Many storage applications require optimum humidity, temperature and air flow to achieve long term positive results. There was a need for a miniaturized smart atmospheric control technology that can benefit multiple industries.

Mary June Makoul CEO and Founder @ Pendram

Why you may want to invest in us...

- 1 Women Founded/CEO leading the company with over 25 years of expertise in launching technology products.
- 2 Totally unique and compelling "Smart" product line based on core, patent pending technology.
- 3 Investment includes entire portfolio of breakthrough high tech products for "Smart Storage".
- 4 Seasoned team has proven track record in start-ups delivering fast cash exits for Investors.
- 5 Flagship "Smart-Lid" Product chosen as Tommy Chong favorite for 2020 with strong demand.
- 6 Clear need and demonstrated demand for a high tech storage solution. Huge market potential.

Why investors ❤️ us

WE'VE RAISED \$315,060 SINCE OUR FOUNDING

Pendram is a technology company creating a new category of compelling delivery control platforms and patent pending products that solve critical quality, safety and preservation challenges. Through its proprietary, miniaturized Intellisphere IAC Technology, the company's "Smart and Smart-Stor" platform is based on patent pending, sophisticated software as well as electronic and thermal breakthroughs that work together to precisely and reliably control temperature, airflow and humidity. Paired with its Smart Cloud management software and comprehensive mobile applications. Pendram's Smart-Grown Quality system can control safety and integrity, enhance business efficiencies, prevent revenue loss and distinguish a higher quality product.

Investor Q&A

What does your company do? ▾

— COLLAPSE ALL

Pendram's proprietary patent pending smart technology called Intellisphere IAC creates the perfect atmosphere and sets a new standard for precise storage conditions with smart flexible control from anywhere. Pendram's business model is innovation and a mission to protect, preserve and optimize the long-term quality of perishables.

Where will your company be in 5 years? ▾

Successful exit with lucrative investor returns, although this cannot be guaranteed.

Why did you choose this idea? ▾

Many storage applications require optimum humidity, temperature and air flow to achieve long term positive results. There was a need for a miniaturized smart atmospheric control technology that can benefit multiple industries.

How far along are you? What's your biggest obstacle? ▾

Technology has been proven in the lab and is patent pending, Initial prototype complete, Smart App complete, Pre-orders received, Sourcing and Distribution set. Biggest obstacle is funds needed to go to finalize design, go to production and fulfill pre-orders and distribution expectations.

Who competes with you? What do you understand that they don't? ▾

No miniaturized solutions on the market today that can add and subtract moisture using distilled water only to maintain the perfect conditions for multiple applications. Current solutions use harmful chemicals which interfere with the integrity of stored products and are an environmental hazard.

How will you make money? ▾

Product sales and recurring service and marketing revenue from the companion applications that go along with product.

What are the biggest risks? If you fail, what would be the reason? What has to go right for you to succeed? ▾

The standard risks associated with bringing a hardware consumer product from prototype to volume production.

Can I invest using my IRA? ▾

Investors are able to invest using their IRA using a partner platform, AltoIRA. Especially for larger investments, we would recommend letting investors know about this option. On average, investors funding their investment with an Alto IRA invest 4x as much as non-Alto investors on Wefunder.

I am considering an investment over \$2,500. Can I schedule a call with the Founders to get more information and ask additional questions? ▾

Yes, for investments over \$2,500, you can schedule a call by using:
<https://calendly.com/maryjune>
