## **INDEPENDENT ACCOUNTANT'S REVIEW REPORT**

We have reviewed the accompanying financial statements of Land Betterment Corporation (an Indiana corporation), which comprise the balance sheet as of February 13, 2020 (inception) and the related notes to the financial statements. A review includes primarily applying analytical procedures to management's financial data and making inquiries of company management. A review is substantially less in scope than an audit, the objective of which is the expression of an opinion regarding the financial statements as a whole. Accordingly, we do not express such an opinion.

### **Management's Responsibility for the Financial Statements**

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America; this includes design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement whether due to fraud or error.

### **Accountant's Responsibility**

Our responsibility is to conduct the review in accordance with Statements on Standards for Accounting and Review Services promulgated by the Accounting and Review Services Committee of the AICPA. Those standards require us to perform procedures to obtain limited assurance as a basis for reporting whether we are aware of any material modifications that should be made to the financial statements for them to be in accordance with accounting principles generally accepted in the United States of America. We believe that the results of our procedures provide a reasonable basis for our conclusion.

### **Accountant's Conclusion**

Based on our review, we are not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with accounting principles generally accepted in the United States of America.

### **Going Concern**

As discussed in Note 2, certain conditions indicate that the Company may be unable to continue as a going concern. The accompanying financial statements do not include any adjustments that might be necessary should the Company be unable to continue as a going concern.

**NOTE 1: NATURE OF OPERATIONS**

Land Betterment Corporation (the “Company”) is a corporation organized February 13, 2020 under the laws of State of Indiana. The Company was formed for the purpose of reclaiming and repurposing former coal mining sites, creating community development initiatives, and performing contracted environmental services.

As of February 13, 2020 (inception), the Company has not yet commenced planned principal operations nor generated revenue. The Company’s activities since inception have consisted of formation activities and preparations to raise capital. Once the Company commences its planned principal operations, it will incur significant additional expenses. The Company is dependent upon additional capital resources for the commencement of its planned principal operations and is subject to significant risks and uncertainties; including failing to secure additional funding to operationalize the Company’s planned operations or failing to profitably operate the business.

**NOTE 2: GOING CONCERN**

The accompanying financial statements have been prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. The Company has not yet commenced planned principal operations, plan to incur significant costs in pursuit of its capital financing plans, and has not yet generated revenues or profits as of its inception date. The Company’s ability to continue as a going concern for the next twelve months following the date the financial statements were available to be issued is dependent upon its ability to obtain additional capital financing from investors sufficient to meet current and future obligations and deploy such capital to produce profitable operating results. No assurance can be given that the Company will be successful in these efforts.

These factors, among others, raise substantial doubt about the ability of the Company to continue as a going concern for a reasonable period of time. The financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts or the amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern.

**NOTE 3: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

Basis of Presentation

The accounting and reporting policies of the Company conform to accounting principles generally accepted in the United States of America (GAAP).

The Company adopted the calendar year as its basis of reporting.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

See accompanying Independent Accountant’s Review Report

**LAND BETTERMENT CORPORATION**  
**NOTES TO THE FINANCIAL STATEMENT (UNAUDITED)**  
**As of February 13, 2020 (inception)**

---

Risks and Uncertainties

The Company has a limited operating history and has not yet generated revenue from intended operations. The Company's business and operations are sensitive to general business and economic conditions in the U.S. along with local, state, and federal governmental policy decisions. A host of factors beyond the Company's control could cause fluctuations in these conditions, including but not limited to: credit risk, and changes to regulations governing the Company's industry. Adverse developments in these general business and economic conditions could have a material adverse effect on the Company's financial condition and the results of its operations.

Cash Equivalents and Concentration of Cash Balance

The Company considers all highly liquid securities with an original maturity of less than three months to be cash equivalents. The Company's cash and cash equivalents in bank deposit accounts, at times, may exceed federally insured limits. As of February 13, 2020 (inception), the Company has not established a deposit account with a financial institution.

Allowance for Doubtful Accounts

The Company recognizes an allowance for losses on trade and other accounts receivable in an amount equal to the estimated probable losses net of recoveries. The allowance is based on an analysis of historical bad debt experience, current receivables aging and expected future write-offs, as well as an assessment of specific identifiable amounts considered at risk or uncollectible.

Fair Value of Financial Instruments

Financial Accounting Standards Board ("FASB") guidance specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect market assumptions. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurement) and the lowest priority to unobservable inputs (Level 3 measurement). The three levels of the fair value hierarchy are as follows:

Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date. Level 1 primarily consists of financial instruments whose value is based on quoted market prices such as exchange-traded instruments and listed equities.

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly (e.g., quoted prices of similar assets or liabilities in active markets, or quoted prices for identical or similar assets or liabilities in markets that are not active).

Level 3 - Unobservable inputs for the asset or liability. Financial instruments are considered Level 3 when their fair values are determined using pricing models, discounted cash flows or similar techniques and at least one significant model assumption or input is unobservable.

The carrying amounts reported in the balance sheet approximate their fair value.

Stock-Based Compensation

The Company accounts for stock options issued to employees under Accounting Standards Codification (“ASC”) 718, Compensation – Stock Compensation. Under ASC 718, share-based compensation cost to employees is measured at the grant date, based on the estimated fair value of the award, and is recognized as expense over the employee’s requisite vesting period. The fair value of each stock option or warrant award is estimated on the date of grant using the Black-Scholes option valuation model. The Company measures compensation expense for its non-employee stock-based compensation under ASC 505, Equity. The fair value of the option issued or committed to be issued is used to measure the transaction, as this is more reliable than the fair value of the services received. The fair value is measured at the value of the Company’s common stock or equity award on the date that the commitment for performance by the counterparty has been reached or the counterparty’s performance is complete. The fair value of the equity instrument is charged directly to stock-based compensation expense and credited to additional paid-in capital.

Revenue Recognition

The Company recognizes revenue in accordance with ASC 606 from services provided when (a) persuasive evidence that an agreement exists; (b) the products or services has been delivered or completed; (c) the prices are fixed and determinable and not subject to refund or adjustment; and (d) collection of the amounts due is reasonably assured. Our revenue is expected to be comprised of the performance of environmental services. All of the activity is expected to be undertaken in eastern Kentucky and Indiana.

Organizational Costs

In accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 720, organizational costs, including accounting fees, legal fees, and costs of incorporation, are expensed as incurred.

Income Taxes

The Company uses the liability method of accounting for income taxes as set forth in ASC 740, *Income Taxes*. Under the liability method, deferred taxes are determined based on the temporary differences between the financial statement and tax basis of assets and liabilities using tax rates expected to be in effect during the years in which the basis differences reverse. A valuation allowance is recorded when it is unlikely that the deferred tax assets will not be realized.

The Company assesses its income tax positions and record tax benefits for all years subject to examination based upon our evaluation of the facts, circumstances and information available at the reporting date. In accordance with ASC 740-10, for those tax positions where there is a greater than 50% likelihood that a tax benefit will be sustained, the Company’s policy is to record the largest amount of tax benefit that is more likely than not to be realized upon ultimate settlement with a taxing authority that has full knowledge of all relevant information. For those income tax positions where there is less than 50% likelihood that a tax benefit will be sustained, no tax benefit will be recognized in the financial statements.

**LAND BETTERMENT CORPORATION**  
**NOTES TO THE FINANCIAL STATEMENT (UNAUDITED)**  
**As of February 13, 2020 (inception)**

---

The Company has evaluated its income tax positions and has determined that it does not have any uncertain tax positions. The Company will recognize interest and penalties related to any uncertain tax positions through its income tax expense.

The Company accounts for income taxes with the recognition of estimated income taxes payable or refundable on income tax returns for the current period and for the estimated future tax effect attributable to temporary differences and carryforwards. Measurement of deferred income items is based on enacted tax laws including tax rates, with the measurement of deferred income tax assets being reduced by available tax benefits not expected to be realized in the immediate future.

The Company expects to file U.S. federal and various state income tax returns. The Company was formed in 2020 and has not been required to file any tax returns. All tax periods since inception remain open to examination by the taxing jurisdictions to which the Company is subject.

**NOTE 4: STOCKHOLDERS' EQUITY (DEFICIT)**

The Company has authorized 100,000,000 shares of \$0.01 par value common stock. As of February 13, 2020 (inception), no shares of common stock were issued or outstanding.

See Note 7 for discussion of equity activity and changes to the capital structure.

**NOTE 5: RECENT ACCOUNTING PRONOUNCEMENTS**

In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers* (Topic 606). This ASU supersedes the previous revenue recognition requirements in ASC Topic 605—Revenue Recognition and most industry-specific guidance throughout the ASC. The core principle within this ASU is to recognize revenues when promised goods or services are transferred to customers in an amount that reflects the consideration expected to be received for those goods or services. In August 2015, the FASB issued ASU 2015-14, *Revenue from Contracts with Customers*, which deferred the effective date for ASU 2014-09 by one year to fiscal years beginning after December 15, 2017, while providing the option to early adopt for fiscal years beginning after December 15, 2016. Transition methods under ASU 2014-09 must be through either (i) retrospective application to each prior reporting period presented, or (ii) retrospective application with a cumulative effect adjustment at the date of initial application. We are continuing to evaluate the impact of this new standard on our financial reporting and disclosures, including but not limited to a review of accounting policies, internal controls and processes. The Company plans to adopt this new standard effective on its inception date.

In February 2016, the FASB issued ASU 2016-02, *Leases* (Topic 842). This ASU requires a lessee to recognize a right-of-use asset and a lease liability under most operating leases in its balance sheet. The ASU is effective for annual and interim periods beginning after December 15, 2020, including interim periods within those fiscal years. Early adoption is permitted. We are continuing to evaluate the impact of this new standard on our financial reporting and disclosures.

Management does not believe that any other recently issued, but not yet effective, accounting standards could have a material effect on the accompanying financial statements. As new accounting pronouncements are issued, we will adopt those that are applicable under the circumstances.

**LAND BETTERMENT CORPORATION**  
**NOTES TO THE FINANCIAL STATEMENT (UNAUDITED)**  
**As of February 13, 2020 (inception)**

---

**NOTE 6: COMMITMENTS AND CONTIGENCIES**

In the course of normal operations, the Company may be involved in various claims and litigation that management intends to defend. The range of loss, if any, from potential claims cannot be reasonably estimated. However, management believes the ultimate resolution of matters will not have a material adverse impact on the Company's business or financial position.

**NOTE 7: SUBSEQUENT EVENTS**

Betterment Spirits LLC, a wholly owned subsidiary of the Company, was acquired in March 2020 for the purpose of up-cycling former thermal coal mining sites into farm to bottle craft distillery facilities.

During February 2020, the Company entered into an environmental solutions contract with a company under common control. The contract covers labor and labor related costs and is structured as a cost-plus contract.

During March 2020, the Company entered into a surface lease agreement with a company under common control. The contract term is 5 years with monthly rental payments equaling \$2,500, plus a sales royalty totaling 6% of gross revenue generated from the property.

On March 30, 2020 the Company filed restated Articles of Incorporation, authorizing 195,000,000 shares of \$0.01 par value of common stock ("Common shares") and 5,000,000 shares of \$0.01 par value of preferred stock ("Preferred shares"). Common shares have all rights and voting privileges of standard common shares. Each Preferred share votes on an as-converted basis as one Common share. The total authorized and issued Preferred shares of 5,000,000 shares is initially convertible into a number of Common shares that results in a greater ownership percentage of either (a) on a basis of one Preferred share convertible into one Common share, or (b) 40.0% of the outstanding amount of Common shares plus common stock equivalents that are existing at the time of the conversion, at any time and from time to time (which is the Conversion Ratio). Should less than the full 5,000,000 Preferred shares be converted to Common shares, the Conversion Ratio will be proportionally reduced by the number of Preferred shares that is so converted. There is no additional consideration required to convert the Preferred shares to Common shares. There is no expiration date on the Preferred shares, and the Preferred shares is convertible to Common shares by the holder on a cashless basis. Upon restatement, 5,000,000 Common shares and 5,000,000 Preferred shares were granted to the Company's founders at an issuance price equal to the par value of \$.01 per share. These issuances vested immediately.

Management's Evaluation

Management has evaluated subsequent events through April 2, 2020, the date the financial statements were available to be issued. Based on this evaluation, no additional material events were identified which require adjustment or disclosure in these financial statements.
