

THE GLOBAL AI API MARKETPLACE

WHAT IS THE PROBLEM

There are thousands of API's out there but because each API has its own networking protocols, structure, and data format, discovering and connecting to the right API is very difficult and takes lots of time. The problem is especially high in magnitude when it comes to AI-related APIs.

- 1.

WHAT IS THE SOLUTION

GenesisAI allows developers to discover, test, and integrate various AI related APIs. Developers can see the demo of the API, test them right from their browser, subscribe to API, and then integrate one by copying a code snippet.

VISION

BECOME GO-TO PLACE FOR
ALL THINGS AI

CROSS-PROVIDER TRANSFER LEARNING

ALLOWING MULTI-AI AGENT INTERACTIONS

Speech Recognition + Translation = Speech Translation

COMPETITIVE ADVANTAGES

Better quality through Validation Accuracy, Ensembling + Distillation, and Cross-Provider Transfer Learning

Lower prices through removing intermediaries and increasing the supply of AI products and services.

HIGH QUALITY AI

We believe, we are Increasing the quality of AI products by up to 70%

Ensemble Learning + distillation – we average model outputs for the best accuracy.

Validation Accuracy – buyers upload sample data with correct results. GenesisAI tests different models to find the best one.

Cross-Provider Transfer Learning – allowing multi-AI agent interaction. E.g. Speech recognition + language translation = Speech translation.
