Forward Looking Statement Disclosure

This Form C-AR and any documents incorporated by reference herein or therein contain forward-looking statements and are subject to risks and uncertainties. All statements other than statements of historical fact or relating to present facts or current conditions included in this Form C-AR are forward-looking statements. Forward-looking statements give the Issuers' current reasonable expectations and projections relating to their respective financial conditions, results of operations, plans, objectives, future performance and business. You can identify

forward-looking statements by the fact that they do not relate strictly to historical or current facts. These statements may include words such as "anticipate," "estimate," "expect," "project," "plan," "intend," "believe," "may," "should," "can have," "likely" and other words and terms of similar meaning in connection with any discussion of the timing or nature of future operating or financial performance or other events.

The forward-looking statements contained in this Form C-AR and any documents incorporated by reference herein or therein are based on reasonable assumptions the Issuers have made in light of their industry experience, perceptions of historical trends, current conditions, expected future developments and other factors they believe are appropriate under the circumstances. As you read and consider this Form C-AR, you should understand that these statements are not guarantees of performance or results. They involve risks, uncertainties (many of which are beyond the Issuers' control) and assumptions. Although the Issuers believe that these forward-looking statements are based on reasonable assumptions, you should be aware that many factors could affect their actual operating and financial performance and cause their performance to differ materially from the performance anticipated in the forward-looking statements. Should one or more of these risks or uncertainties materialize, or should any of these assumptions prove incorrect or change, the Issuers' actual operating and financial performance may vary in material respects from the performance projected in these forward-looking statements.

Any forward-looking statement made by either of the Issuers in this Form C-AR or any documents incorporated by reference herein or therein speaks only as of the date of this Form C-AR. Factors or events that could cause our actual operating and financial performance to differ may emerge from time to time, and it is not possible for the Issuers to predict all of them. The Issuers undertake no obligation to update any forward-looking statement, whether as a result of new information, future developments or otherwise, except as may be required by law.

RISK FACTORS

Risks Related to the Company's Business and Industry

The upfront setup and time training of data sets for machine learning takes time and iteration.

The entertainment space was on pause during COVID as well as during strikes last year, and while it is on track to reopen production globally, the industry is taking extra precautions to ensure safety and longevity.

Our approach to becoming an ecosystem partner rather than competing with each creative software or cloud provider may mean that we have a strong competitor for parts of our pipeline that we have yet to partner with.

Our assumption that hosting a private cloud to maintain power over our testing systems and mitigate costs may prove to be a less favorable option for large companies that have existing public cloud integrations or private infrastructure.

The mobile app may be attractive to consumers. Though it has been created as a professional tool, the goal is for it to become an enterprise add-on.

Our future success depends on the efforts of a small management team.

The loss of services of the members of the management team may have adverse effect on the company. There can be no assurance that we will be successful in attracting and retaining other personnel we require to successfully grow our business.

The holders of a majority interest of voting rights in the company could limit the investors rights in a material way. For example, those interested holders could vote to change the terms of the agreements governing the company's operations or cause the company to engage in additional offerings, (including potentially a public offering.)

These changes could result in further limitations on voting rights. The investor will have as an owner Of equity in the company, for example by diluting those rights or limiting them to certain types of events or consents.

To the extent applicable in cases where the rights of holders have converted debt saves or other outstanding options or warranties are exercised. If new awards are granted under our equity compensation plans and investors interest in the company may be deleted. This means the pro rata portion of the company represented by the Investor Securities will decrease, which would also diminish the investors. reading or economic rights in addition as discussed above if the majority in interest of holders of securities with voting rights cause the company to issue additional equity and investors interest will be typically diluted.

Based on the risk that the investors rights could be limited, diluted or otherwise qualified, the investor could lose all or part of his investment in the securities in this offering and may never see positive returns.

In addition to the risks listed above, businesses are often subject to risks not foreseen or fully appreciated by the management. It is not possible to foresee all risks that may affect us. Moreover, the Company cannot predict whether the Company will successfully effectuate the Company's current business plan. Each prospective Purchaser is encouraged to carefully analyze the risks and merits of an investment in the Securities and should take into consideration when making such analysis, among other, the Risk Factors discussed above.
