	Sync & Licensing	

The artist will have broad discretion in using these proceeds.

Lil Nas X and Arizona Zervas... What Do These Artists Have In Common?

They both went viral on TikTok and Triller. Hundreds of thousands of users have danced and created videos to "Old Town Road" - Lil Nas and "ROXANNE" - Arizona Zervas. Each record has accumulated over 1 billion streams. Most importantly, they did it all while being independent.

So What?

A core part of our marketing plan is utilizing a similar social media marketing campaign. It starts with creating great music that fits these platforms. From there, we plan on working with TikTok and Triller creators to share our music amongst their fans. Let's share the fun, the music, the money.

Timeline:

Investor FAQ:

How do you determine the total
royalty percentage listed in the
offering?

The securities being offered in
this Regulation Crowdfunding
raise have been determined by
the Company as a direct ratio to
the budget of the music album.

The Company did not employ
investment banking firms or
other outside organizations to
make an independent
evaluation.

Why does the duration of my
investment only last 3 years?

Typically, most music projects'
streaming and download
royalties are strongest in the
first few years, but taper down
to a lower steady state. Financial
and accounting fees are fixed
and overtime will materially
hurt the investment. We feel this
term length balances investors'
upside and minimizes total fixed
costs.

What am I actually investing in?

You are investing in the mastering, mechanical, sync, and licensing royalty rights of the Project.

How does the Project make money? ^

Digital service providers such as Spotify, Apple Music, YouTube, etc. pay the royalty rights holders \$3-\$7 per 1000 plays. Licensees may also pay a one-time fee to the royalty rights holders for the right to use the project's recordings in an entity such as a movie, video game, or commercial. As an investor, you are getting a portion of these royalties based on your ownership stake pro-rata.

When/ how do I get paid? ^

If the Project is successful, you will receive an annual royalty payout starting a year after the

completed Project release date.
You will hold these royalty rights
for 3 years. This distribution will
be sent directly to the bank
account registered with Bumper
Collective.

Can I Invest As An International Citizen?

Yes, anyone over 18 can invest
on the Bumper Collective
platform. If you do not have an
International Tax Identification
Number ("TIN" or "ITIN"), you
will be purchasing a Promissory
Note. The U.S. tax laws are set
up where the Company is
unable to give tax return
documents or distribute funds
to LLC members that do not
have TINs. By investing in a
Promissory Note, U.S. tax laws
allow us to distribute funds to
you regardless if you obtain a
TIN. The catch is your
investment is capped at an 8%
simple interest rate per annum
until you obtain a TIN. However,
upon obtaining a TIN and
notifying us, the Promissory

Note will convert into the equivalent Class B Units and any payments owed to you will be equivalent as if you had invested in Class B Units originally.

Please see terms of Promissory Note here. Please see all documents filed for the Promissory Note here.

Additionally, Investors from outside of the US should check their local laws for any restrictions before subscribing to any offering posted on Bumper Collective.
