Jackie Iversen, Chief Clinical Officer at Sen-Jam is a visionary pharmacist and clinical research expert in the areas of pharmacokinetics and pain management. She's a leader in clinical settings and clinical pain education. Jackie has been cited in 10 scientific publications. She's a Memorial Sloan Kettering fellow. Jackie holds a BS in Pharmacy from University of Buffalo and a MS in Clinical Pharmacy from St. John's University.

Experience

Sen-Jam Pharmaceutical

Chief Clinical Officer

2016 - Present (8 years)

Sen-Jam is the biggest advancement in curbing inflammation since aspirin was invented 125 years ago! Because our products repurpose small molecules that are already in drugs today, our assets are potent and extremely non-toxic therapeutics that have a lower regulatory risk. And we benefit from a more direct path to FDA approval and to market.

- \$217B addressable market across multiple therapeutic applications including hangovers, opioid withdrawal, and upper respiratory infections
- Leadership from MIT, Harvard, Mayo Clinic, & Memorial Sloan Kettering with exits over \$730M
- 60 global patents approved & pending
- Portfolio of 11 assets, 4 of which are at or near pivotal Phase II clinical trials
- Partnerships w/National Institute of Drug Abuse, People Science, & Duke University
- Backed by corporate venture partner KVK Tec
