LEAD INVESTOR 

 **Ethia Dolorie**

Kiddie Kredit is a product that will change the way children not only learn about credit but engage with the credit industry as a whole. As a mother of three, I made sure I taught my children the necessary values of debt management. This has helped to prevent them from making mistakes in their young lives but many other children do not have access to the same resources. Evan is an experienced founder who I believe has the skill and passion to bring this vision to fruition. He has assembled a great team, has tapped on incredible advisors, and is backed by other very knowledgeable investors. The future is bright for Kiddie Kredit!

As someone who spent his youth affected by bad credit, I don't want the same thing to happen to the generation after me. If credit is understood at an early age and maintained well through young adulthood, individuals will have earlier access to business loans and lines of credit which will allow generational wealth to grow at a faster pace.
