

YAHYN™

DISCOVER THE PERFECT WINE FOR **YOU.**

MATCH.BUY.DRINK.

YAHYN IS A B2C MARKETPLACE LEAVING AI

SHOPPING FOR WINE HAS NEVER BEEN EASY

Meet Sarah, she loves wine, but struggles to find the perfect wine for her.

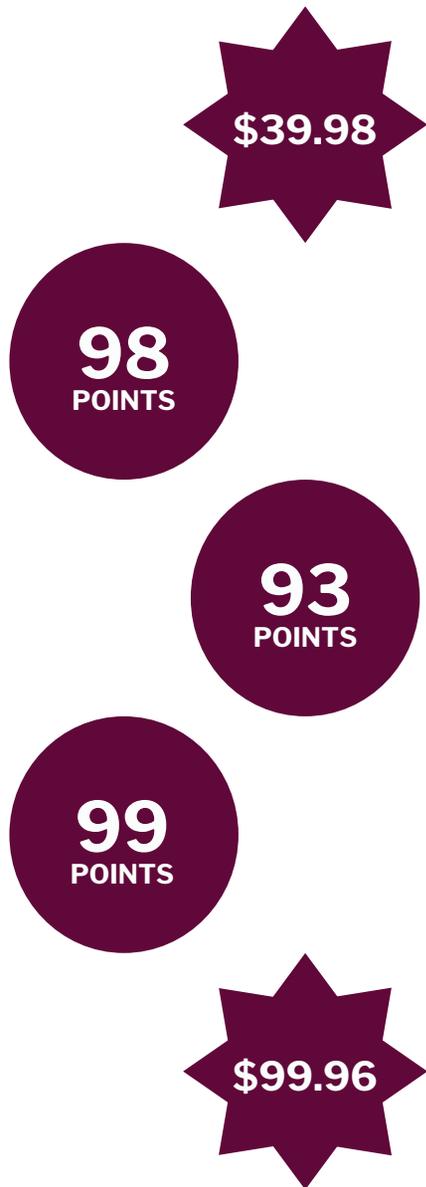

Vintage, varietal, region, and other factors create the paradox of choice.

Sarah is unlikely to choose an unknown wine.

She has the same problem most of us do...

DECIDEOPHOBIA

WINE IS BROKEN.

Marketed to consumers by just two numbers.
Price and Rating.

Consumers are buried with endless choices, prices, jargon and highly subjective ratings.

As a result **78% of consumers** purchase wine based on brand awareness or aesthetic of bottle, **not taste!**

SOLUTION.

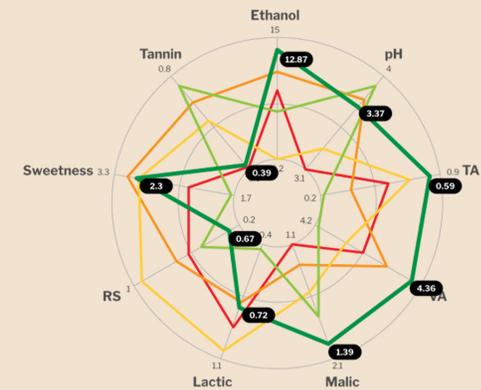

Yahyn turns subjectivity to objectivity.

Yahyn chemically identifies what a wine tastes like and then with a high degree of accuracy, **pairs you with the perfect bottle.**

Users no longer will need to “take a chance” on unknow bottles or vintages.

Yahyn is a two-sided platform that positively disrupts the “**three tier system**” of wine distribution by integrating with vineyards in real time through custom APIs, driving DTC success.

YAHYN'S NETWORK EFFECT.

Wine is a social beverage that is usually shared between 2 people or more. We leverage this by using our AI to pair you AND your friends with the perfect wine to share despite potentially having varying flavor preferences. We are creating further incentives for our user base to “clink” with others to earn credits towards future wine purchases.

Power comes from the gamified sharibility
