Yes Chef App Inc

There's no secret that personal and private chefs are in more of a demand than ever!

Here's the problem: With over one hundred thousand restaurants being closed within the past 3 months YELP says "60% of restaurants with COVID-19 closures have closed permanently."

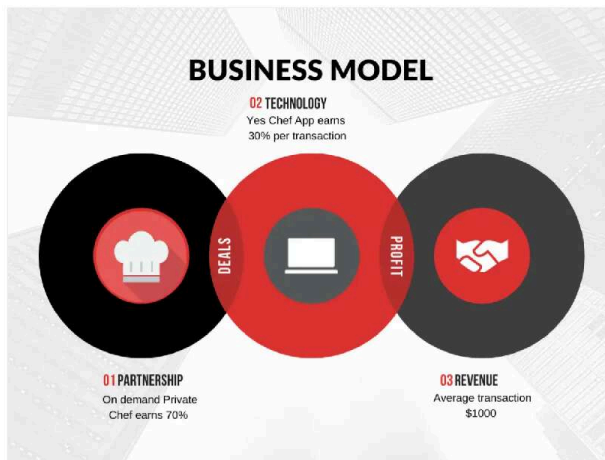

Here's The Solution:

At your convenience YES CHEF app is giving you not only the ability to book a chef in your home, but also to customize your menu preference, see chef reviews, and book a chef. (No hidden fees, No start-up fees, No overhead costs)

Our goal is to allow customers to book the chef experience of their lifetime in less than 3 minutes

Currently personal and private chefs are in high demand due to COVID-19, because families are looking to host more gatherings but would also like to social distance. Our chefs have and will be COVID tested and practice all standard policies for our customers.

This business model has been proved because our founder Chef Kev has been in business as a personal and private chef for the past 10 years.

Business Model: Our on-demand food concierge service app connects Chefs with customers and Customers with Chefs we earn 30% of the revenue. Yes Chef earns Chefs will be able to earn 70% of every transaction; Yes Chef App will in return earn 30% of those transactions.

Our Next Steps: To keep growing our technology and building on the marketing side. Add more chefs and customers and build new revenue streams, features, and products. To go after personal chefs, private chefs, certified chefs, and newly graduated chefs who are aspiring to become chef into the market.

We will increase our customer base by continuing to go after the COVID-19 cautious customers who are still looking to entertain at home while staying safe.
