Risk Factors

Since our initial stockholders will lose their entire investment in us..., page 45

1. You describe conflicts of interest on page 45 in circumstances where the founder shares become worthless without an initial business combination. Please also disclose in quantitative and qualitative terms how economic incentives could result in substantial misalignment of interests where an initial business combination does occur. For example, since your sponsor and officers and directors acquired 20% of your ordinary shares for approximately \$0.003 per share and the offering is for \$10.00 per unit, the officers and directors could make a substantial profit after the initial business combination even if public investors experience substantial losses. Please revise here and elsewhere as appropriate.
