Precious Metals Backed Tokens

Table of Contents

1. C3Bullion Business Model, Strategy and Market Overview

2. C3 Bullion Project Opportunities

3. C3Bullion Structure, Partner and Financial Details

4. C3 Bullion Management Team and Advisory Board

Confidential and Proprietary

Financial models and other supporting information regarding historical data, hypothetical target returns, contextual analysis, and other pertinent matters will be made available to prospective investors upon request. Please refer to Potential Risks for important information. The information in this Presentation does not constitute an offer to sell or a solicitation of an offer to buy any securities of the corporation or entities referred to herein, in the United States or to U.S. Persons.

C3Bullion (“C3B”) Streaming Investment Token

The Junior Mining sector is currently facing limited financing alternatives and **C3B** aims to capitalize on the opportunity, especially in light of CV-19 impacts:

- **C3B** will operate as an alternative capital provider for mining companies with a focus on acquiring interests in near-production mining of precious and base mineral properties mainly in the Americas.
- **C3B** will provide secured capital to junior miners to enter streaming and royalty opportunities to secure physical assets for the duration of the mine’s life (typically over 10 years).
- **C3B** will work with C3, Ltd., an established Bermuda Exempted Company (“**C3**”) that will invest into C3Bullion and offer STO holders' exposure to its streaming business model through a cash component (from the loan’s interest and cash streaming mining assets) or an eventual fully gold backed token from the precious metals mining projects where **C3B** invests into the target.
- For **C3B** investors interested in owning bullion Gold, investors can opt to be exposed to gold and C3,Ltd., as a backed STO, will offer the potential of obtaining an excess rate of return on gold, over the life of the token.

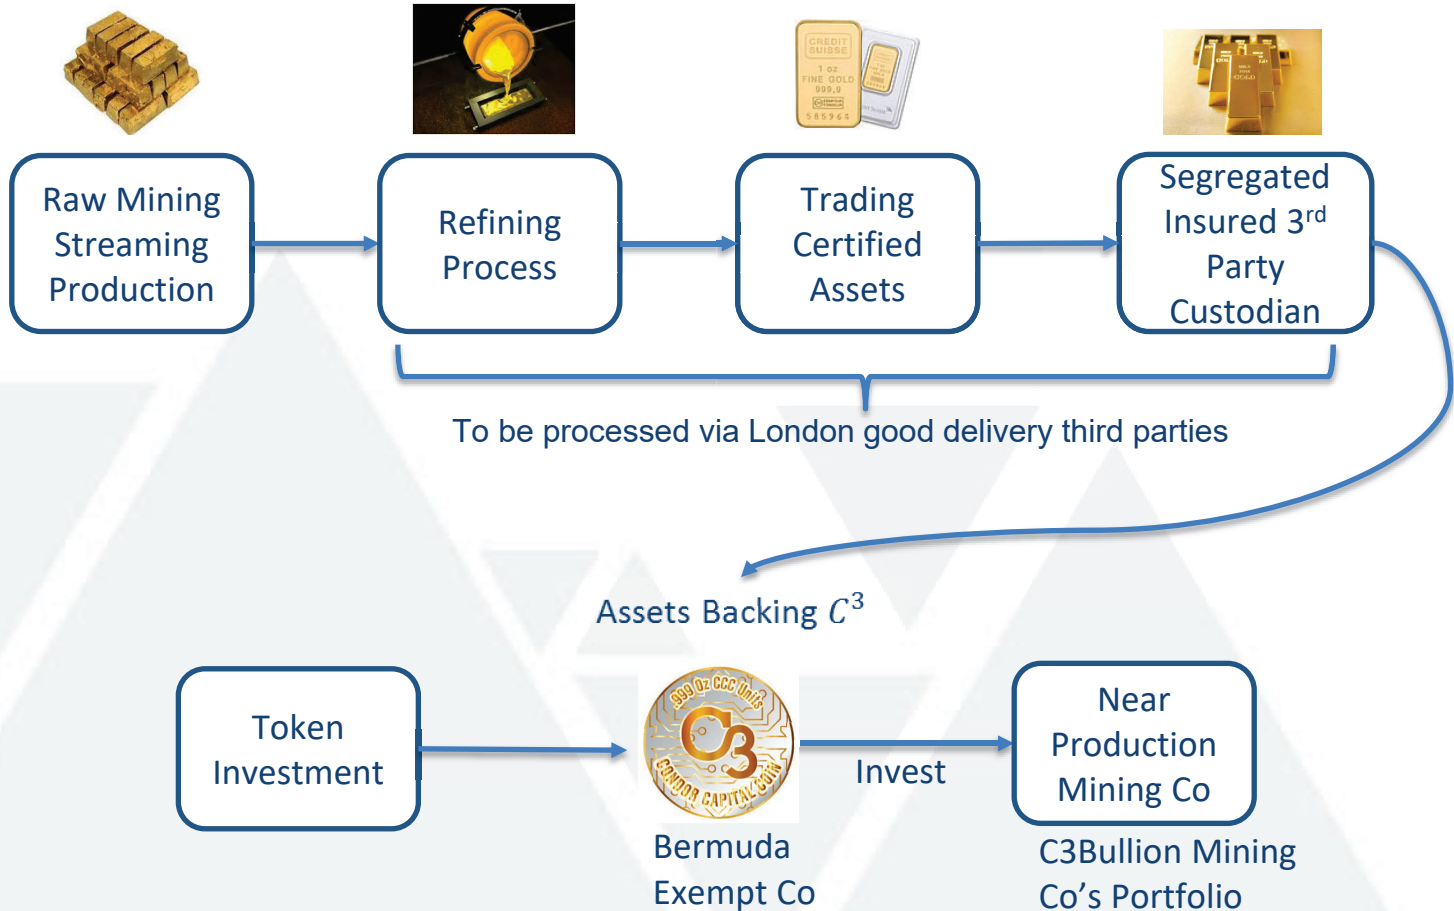

C3Bullion Token: Business Model

C3B will be a fully-backed token and will allow token holders the option to redeem into physical assets

C3B will work with reputable parties to refine, trade into bullion, and secure all

C3B assets at a fully insured custodian

Investment Process into Near Production Mining Companies

Confidential and Proprietary

Financial models and other supporting information regarding historical data, hypothetical target returns, contextual analysis, and other pertinent matters will be made available to prospective investors upon request. Please refer to Potential Risks for important information. The information in this Presentation does not constitute an offer to sell or a solicitation of an offer to buy any securities of the corporations or entities referred to herein, in the United States or to U.S. Persons.

C3Bullion: A Gold Stacking Fulfilling Cycle

As C3B invests in near production mines, C3B gold investors can expect an increase (or stacking) in certified gold that will come from the streaming deals to back their token.

Confidential and Proprietary

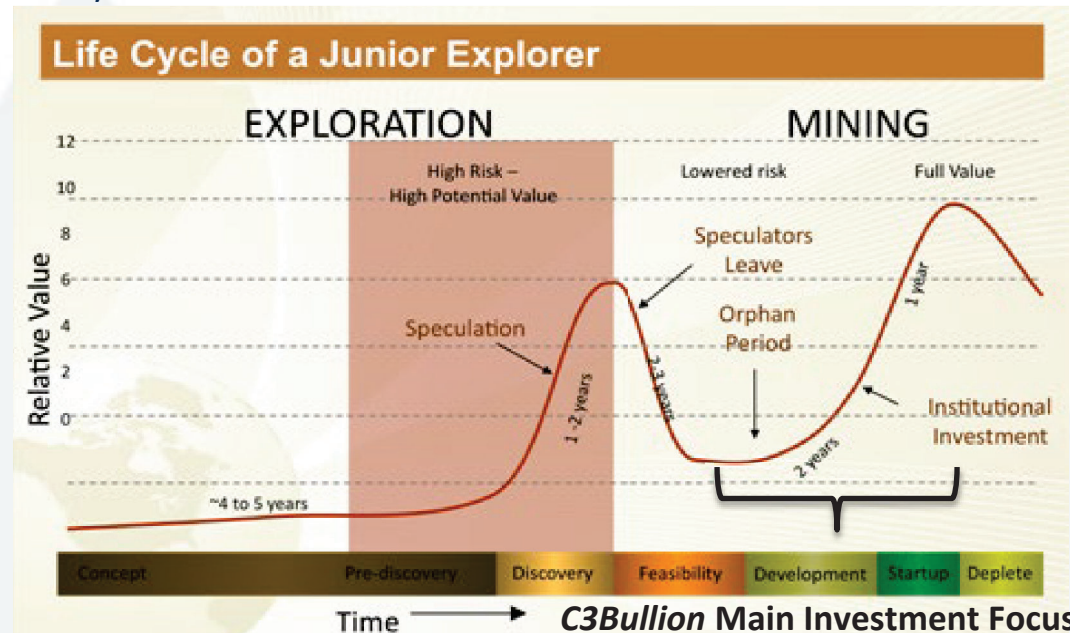

Financial models and other supporting information regarding historical data, hypothetical target returns, contextual analysis, and other pertinent matters will be made available to prospective investors upon request. Please refer to Potential Risks for important information. The information in this Presentation does not constitute an offer to sell or a solicitation of an offer to buy any securities of the corporations or entities referred to herein, in the United States or to U.S. Persons.

C3Bullion Investment Process

C3B aims to position its investment in near-term production opportunities with a financial structure in place to protect the “downside”

- **C3Bullion** follows a multi-step investment process structured to protect and secure the investment made in mining assets. In addition, we position our investments to have an optionality in a potential upside in the equity value of the targets where we invest
- **C3Bullion** focuses on near-production stage of development to capitalize on “orphaned” opportunities that are near cash-flow and therefore avoids exploration and feasibility risk

Confidential and Proprietary

Financial models and other supporting information regarding historical data, hypothetical target returns, contextual analysis, and other pertinent matters will be made available to prospective investors upon request. Please refer to Potential Risks for important information. The information in this Presentation does not constitute an offer to sell or a solicitation of an offer to buy any securities of the corporations or entities referred to herein, in the United States or to U.S. Persons.

C3Bullion Investment Criteria

C3Bullion focuses in public companies trading in the TSX/TSXV to minimize investment risk

Investment Criteria

- Target investments are focused mainly on public companies trading in the TSX/TSXV with geographical locations mainly in North America. **C3Bullion** will consider Australia and Developed Europe on an opportunistic basis
- Target investment size of \$1M - \$10M per transaction, \$5M investment on average
- Strong management team with proven successful track record
- Completed NI43-101 or JORC Resource statement, Preliminary Economic Assessment (PEA), and / or Feasibility Studies
- Stage of Development: Pre-production or near-production development stage with permitting in place
- Funding Mechanisms:
 - Convertible debentures
 - Streaming and Royalty opportunities
 - Senior secured debt
 - Opportunistic equity investments

Confidential and Proprietary

Financial models and other supporting information regarding historical data, hypothetical target returns, contextual analysis, and other pertinent matters will be made available to prospective investors upon request. Please refer to Potential Risks for important information. The information in this Presentation does not constitute an offer to sell or a solicitation of an offer to buy any securities of the corporations or entities referred to herein, in the United States or to U.S. Persons.

C3 Bullion Downside Protection

C3 Bullion will invest in convertible debt type structures and will aim to minimize risk and protect the downside scenario via a combination of multiple mechanisms:

- Invest mainly in publicly traded companies with good management teams in place with strong successful track record

- Will obtain a senior secured lending position and a security blanket on all assets (PP&E and resource / reserves) with at least a 2.5-3x LTV

- Will eventually require junior miners to obtain captive insurance (through a separate C3 Bullion captive insurance Co in Bermuda) to cover cash flow should production targets not be met in the agreed established amount of time

Utilizing Blockchain Across The Supply Chain

Decentralization guarantees complete transparency, meaning anyone along the supply chain can see how, when and where the metal was produced, and who was involved every step of the way¹

Open Mine Production & Simplified Assay Ore Production²

The information in this Presentation does not constitute an offer to sell or a solicitation of an offer to buy any securities of the corporations or entities referred to herein, in the United States or to U.S. Persons.

Utilizing Blockchain Across The Supply Chain

C3Bullion will utilize blockchain technology at specific supply chain points to track the production and movement of the assay ore into certified gold bullion

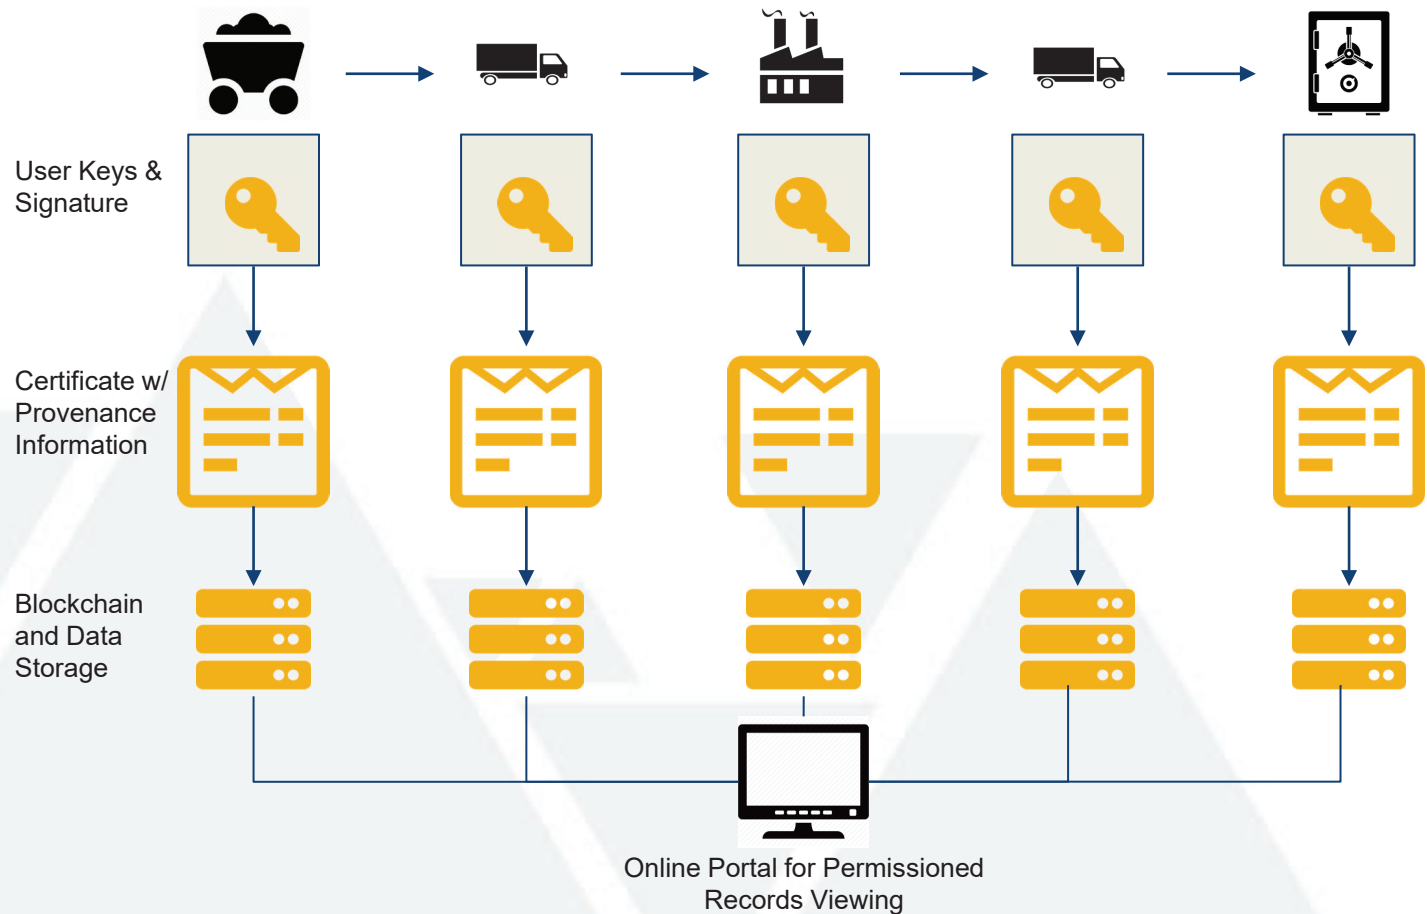

Data Flow Steps

Each party in the supply chain inputs information and signs the record in the form of a digital certificate with their unique digital signature.

Each certificate is written to the blockchain layer, forever immutable and visible to those with permission to view including any downstream supply chain participants. All larger data is stored in enterprise DLT until distributed storage options are available.

DecentraNet To Lead Blockchain Technology

- **C3B** has recently engaged DecentraNet, a Blockchain Advisory firm, to lead the development of **C3B** backend technology
- DecentraNet is a purpose-driven investment and advisory firm specializing in blockchain and other transformational technologies with a global impact. DecentraNet also create event experiences and innovative content to bring its clients projects to market and has a strong client base network to better assist new projects

Confidential and Proprietary

C3Bullion Investment Options

C3Bullion investors can be exposed to its streaming/royalty business model through two different alternatives:

- Cash Option – investors participate in **C3Bullion** streaming model on a cash basis (any physical streaming assets are received on a USD basis) and can expect the fund Net Asset Value (“NAV”) as follows:

Revenue Model	Gross NAV Calculation
Loan Interest	Cash Dividend +
Streaming Assets	Cash Dividend +
<u>Equity Options Value</u>	<u>Cash Dividend =</u>
Total	Gross Cash NAV

- Gold Option – investors participate in **C3Bullion** streaming model on a gold basis (all physical streaming assets as well as any cash USD components are traded into gold bullion), will have an option to redeem its assets into gold bullion (or cash), and can expect the NAV as follows:

Revenue Model	Gross NAV Calculation
Loan Interest	Traded into Gold Bullion +
Streaming Assets	Gold Bullion +
<u>Equity Options Value</u>	<u>Traded into Gold Bullion =</u>
Total	Gross Gold NAV

Confidential and Proprietary

Financial models and other supporting information regarding historical data, hypothetical target returns, contextual analysis, and other pertinent matters will be made available to prospective investors upon request. C3B: An Asset Backed Revenue Token With Value Appreciation

UBS commodity analyst, Giovanni Staunovo, and other research experts, expect gold to maintain its value and appreciate in the medium to long term

For gold investors, C3B offers a gold investment with an implied rate of return from successful streaming deals

C3B is an Asset Backed Revenue Token and is defined as a Precious Metal “unit”

- During initial investment, the “Unit” will be defined as the number of Gold Ounces equivalent for each STO holder (i.e., 1 oz .999 Gold per Token)
- The “Unit” definition will be updated to reflect new Ounces of Gold that **C3B** streaming deals provide into **C3B’s** custodian
 - For example: assuming **C3B** enters into an agreement with a gold producer that will provide each token holder 0.2 oz of gold per year for the life of the mine (15+ years), the token value for the next 3 years will be defined:

Year Zero: 1 oz Gold x Gold Spot Price
Year One: 1.2 oz Gold x Gold Spot Price
Year Two: 1.4 oz Gold x Gold Spot Price
Year Three: 1.6 oz Gold x Gold Spot Price

- While **C3B** will be exposed to the market fluctuations of gold, the value of the token will offer a potential rate of return per year from increases in quantities in the “Unit”

C3Bullion: Illustrative Example Fixed Gold Price

The return analysis on the right keeps the gold spot price fixed for the duration of 5 years to better illustrate the rate of return of a streaming and royalty transaction

The following chart highlights the streaming return and NAV rate of return of placing 80% of NAV into streaming deals that provide 10,000 ounces at \$800/oz for a \$4M investment each assuming a fixed Gold price

Confidential and Proprietary

Financial models and other supporting information regarding historical data, hypothetical target returns, contextual analysis, and other pertinent matters will be made available to prospective investors upon request. The information in this Presentation does not constitute an offer to sell or a solicitation of an offer to buy any securities of the corporations or entities referred to herein, in the United States or to U.S. Persons.

C3Bullion: Illustrative Example Gold Spot Price at 5% Return

The following chart highlights the streaming return and NAV rate of return of placing 80% of NAV into streaming deals that provide 10,000 ounces at \$800/oz for a \$4M investment each, with the assumption of Gold growing at 5% per annum

The illustrative example highlights a conservative scenario where gold spot price grows at 5% per annum

A steady and increasing gold price is a conservative and realistic assumption based on 3rd party research and current world macro economic conditions

Confidential and Proprietary

Junior Mining Capital Overview

C3Bullion is positioning itself as an alternative capital provider in the Junior Mining Space to meet the gap in lack of funding

- After the commodity prices peak in 2011-2012, a long period of price decline led the mineral sector into a period of stagnation

Base Metals Price Change (2011 – 2017)

Junior Mining Capital Overview Continued

Precious metals price decline has been a strong factor behind the lack of funding in junior mining opportunities

- Many factors influence and impact investment in mineral streaming investments and mining, but the prices of commodities is a key one
- It is expected that broad-based commodity price appreciation over the last two years should expand investors' appetite for investment in the mineral industry
- This should positively impact the financing landscape of the sector as a whole

Precious Metals Price Change (2011 – 2019)

Confidential and Proprietary

Financial models and other supporting information regarding historical data, hypothetical target returns, contextual analysis, and other pertinent matters will be made available to prospective investors upon request. Junior Mining Capital Overview Continued

- The junior mining sector is mainly financed via private placements, and the trend is that financing has slowly begun to improve
- The slow rebound in activity within the mineral and exploration sector has been supported by a cyclical upswing in global economic activity since mid-2016

Junior Mining Capital Overview Continued

The Oreninc Index indicates a limited improvement of the Junior Sector in 2016-19

- The Oreninc Index is intended to measure the overall health of the junior mining sector in terms of financing activity. The weighted index measures three factors on a weekly basis:
 - Broker participation
 - Total number of transactions opened
 - Total amount of funds raised

Latest Gold Market Analysis

Gold, once mocked for its lack of yield and practical use, offers something the growing pile of negative-yielding bonds doesn't -- inflation protection. Plus, it makes a great doorstep. For five years, resistance above \$1,350 an ounce was too much for bullion to overcome. That changed in June, as it became clear the Federal Reserve was heading for a round of interest-rate cuts. Spot prices touched \$1,453.09 on Friday, the highest level since May 2013.

Ceiling Smashed

Gold broke through resistance that halted rallies for five years

Bloomberg Markets "The Gold Rush Heats Up as Sub-Zero Yields Spread", By Eddie van der Walt and Ranjeetha Pakiam

Latest Gold Market Analysis

Gold's inflation-busting properties and low opportunity cost when interest rates drop have never been as important as now. The inverse relationship between bullion's price and U.S. real rates expectations, as measured by the yield on five-year inflation-linked Treasuries, is the strongest it's ever been. The correlation measured over 60 days hit -0.7 as bullion climbed.

Bloomberg Markets "The Gold Rush Heats Up as Sub-Zero Yields Spread", By Eddie van der Walt and Ranjeetha Pakiam

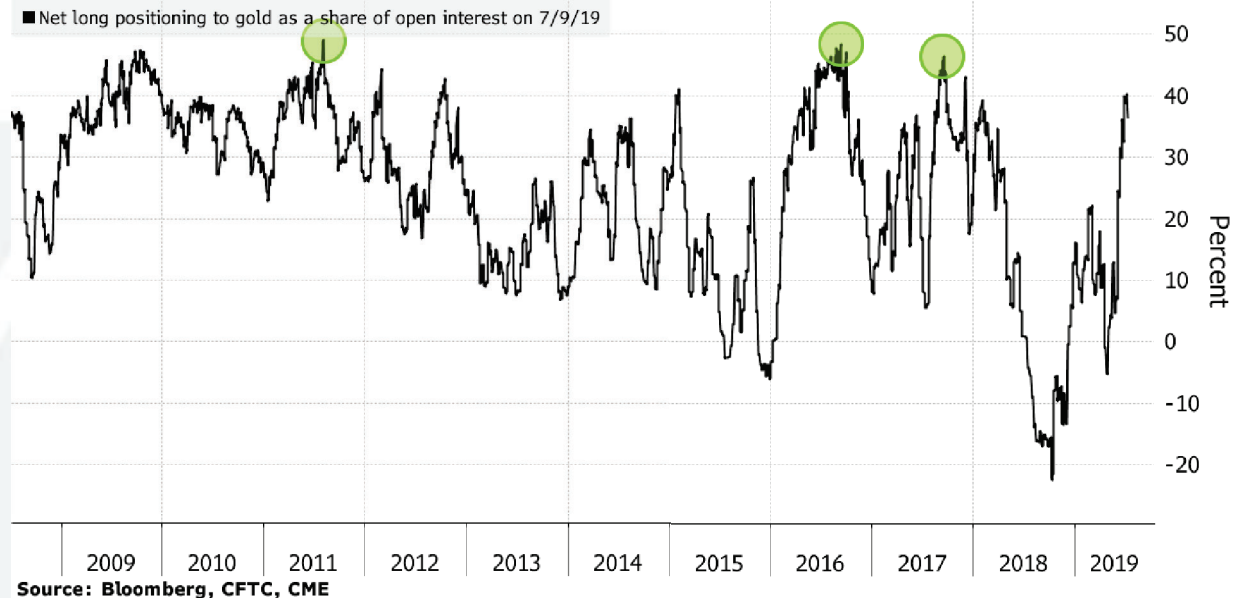

Latest Gold Market Analysis

While holdings in exchange-traded funds have risen this year, the total amount of bullion in funds still isn't as high as it was at the end of 2012. And some, like Bridgewater Associates' Ray Dalio, suggest the market may just be at the start of a period that will be very positive for gold.

Trinidad Opportunity – Project #1

The Company is negotiating with management and its senior secured lender, a Gold production opportunity from Trinidad that has been orphaned and has all mining equipment in place (target is valued at ~\$__M)

C3Bullion is currently negotiating a \$2 million investment (and a full purchase option for ~\$5M mostly payable through production revenue) into Trinidad, a pre-producing Peruvian mine that has all operating equipment in place as well as all permitting.

Property Details:

- Trinidad project is located in the Region of La Libertad, Sanchez Carrión province, Sartimbamba district, Monserrate Parish, Quebrada Quilcha at 5km between the communities of Conga and Santa Bárbara (Cota: 2,000 to 3,800 m.s.n.m.).

- Trinidad is located south of the Poderosa Mine and is located within the Belts Pataz Batholith & Coastal Batholith, Mesothermal Gold Belts.
- COMMUNITY: No social problems.
- HIGH GRADE: High Au and Ag values.
- ESTIMATED RESOURCES: 2.0 Mill ounces of gold.
- DEPOSIT TYPE: Mesothermal Veins Gold .
- INFRASTRUCTURE LOW INVESTMENT: Access road to the production site.
- STATE LANDOWNER: Superficial rights in process.
- WATER: Good water resources in the area.
- ELECTRICITY: There is power to the production site (2 Km).
- NO SOCIAL ISSUES: The communities located close to the project are pro mining activities.

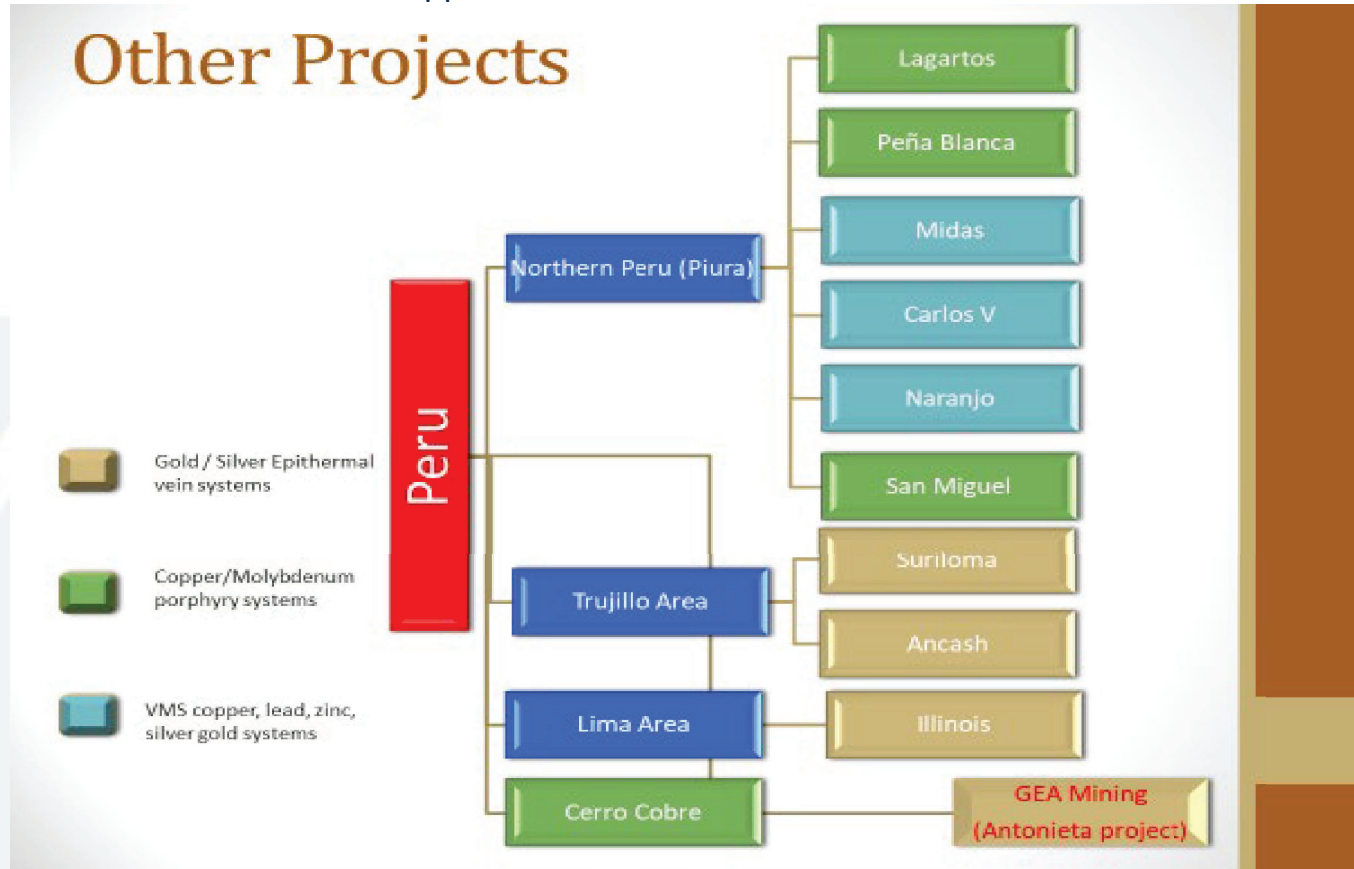

C3Bullion South America Concessions - Peru

- While the current focus of C3Bullion is publicly-traded junior production issuers or North American near-production opportunities, we hold rights/options to significant concessions in Peru on an opportunistic basis.

C3Bullion has rights and options to a wide array of streaming investment opportunities in the U.S.A., Central and South America with an estimated value of \$6-12 million

In addition, C3Bullion continues negotiate in the Western U.S. for streaming investment opportunities in attractive locations

2. C3 Bullion Project Opportunities
3. C3Bullion Structure, Partner and Financial Details
- 4. C3 Bullion Management Team and Advisory Board**

C3Bullion Management Team

C3Bullion has a strong management team with over 100 years of natural resources experience

Christopher Werner – CEO

Mr. Werner is Past CEO of Ascendant Holdings Ltd which completed two separate IPO's on TSX for Ecuadorian based mining companies. He was also Founder and CEO of River Hills Resources which joint ventured with a Chinese State-Owned company to develop three projects in Ecuador. Recently, Mr. Werner became Co-Founder and CEO of Gorgona Gold S.A.C. which is a Peruvian based exploration company with ten mining projects comprising 22 concessions covering over 15,000 hectares and Co-Founder CEO of Pangea Resources S.A. which is a Nicaraguan based mining company which controls the Iberominas gold processing facility in North Western Nicaragua through a lease/purchase option.

Julian Rosero – Chief Mining Engineer

Mr. Rosero graduated as an Engineer in Mines in 1973 and with a Post Degree in Mines Geology from the University of Leicester, England 1976. He has served as a field geologist in exploration geochemistry and mapping in the Ecuadorian Geological Survey since November of 1972, was a Mineralogy Teacher in the Faculty of GMYP of the Central University of the Ecuador from 1971 until October of 1985 and Mineral Exploration from November 1985 until 2001, and Director of the Ecuadorian Geological Survey from January to October of 2003 and Vice Minister of Mines from 2004 to 2005.

C3Bullion Management Team

C3Bullion has a strong management team with over 100 years of natural resources experience

Martin Gallon – Chief Mining Officer

Mr. Gallon is a registered professional mining executive with over 45 years experience in all phases of exploration and mining, both open pit and underground, from grass roots exploration through feasibility studies, mine development & construction, to process plant design and operational mine management. He developed, supervised and authored feasibility and EPCM proposals for major engineering and construction groups and held progressively senior positions including VP Exploration, President, COO and CEO. More recently, Mr. Gallon focused on project evaluation, financing, development, construction and advancing a number of projects from grass roots to production in North, Central and South America where he was responsible for two major exploration discoveries and designed, built and operated three gold mines.

Jim Simmons – SVP Legal

James received his law degree from George Washington University in 1988. Before joining N&S, Jim practiced with Tillinghast Collins & Graham in its corporate, commercial and real estate departments. Jim serves on the Banks and Trusts Committee of the Rhode Island Bar Association and his practice is concentrated in the areas of corporate law, banking and commercial law, mortgage lending, venture capital, private placements and real estate, bankruptcy, and creditors' rights. He is admitted to practice law in both Rhode Island and Massachusetts.

C3Bullion Management Team

C3Bullion technology and cryptocurrency platform will be led by seasoned experts in the industry

Dana T. Jurika – COO

Mr. Jurika has 20+ years' experience in mining and finance. In the 90s he was part of Robertson Stephens an investment bank then acquired by Bank of Boston. Later he spent several years as a portfolio manager for a Hedge Fund. Mr. Jurika has brought two mineral exploration companies from startup through IPO. Most recently Dana has been the CFO of CMMC, Redstone, and SensorComm. He previously has sat on the board of several public and private corporations and holds the CFA designation.

Elizabeth Hunker – EIR & Cryptocurrency Advisor

Elizabeth is Entrepreneur in Residence at a strategic fund with a B2B, enterprise technology focus, and primary technology market research firm in NYC. Elizabeth became majority-invested into distributed ledger technology & cryptocurrency in 2010, while independently researching economics supportive of decentralized systems and marketplaces. Elizabeth currently advises ventures with digital assets under management, and initiatives leveraging blockchain that are long-term impact-oriented (specifically with market, AI/ML, and quality of life/longevity focuses), as well as Opportunity Zones seeking regulatory framework innovation to adapt for emerging markets and technologies. Elizabeth will lead C3Bullion fintech projects.

Legal Structure Overview – Onshore/Offshore Fund Metrics

Rights Available for the U.S. Common Shares (Onshore) and Non-U.S. Bermuda Exempt Shares (Offshore)

(a) The C3, Ltd. Bermuda Token/Coin Launch: Following the successful STO I launch in Bermuda by C3, Ltd., a Bermuda exempt company, the C3Bullion Shares will have the option to either:

- (i) continue to hold Shares in the Colorado corporation;
- (ii) convert the Shares into unrestricted C3, Ltd. Bermuda STO I coins/tokens at the opening price when the C3, Ltd. Bermuda STO I is approved;
- (iii) C3, Ltd. Bermuda STO I coins/tokens will be held at the holder's discretion in either: USD or Gold bullion; and NAV will be assigned to either account accordingly based upon the date of conversion; and
- (v) C3Bullion Shares will be secured by a SAFT for the C3, Ltd. Bermuda STO II, as surety in the interim period prior to the C3, Ltd. Bermuda STO II launch receiving approval from the Bermuda Finance Minister's office;

(c) The C3Bullion Shares and C3, Ltd. Tokens will be managed by the General Partner who may invest proceeds in its sole discretion with respect to any particular investment, and such investments will be made on a pari passu basis, including the sharing of applicable expenses.

They are also not registered with any state securities commission or authority as a broker-dealer or investment advisor or in any other capacity.

Disclaimer for Reports:

The information in the C3Bullion and AMERICAN CONDOR RESOURCES summary does not constitute an offer to sell or a solicitation of an offer to buy any securities of the corporations or entities referred to herein, in the United States or to U.S. Persons. Securities may not be offered or sold in the United States except in compliance with the registration requirements of the Securities Act of 1933 (the "Securities Act") and applicable U.S. state securities laws or pursuant to an exemption therefrom.

Second Position:

This summary is for informational purposes only and does not constitute an offer or solicitation to sell shares or securities in the Company or any related or associated company. Any such offer or solicitation will be made only by means of the Company's confidential Offering Memorandum, Offering Circular or Offering Statement, and in accordance with the terms of all applicable securities and other laws. None of the information or analyses presented are intended to form the basis for any investment decision, and no specific recommendations are intended. Accordingly, this summary does not constitute investment advice or counsel or solicitation for investment in any security. This summary does not constitute or form part of, and should not be construed as, any offer for sale or subscription of, or any invitation to offer to buy or subscribe for, any securities, nor should it or any part of it form the basis of, or be relied on in any connection with, any contract or commitment whatsoever. The Company expressly disclaims any and all responsibility for any direct or consequential loss or damage of any kind whatsoever arising directly or indirectly from: (i) reliance on any information contained in the summary, (ii) any error, omission or inaccuracy in any such information or (iii) any action resulting therefrom.

Third Position:

This summary contains certain statements, estimates and projections that are "forward-looking statements." All statements other than statements of historical fact in this executive summary are forward-looking statements and include statements and assumptions relating to: plans and objectives of management for future operations or economic performance; conclusions and projections about current and future economic and political trends and conditions; and projected financial results and results of operations. These statements can generally be identified by the use of forward-looking terminology including "may," "believe," "will," "expect," "anticipate," "estimate," "continue", "rankings" or other similar words. C3Bullion and ACR does not make any representations or warranties (express or implied) about the accuracy of such forward-looking statements. Readers are cautioned that actual results of any investments referenced in this summary could differ materially from forward-looking statements; and readers of this summary are cautioned not to place undue reliance on forward-looking statements. The information provided in this summary (including any separate documents that may be accessed through the C3Bullion and ACR website) is not directed at any investor or category of investors and is provided solely as general information about our products and services and to provide general investment education. No information contained herein should be regarded as a suggestion to engage in or refrain from any investment-related course of action as C3Bullion/ACR and its affiliates are not undertaking to provide investment advice, act as an adviser to any plan or entity subject to the Employee Retirement Income Security Act of 1974, as amended, individual retirement account or individual retirement annuity, or give advice in a fiduciary capacity with respect to the information presented herein.
