First_Name - great chatting just now!

Here are some useful links to show you the power of humanity and its potential for impact at scale.

Best wishes,
Pete

Blurb:

Humanity (<https://humanity.health>) is the #1 health and longevity app platform that leverages AI and longitudinal health data to monitor people's rate of aging and biological age, and guides them to slow it down, and even reverse it, based on what's working for people like them.

The founders have founded, scaled and exited b2c and b2b2c platforms to over 1 billion users and hundreds of millions of dollars in revenues, and are on a mission to give 1 billion years of health back to humanity by the end of this decade.

Raise:

- already closed > \$2.3m in this round
- includes Seedcamp, One Way Ventures, S16, the co-founder of Match.com, Shazam, Editor in chief of Lifespan.io and more
- includes \$440k raised from crowd raise on Wefunder, largely from Humanity customers who love the product (raised more in first week than any other company on Wefunder. Learn more here: <https://wefunder.com/humanity>)
- \$60k remaining on preferential terms (\$30m cap and 15% discount on a SAFE) and then \$35m cap and 10% discount for up to \$1m more.
- Plan is to raise a much bigger round in the second half of 2024.

Here's a link to the deck: <https://docsend.com/view/mmv9qsgn9yfh657r>

Here's a link to the investors on our cap table:

<https://docsend.com/view/sxudkfyxfqhdyisn>

Target: angels and single family offices.

All the key headline points can be found on the Wefunder page above.

Latest Update:

- Most recent quarterly investor update here:

<https://docsend.com/view/s7i8fyanm22km6i3>

- 170,000 users, 4.8 App Store rating and 10x market leading engagement (65% WAU/MAU and 35% DAU/MAU), retention (74% after 12 weeks for premium users) and conversion to premium (12%) metrics.
- just launched Humanity enterprise for B2B partners due to inbound commercial interest to offer Humanity to their teams, customers and citizens
- a number of big b2b commercial partnerships to be announced soon
- partner API's read for integration of aging models for movement, heart rate and blood markers by end of Jan
- launching a higher tier "pro" subscription offering in Jan which includes measuring Biological Age and Rate of Aging from blood results
- just published a [ground breaking scientific paper in Nature](#) in partnership with Imperial College London, having developed a blood biomarker model for aging that's 9% more accurate than the world's leading blood model for aging, and only needs 6 blood markers, radically increasing access.

Exciting news for Humanity!

Humanity recently closed \$1.8m in funding and we're now extending our round to allow our customers, fans, and supporters to become investors as well.

You can learn more HERE: <https://wefunder.com/humanity>

For the past few years, my cofounder (MG) and I have built Humanity into the #1 longevity app.

It's powered by AI and guides you to slow your aging, by monitoring your movement, heart rate, lifestyle (and soon blood marker) patterns.

Since we lost loved ones to chronic disease and felt helpless at the time, we wanted to create a system that helps people understand what's causing them to get sick before it's too late and help them live a healthier life for longer.

We're just getting started, and already have over 160,000 users, 4,500 reviews on the App Store, averaging 4.8/5 stars, with proven behavior change and market leading engagement and retention metrics.

Many of you here have been with us since day one, and we wanted to give an opportunity to secure your spot and invest alongside our VC partners.

You can become a shareholder here: <https://wefunder.com/humanity>

We're excited to have you on board as we embark on this new chapter.

Since we lost loved ones to chronic disease and felt helpless at the time, we wanted to create a system that helps people understand what's causing them to get sick before it's too late and help them live a healthier life for longer.

The healthcare industry is extremely reactive, only jumping in when individuals are already sick. Humanity is leading a new wave in preventative health and we're on a mission to give back 1 billion years of health by the end of this decade.

Hey {first name}

Pete & MG here. Hope you're enjoying the new functionality in Compare which makes it

easier for you to celebrate progress with friends in your circle. Look out for more social features coming very soon.

A huge thank you to those who've already reserved an allocation in Humanity on our crowdfunding campaign [on Wefunder](#). Your support helps us in accelerating towards our mission of giving 1 billion years of health back to the world by the end of this decade.

Here are some our favorite comments left by Humanity users, and now investors:

These two founders are very special and the app is just beautiful - longevity is also key for solving many chronic illnesses - incredibly impactful.

I use the app daily, has helped given me the motivation to change and am hoping others will feel the same.....simple actions caused me to go for over 4 years in age.

I've used the app since day one and find it so informative and invaluable to helping me keep on top of my age management

In line with our values, we wanted to extend the opportunity to each and everyone one of you, to become part owners in Humanity alongside world renowned venture capitalists, health industry leaders, and prominent angels.

For those who have yet to reserve an allocation, it's not too late, we still have a few weeks before launching to the public.

If you haven't seen our Wefunder page yet, check it out [here](#).

We're building an app that helps individuals live healthier for longer by monitoring their rate of aging through digital, blood and genetic markers, and recommending specific actions to take to improve one's health, based on what's working for people like them. Like a WAZE for health.

Highlights:

- Repeat founders with successful exits of platforms that reached over 1 billion users and hundreds of \$ millions in revenues (Stanford, MIT, Cambridge, Accenture, AnchorFree, lastminute.com and Badoo).

- 12% conversion to premium compared to 1-2% industry average
- 63% Usage retention after 12 weeks for premium users and 48% for all users
- 4.8 Star rating with over 4,500 reviews on Apple App Store
- Advanced strategic partnership discussions with several of the worlds largest companies focused on health and wellness including one of the largest hardware and software companies, retailers, fitness apps and various insurance companies
- Proven behavior change with over 15% median increase in movement after sign up (18% if BMI > 30)
