

THISWAY GLOBAL

2020 Report

Dear investors,

First, my team and I want to thank all of you that are invested in this. The problem of hiring/getting hired has affected most Americans at some point in their lives. It is not an easy problem to solve, and COVID certainly hasn't helped. But we remain committed to bringing this solution to the market to help address the issues of bias, diversity, and helping the right people find their fit with the right company. Thank you for your support and belief in this mission. We couldn't do it without you!

We need your help!

We have poured a majority of our funding into product research and development, with minimal spend on marketing. This was intentional because this is a much more complex problem to solve and we wanted to be sure we have a solution that works before taking it to market. After extensive testing we feel now is that time. Any "word of mouth" marketing that our investors can do, (along with becoming customers!) would be the biggest help to us now.

Sincerely,

Angela Hood

Founder/CEO

Justin Hood

COO

Our Mission

We want ThisWay to be the gold standard for the most fair and accurate technology to source and match people to jobs without bias. Our 5 year goal was to have 1000 customers and we are onboarding 5000+ over the next 12 months. ThisWay will be known for bringing innovation to market that helped the world recover from a pandemic. These projections cannot be guaranteed.

How did we do this year?

Report Card

B+

The Good

We were able to weather the storm of COVID and the pandemic.

There was continued interest by our target customer base.

We closed a significant round of funding through WeFunder.

The Bad

We vacated our offices and went fully remote. While this has not significantly kept us from our mission, we miss each other!

We missed our revenue projections due to the economy shutting down and businesses not hiring.

NARRATIVE

Management's Discussion and Analysis of Financial Condition and Results of Operations

You should read the following discussion and analysis of our financial condition and results of operations together with our financial statements and the related notes and other financial information included elsewhere in this offering. Some of the information contained in this discussion and analysis, including information regarding the strategy and plans for our business, includes forward-looking statements that involve risks and uncertainties. You should review the "Risk Factors" section for a discussion of important factors that could cause actual results to differ materially from the results described in or implied by the forward-looking statements contained in the following discussion and analysis.

Overview

ThisWay is putting our workforce back together again by matching all people to all jobs, without bias. Removing bias levels the playing field and increases job opportunities for candidates by matching them to jobs they may not know about.

We want ThisWay to be the gold standard for the most fair and accurate technology to source and match people to jobs without bias.

Our 5 year goal was to have 1000 customers and we are onboarding 5000+ over the next 12 months.

ThisWay will be known for bringing innovation to market that helped the world recover from a pandemic.

These projections cannot be guaranteed.

Milestones

ThisWay Global Inc was incorporated in the State of Delaware in September 2016.

Since then, we have:

- \$7M raised. Accelerated by Google. Backed by Amazon. Team with multiple exits.
- Artificial intelligence technology serving over 4000 companies.
- \$160B annual market in the US alone.
- Led by award-winning Founder & CEO, Angela Hood, Alumni Founder from University of Cambridge
- Named HR Tech Innovation of the Year featured in Yahoo! Finance

Historical Results of Operations

- *Revenues & Gross Margin.* For the period ended December 31, 2020, the Company had revenues of \$980,662 compared to the year ended December 31, 2019, when the Company had revenues of \$208,412. Our gross margin was 95.67% in fiscal year 2020, compared to 70.22% in 2019.
- *Assets.* As of December 31, 2020, the Company had total assets of \$2,432,959, including \$492,252 in cash. As of December 31, 2019, the Company had \$1,019,043 in total assets, including \$330,457 in cash.
- *Net Loss.* The Company has had net losses of \$459,949 and net losses of \$1,339,712 for the fiscal years ended December 31, 2020 and December 31, 2019, respectively.
- *Liabilities.* The Company's liabilities totaled \$5,217,628 for the fiscal year ended December 31, 2020 and \$3,243,763 for the fiscal year ended December 31, 2019.

Liquidity & Capital Resources

To-date, the company has been financed with \$500,000 in equity and \$5,650,000 in convertibles.

After the conclusion of this Offering, should we hit our minimum funding target, our projected runway is 3 months before we need to raise further capital.

We plan to use the proceeds as set forth in this Form C under "Use of Funds". We don't have any other sources of capital in the immediate future.

We will likely require additional financing in excess of the proceeds from the Offering in order to perform operations over the lifetime of the Company. We plan to raise capital in 7 months. Except as otherwise described in this Form C, we do not have additional sources of capital other than the proceeds from the offering. Because of the complexities and uncertainties in establishing a new business strategy, it is not possible to adequately project whether the proceeds of this offering will be sufficient to enable us to implement our strategy. This complexity and uncertainty will be increased if less than the maximum amount of securities offered in this offering is sold. The Company intends to raise additional capital in the future from investors. Although capital may be available for early-stage companies, there is no guarantee that the Company will receive any investments from investors.

Runway & Short/Mid Term Expenses

ThisWay Global Inc cash in hand is \$438,573, as of December 2021. Over the last three months, revenues have averaged \$105,000/month, cost of goods sold has averaged \$5,400/month, and operational expenses have averaged \$143,000/month, for an average burn rate of \$43,400 per month. Our intent is to be profitable in 12 months.

As a result of a successful pilot, on December 31, 2020 we signed a large partnership requiring us to onboard 5,000+ new paying company customers over the next 24 months. As of Nov 2021 we have onboarded the first 500 of these customers and now have the resource plans in place to ramp this up.

This current funding is to hire new people to support the required ramp so we have the ability increase our ramp up to 500 customers per month by end of 2021.

We added 4 more sales people to our team and have just hired a marketing agency to increase sales and revenue. We can ramp up the new customer partnership to support very rapid growth of our company.

The current sales team have closed \$987,450 in 2021 and \$750,000 of additional working capital will enable us reach profitability by Q1-2022. These are projections based on current partnership agreements and our sales pipeline and cannot be guaranteed.

Yes, we have current investors that are very supportive and we have new investors that have already made \$500,000 in funding commitments towards this current raise, including venture capital and other professional investors.

Net Margin: -47% Gross Margin: 96% Return on Assets: -19% Earnings per Share: -\$38,329.08

Revenue per Employee: \$122,583 Cash to Assets: 20% Revenue to Receivables: 125% Debt Ratio: 214%

Risks

Long enterprise sales cycles, long integration periods and accrual accounting framework can cause reporting revenue to take several months to become realized revenue receivables for the company. This poses a cash flow risk as an early stage company delivering to enterprise organizations.

This offering is being conducted on an expedited basis due to circumstances relating to COVID-19 and pursuant to the SEC's temporary regulatory COVID-19 relief. [Rule 201(z)(1)(i)].

Our future success depends on the efforts of a small management team. The loss of services of the members of the management team may have an adverse effect on the company. There can be no assurance that we will be successful in attracting and retaining other personnel we require to successfully grow our business.

Relatively low capitalization for the target market of mid/large/enterprise customers, which puts company at risk of not reaching cash-flow positive before funds run out

Combination of above risks resulting in team members getting sick and adversely affecting the company's ability to deliver.

We are currently a small team of highly skilled experts, but our lack of depth on "the bench" is a continuing risk, meaning we have one person in each role--one front-end engineer, one back-end engineer, one salesperson, one customer support person, etc.

Our status as an early-stage startup disincentivizes large/enterprise customers from early adoption and conversion to long term contracts.

The chaos and distraction due to the COVID-19 quarantine and its effects keep our customers from deciding to buy.

That a larger competitor develops similar technology and uses their size and capital to capture greater market share.

Description of Securities for Prior Reg CF Raise

Additional issuances of securities. Following the Investor's investment in the Company, the Company may sell interests to additional investors, which will dilute the percentage interest of the Investor in the Company. The Investor may have the opportunity to increase its investment in the Company in such a transaction, but such opportunity cannot be assured. The amount of additional financing needed by the Company, if any, will depend upon the maturity and objectives of the Company. The declining of an opportunity or the inability of the Investor to make a follow-on investment, or the lack of an opportunity to make such a follow-on investment, may result in substantial dilution of the Investor's interest in the Company.

Issuer repurchases of securities. The Company may have authority to repurchase its securities from unitholders, which may serve to decrease any liquidity in the market for such securities, decrease the percentage interests held by other similarly situated investors to the Investor, and create pressure on the Investor to sell its securities to the Company concurrently.

A sale of the issuer or of assets of the issuer. As a minority owner of the Company, the Investor will have limited or no ability to influence a potential sale of the Company or a substantial portion of its assets. Thus, the Investor will rely upon the executive management of the Company to manage the Company so as to maximize value for unitholders. Accordingly, the success of the Investor's investment in the Company will depend in large part upon the skill and expertise of the executive management of the Company. If the Management of the Company authorizes a sale of all or a part of the Company, or a disposition of a substantial portion of the Company's assets, there can be no guarantee that the value received by the Investor, together with the fair market estimate of the value remaining in the Company, will be equal to or exceed the value of the Investor's initial investment in the Company.

Transactions with related parties. The Investor should be aware that there will be occasions when the Company may encounter potential conflicts of interest in its operations. On any issue involving conflicts of interest, the executive management of the Company will be guided by their good faith judgement as to the Company's best interests. The Company may engage in transactions with affiliates, subsidiaries or other related parties, which may be on terms which are not arm's-length, but will be in all cases consistent with the duties of the management of the Company to its unitholders. By acquiring an interest in the Company, the Investor will be deemed to have acknowledged the existence of any such actual or potential conflicts of interest and to have waived any claim with respect to any liability arising from the existence of any such conflict of interest.

Minority Ownership

An Investor in the Company will likely hold a minority position in the Company, and thus be limited as to its ability to control or influence the governance and operations of the Company.

The marketability and value of the Investor's interest in the Company will depend upon many factors outside the control of the Investor. The Company will be managed by its officers and be governed in accordance with the strategic direction and decision-making of its Management, and the Investor will have no independent right to name or remove an officer or member of the Management of the Company.

Following the Investor's investment in the Company, the Company may sell interests to additional investors, which will dilute the percentage interest of the Investor in the Company. The Investor may have the opportunity to increase its investment in the Company in such a transaction, but such opportunity cannot be assured.

The amount of additional financing needed by the Company, if any, will depend upon the maturity and objectives of the Company. The declining of an opportunity or the inability of the Investor to make a follow-on investment, or the lack of an opportunity to make such a follow-on investment, may result in substantial dilution of the Investor's interest in the Company.

Exercise of Rights Held by Principal Shareholders

As holders of a majority-in-interest of voting rights in the Company, the unitholders may make decisions with which the Investor disagrees, or that negatively affect the value of the Investor's securities in the Company, and the Investor will have no recourse to change these decisions. The Investor's interests may conflict with those of other investors, and there is no guarantee that the Company will develop in a way that is optimal for or advantageous to the Investor. For example, the unitholders may change the terms of the operating agreement for the company, change the terms of securities issued by the Company, change the management of the Company, and even force out minority holders of securities. The unitholders may make changes that affect the tax treatment of the Company in ways that are unfavorable to you but favorable to them. They may also vote to engage in new offerings and/or to register certain of the Company's securities in a way that negatively affects the value of the securities the Investor owns. Other holders of securities of the Company may also have access to more information than the Investor, leaving the Investor at a disadvantage with respect to any decisions regarding the securities he or she owns. The unitholders have the right to redeem their securities at any time. Unitholders could decide to force the Company to redeem their securities at a time that is not favorable to the Investor and is damaging to the Company. Investors' exit may affect the value of the Company and/or its viability. In cases where the rights of holders of convertible debt, SAFES, or other outstanding options or warrants are exercised, or if new awards are granted under our equity compensation plans, an Investor's interests in the Company may be diluted. This means that the pro-rata portion of the Company represented by the Investor's securities will decrease, which could also diminish the Investor's voting and/or economic rights. In addition, as discussed above, if a majority-in-interest of holders of securities with voting rights cause the Company to issue additional units, an Investor's interest will typically also be diluted.

Restrictions on Transfer

The securities offered via Regulation Crowdfunding may not be transferred by any purchaser of such securities during the one year period beginning when the securities were issued, unless such securities are transferred:

- to the issuer;
- to an accredited investor[®];
- as part of an offering registered with the U.S. Securities and Exchange Commission; or
- to a member of the family of the purchaser or the equivalent, to a trust controlled by the purchaser, to a trust created for the benefit of a member of the family of the

the purchaser, to a trust created for the benefit of a member of the family of the purchaser or the equivalent, or in connection with the death or divorce of the purchaser or other similar circumstance.

Valuation Methodology for Prior Reg CF Raise

The offering price for the securities offered pursuant to this Form C has been determined arbitrarily by the Company, and does not necessarily bear any relationship to the Company's book value, assets, earnings or other generally accepted valuation criteria. In determining the offering price, the Company did not employ investment banking firms or other outside organizations to make an independent appraisal or evaluation. Accordingly, the offering price should not be considered to be indicative of the actual value of the securities offered hereby.

The initial amount invested in a Convertible Note is determined by the investor, and we do not guarantee that the Convertible Note will be converted into any particular number of units.

As discussed in Question 13, when we engage in an offering of equity involving Units, Investors may receive a number of units of Preferred Units calculated as either the conversion price equal to the lesser of (i) 100% of the price paid per unit for Equity Securities by the Investors in the Qualified Financing or (ii) the price equal to the quotient of the valuation cap of \$25,000,000.00 (the "Valuation Cap") divided by the aggregate number of outstanding units of the Company's units as of immediately prior to the initial closing of the Qualified Financing (assuming full conversion or exercise of all convertible and exercisable securities then outstanding, but excluding the units of equity securities of the Company issuable upon the conversion of the Notes or any other debt).

Because there will likely be no public market for our securities prior to an initial public offering or similar liquidity event, the price of the Units that Investors will receive, and/or the total value of the Company's capitalization, will be determined by our board of directors. Among the factors we may consider in determining the price of Units are prevailing market conditions, our financial information, market valuations of other companies that we believe to be comparable to us, estimates of our business potential, the present state of our development and other factors deemed relevant. In the future, we will perform valuations of our units that take into account, as applicable, factors such as the following:

- unrelated third party valuations;
- the price at which we sell other securities in light of the relative rights, preferences and privileges of those
- our results of operations, financial position and capital resources;
- current business conditions and projections;
- the marketability or lack thereof of the securities;
- the hiring of key personnel and the experience of our management;
- the introduction of new products;
- the risk inherent in the development and expansion of our products;
- our stage of development and material risks related to our business;
- the likelihood of achieving a liquidity event, such as an initial public offering or a sale of our company given the
- market conditions and the nature and history of our business;
- industry trends and competitive environment;
- trends in consumer spending, including consumer confidence;
- overall economic indicators, including gross domestic product, employment, inflation and interest rates; and
- the general economic outlook.

We will analyze factors such as those described above using a combination of financial and market-based methodologies to determine our business enterprise value. For example, we may use methodologies that assume that businesses operating in the same industry will unit similar characteristics and that the Company's value will correlate to those characteristics, and/or methodologies that compare transactions in similar securities issued by us that were conducted in the market.

Company

ThisWay Global Inc.

- Delaware Corporation
- Organized September 2016
- 8 employees

801 Barton Springs Road

Austin TX 78704

<https://www.thiswayglobal.com>

Business Description

Refer to the [ThisWay Global](#) profile.

EDGAR Filing

The Securities and Exchange Commission hosts the [official version of this annual report](#) on their EDGAR web site. It looks like it was built in 1989.

Compliance with Prior Annual Reports

ThisWay Global has previously not complied with the reporting requirements under Rule 202 of Regulation Crowdfunding.

Filing annual report late in 2021.

All prior investor updates

You can refer to the company's [updates page](#) to view all updates to date. Updates are for investors only and will require you to log in to the Wefunder account used to make the investment.
