

Black Sands Entertainment

LETTER

Dear investors,

In the past year, we have increased our diversity when it comes to revenue sources. We now rely heavily on wide distribution from more professional sources like schools, libraries, and retail stores. Facebook has been notoriously bad on advertising so we are trying to pivot away from relying on their services. We are very cash healthy and expect no problem with operations for years to come. Now we are focusing our efforts on a anime that could potentially help licensing and merchandising for our company.

We need your help!

Raising awareness with family and friends is always a nice thing to have. We have been working diligently to build partnerships with influencers in our space so advocating for us is always a great way to help. Additionally, we have expanded greatly in schools. If investors talk to their school administrations locally, they can have Black Sands placed in their districts across the entire state.

Sincerely,

Manuel Godoy

CEO

How did we do this year?

REPORT CARD

B+

☺ The Good

We massively increased our school distribution and expanded digital sales.

We formed a partnership for a flagship anime that will boost the value of the company.

We have selected a limited amount of series for permanent ongoing development status, streamlining development costs.

☹ The Bad

Facebook advertising has tanked across the industry and effected our sales considerably.

Numerous apple updates has caused many of our back channels to lose effectiveness.

social media reach has limited our ability to reach our customers.

Preferred Stock	1,615,000	951,264	No
Warrants:	0		
Options:	300		

Form C Risks:

The value of a publishing brand relies heavily on products that require a large amount of upfront cost, such as films. As such, there may not be funding for such productions that would help bring the company to explosive growth, causing growth to stagnate for a period of time.

Our future success depends on the efforts of a small management team. The loss of services of the members of the management team may have an adverse effect on the company. There can be no assurance that we will be successful in attracting and retaining other personnel we require to successfully grow our business.

Financial Risks: The Company's financial performance is subject to various risks, including fluctuations in revenues, changes in operating costs, foreign exchange rate fluctuations, interest rate fluctuations, and the availability of financing. These risks may affect the Company's profitability and liquidity.

Market Risks: The entertainment industry is subject to changes in consumer preferences and technological advances, which may lead to decreased demand for the Company's content or render its distribution methods obsolete.

Dependence on Third-Party Partners: The Company relies on third-party partners for the development, production, and distribution of its content. The failure of these third-party partners to perform their obligations may result in delays, cost overruns, or lower-quality content.

Competition: The entertainment industry is highly competitive, and the Company faces competition from established and emerging companies that create and distribute similar content. Increased competition may negatively impact the Company's market share and financial performance

Description of Securities for Prior Reg CF Raise

Additional issuances of securities. Following the Investor's investment in the Company, the Company may sell interests to additional investors, which will dilute the percentage interest of the Investor in the Company. The Investor may have the opportunity to increase its investment in the Company in such a transaction, but such opportunity cannot be assured. The amount of additional financing needed by the Company, if any, will depend upon the maturity and objectives of the Company. The declining of an opportunity or the inability of the Investor to make a follow-on investment, or the lack of an opportunity to make such a follow-on investment, may result in substantial dilution of the Investor's interest in the Company.

Issuer repurchases of securities. The Company may have authority to repurchase its securities from shareholders, which may serve to decrease any liquidity in the market for such securities, decrease the percentage interests held by other similarly situated investors to the Investor, and create pressure on the Investor to sell its securities to the Company concurrently.

A sale of the issuer or of assets of the issuer. As a minority owner of the Company, the Investor will have limited or no ability to influence a potential sale of the Company or a substantial portion of its assets. Thus, the Investor will rely upon the executive management of the Company and the Board of Directors of the Company to manage the Company so as to maximize value for shareholders. Accordingly, the success of the Investor's investment in the Company will depend in large part upon the skill and expertise of the executive management of the Company and the Board of Directors of the Company. If the Board Of Directors of the Company authorizes a sale of all or a part of the Company, or a disposition

of a substantial portion of the Company's assets, there can be no guarantee that the value received by the Investor, together with the fair market estimate of the value remaining in the Company, will be equal to or exceed the value of the Investor's initial investment in the Company.

Transactions with related parties. The Investor should be aware that there will be occasions when the Company may encounter potential conflicts of interest in its operations. On any issue involving conflicts of interest, the executive management and Board of Directors of the Company will be guided by their good faith judgement as to the Company's best interests. The Company may engage in transactions with affiliates, subsidiaries or other related parties, which may be on terms which are not arm's-length, but will be in all cases consistent with the duties of the management of the Company to its shareholders. By acquiring an interest in the Company, the Investor will be deemed to have acknowledged the existence of any such actual or potential conflicts of interest and to have waived any claim with respect to any liability arising from the existence of any such conflict of interest.

Minority Ownership

An Investor in the Company will likely hold a minority position in the Company, and thus be limited as to its ability to control or influence the governance and operations of the Company.

The marketability and value of the Investor's interest in the Company will depend upon many factors outside the control of the Investor. The Company will be managed by its officers and be governed in accordance with the strategic direction and decision-making of its Board Of Directors, and the Investor will have no independent right to name or remove an officer or member of the Board Of Directors of the Company.

Following the Investor's investment in the Company, the Company may sell interests to additional investors, which will dilute the percentage interest of the Investor in the Company. The Investor may have the opportunity to increase its investment in the Company in such a transaction, but such opportunity cannot be assured.

The amount of additional financing needed by the Company, if any, will depend upon the maturity and objectives of the Company. The declining of an opportunity or the inability of the Investor to make a follow-on investment, or the lack of an opportunity to make such a follow-on investment, may result in substantial dilution of the Investor's interest in the Company.

Exercise of Rights Held by Principal Shareholders

As holders of a majority-in-interest of voting rights in the Company, the shareholders may make decisions with which the Investor disagrees, or that negatively affect the value of the Investor's securities in the Company, and the Investor will have no recourse to change these decisions. The Investor's interests may conflict with those of other investors, and there is no guarantee that the Company will develop in a way that is optimal for or advantageous to the Investor.

For example, the shareholders may change the terms of the Articles of Incorporation for the

company, change the terms of securities issued by the Company, change the management of the Company, and even force out minority holders of securities. The shareholders may make changes that affect the tax treatment of the Company in ways that are unfavorable to you but favorable to them. They may also vote to engage in new offerings and/or to register certain of the Company's securities in a way that negatively affects the value of the securities the Investor owns. Other holders of securities of the Company may also have access to more information than the Investor, leaving the Investor at a disadvantage with respect to any decisions regarding the securities he or she owns. The shareholders have the right to redeem their securities at any time. Shareholders could decide to force the Company to redeem their securities at a time that is not favorable to the Investor and is damaging to the Company. Investors' exit may affect the value of the Company and/or its viability. In cases where the rights of holders of convertible debt, SAFES, or other outstanding options or warrants are exercised, or if new awards are granted under our equity compensation plans, an Investor's interests in the Company may be diluted. This means that the pro-rata portion of the Company represented by the Investor's securities will decrease, which could also diminish the Investor's voting and/or economic rights. In addition, as discussed above, if a majority-in-interest of holders of securities with voting rights cause the Company to issue additional stock, an Investor's interest will typically also be diluted.

Based on the risks described above, the Investor could lose all or part of his or her investment in the securities in this offering, and may never see positive returns.

Restrictions on Transfer

The securities offered via Regulation Crowdfunding may not be transferred by any purchaser of such securities during the one year period beginning when the securities were issued, unless such securities are transferred:

to the issuer;
to an accredited investor [?](#) ;
as part of an offering registered with the U.S. Securities and Exchange Commission; or
to a member of the family of the purchaser or the equivalent, to a trust controlled by the purchaser, to a trust created for the benefit of a member of the family of the purchaser or the equivalent, or in connection with the death or divorce of the purchaser or other similar circumstance. [?](#)

Valuation Methodology for Prior Reg CF Raise

The offering price for the securities offered pursuant to this Form C has been determined arbitrarily by the Company, and does not necessarily bear any relationship to the Company's book value, assets, earnings or other generally accepted valuation criteria. In determining the offering price, the Company did not employ investment banking firms or other outside organizations to make an independent appraisal or evaluation. Accordingly, the offering price should not be considered to be indicative of the actual value of the securities offered hereby.

In the future, we will perform valuations of our common stock that take into account factors such as the following:

unrelated third party valuations of our common stock;

the price at which we sell other securities, such as convertible debt or preferred stock, in light of the rights, preferences and privileges of our those securities relative to those of our common stock;
our results of operations, financial position and capital resources;
current business conditions and projections;
the lack of marketability of our common stock;
the hiring of key personnel and the experience of our management;
the introduction of new products;
the risk inherent in the development and expansion of our products;
our stage of development and material risks related to our business;
the likelihood of achieving a liquidity event, such as an initial public offering or a sale of our company given the prevailing market conditions and the nature and history of our business;
industry trends and competitive environment;
trends in consumer spending, including consumer confidence;
overall economic indicators, including gross domestic product, employment, inflation and interest rates; and
the general economic outlook.

We will analyze factors such as those described above using a combination of financial and market-based methodologies to determine our business enterprise value. For example, we may use methodologies that assume that businesses operating in the same industry will share similar characteristics and that the Company's value will correlate to those characteristics, and/or methodologies that compare transactions in similar securities issued by us that were conducted in the market.

Company

Black Sands Entertainment Inc.

Delaware Corporation

Organized November 2016

2 employees

298 East Main St

944

Middletown DE 19709 <http://blacksands.com>

Business Description

Refer to the Black Sands Entertainment profile.

EDGAR Filing

The Securities and Exchange Commission hosts the official version of this annual report on their EDGAR web site. It looks like it was built in 1989.

Compliance with Prior Annual Reports

Black Sands Entertainment has previously not complied with the reporting requirements under Rule 202 of Regulation Crowdfunding.

Late filing.

All prior investor updates

You can refer to the company's updates page to view all updates to date. Updates are for investors only and will require you to log in to the Wefunder account used to make the investment.
