## About

Human beings are the greatest of all creations. You and I are blessed to be on our journey through life on this beautiful planet.

We don't get to choose everything, but we do get to choose how we will respond to everything life throws at us -- or offers to us.

To maximize our time on the earth, we need to understand our identity--who we are and why we are here.

Alex Haley, author of Roots, said that in each of us there is a "deep hunger, marrow deep, to discover our heritage, to know who we are and where we came from."

Ancestry.com was founded in 1997 so more people could discover their family stories. Much of our identity and resilience comes from deeply knowing and appreciating our ancestors--and what they did to get us here.

Another part of our individual identity is our natural talents.

Gallup invited me to lead the global strengths movement for nearly 5 years. I soaked up the teachings of Dr. Don Clifton, the father of strengths psychology and grandfather of positive psychology, and met great people who were taught and trained by him.

Today, Soar's mission is to unlock the potential of billions of human beings.

We plan to launch an AI-based personal recommendation engine to help you reach your full potential and make the best possible use of your time on earth.

You will personally train your AI to help you reach the outcomes you want in life.

By understanding your talents, your values, your beliefs, your goals--and the people in your life who help you most to grow and develop, it will help you utilize time wisely. It will connect you with amazing content, people, experiences and opportunities.

It will help you make time for family and friends, find a career that you love, find joy in meaningful service to others.

Don Clifton said there are enough human strengths to create a productive and harmonious world.

Let's find them and unleash them, in everyone.

Oct 2017 – Present · 2 yrs 4 mos  
Provo, Utah Area

If you are a coach who loves helping people identify, develop and use their natural talents, you should take a look at Soar.

Soar helps individuals and teams find the perfect coach for them. Tens of millions of people have taken assessments (such as StrengthsFinder 2.0) that help them find their positive traits, talents, and strengths, but few have a coach to help them fully unlock their potential. We believe that to be their absolute best, everybody needs a coach.
