New Business Development

Luis Jose Cruz-Rivera

Senior Executive Partner in Technology and Inspired Master Distiller
Puerto Rico

Summary

Mr. Cruz-Rivera has over 20 years in technology solution development, business consulting, and corporate management, serving multidisciplinary and complex engagements in both the private and government sectors. Luis has a breadth of experience in setting the direction of new business opportunities, tailored solution development, enterprise architecture, data analytics, intellectual property exploitation, and partnership development to effectively meet growth, technical, financial, and business objectives.

He has also is a creative force that leads La Destilería designing spirits (winning 14 medals for his approach to Rum) process improvements, technique evolution. Focused on innovation to drive new experience and memories.

His management experience includes strategic plan and key performance indicator development, developing teams, and executing plans to meet near-term goals and long-range strategies. He has excelled in cyber and system engineering, enterprise architecture, and R&D, not to mention distillery plant design, operations and distilled spirits design.

Mr. Cruz-Rivera has focused his career on the effective management of technical and business innovation, always striving to achieve and maintain a competitive edge and enduring value that adapts to the dynamic and demanding requirements of national and corporate priorities.

A U.S. Army veteran and a member of numerous professional and civic organizations, Mr. Cruz-Rivera obtained his BS in Electrical Engineering from Prairie View A&M University and graduate work from Stanford University and GA Tech where he supported the Intelligence Community, as a consultant through SAIC, on cyber security, cyber-physical vulnerability, and supply chain risk. As a serial entrepreneur for over a decade, he supported

venture capital, hi-tech venture development organizations, and US government clients. Most recently before La Destilería and co-founding WhiteHawk, he was VP at Resilient in 2014, and worked as a Technical Director at TASC supporting Cyber and IT and the DHS DNDO programs in solution development, systems engineering, business development and project management. Where he was instrumental in the identification of business and technical models for multiple customers.

Experience

WhiteHawk Inc

Co-Founder

June 2016 - Present (6 years 9 months)

Alexandria, Virginia

WhiteHawk helps match cyber security need to best possible solution. We provide a client centric view which accounts for a 360 protection approach to facilitate customer investment and operational planning. Our advanced algorithms and remediation approach helps mid-sized and small companies to build and provide secure environment that supports business value. Therein I am responsible for the enterprise, technical, and security architecture, the development teams, and the overall management of the service delivery framework we deploy. Innovation management, delivery management, cyber consulting services, algorithm development, intellectual property development, are all in a good day's work...

LA DESTILERIA CRAFT SPIRITS

Chief Spirits Engineer

October 2016 - Present (6 years 5 months)

Jayuya, PR

Celebrating Life as Art, we bring new premium expressions of Rum to life and build on the quality Rum heritage of the Island. My job is to imagine how to execute every small batch to quality standards and build unique expressions in every bottle we send out to the world!

At La Destileria, I focus on building teams that deliver unique high quality distilled spirits through an Agile based product delivery model that unifies spirits manufacturing with artistry and craftsmanship using an innovative Kanban-lean manufacturing model. We have received 14 medals in less than

6 years for our spirits. Lead 3rd party manufacturing in support of Clients like Artesano Rum Corporation.

Hilton

Sr. Director, Enterprise architect

November 2018 - July 2022 (3 years 9 months)

Mclean, Virginia

Directed enterprise architecture integration and technology strategy. Involved in roadmap development and innovation planning that spanned 15 brands and over 5000 hotels worldwide. Managed risk and solution review for several products and architecture of same.

Resilient

Vice President of Govt and Industry Programs

October 2014 - June 2016 (1 year 9 months)

DC Area

Resilient, a pioneer in the field of resilience metrics, uses innovative big data analytics to measure the capacity of the world's leading businesses, governments and institutions to anticipate disruptions, adapt to events and create lasting value. As Vice President of Government and Industry Programs, I support business and market intelligence, strategic planning, process innovation, development of data science initiatives, information security solutions, among other responsibilities. Exciting times...
