Evrmore is a compelling, intuitive experience for young people to understand themselves and bring compassion to others in a particularly anxious time.

PROBLEM:
Social technologies
have been
delivering grave
metrics for youth

#2

Leading cause of death
for 13-25 yr olds

48,344 Americans died
by suicide in 2020

Source: Centers for Disease Control and Prevention

current social platforms are not geared towards
quality of life and wellness at scale and
don't provide young people with the care and connections they need

OPPORTUNITY: A breakthrough category in social technology

that combines wellness and personal development

UTILITY + COMMUNITY BASED ON LIFE CONTEXT

Personal/Life Events Social Interactions Environmental Changes

93%
of youth

surveyed want a VOICE TOOL for talking things out and self-discovery.

”

We want our own tool that helps us build confidence and future opportunities.

ALL parents
surveyed

want a single tool that helps with building a GOOD HOME LIFE

”

We have report cards for everything: school, health and fitness, but **how about for well-being?**

At a time when despair & trauma are compounded at home/school/virtually
we have the tech to address them at scale

SOLUTION: An app that uses the latest AI to achieve empathy
in caring for **YOUNG PEOPLE (13-25)** & **FOR SCHOOLS**

powered by **Empathy AI®**

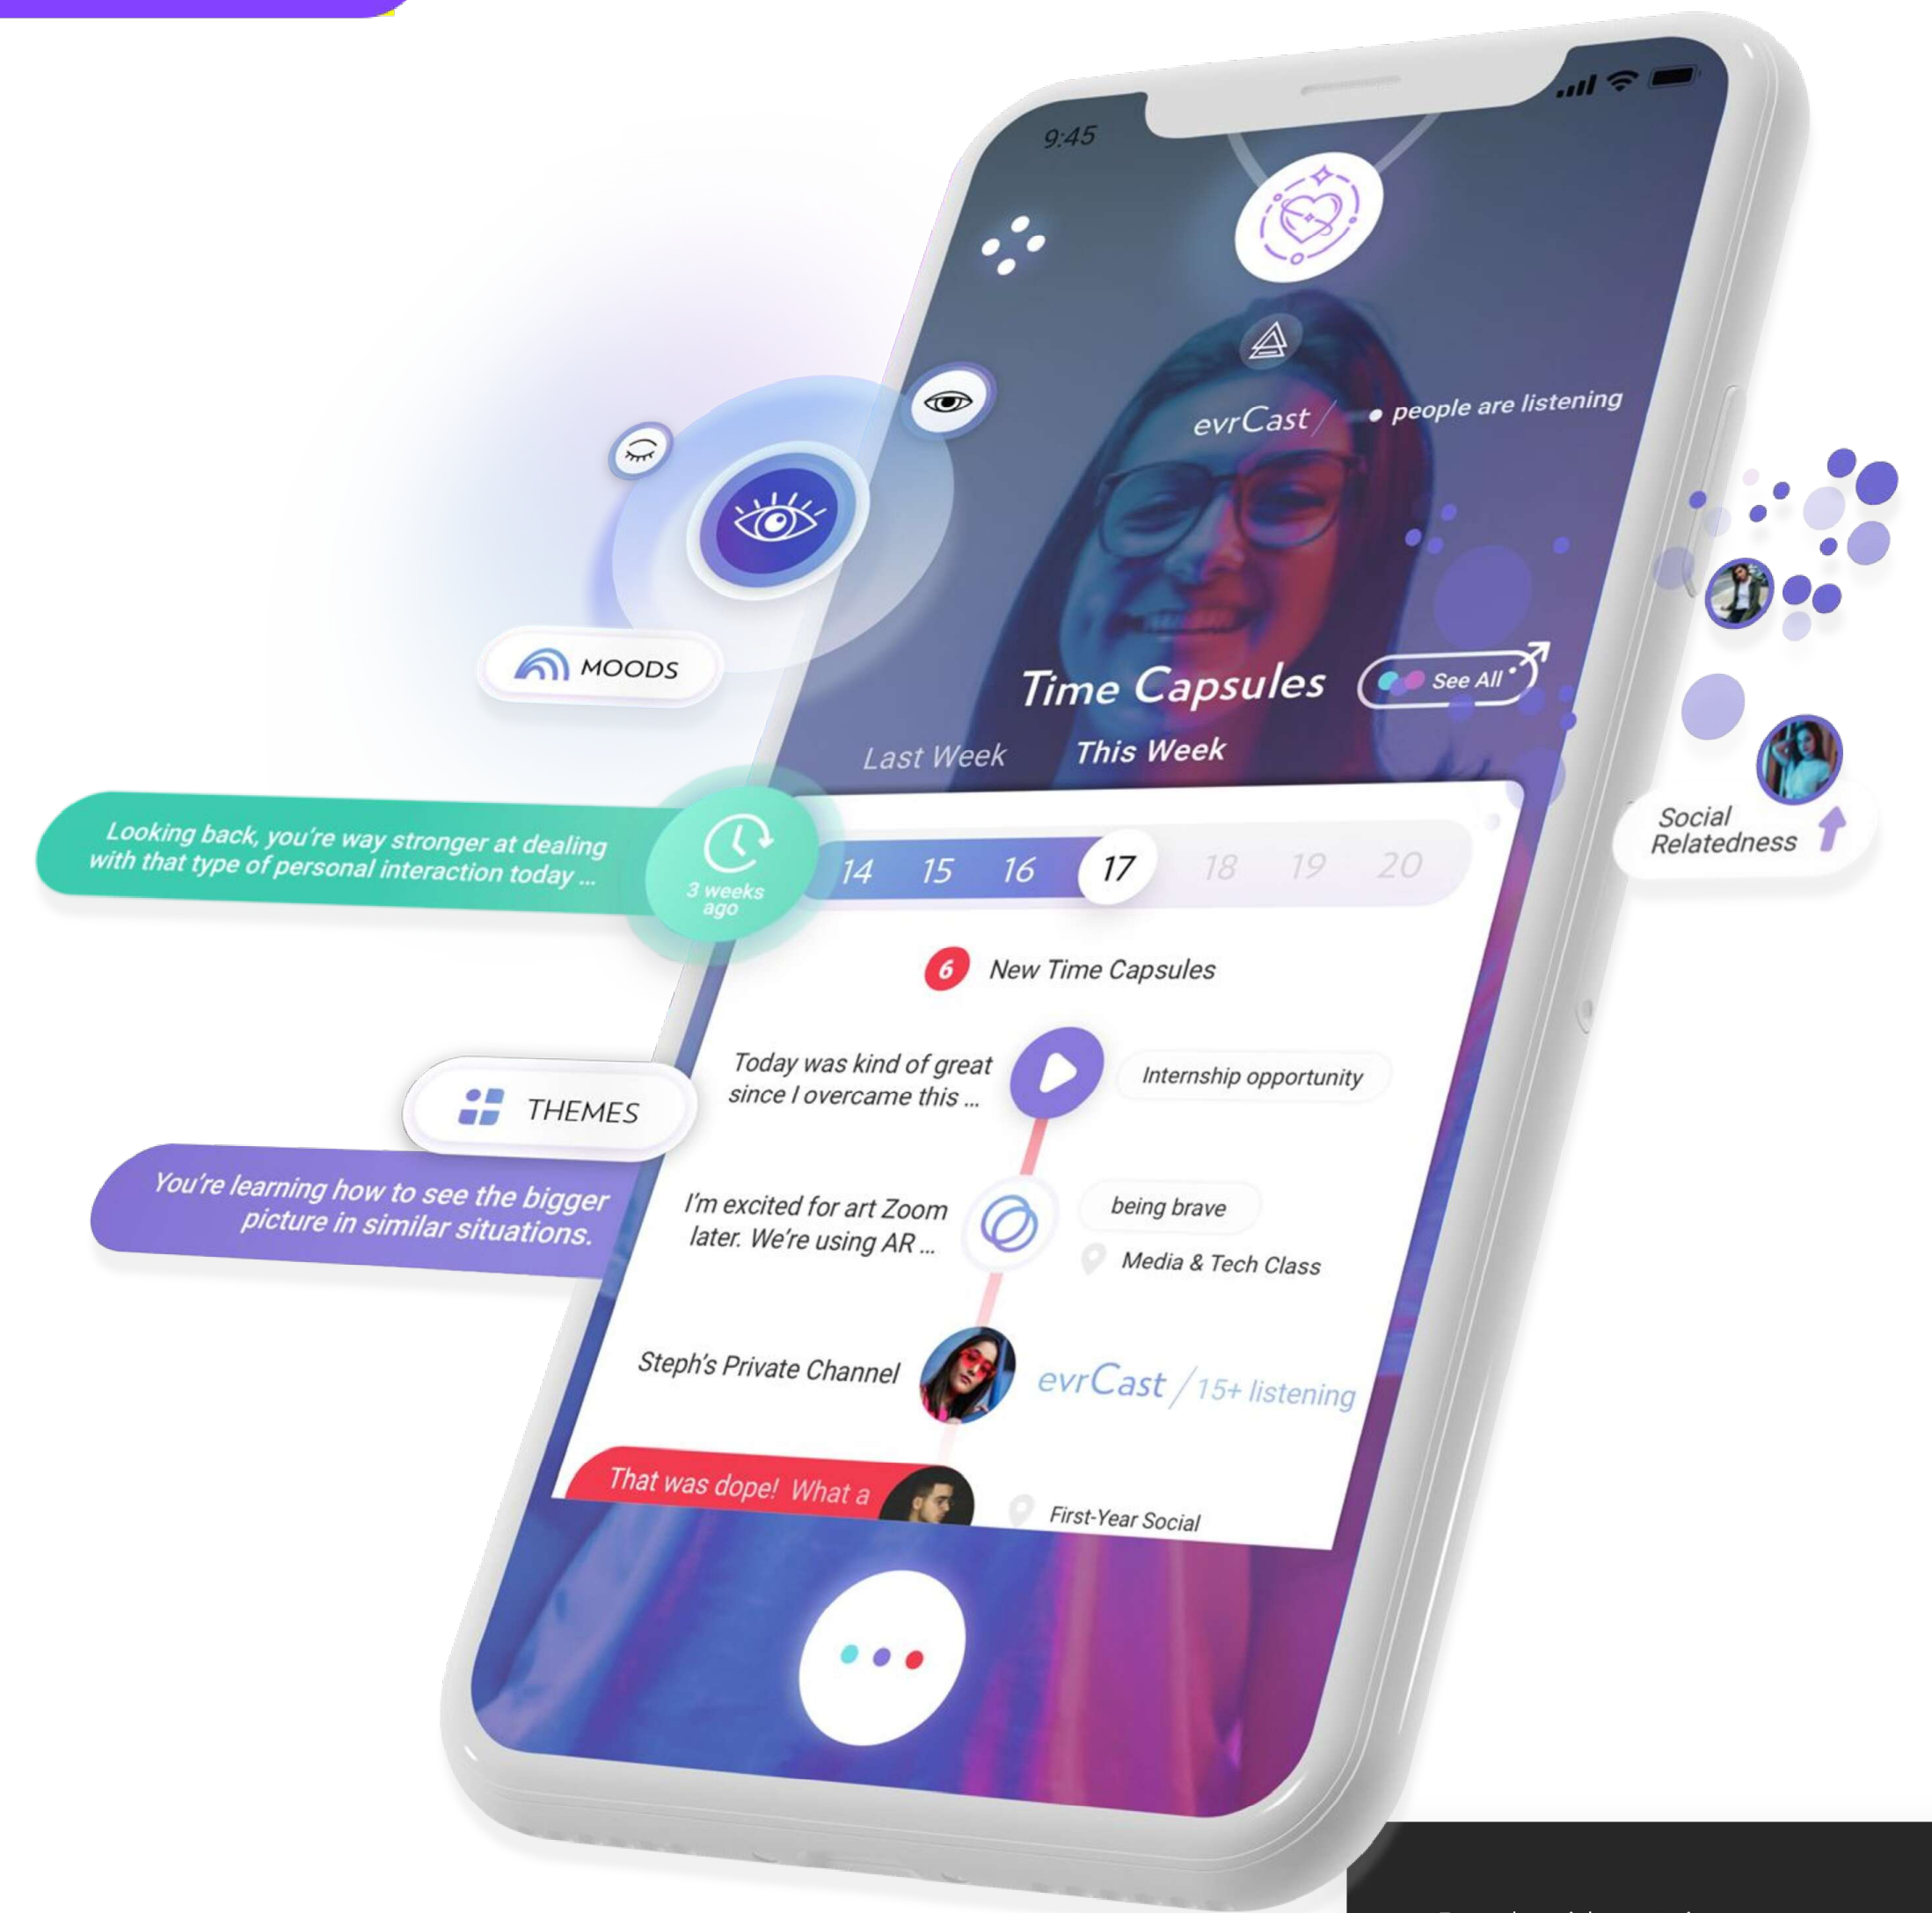

A smart journal you talk to that helps you
make important self-discoveries
form interest-based connections
stay on track across all life stages

**Fastest & Most Accurate
Speech Recognition**

**Emotion Calibration
Using Machine Learning**

People with certain learning disabilities such as dysgraphia and dyslexia will benefit from a consistent channel for vocalization

Emotion detection and soft skills development are completely untapped and desperately needed in edu & wellness sectors.

Evrmore uses emotion AI that provides life context and a natural user experience

Evrmore breaks out of boring chat-based experiences and heightens engagement with context + narrative that doesn’t pigeon-hole the user’s emotional states
