## Pitch

**MobileyMe, Inc. is solving a problem that affects anyone with a smartphone and is ready to hit the market!**

Anyone with a smart device knows the anxiety and trouble that comes with being locked out of your phone in the event that it is lost, stolen, broken, or dead. With our revolutionary breakthrough in mobile application technology and security, users will never have to worry about losing their data or being unreachable again. MobileyMe is a patented internet-based program that would enable any user's cell phone data to be saved in a cloud service without even holding their phone in their hands. No matter where you are, you can simply log into MobileyMe from any device to access all of your smartphone's features, including access to contacts, as well as receiving and making calls with your personal caller ID. All of this will be possible without having any effect on the device you are using to log on! Now you can feel secure knowing you will be able to contact family, conduct business as usual, and have access to your data anywhere, any time.

Key Facts
Everyone with a smartphone will be able to seamlessly trace and access the full features of their phone no matter where it is.
The online application is unique software, brilliantly engineered by a team of experienced and passionate tech experts.
Our cybersecurity expert, Bryan Seely, protects our back-end servers.
Our purpose-driven Founder is on a mission to ensure people have access to the connection, security, and communication they need when they need it most!

## The Problem:

You're locked out of your phone and your personal information due to:

**Broken or  
Malfunctioning  
Device**

**Lost or Stolen  
Device**

**Dead Battery**

**We've all been there. We've all felt  
the anxiety that comes with being:**

**Unable to  
reach family**

**Unable to  
conduct  
business**

**Unable to be  
contacted  
during an  
emergency**

The 'MOBILEY ME' logo is positioned in the top right corner of this section, featuring the same cartoon smartphone character as above.

## MOBILEYME KEY FEATURES

A white line-art icon of a smartphone with a thumbs-up gesture on the screen.

Access all of your phone's stored information from any device without having any effect on that other device.

A white line-art icon of a smartphone with a cracked screen.

If your phone was lost, stolen, or damaged you will be able to remotely lock it or delete information.

A white line-art icon of a smartphone with circuitry patterns on its surface.

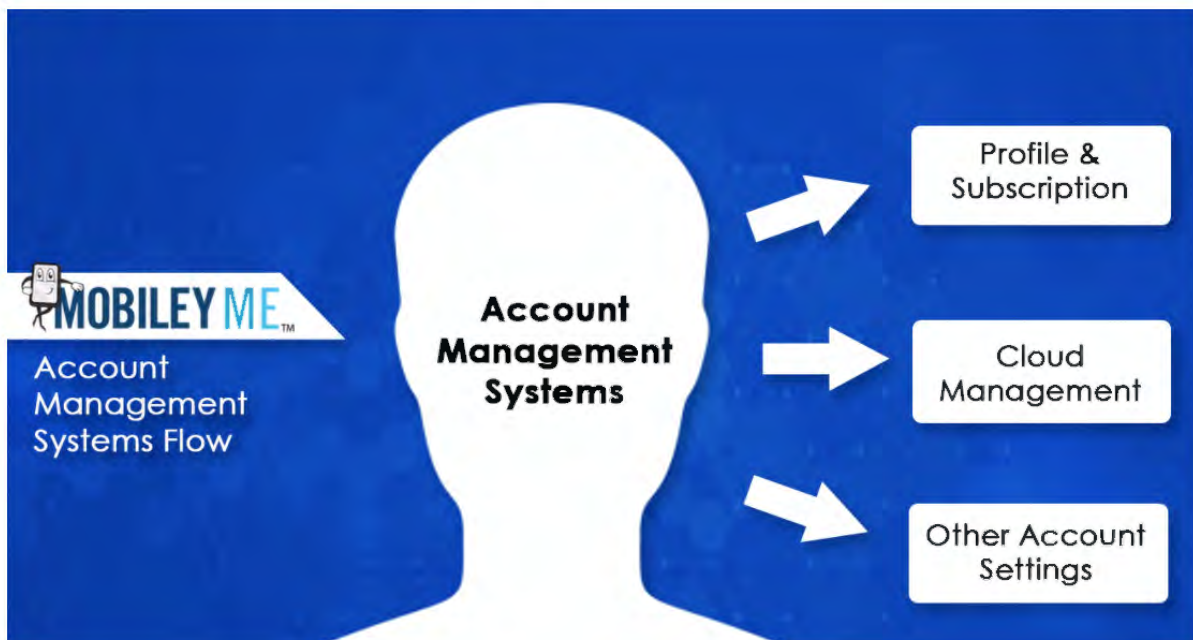

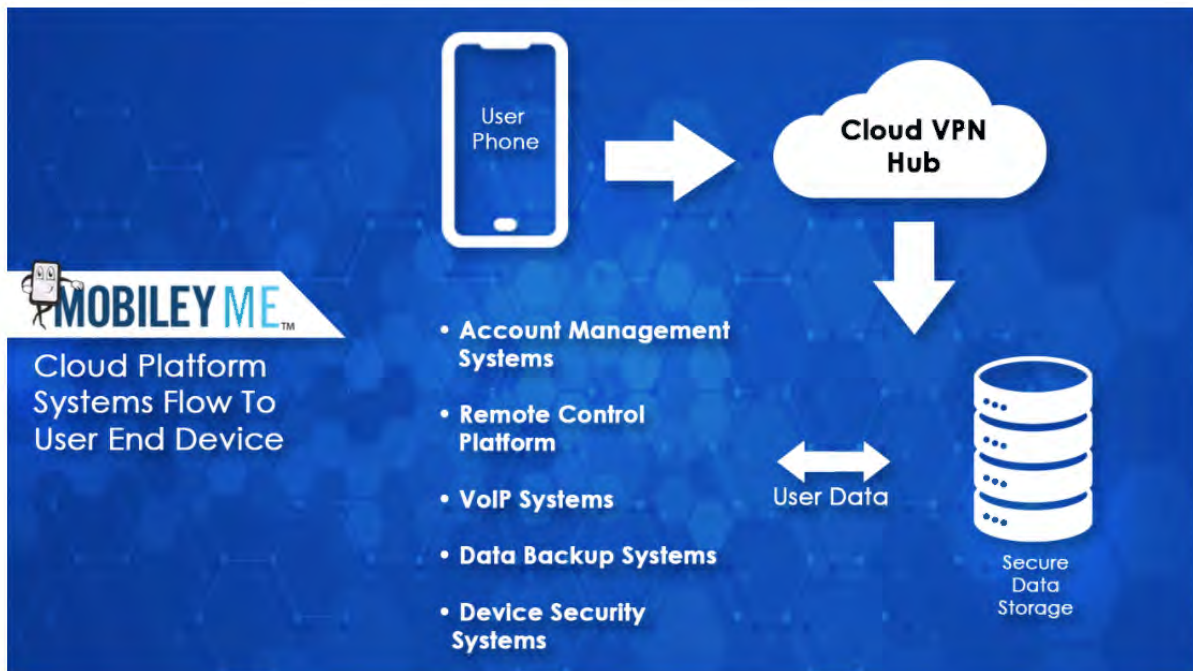

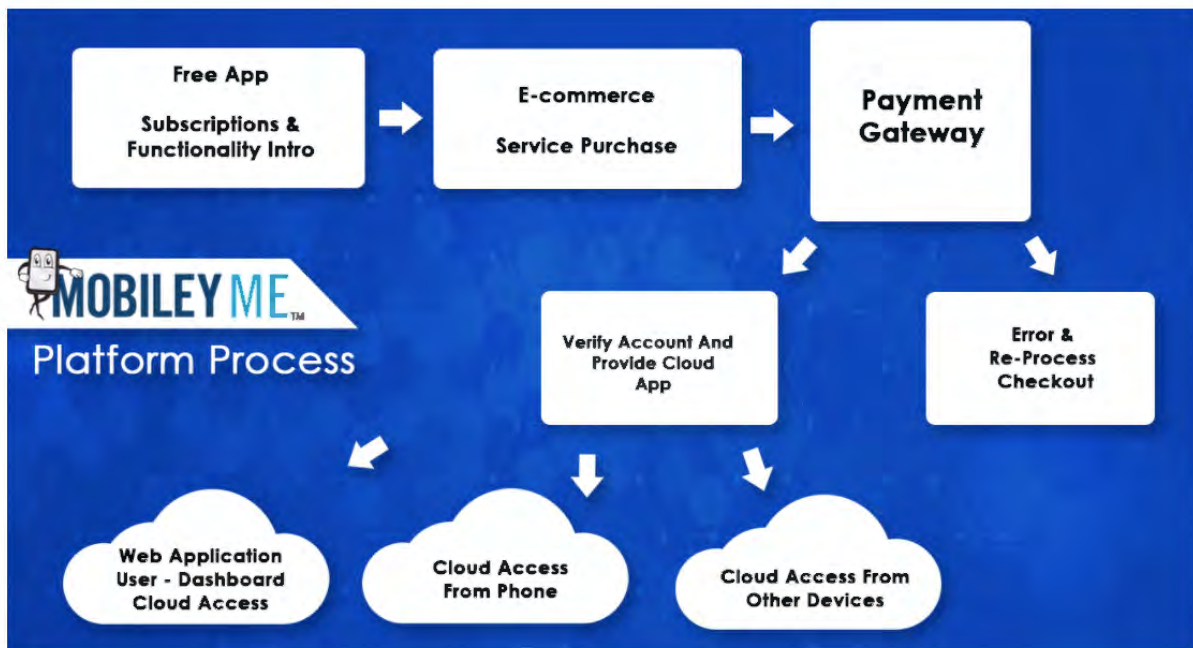

Access your smart phone no matter where it's located, e.g. it has been stolen or lost.

A white line-art icon showing a smartphone and a laptop connected by a circular arrow, indicating remote access.

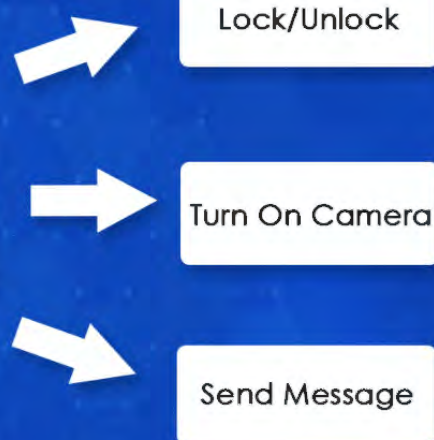

Remotely access and operate all apps and functions of your phone.

**Have confidence that you have control over your device!**

## Bryan Seely BOARD MEMBER

CHIEF INFORMATION SECURITY OFFICER /EVANGELIST/R&D/COFOUNDER

Bryan Seely is a world famous cyber security expert, ethical hacker, author and former U.S. Marine. Seely is known for intercepting calls to the United States Secret Service and FBI by hacking Google Maps in early 2014, but rather than spending time in prison he was called a hero and moved on to bigger and better things. A few months later, he found an exploit in LinkedIn and helped the company resolve it.

In August of 2014, Seely and another security expert de-anonymized the highly valued mobile app, Secret. He was on the front page of Wired, CNNMoney, CNET, Forbes and the Washington Post— all in the same day. The high-profile hacking of Secret landed Seely a consulting gig with Secret less than a week later, and Mark Cuban personally contacted the duo to provide mobile application security/ethical hacking services for his newest tech investment, Cyberdust.

In a rare interview, Mark Cuban spoke with NYTimes best-selling author and journalist Brian Krebs and provided a glowing endorsement of Seely.

## Mack Major

DIRECTOR OF COMMUNICATIONS

Major's more than 20 years of experience in real estate includes the acquisition, rehabilitation and resale of more than 200 single-family homes within Detroit; and, most recently, redevelopment of residential neighborhoods in Central Florida, as managing partner of House Tur Investments LLC and Capital Real Estate Professionals LLC.

As a residential real estate developer, Major has developed core teams for acquisitions and sales, property inspection, and title and escrow; along with an organized team of architects and construction managers capable in both renovations and new development.

Major developed, managed the financing and co-owns an \$18 million indoor soccer facility in North America. Major also has extensive sales, marketing and project management experience in the area of advanced MaterialScience (now, Covestro) and DuPont Automotive.

Major earned a Bachelors of Science in Mechanical Engineering from Michigan State University and a Masters of Business Administration in Business and Economics from West Virginia University. He holds a Michigan Builders License.

Chica

"The elegantly engineered software, ..., is a patented internet-based program that would enable any user's cell phone data to be saved in a cloud service without even holding the phone in their hands."

— The Chicago Journal

## FAQ

**Q:** Is my data secure?

**A:** Absolutely. We have the highest parameters of security in place through a variety of VPN's when establishing a secure line to our Cloud platform with the data hub being hosted anonymously. All of this backed and monitored by our world renowned security analyst, Bryan Seely, a former consultant of the FBI, White House, Google, and Microsoft.

**Q:** Whats the difference in other data storage providers and your service?

**A:** Majority of other data storage services require a verification code to be sent to your phone that would usually be broken/lost/stolen, making it troubling to actually get to your info, until you go buy a new phone. Hopefully you have it backed up! We also run on any device, remotely, so we welcome Android users to your very own personal cloud.

**Q:** Can I call any phone number?

**A:** Yes, we bridge the gap between Skype and WhatsApp where on those platforms you can ONLY call existing contacts. With MobileyMe you're able to call any cell phone or landline.

**Q:** If I have lost my phone and someone calls me, will I receive incoming calls?

**A:** Yes, as long as you are logged in to our platform from any smart device.

**Q:** How will I be able to control my AIRPLANE mode?

**A:** Simple. When you are making your account, it will give you an option in settings to keep it on or off, so in-fact if it's lost, you will go on to your desktop and keep it ON so the thief wont be able to

shut it off. You will then be able to locate your device.

Q: If I leave my phone somewhere by accident, can I log into my computer and start using my phone?

A: Yes! Just log in and start making phone calls. Even your very own number will show to whomever your calling/ send messages /pictures as if you were using your own phone with just a click of a button!

Q: If my ringer is OFF and I can't find my phone, how can I get to it?

A: Log into the MobileyMe platform from ANY desktop or smart device; under settings, put your ringer ON and call your phone or look in "locate my phone" if you know its not in the house.

Investing in startups and early-stage companies involves risks including illiquidity, loss of investment and dilution. If you choose to invest in businesses displayed on this portal, you need to be aware and accept that (1) you should invest money you can afford to lose, (2) the stock purchased is restricted, and that investments are illiquid, (3) even if the business is successful, you might not receive any cash return on your investment for several years, (4) ordinary events in the life of the firm can cause your ownership percentage to decline, and (5) investments in early-stage companies should be done as part of a broader investment plan where the vast majority of assets are placed in safer, more liquid assets. You only will be allowed to invest with Fundopolis after you have registered and reviewed our educational materials.

Crowdfunding is a relatively new and evolving method of using the Internet to raise capital to support a wide range of ideas and ventures. An entity or individual raising funds through crowdfunding typically seeks small individual contributions from a large number of people. Individuals interested in the crowdfunding campaign – members of the “crowd” – may share information about the project, cause, idea or business with each other and use the information to decide whether to fund the campaign based on the collective “wisdom of the crowd.” To learn more about crowdfunding, please visit our [Educational Material](#) and the [SEC's website](#).

The portal provides access to investment opportunities under Regulation Crowdfunding, which was adopted by the SEC under Title III of the Jumpstart Our Business Startups Act (JOBS Act). Fundopolis [www.Fundopolis.com](#) is a website owned by Fundopolis LLC that operates Fundopolis Portal LLC, a crowdfunding portal member of the **Financial Industry Regulatory Authority (FINRA)** and registered with the U.S. Securities and Exchange Commission (SEC).
