadow series shareholders shall grant their vote on any matter that is submitted to a vote or for the consent of the members of the Company (except for on matters required by law) by irrevocable proxy.

The Company does not have any shareholder/equity holder agreements in place.

The Securities do not have anti-dilution rights.

Other Material Terms

The Company does not have the right or the obligation to repurchase the Securities.

USE OF PROCEEDS

UNOMi plans to use proceeds from the Offering for additional working capital required for marketing, advertising, expanding its sales team, software maintenance, and legal expenditures, all of which are necessary to continue operations, enhance product offerings, strengthen customer relationships, and navigate the complexities of the evolving animation industry.

The percentage allocated to each Company initiative may vary depending on proceeds raised.

A review includes primarily applying analytical procedures to management's financial data and making inquiries of Company management. Our responsibility is to conduct the review engagement in accordance with Statements on Standards for Accounting and Review Services promulgated by the Accounting and Review Services Committee of the AICPA. Those standards require us to perform procedures to obtain limited assurance as a basis for reporting whether we are aware of any material modifications that should be made to the financial statements for them to be in accordance with accounting principles generally accepted in the United States of America. We believe that the results of our procedures provide a reasonable basis for our conclusion.

Based on our review, we are not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in accordance with accounting principles generally accepted in the United States of America.

Emphasis of Matter Regarding Going Concern

As discussed in Note 8, certain conditions indicate substantial doubt that the Company will be able to continue as a going concern. The accompanying financial statements do not include any adjustments that might be necessary should the Company be unable to continue as a going concern. Management has evaluated these conditions and plans to generate revenues and raise capital as needed to satisfy its capital needs.

Oomi, Inc.
Notes to the Unaudited Financial Statements
December 31st, 2022
\$USD

NOTE 1 – ORGANIZATION AND NATURE OF ACTIVITIES

Oomi, Inc. (“the Company”) dba UNOMI was formed in Delaware on September 9th, 2016. The Company is a SaaS for animators and video game developers. The Company leverages advanced, patent-pending voice recognition and motion capture technology that automates a lot of the most time-consuming aspects of animation production. Our voice recognition software understands human speech in multiple languages. This allows animators to easily create the speech of multiple 2D and 3D animated characters and for some, the Company gives them the ability to create content on a daily basis. The Company’s motion capture software will give content creators the ability to easily track human movement within their home or studio, which will eliminate the need to rent expensive motion capture studio space and equipment. Large-scale animation studios will be able to drastically reduce costs allowing them to create more content in a significantly shorter amount of time. The Company will also be releasing an Augmented Reality and VR, 3D object plugin for Adobe software which will allow users to easily implement and animate 3D objects quickly and easily. Each of the Company’s software will be intuitive, which will eliminate a learning curve for most users.

The Company will conduct a crowdfunding campaign under regulation CF in 2023 to raise operating capital.

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

Our financial statements are prepared in accordance with U.S. generally accepted accounting principles (“GAAP”). Our fiscal year ends on December 31. The Company has no interest in variable interest entities and no predecessor entities.

Use of Estimates and Assumptions

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and Cash Equivalents

Cash and cash equivalents include all cash balances, and highly liquid investments with maturities of three months or less when purchased.

Fair Value of Financial Instruments

ASC 820 “*Fair Value Measurements and Disclosures*” establishes a three-tier fair value hierarchy, which prioritizes the inputs in measuring fair value. The hierarchy prioritizes the inputs into three levels based on the extent to which inputs used in measuring fair value are observable in the market.

These tiers include:

Level 1: defined as observable inputs such as quoted prices in active markets;

Level 2: defined as inputs other than quoted prices in active markets that are either directly or indirectly observable; and

Level 3: defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions.

Concentrations of Credit Risks

The Company's financial instruments that are exposed to concentrations of credit risk primarily consist of its cash and cash equivalents. The Company places its cash and cash equivalents with financial institutions of high credit worthiness. The Company's management plans to assess the financial strength and credit worthiness of any parties to which it extends funds, and as such, it believes that any associated credit risk exposures are limited.

Revenue Recognition

The Company recognizes revenue from the sale of products and services in accordance with ASC 606, "Revenue Recognition" following the five steps procedure:

- Step 1: Identify the contract(s) with customers
- Step 2: Identify the performance obligations in the contract
- Step 3: Determine the transaction price
- Step 4: Allocate the transaction price to performance obligations
- Step 5: Recognize revenue when or as performance obligations are satisfied

The Company plans to generate revenue as a SaaS model. There will be an annual and monthly subscription model for all three of the Company's software applications. Monthly fees will range from \$18.50 to \$24.60 a month, per seat and annual fees will be an estimation of \$155 to \$206 a year per seat. The Company's primary performance obligation will be to maintain an acceptable level of software uptime for users over the subscription period and revenue will be recognized over the life of the subscription as performance obligations are satisfied.

The Company also plans to generate revenue using a plugin for Adobe and Final cut that is sold for \$299. The Company's performance obligation will be the delivery of products. Revenue will be recognized at the time of delivery.

Accounts Receivable

Trade receivables due from customers are uncollateralized customer obligations due under normal trade terms. Trade receivables are stated at the amount billed to the customer. Payments of trade receivables are allocated to the specific invoices identified on the customer's remittance advice or, if unspecified, are applied to the earliest unpaid invoices. Payments are generally collected upfront, but some of the merchants that products are sold through have a delay between collecting from the customer and sending to the Company.

The Company estimates an allowance for doubtful accounts based upon an evaluation of the current status of receivables, historical experience, and other factors as necessary. It is reasonably possible that the Company's estimate of the allowance for doubtful accounts will change.

Advertising Costs

Advertising costs associated with marketing the Company's products and services are generally expensed as costs are incurred.

General and Administrative

General and administrative expenses consist of payroll and related expenses for employees and independent contractors involved in general corporate functions, including accounting, finance, tax, legal, business development, and other miscellaneous expenses.

Equity Based Compensation

The Company accounts for stock options issued to employees under ASC 718 (Stock Compensation). Under ASC 718, share-based compensation cost to employees is measured at the grant date, based on the estimated fair value of

the award, and is recognized as an item of expense ratably over the employee's requisite vesting period. The Company has elected early adoption of ASU 2018-07, which permits measurement of stock options at their intrinsic value, instead of their fair value. An option's intrinsic value is defined as the amount by which the fair value of the underlying stock exceeds the exercise price of an option. In certain cases, this means that option compensation granted by the Company may have an intrinsic value of \$0.

The Company measures compensation expense for its non-employee stock-based compensation under ASC 505 (Equity). The fair value of the option issued or committed to be issued is used to measure the transaction, as this is more reliable than the fair value of the services received. The fair value is measured at the value of the Company's common stock on the date that the commitment for performance by the counterparty has been reached or the counterparty's performance is complete. The fair value of the equity instrument is charged directly to expense and credited to additional paid-in capital.

There is not a viable market for the Company's common stock to determine its fair value, therefore management is required to estimate the fair value to be utilized in determining stock-based compensation costs. In estimating the fair value, management considers recent sales of its common stock to independent qualified investors, placement agents' assessments of the underlying common shares relating to our sale of preferred stock and validation by independent fair value experts. Considerable management judgment is necessary to estimate the fair value. Accordingly, actual results could vary significantly from management's estimates. Management has concluded that the estimated fair value of the Company's stock and corresponding expense is negligible.

Income Taxes

The Company is subject to corporate income and state income taxes in the state it does business. We account for income taxes under the asset and liability method, which requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements. Under this method, we determine deferred tax assets and liabilities on the basis of the differences between the financial statement and tax bases of assets and liabilities by using enacted tax rates in effect for the year in which the differences are expected to reverse. The effect of a change in tax rates on deferred tax assets and liabilities is recognized in income in the period that includes the enactment date. We recognize deferred tax assets to the extent that we believe that these assets are more likely than not to be realized. In making such a determination, we consider all available positive and negative evidence, including future reversals of existing taxable temporary differences, projected future taxable income, tax-planning strategies, and results of recent operations. If we determine that we would be able to realize our deferred tax assets in the future in excess of their net recorded amount, we would make an adjustment to the deferred tax asset valuation allowance, which would reduce the provision for income taxes. We record uncertain tax positions in accordance with ASC 740 on the basis of a two-step process in which (1) we determine whether it is more likely than not that the tax positions will be sustained on the basis of the technical merits of the position and (2) for those tax positions that meet the more-likely-than-not recognition threshold, we recognize the largest amount of tax benefit that is more than 50 percent likely to be realized upon ultimate settlement with the related tax authority. The Company does not have any uncertain tax provisions. The Company's primary tax jurisdictions are the United States and California. The Company's primary deferred tax assets are its net operating loss (NOL) carryforwards which approximates its retained earnings as of the date of these financials. A deferred tax asset as a result of NOLs have not been recognized due to the uncertainty of future positive taxable income to utilize the NOL. The Company is no longer subject to U.S. federal, state and local, tax examinations by tax authorities for years before 2019.

Recent Accounting Pronouncements

The FASB issues ASUs to amend the authoritative literature in ASC. There have been a number of ASUs to date that amend the original text of ASC. Management believes that those issued to date either (i) provide supplemental guidance, (ii) are technical corrections, (iii) are not applicable to us or (iv) are not expected to have a significant impact on our financial statements.

NOTE 3 – RELATED PARTY TRANSACTIONS

NOTE 8 – GOING CONCERN

The accompanying balance sheet has been prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. The entity has realized losses every year since inception, incurred negative working capital and cash flows from operations, and may continue to generate losses.

During the next twelve months, the Company intends to finance its operations with funds from a crowdfunding campaign and revenue producing activities. The Company's ability to continue as a going concern in the next twelve months following the date the financial statements were available to be issued is dependent upon its ability to produce revenues and/or obtain financing sufficient to meet current and future obligations and deploy such to produce profitable operating results. Management has evaluated these conditions and plans to generate revenues and raise capital as needed to satisfy its capital needs. No assurance can be given that the Company will be successful in these efforts. These factors, among others, raise substantial doubt about the ability of the Company to continue as a going concern for a reasonable period of time. The financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts or the amounts and classification of liabilities.

WHY IT'S INTERESTING

When was the last time you felt profound emotions for an animated character? The world of animation has burgeoned from mere entertainment to a creative medium for communication, storytelling, and education, and more. With the rising popularity of streaming platforms, gaming, and educational apps, animation has become an important facet of contemporary media consumption.^{iv v} According to Precedence Research, the global animation market size was valued at \$392.54 billion in 2022.^{vi} Beyond its popularity, animation, especially 3D animation, presents its set of challenges. The cost of producing high-quality 3D animations can be high, encompassing expenses from software licenses and specialized hardware to the skilled labor required. As the demand for animated content diversifies, grows, and expands across age groups and sectors, from advertisements to e-learning, the industry grapples with the need for cost-effective solutions that don't compromise on quality.^{vii viii ix x}

Founded in 2016, UNOMi offers artificial intelligence- (AI-) driven animation software designed to simplify the animation process. Its products, such as the Avatar Creator Plugin and the 2D and 3D Lip Sync Applications, integrate with popular animation platforms like Adobe Creative Cloud, Apple Final Cut Pro, and Motion, and are designed to make the creation process more efficient.^{xi} Through these solutions, users can access animation capabilities and create a fully-realized persona without the need for specialized equipment or training. Since inception, UNOMi's suite of animation software has been leveraged by more than 1,100 users. In 2022, the company gained 610 new users, representing a year-over-year increase of approximately 122% from 2021. Additionally, the company is in early-stage discussions with employees from major corporations in the entertainment industry as well as universities with animation programs for the use its animation software.^{xii}

COMPANY SUMMARY

Opportunity

In the detailed landscape of animation, producing characters that move and express emotions authentically has always been a challenge. Perfectly aligning animated facial expressions, especially the nuanced movements of lips with corresponding voiceovers, is a complex aspect of animation. This task demands a harmonious blend of artistic touch, technical acumen, and, typically, specialized tools and training. For many budding animators and even some seasoned professionals, these prerequisites can sometimes be overwhelming, resulting in animations that might miss the mark in terms of realism and engagement. The complexities associated with achieving impeccable lip-syncing and capturing subtle character motions can often act as constraints, potentially diminishing the creative aspirations and final quality of many in the animation field.^{xv xvi}

Aiming to address these challenges, UNOMi has developed a suite of AI-driven animation software engineered to streamline and enhance the animation process. Its Avatar Creator Plugin, for instance, is not just a tool, but a bridge that can integrate with widely used platforms such as Adobe Creative Cloud, Apple Final Cut Pro, and Motion. This enables animators who utilize these platforms to have a familiar environment while benefiting from UNOMi's features. Delving deeper into the realm of voice synchronization, its 3D and 2D Lip Sync Applications are designed to harness the power of AI. These applications aim to match mouth poses to voice recordings allowing characters speak with a realism previously difficult to achieve.^{xvii}

3D Lip-Sync

UNOMi's 3D Lip-Sync Application is a specialized tool designed to synchronize mouth poses with voice recordings, aiming to accelerate the animation process. Compatible with platforms like Maya and Cinema 4D, this application offers technology in an easy-to-use format without the need for specialized training. Users can add sculpted mouth poses to match phonetic sounds, requiring only 14 mouth poses to create high-quality speech animations. The 3D Lip-Sync Interface is designed for intuitive control, allowing users to import mouth poses, audio, and scripts, and fine-tune animations before the final render.

3D Lip-Sync's features include the ability to swap mouth poses after syncing an audio file, organize multiple files in the "Assets Window," and create RAM previews anywhere in the timeline. The application also supports multiple file formats like .FBX and .GLTF, as well as audio files like .MP3, .AIFF, and .WAVE files. With quick rendering capabilities and support for languages such as English, French, German, Italian, Japanese, Spanish, Portuguese, and others, UNOMi's 3D Lip-Sync Application is designed to provide a comprehensive solution for creating 3D animated conversations.^{xix}

2D Lip-Sync

Similar to its 3D application, UNOMi's 2D Lip-Sync is an application designed for synchronizing mouth poses with voice recordings in 2D animations. Integrating with platforms like Toonboom, Adobe Animate, and TVPaint, the application aims to offer a straightforward experience without the need for extensive training. The 2D Lip-Sync interface is designed to empower animators, regardless of their expertise, to craft multiple scenes with lip-syncing across a variety of characters and poses. By utilizing .PNG and .JPEG files, the application can align mouth poses to phonetic sounds. Additionally, features such as the ability to add and delete key-frames, organize multiple files in the "Assets Window," and create RAM previews, are designed to enhance the animation process. 2D Lip-Sync also boasts compatibility with popular file formats from Flash, Photoshop, and Illustrator, and supports a range of audio files. With capabilities for batch rendering and support for multiple languages, UNOMi's 2D Lip-Sync Application aims to be a solution for animators aiming to bring authenticity to their 2D characters' speech.^{xx}

INDUSTRY AND MARKET ANALYSIS

According to Precedence Research, the global animation market, encompassing offerings such as software and services and product types like 2D Animation, 3D Animation, Motion graphics, and Stop Motion, was estimated at \$392.54 billion in 2022. The industry is forecasted to reach over \$779.73 billion by 2032, representing a compound annual growth rate (CAGR) of 6.8%. Key drivers of this growth reportedly include advancements and developments across the communications and technology sectors, a growing media and entertainment industry, and increased internet penetration across different regions. Technological advancements and the emergence of Extended Reality (XR) technologies like Virtual Reality (VR) and AI are also expected to have a transformative effect on the animation industry.^{xxxi}

MICROVENTURES

Within the global animation market, the 3D animation segment reached an estimated value of approximately \$20.56 billion in 2022, according to a report from Expert Market Research. The industry is projected to grow at CAGR of 11.80%, reaching around \$40.2 billion by 2028. Key drivers of this growth include advancements in, and increasing affordability of, 3D animation technology, anticipatorily leading to a surge in applications and usage across various sectors. According to the report, the growing penetration of the internet and rising consumer expectations are resulting in more companies adopting 3D animation to help enhance visibility and impact. More specifically, the increasing demand for 3D animation in education and academics, such as e-learning platforms, is aiding the market growth, with techniques like 3D modeling growing in demand. Moreover, the integration of 3D animation with live action and the advent of streaming services like Netflix and Amazon Prime Video are diversifying the animation market, thereby catalyzing growth.^{xxxii}

Serving as a facet of the 3D animation sector, the 3D Motion Capture industry plays a role in transforming real-world movements into animated realism. According to Mordor Intelligence, the 3D Motion Capture Market is projected to grow from an estimated \$218.79 million in 2023 to \$412.11 million by 2028, at a CAGR of 13.50%. This growth is driven by advancements in computer vision technology and an increasing demand for high-quality 3D animations. One of the primary reasons for utilizing 3D motion capture is to expedite the creation process for intricate 3D computer-generated imagery (CGI) characters in movies, television, or video games. The technology is also gaining traction in various applications, such as robotics, with significant growth anticipated in the robotics sector potentially driving growth in the 3D animation sector. Furthermore, the post-COVID-19 emergence of the metaverse and the increasing demand for virtual events are also expected to further propel the market's growth.^{xxxiii}

PAST FINANCING

To date, UNOMi has raised approximately \$540,000 in total funding. In 2021, the company completed its second Regulation Crowdfund offering with MicroVentures and raised approximately \$123,000 in the offering by issuing crowd notes with a \$4 million and \$5 million valuation cap with a 5% interest rate and 20% discount. In the same year, the company raised \$65,000 through a \$20,000 convertible promissory note with a 5% interest rate, and a \$45,000 SAFE with a 10% income sharing provision, 2x payment cap, and 10-year payment term. The \$20,000 convertible note has since converted into in 2,850 shares of common stock.

Defined in the SAFE with the income sharing provision, UNOMi will be required to make monthly payments for a certain period of time. The amount of the payments will be deferred if UNOMi's annualized Earned Income is less than \$40,000. If UNOMi makes 75% of the payments within 60 months, the company will no longer be required to make any payments and the agreement will be considered satisfied. In the event of a sale of the company, UNOMi will be required to pay an aggregate amount equal to the payment cap (\$90,000) less any monthly payments already made. The agreement also features a SAFE claw back provision in which the investor was issued a SAFE that will convert into 1.125% of the fully diluted capitalization of the company. The number of shares that the investor receives from the SAFE will be reduced, in proportion to the number of payments UNOMi makes towards the Payment Cap, up to a maximum of 2/3rds of the total conversion amount. However, any reduction of the Payment Cap that is made under this agreement will not apply to this section. For example, if the UNOMi repays 50% of the Payment Cap, the number of shares the investor receives will be reduced by 50%; if UNOMi repays 70% of the Payment Cap, the number of shares the investor receives will be reduced by 66.66%.

From 2016 to 2020, the company raised approximately \$356,000 in the form of convertible notes (5% interest rate), SAFEs (\$2 million valuation cap), and crowd notes (\$4 million and \$5 million valuation cap with a 20% discount). In addition, SAM Venture Partners executed a warrant to purchase 2.5% of UNOMi common stock, once/if the company sells \$1.5 million of preferred stock. In exchange, UNOMi's accelerator fee was waived for the Precceclerator Program (SAM Venture Partners is an affiliate) in Los Angeles, CA.

- iii. The undersigned confirms that it is not relying and will not rely on any communication (written or oral) of the Company, MicroVenture Marketplace Inc., or any of their respective affiliates, as investment advice or as a recommendation to purchase the Securities. It is understood that information and explanations related to the terms and conditions of the Securities provided in the Form C or otherwise by the Company, MicroVenture Marketplace Inc. or any of their respective affiliates shall not be considered investment advice or a recommendation to purchase the Securities, and that neither the Company, MicroVenture Marketplace Inc. nor any of their respective affiliates is acting or has acted as an advisor to the undersigned in deciding to invest in the Securities. The undersigned acknowledges that neither the Company, MicroVenture Marketplace Inc. nor any of their respective affiliates have made any representation regarding the proper characterization of the Securities for purposes of determining the undersigned's authority or suitability to invest in the Securities.
- iv. The undersigned is familiar with the business and financial condition and operations of the Company, all as generally described in the Form C. The undersigned has had access to such information concerning the Company and the

Securities as it deems necessary to enable it to make an informed investment decision concerning the purchase of the Securities.

- v. The undersigned understands that, unless the undersigned notifies the Company in writing to the contrary at or before the Closing, each of the undersigned's representations and warranties contained in this Subscription Agreement will be deemed to have been reaffirmed and confirmed as of the Closing, taking into account all information received by the undersigned.
- vi. The undersigned acknowledges that the Company has the right in its sole and absolute discretion to abandon this Offering at any time prior to the completion of the Offering. This Subscription Agreement shall thereafter have no force or effect and the Company shall return any previously paid subscription price of the Securities, without interest thereon, to the undersigned.
- vii. The undersigned understands that no federal or state agency has passed upon the merits or risks of an investment in the Securities or made any finding or determination concerning the fairness or advisability of this investment.

c) No Guaranty.

The undersigned confirms that the Company has not (i) given any guarantee or representation as to the potential success, return, effect or benefit (either legal, regulatory, tax, financial, accounting or otherwise) of an investment in the Securities or (ii) made any representation to the undersigned regarding the legality of an investment in the Securities under applicable legal investment or similar laws or regulations. In deciding to purchase the Securities, the undersigned is not relying on the advice or recommendations of the Company and the undersigned has made its own independent decision that the investment in the Securities is suitable and appropriate for the undersigned.

d) Status of the Undersigned.

The undersigned has such knowledge, skill and experience in business, financial and investment matters that the undersigned is capable of evaluating the merits and risks of an investment in the Securities. With the assistance of the undersigned's own professional advisors, to the extent that the undersigned has deemed appropriate, the undersigned has made its own legal, tax, accounting and financial evaluation of the merits and risks of an investment in the Securities and the consequences of this Subscription Agreement. The undersigned has considered the suitability of the Securities as an investment in light of its own circumstances and financial condition and the undersigned is able to bear the risks associated with an investment in the Securities and its authority to invest in the Securities.

e) Restrictions on Transfer or Sale of Securities.

- i. The undersigned is acquiring the Securities solely for the undersigned's own beneficial account, for investment purposes, and not with a view to, or for resale in connection with, any distribution of the Securities. The undersigned understands that the Securities have not been registered under the Securities Act or any State Securities Laws by reason of specific exemptions under the provisions thereof which depend in part upon the investment intent of the undersigned and of the other

representations made by the undersigned in this Subscription Agreement. The undersigned understands that the Company is relying upon the representations and agreements contained in this Subscription Agreement (and any supplemental information) for the purpose of determining whether this transaction meets the requirements for such exemptions.

- ii. The undersigned understands that the Securities are restricted from transfer for a period of time under applicable federal securities laws and that the Securities Act and the rules of the U.S. Securities and Exchange Commission (the "Commission") provide in substance that the undersigned may dispose of the Securities only pursuant to an effective registration statement under the Securities Act, an exemption therefrom or as further described in Rule 501 of Regulation CF, after which certain state restrictions may apply. The undersigned understands that the Company has no obligation or intention to register any of the Securities, or to take action so as to permit sales pursuant to the Securities Act. Even when the Securities become freely transferrable, a secondary market in the Securities may not develop. Consequently, the undersigned understands that the undersigned must bear the economic risks of the investment in the Securities for an indefinite period of time.
- iii. The undersigned agrees that the undersigned will not sell, assign, pledge, give, transfer or otherwise dispose of the Securities or any interest therein, or make any offer or attempt to do any of the foregoing, except pursuant to Rule 501 of Regulation CF.

7. Conditions to Obligations of the Undersigned and the Company. The obligations of the undersigned to purchase and pay for the Securities specified on the signature page hereto and of the Company to sell the Securities are subject to the satisfaction at or prior to the Closing of the following conditions precedent: the representations and warranties of the Company contained in Section 5 hereof and of the undersigned contained in Section 6 hereof shall be true and correct as of the Closing in all respects with the same effect as though such representations and warranties had been made as of the Closing.

8. Obligations Irrevocable. Following the Closing, the obligations of the undersigned shall be irrevocable.

9. Legend. The certificates, book entry or other form of notation representing the Securities sold pursuant to this Subscription Agreement will be notated with a legend or designation, which communicates in some manner that the Securities were issued pursuant to Section 4(a)(6) of the Securities Act and may only be resold pursuant to Rule 501 of Regulation CF.

10. Waiver, Amendment. Neither this Subscription Agreement nor any provisions hereof shall be modified, changed, discharged or terminated except by an instrument in writing, signed by the party against whom any waiver, change, discharge or termination is sought.

11. Assignability. Neither this Subscription Agreement nor any right, remedy, obligation or liability arising hereunder or by reason hereof shall be assignable by either the Company or the undersigned without the prior written consent of the other party.

12. Waiver of Jury Trial. THE UNDERSIGNED IRREVOCABLY WAIVES ANY AND ALL RIGHT TO TRIAL BY JURY WITH RESPECT TO ANY LEGAL PROCEEDING ARISING

OUT OF THE TRANSACTIONS CONTEMPLATED BY THIS SUBSCRIPTION AGREEMENT.

13. Dispute Resolution.

a) General Rule.

Any dispute under this Subscription Agreement will be resolved through arbitration, not through the court system. All arbitration will be conducted in the state where the executive office of the Company is located at such time, unless both parties agree otherwise in writing in a specific case. All arbitration will be conducted before a single arbitrator in following the rules of the American Arbitration Association. Except as required by law, neither a party nor the arbitrator may disclose the existence, content or results of any arbitration without the prior written consent of the other parties.

b) Appeal of Award.

Within thirty days of a final award by the single arbitrator, either party may appeal the award for reconsideration by a three-arbitrator panel. If there is an appeal, the other party may cross-appeal within thirty days after notice of the appeal. The panel will reconsider all aspects of the initial award that are appealed, including related findings of fact.

c) Effect of Award.

Any award by the individual arbitrator that is not subject to appeal, and any panel award on appeal, shall be final and binding, except for any appeal right under the Federal Arbitration Act, and may be entered as a judgment in any court of competent jurisdiction.

d) No Class Action Claims.

NO ARBITRATION SHALL PROCEED ON A CLASS, REPRESENTATIVE, OR COLLECTIVE BASIS. No party may join, consolidate, or otherwise bring claims for or on behalf of two or more individuals or unrelated corporate entities in the same arbitration unless those persons are parties to a single transaction. An award in arbitration shall determine the rights and obligations of the named parties only, and only with respect to the claims in arbitration, and shall not (i) determine the rights, obligations, or interests of anyone other than a named party, or resolve any claim of anyone other than a named party, or (ii) make an award for the benefit of, or against, anyone other than a named party. No administrator or arbitrator shall have the power or authority to waive, modify, or fail to enforce this paragraph, and any attempt to do so, whether by rule, policy, and arbitration decision or otherwise, shall be invalid and unenforceable. Any challenge to the validity of this paragraph shall be determined exclusively by a court and not by the administrator or any arbitrator. If this paragraph shall be deemed unenforceable, then any proceeding in the nature of a class action shall be handled in court, not in arbitration.

14. Governing Law. This Subscription Agreement shall be governed by and construed in accordance with the laws of the State of Delaware, without regard to conflict of law principles thereof.

15. Section and Other Headings. The section and other headings contained in this Subscription Agreement are for reference purposes only and shall not affect the meaning or interpretation of this Subscription Agreement.

16. Counterparts. This Subscription Agreement may be executed in any number of counterparts, each of which when so executed and delivered shall be deemed to be an original and all of which together shall be deemed to be one and the same agreement.

17. Notices. All notices and other communications provided for herein shall be in writing and shall be deemed to have been duly given if delivered personally or sent by registered or certified mail, return receipt requested, postage prepaid or email to the following addresses (or such other address as either party shall have specified by notice in writing to the other):

If to the Purchaser:	[PURCHASER ADDRESS] [E-MAIL ADDRESS]

18. Binding Effect. The provisions of this Subscription Agreement shall be binding upon and accrue to the benefit of the parties hereto and their respective heirs, legal representatives, successors and assigns.

19. Survival. All representations, warranties and covenants contained in this Subscription Agreement shall survive (i) the acceptance of the subscription by the Company, (ii) changes in the transactions, documents and instruments described in the Form C which are not material or which are to the benefit of the undersigned and (iii) the death or disability of the undersigned.

20. Notification of Changes. The undersigned hereby covenants and agrees to notify the Company upon the occurrence of any event prior to the closing of the purchase of the Securities pursuant to this Subscription Agreement, which would cause any representation, warranty, or covenant of the undersigned contained in this Subscription Agreement to be false or incorrect.

21. Severability. If any term or provision of this Subscription Agreement is invalid, illegal or unenforceable in any jurisdiction, such invalidity, illegality or unenforceability shall not affect any other term or provision of this Subscription Agreement or invalidate or render unenforceable such term or provision in any other jurisdiction.

- l. **"Shadow Series"** shall mean shares of a series of the Company's preferred stock that is identical in all respects to the shares of preferred stock issued in the Qualified Equity Financing (e.g., if the Company sells Series A Preferred Stock in the Qualified Equity Financing, the Shadow Series would be Series A-1 Preferred Stock), except that the liquidation preference per share of the Shadow Series shall equal the Conversion Price (as determined pursuant to Section 2) and the following additional differences:

Video Transcript

Hello everyone,

As some of you already know, my name is Obi Onyejekwe and I am the CEO of UNOMi. UNOMi is a 3D and 2D AI software that is currently available for creative professionals. I'm very excited to announce that we finally launched our latest product, which is the UNOMi Avatar Creator. This plugin is designed to allow artists and creative individuals to create fully rigged 3D characters and animate them easily and quickly. It's currently available as a plugin for Adobe After Effects, Premiere Pro, Final Cut, and Motion.

The plugin is also designed to allow users to import pre-made 3D characters and objects from other platforms like Turbo Squid, SketchFab, and Mixamo. Now, all creative individuals will now have access to an extensive library of 3D content and assets that they can use to help tell their story.

Users can also use our 3D lip-syncing software to auto-lip-sync their characters and allow them to speak. This is a huge update that allows you to tell stories in 3D, unlike ever before.

We're also close to the completion of our Motion Capture software, which will work in conjunction with the Avatar Creator plugin. The Motion Capture software will allow users to track human movement from prerecorded footage.

With all that said, please help us with our next milestone. We've gained sales for our software, and now we need your help. Your investment will help us with making small updates as well as locking in sales with multiple enterprise clients.

Thanks again for your support, and we hope that you join us on this great journey.

Webinar Transcript

UNOMi Webinar

0:03

Hi guys, my name is Obi Onyejekwe, I'm the CEO and founder of UNOMi. And UNOMi is a software-as-a-service for animators and video game developers, and our main task is to democratize creativity and help creatives in their goal to create great and amazing content.

0:19

So here's our legal notice. Before I start the presentation, please review at your own discretion.

0:28

So first off about the challenge in animation and creating animated content is... It's very time consuming and expensive. So this pain point reaches multiple industries. So it starts with media which is film and television, gaming which is of course includes game development in general for consoles, mobile apps, and PC desktop games, creative agencies, so this is ad agencies and branding agencies that create content for other brands for marketing purposes, of course, Web 3, this is the creation of Metaverse and NFTs and augmented AR/VR reality, and of course education, so this includes universities that teach animation and video game development that use these tools.

1:11

So, of course, the way we solve this is UNOMi has artificial intelligence AI computer vision technology that reduces the production time but and spend on animation projects.

1:27

So we do this with a suite of software. So first includes our 2D and 3D lip syncing software that automates lip syncing for 2D and 3D animated characters. This does it in seconds versus minutes.

1:41

Of course we have our markerless motion tracking technology that tracks human movement based just from prerecorded footage. So, our software does not require a special specialized camera or tracking suit. So, once you record your footage, just load it in, and UNOMi instantly starts tracking your movement.

2:01

And of course there's our 3D avatar creator tool which is out now - allows you to easily create a 3D animated character which saves you a lot of time and money. And then, of course, add animated, add animated sequences to that character, and instantly you're able to create animated content.

2:17

So our market size is pretty big. It's up to \$585, \$587 billion. So there's over... and we're targeting 3 demographics ultimately, which is first, universities that teach animation and gaming. So, there's over 700 plus universities that teach animation and gaming in general, and that's globally. Of course, there's over 700 plus animation studios worldwide that teach that actually create animated content and of course there's 58k independent animators in the U.S, that actually create animated content for a living.

2:58

So our go to market strategy, so we partner with Apple in the sense that Apple will be selling our

plugin which is our avatar creator on the Apple store. So that goes up in the next couple of weeks. Then we also are in discussions with Apple to help promote our software on their website. So that's a great opportunity. And so the reason why we're working with Apple is Apple owns Final Cut in Motion and our plugin works directly with Final Cut in Motion, which is the editing software. And then of course motions are I guess you could say creative animation software.

3:34

And then we our software is currently being sold on FxFactory website. But yeah, so we're currently on FxFactory for sale. So we've got a couple sales through there. And then we're on, we have a partnership with NVIDIA, so we're a part of the NVIDIA inception program, so which it gives us access to a lot of the the tools and and and products that NVIDIA provides for their partnership program.

4:09

So our revenue model. So the way we make monies are first with our 2D and 3D lip syncing software which we charge a monthly plan for. So we're also about to roll out annual subscription as well. So this is a SaaS model, so of course users are paying monthly.

4:25

And then we have our Avatar Creator plugin which is a one-time fee of \$299. So we're currently selling this on our website as well as FxFactory's website and then it will be for sale for on Apple's platform in the next couple weeks.

4:42

So we've seen significant growth in in test users as well as paid users over time and our game plan's to just keep scaling this up.

4:56

So our milestones, so we've raised over 100,000 back from Backstage Capital, they were our first lead investor and we've been raising additional capital ever since. We have, we're integrated with Adobe as well as Final Cut in Motion.

So that's a great opportunity to kind of reach reach and I guess solve the problem for animators and content creators on that use Adobe and of course our software has been used and animated content for The Players' Tribune.

5:26

So this was a social media project that was called KnuckTales. So it was like 3 episodes of an animated show. So that was released not too long ago. And yes, our software is used in creation of that, of that animated show.

So our team of course comprised of myself, CEO, UNOMi is my second startup. My first was Nito which was acquired by AOL. I've been a creative director for multiple companies including Nickelodeon, BET, and Dentsu America. So extensive experience as a creative director working in multiple companies as well as leading teams.

And then our technical lead is Joe Lopez. He has over 17 years of experience in the industry. He's pretty much crafted out the the layout and architecture for our overall software.

6:15

And then Robert Lara is our lead software engineer who's pretty much leads the team, he's worked with multiple Fortune 500 companies in developing their back end software systems.

6:27

And of course Dafa Muhammad was our full stack engineer. He's a lead engineer on the development of all our 3D software.

6:35

This is going mostly to a bit of development as well as marketing. So we're really trying to scale up revenue and sales and then of course maintain software maintenance that will go to just maintaining the updates and any type of bug faces and features that we get feedback that we got, that we get from customers. So, yeah, that's pretty much where most of the capital is going.
