Creating the first artificial human arm | CEO at Atom Limbs | Co-founder at Bebo (acquired by Amazon)

San Francisco, California, United States

Summary

Atom Limbs is making the first artificial human arm for the 65M+ individuals worldwide with limb loss and limb difference, who make up the \$800B+ market. Leveraging neural feedback, Atom's state-of-the-art robotic arm is radically superior, easier-to-use, and more competitively priced than alternatives. We're a world-class team of ex-leadership from Apple, Neuralink, and IDEO who have brought some of the most iconic products of our time to life. More at <https://atomlimbs.com>

Experience

Atom Limbs

Co-Founder & CEO

September 2020 - Present (3 years 2 months)

San Francisco Bay Area

Self-employed

Angel Investor

January 2015 - Present (8 years 10 months)

I actively invest in several stealth longevity-focused startups that directly focus on full lifespan engineering vs. moderate lifespan extension.

I try not to constrain myself too much but my focus areas generally are: deep/hard/frontier tech, biotech, medical devices, robotics. Not sure if I'm a fit?

Shoot me a DM.
