COMPASS BANCSHARES, INC. AND SUBSIDIARIES
Notes to the Consolidated Financial Statements

NOTE 1 — General

The consolidated financial statements of Compass Bancshares, Inc. (the “Company”) in this report have not been audited. In the opinion of management, all adjustments necessary to present fairly the financial position and the results of operations for the interim periods have been made. All such adjustments are of a normal recurring nature. The results of operations are not necessarily indicative of the results of operations for the full year or any other interim periods. For further information, refer to the consolidated financial statements and notes included in the Company’s annual report on Form 10-K for the year ended December 31, 2000, as restated in the Current Report on Form 8-K filed on September 6, 2001.

Certain reclassifications of prior years’ amounts have been made to conform to current year presentation. Such reclassifications had no effect on net income, total assets, total liabilities, or shareholders’ equity.

NOTE 2 — Business Combinations

On January 4, 2001, the Company completed the merger with FirsTier Corporation (“FirsTier”). FirsTier is the parent Company of FirsTier Bank, an approximately \$815 million asset bank located in the greater Denver area, and Firststate Bank, an \$85 million bank in Nebraska. Under the terms of the agreement, FirsTier shareholders received 6,800,000 shares of Compass common stock in exchange for all of the outstanding shares of FirsTier. The transaction was accounted for under the pooling-of-interests method of accounting and, accordingly, all prior information has been restated.

NOTE 3 — Capital and Preferred Securities

Three subsidiary business trusts of the Company (Compass Trust I, MB Capital I, and FW Capital I) have issued mandatorily redeemable preferred capital securities (“Capital Securities”). As guarantor, the Company unconditionally guarantees payment of accrued and unpaid distributions required to be paid on the capital securities; the redemption price when a capital security is called for redemption; and amounts due if a trust is liquidated or terminated.

The Company owns all of the outstanding common stock of each of the three trusts. The trusts used the proceeds from the issuance of their Capital Securities and common stock to buy debentures issued by the Company. These debentures are the trusts’ only assets and the interest payments from the debentures finance the distributions paid on the Capital Securities. The Company’s financial statements do not reflect the debentures or the related income statement effects because they are eliminated in consolidation.

The Capital Securities are summarized for the periods as follows:

	September 30, 2001	December 31, 2000
	<hr/> (in Millions) <hr/>	
Compass Trust I (a)	\$ 73	\$100
MB Capital I	12	12
FW Capital I	19	23
	<hr/>	<hr/>
Total	\$104	\$135
	<hr/>	<hr/>
	Interest Rate of Securities and Debentures	Maturity of Securities and Debentures
	<hr/>	<hr/>
Compass Trust I	8.23%	2027
MB Capital I	8.75%	2028
FW Capital I	9.38%	2029

(a) In addition to the Capital Securities, common securities of \$3 million were issued and the proceeds used by Compass Trust I to purchase junior subordinated deferrable interest debentures of the Company.

COMPASS BANCSHARES, INC. AND SUBSIDIARIES
Notes to the Consolidated Financial Statements — Continued

The Capital Securities must be redeemed when the related debentures mature, or earlier, if provided in the governing indenture. Each issue of capital securities carries an interest rate identical to that of the related debenture. The Capital Securities qualify as Tier 1 capital under Federal Reserve Board guidelines.

The Company has the right to redeem its debentures: (i) in whole or in part, on or after January 15, 2007 (for debentures owned by Compass Trust I), February 9, 2003 (for debentures owned by MB Capital I), and February 16, 2004 (for debentures owned by FW Capital I); and (ii) in whole at any time within 90 days following the occurrence and during the continuation of a tax event or a capital treatment event (as defined in the offering circulars). If the debentures purchased by Compass Trust I are redeemed before they mature, the redemption price will be the principal amount, plus a premium, plus any accrued but unpaid interest. If the debentures purchased by MB Capital I or FW Capital I are redeemed before they mature, the redemption price will be the principal amount plus any accrued but unpaid interest. When debentures are redeemed in response to tax or capital treatment events, the redemption price is generally slightly more favorable to the Company. During 2001, the Company repurchased approximately \$27 million of the Capital Securities of Compass Trust I and \$4 million of the Capital Securities of FW Capital I.

Class B Preferred Stock

In December 2000, a subsidiary of the Company issued \$21 million of Class B Preferred Stock (the “Preferred Stock”). The Preferred Stock, net of discount, was approximately \$18 million at both September 30, 2001 and December 31, 2000. The Preferred Stock qualifies as Tier I capital under Federal Reserve Board guidelines. The Preferred Stock dividends are preferential, non-cumulative and payable semi-annually in arrears on June 15 and December 15 of each year, commencing June 15, 2001, at a rate per annum equal to 9.875 percent of the liquidation preference of \$1,000 per share when, and if declared by the Board of Directors of the Subsidiary, in its sole discretion, out of funds legally available for such payment.

The Preferred Stock is redeemable for cash, at the option of the Subsidiary, in whole or in part, at any time on or after June 15, 2021. Prior to June 15, 2021, the Preferred Stock is not redeemable, except that prior to such date, the Preferred Stock may be redeemed for cash, at the option of the Subsidiary, in whole or in part, only upon the occurrence of any tax or regulatory events. Any such redemption is subject to the prior approval of the Board of Governors of the Federal Reserve System. The Preferred Stock is not redeemable at the option of the holders thereof at any time.

COMPASS BANCSHARES, INC. AND SUBSIDIARIES
Notes to the Consolidated Financial Statements — Continued

NOTE 5 – Segment Information

The Company's segment information is presented by line of business. Each line of business is a strategic unit that serves a particular group of customers that have certain common characteristics, through various products and services. The segment results include certain overhead allocations and intercompany transactions. All intercompany transactions have been eliminated to determine the consolidated balances. The Company's reportable operating segments are Corporate Banking, Retail Banking, Asset Management, and Treasury.

The Corporate Banking segment is responsible for providing a full array of banking and investment services to business banking, commercial banking, and other institutional clients in each of the Company's major metropolitan markets. The Corporate Banking segment also includes a National Industries unit that is responsible for serving larger national accounts, principally in targeted industries. In addition to traditional credit and deposit products, the Corporate Banking segment also supports its customers with capabilities in treasury management, leasing, accounts receivable purchasing, asset-based lending, international services, insurance, and interest rate protection and investment products.

The Retail Banking segment serves the Company's consumer customers through an extensive banking office network and through the use of alternative delivery channels such as personal computer banking, the internet and telephone banking. The Retail Banking segment provides individuals with comprehensive products and services, including home mortgages, credit cards, deposit accounts, mutual funds, and brokerage. In addition, Retail Banking serves the Company's small business customers, and is responsible for the indirect automobile portfolio.

The Asset Management segment provides specialized investment portfolio management, traditional credit products, financial counseling, and customized services to the Company's private clients and foundations as well as investment management and retirement services to companies and their employees. The Asset Management segment is also the discretionary investment manager of Expedition Funds®, the Company's family of proprietary mutual funds.

The Treasury segment's primary function is to manage the investment securities portfolio, certain residential real estate loans, public entity deposits, and the liquidity and funding positions of the Company.

Corporate Support and Other includes activities that are not directly attributable to the reportable segments. Included in this category are the activities of the parent company and support functions, i.e., accounting, operations, loan review, etc. and the elimination of intercompany transactions.

The financial information presented was derived from the internal profitability reporting system used by management to monitor and manage the financial performance of the Company. This information is based on internal management accounting policies, which have been developed to reflect the underlying economics of the businesses. The policies address the methodologies applied in connection with funds transfer pricing. Funds transfer pricing was used in the determination of net interest income by assigning a standard cost (credit) for funds used (provided) to assets and liabilities based on their maturity, prepayment, and/or repricing characteristics.

The development and application of these methodologies is a dynamic process. Accordingly, financial results have been revised to reflect management accounting enhancements and changes in the Company's organizational structure. The 2000 segment information has been revised to conform to the 2001 presentation. In addition, unlike financial accounting, there is no authoritative literature for management accounting similar to generally accepted accounting principles. Consequently, reported results are not necessarily comparable with those presented by other financial institutions.

NOTE 6 – Loans and Allowance for Loan Losses

The following presents the composition of the loan portfolio at September 30, 2001 and December 31, 2000.

	September 30, 2001	December 31, 2000
	(in Thousands)	
Commercial, financial and agricultural	\$ 4,116,826	\$ 4,056,090
Real estate construction — commercial	1,320,562	1,519,759
Real estate — commercial	2,229,029	2,140,270
Total commercial	7,666,417	7,716,119
Real estate construction — residential	877,989	771,821
Real estate — residential	2,723,697	2,132,053
Consumer — credit cards	406,148	417,002
Consumer — installment	1,593,877	1,221,759
Total consumer	5,601,711	4,542,635
Total loans	\$13,268,128	\$12,258,754

A summary of the activity in the allowance for loan losses for the three and nine months ended September 30, 2001 and 2000 follows:

	Three Months Ended		Nine Months Ended	
	2001	2000	2001	2000
	(in Thousands)			
Balance at beginning of period	\$172,986	\$157,908	\$167,288	\$151,211
Add: Provision charged to income	32,317	10,872	67,149	40,622
Allowance for loans acquired (sold)	—	3,566	(1,050)	7,560
Net charge-offs (recoveries):				
Commercial, financial and agricultural	22,059	3,800	32,140	15,695
Real estate construction	34	—	189	55
Real estate — commercial	(11)	(241)	343	(190)
Real estate — residential	727	483	1,812	968
Consumer — credit cards	5,085	3,678	16,284	11,305
Consumer — installment	2,600	2,559	7,810	9,493
Net charge-offs	30,494	10,279	58,578	37,326
Balance at end of period	\$174,809	\$162,067	\$174,809	\$162,067

Nonperforming assets at September 30, 2001 and December 31, 2000 are detailed in the following table.

	September 30, 2001	December 31, 2000
	(in Thousands)	
Nonaccrual loans:		
Commercial, financial and agricultural	\$25,654	\$ 59,842
Real estate construction	12,023	9,198
Real estate — commercial	10,427	4,336
Real estate — residential	10,576	10,543
Consumer	4,604	2,249
Total nonaccrual loans	63,284	86,168
Renegotiated loans	2,008	84
Other real estate	31,061	15,476
Total nonperforming assets	\$96,353	\$101,728

COMPASS BANCSHARES, INC. AND SUBSIDIARIES
Notes to the Consolidated Financial Statements — Continued

NOTE 7 – Loan Participation Sales

In June, the Company sold \$500 million of loan participations to a third party asset-backed commercial paper conduit. Under the terms of the transaction, the Company retains servicing of the loans and remains obligated for any credit related charge-offs. No gain or loss was recognized on the sale; a \$1 million liability for estimated future losses was established.

NOTE 8 – Recently Adopted and Issued Accounting Standards

Accounting for Derivative Instruments and Hedging Activities

The Company adopted Financial Accounting Standards Board (“FASB”) Statement of Financial Accounting Standards (“SFAS”) No. 133, *Accounting for Derivative Instruments and Hedging Activities*, on January 1, 2001. For information regarding the adoption of this standard, or the Company’s accounting for derivatives and hedging activities, refer to the notes to consolidated financial statements included in the Company’s report on Form 10-Q for the quarter ended March 31, 2001.

Business Combinations, Goodwill and Other Intangible Assets

In July 2001, the FASB issued Statement No. 141, *Business Combinations*, and Statement No. 142, *Goodwill and Other Intangible Assets*. Statement No. 141 requires that the purchase method of accounting be used for all business combinations initiated after June 30, 2001. Pooling-of-interests business combination initiated prior to June 30, 2001 are grandfathered. Statement No. 142 will require that goodwill and intangible assets with indefinite useful lives no longer be amortized, but instead an entity must perform an assessment of whether these assets are impaired as of the date of adoption and test for impairment at least annually in accordance with the provisions of Statement No. 142. The new standard will also require that intangible assets with definite useful lives be amortized over their respective estimated useful lives to their estimated residual values, and reviewed for impairment. The Company was required to adopt the provisions of Statement No. 141 immediately and Statement No. 142 effective January 1, 2002.

As of the date of adoption, the Company expects to have unamortized goodwill in the amount of \$236 million and unamortized identifiable intangible assets in the amount of \$38 million, both of which will be subject to the transition provisions of Statement No. 142. Because of the extensive effort needed to comply with adopting Statement No. 142, it is not practicable to reasonably estimate the impact of adopting these Statements on the Company’s financial statements at the date of this report, including whether any transitional impairment losses will be required to be recognized as the cumulative effect of a change in accounting principle.

COMPASS BANCSHARES, INC. AND SUBSIDIARIES
Notes to the Consolidated Financial Statements — Continued

Accounting for Asset Retirement Obligations

In June 2001, the FASB issued SFAS No. 143, *Accounting for Asset Retirement Obligations*. This Statement applies to legal obligations associated with the retirement of a tangible long-lived asset that results from the acquisition, construction, or development and (or) the normal operation of long-lived assets, except for certain obligations of lessees. The Statement shall be effective for financial statements issued for fiscal years beginning after June 15, 2002; earlier application is encouraged. Initial application of this Statement shall be as of the beginning of an entity's fiscal year. Management does not anticipate that the adoption of this Statement will have a material impact on the Company's consolidated financial position or consolidated results of operations.

Accounting for the Impairment or Disposal of Long-Lived Assets

In October 2001, the FASB issued Statement No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, that replaces FASB Statement No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of*. The provisions of Statement 144 are effective for financial statements issued for fiscal years beginning after December 15, 2001 and, generally, are to be applied prospectively. Early application is encouraged. Management does not anticipate that the adoption of this Statement will have a material impact on the Company's consolidated financial position or consolidated results of operations.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF RESULTS OF OPERATIONS AND FINANCIAL CONDITION

Results of Operations

Forward-Looking Information

This report may contain forward-looking statements which are subject to numerous assumptions, risks and uncertainties. Statements pertaining to future periods are subject to uncertainty because of the possibility of changes in underlying factors and assumptions. Actual results could differ materially from those contained in or implied by such forward-looking statements for a variety of reasons including: sharp and/or rapid changes in interest rates; significant changes in the economic scenario from the current anticipated scenario which could materially change anticipated credit quality trends and the ability to generate loans and gather deposits; significant delay in or inability to execute strategic initiatives designed to grow revenues and/or control expenses; unanticipated issues during the integration of acquisitions; and significant changes in accounting, tax, or regulatory practices or requirements. The Company disclaims any obligations to update any such forward-looking statements.

Overview

Net income for the quarter ended September 30, 2001, increased four percent to \$68.7 million and diluted earnings per share increased four percent to \$0.53 per share. Net interest income increased 15 percent to \$209.2 million from the third quarter of 2000. Noninterest income increased 26 percent to \$97.3 million and noninterest expense increased 16 percent to \$170.5 million.

For the first nine months of 2001, net income increased six percent to \$198.2 million and diluted earnings per share increased five percent to \$1.55 per share. Net interest income for the nine months grew to \$598.2 million, an increase of 12 percent, while noninterest income and noninterest expense increased 22 percent and 16 percent, respectively.

Cash Basis Results

Cash basis results exclude the amortization of goodwill and other intangibles considered nonqualifying in regulatory capital calculations resulting from business combinations recorded by the Company under the purchase method of accounting. Had these business combinations qualified for accounting under the pooling-of-interests method, no intangible asset would have been recorded. Since the amortization of goodwill and other intangibles does not result in a cash expense, the economic value to shareholders under either accounting method is essentially the same. Additionally, such amortization does not impact the Company's liquidity and funds management activities.

On a cash basis, net income for the quarter ended September 30, 2001, was \$73.8 million, a four percent increase over the \$70.7 million for the same quarter last year. Similarly, diluted earnings per share were \$0.57 in the third quarter of 2001, a four percent increase compared to \$0.55 in the prior year quarter.

On a cash basis, net income for the nine months ended September 30, 2001, was \$213.6 million, a six percent increase over the \$200.8 million for the same quarter last year. Similarly, diluted earnings per share were \$1.67 for the nine months ended September 30, 2001, a six percent increase compared to \$1.58 in the prior year period.

Net Interest Income

Net interest income is the principal component of a financial institution's income stream and represents the difference or spread between interest and fee income generated from earning assets and the interest expense paid on deposits and borrowed funds. Fluctuations in interest rates as well as changes in the volume and mix of earning assets and interest bearing liabilities can materially impact net interest income. The following discussion of net interest income is presented on a taxable equivalent basis, unless otherwise noted, to facilitate performance comparisons among various taxable and tax-exempt assets.

Net interest income for the quarter ended September 30, 2001, increased \$28.0 million over the third quarter of 2000 to \$210.4 million with interest income decreasing \$15.0 million and interest expense decreasing \$43.0 million. The decrease in interest income was due to a 93 basis point decrease in the average yield on earnings assets from 8.37 percent to 7.44 percent, offset partially by an increase in average earning assets of \$1.5 billion, or eight percent. The increase in average earning assets from the third quarter of 2000 was the result of a \$1.5 billion increase in investment securities available for sale and \$695 million increase in loans, partially offset by a \$645 million decrease in investment securities. Investment securities available for sale increased due to purchases of \$2.6 billion of securities during the first nine months of 2001, the securitization and transfer of real estate mortgage loans of \$725 million in December 2000, and the transfer of \$475 million of investment securities in connection with the implementation of a new accounting standard. Loans increased due to continued strong internal loan growth. The 21 percent decrease in interest expense over the prior year quarter was the result of a 142 basis point decrease in the rate paid on interest bearing liabilities offset partially by a \$1.3 billion increase in average interest bearing liabilities. The increase in interest bearing liabilities was primarily due to increases in both federal funds purchased and securities sold under agreements to repurchase and FHLB and other borrowings offset partially by a decrease in certificates of deposit. The decrease in certificates of deposits was by design in an effort to re-channel higher rate liabilities into lower cost funding sources.

For the first nine months of 2001, net interest income increased 12 percent, or \$63.0 million, to \$602.0 million consisting of a \$37.2 million increase in interest income and a \$25.7 million decrease in interest expense. The increase in interest income was due to a nine percent increase in average earning assets which was partially offset by a 5 percent decrease in the yield on earning assets, or 43 basis points, to 7.80 percent from 8.23 percent. The average balance of loans for the first nine months of 2001 over the comparable 2000 period increased \$877 million, investments securities available for sale increased \$1.5 billion, and investment securities decreased \$623 million, due to the factors discussed previously. A 65 basis point decrease in the rate paid on interest bearing liabilities partially offset by a \$1.5 billion increase in average interest bearing liabilities resulted in a four percent decrease in interest expense.

Net interest margin, stated as a percentage, is the yield obtained by dividing the difference between the overall interest income on earning assets and the interest expense paid on all funding sources by average earning assets. The following discussion of net interest margin is presented on a taxable equivalent basis.

The net interest margin continued its expansion to 4.16 percent for the third quarter of 2001, compared to 3.90 percent for 2000. For the nine months ended September 30, 2001, net interest margin increased 10 basis points from 3.96 percent in the prior year to 4.06 percent. These changes resulted from the changes in rates and volumes of earning assets and the corresponding funding sources noted previously. During the third quarter of 2001, the Company's net interest margin was impacted by the Company's use of interest rate contracts, increasing taxable equivalent net interest margin by 18 basis points as compared to a 7 basis point negative impact for the same period in 2000. For the nine months ended September 30, 2001, the Company's use of interest rate contracts increased the Company's net interest margin by 11 basis points as compared to a 3 basis point negative impact for the first nine months of 2000.

The following tables detail the components of the changes in net interest income (on a tax-equivalent basis) by major category of interest earning assets and interest bearing liabilities for the nine month and three month periods ended September 30, 2001, as compared to the comparable period of 2000 (in thousands):

* Includes Capital and Preferred Securities

Noninterest Income and Noninterest Expense

The robust growth in major fee-based business continued during the third quarter of 2001. Noninterest income increased \$20.1 million, or 26 percent, to \$97.3 million. Excluding the effect of the \$4.9 million gain on the sale of non-strategic branches included in other noninterest income for the third quarter of 2000 and investment securities gains in both 2001 and 2000, noninterest income increased by 35 percent. The increase in noninterest income is directly attributable to increases in most of the major fee-based businesses, especially a \$6.3 million increase in service charges on deposit accounts, a \$3.4 million increase in trading account profits and commissions, and a \$3.3 million increase in retail investment sales. Noninterest income for the first nine months of 2001 increased \$50.5 million, or 22 percent, to \$277.2 million. The increase in noninterest income was due to an \$18.8 million increase in service charges on deposit accounts and a \$10.7 million increase in trading account profits and commissions. The increase in service charges on deposit accounts was primarily due to the increase in noninterest bearing demand deposit accounts, while the increase in trading account profits and commissions was due to favorable market conditions for the sales of bonds and matched interest rate protection contracts to the nearly 1,000 correspondent banks and corporate customers. The increase in retail investment sales was due primarily to the increased sales of fixed annuity products.

Noninterest expense increased \$23.1 million, or 16 percent, during the third quarter and \$70.2 million, or 16 percent, during the first nine months of 2001. The growth in each caption of noninterest expense, excluding the decrease in merger and integration for the third quarter, can be attributed in large part to bringing on-line 30 new banking offices through purchase acquisitions and de novo activity during the past 12 months.

Income Taxes

Income tax expense during the three and nine month periods ended September 30, 2001 is directly attributable to the increases in pretax income.

Provision and Allowance for Loan Losses

The provision for loan losses for the three and nine months ended September 30, 2001, increased \$21.4 million and \$26.5 million from the same periods in 2000, respectively. The increase in net charge-offs for both periods was primarily related to the charge-down of a single energy related credit prior to foreclosure of the related collateral. The allowance for loan losses, and the resulting provision for loan losses, was based on changes in the size and character of the loan portfolio, changes in nonperforming and past due loans, historical loan loss experience, the existing risk of individual loans, concentrations of loans to specific borrowers or industries and existing and prospective economic conditions. The allowance for loan losses at September 30, 2001, was \$175 million. The ratio of the allowance for loan losses to loans outstanding was 1.32 percent at September 30, 2001, down from the 1.36 percent at December 31, 2000. Management believes that the allowance for loan losses at September 30, 2001 is adequate.

Nonperforming Assets and Past Due Loans

Nonperforming loans, comprised of nonaccrual loans and renegotiated loans totaled \$65 million at September 30, 2001, decreasing 24 percent from December 31, 2000. At September 30, 2001, the allowance for loan losses as a percentage of nonperforming loans was 268 percent as compared to 194 percent at December 31, 2000. The allowance for loan losses as a percentage of nonperforming assets increased from 164 percent at December 31, 2000, to 181 percent at September 30, 2001.

Nonperforming assets as a percentage of total loans and other real estate owned decreased to 0.72 percent at September 30, 2001, from 0.83 percent at December 31, 2000. The amount recorded in other repossessed assets at September 30, 2001, was \$0.7 million, down from \$1.7 million at December 31, 2000. Loans past due ninety days or more but still accruing interest decreased from \$19.9 million at December 31, 2000, to \$18.5 million at September 30, 2001.

The Company regularly monitors selected accruing loans for which general economic conditions or changes within a particular industry could cause the borrowers financial difficulties. This continuous monitoring of the loan portfolio and the related identification of loans with a high degree of credit risk are essential parts of the Company’s credit management. The quality of the loan portfolio remained strong and exposure to shared national credits, and the airline, insurance, tourism and communications industry is not significant. Management continues to emphasize maintaining a low level of nonperforming assets and returning current nonperforming assets to an earning status.

Financial Condition

Overview

Total assets at September 30, 2001, were \$22.3 billion, up from \$20.9 billion at December 31, 2000. The increase in assets was primarily due to internal loan growth and the increase in market value and purchases of investment securities available for sale.

Assets and Funding

At September 30, 2001, earning assets totaled \$20.3 billion, up from \$18.9 billion at December 31, 2000. The mix of earning assets remained relatively unchanged with total investment securities and loans comprising 35 percent and 65 percent, respectively, of total earning assets at September 30, 2001. The largest component of the growth in earning assets was concentrated in net loans. Net loans increased by \$1.0 billion due to internal loan growth. This increase would have been greater except for the sale of \$500 million of commercial real estate loans to a third party conduit during the second quarter of 2001. Total liabilities increased by \$1.2 billion due to the increase in federal funds purchased, securities sold under agreements to repurchase and other short-term borrowings of \$1.3 billion and the increase in FHLB and other borrowings of \$1.2 billion, which was partially offset by a \$1.6 billion reduction in interest bearing deposits. The increase in borrowings and decrease in deposits was due to a re-channeling of higher rate certificates of deposit to lower cost funding sources.

Liquidity and Capital Resources

The following is a discussion of cash flows; these amounts are based on cash flows that exclude changes resulting from merger activity. Net cash provided by operating activities totaled \$303 million for the nine months ended September 30, 2001. Net cash used by investing activities of \$1.3 billion primarily resulted from the purchase of \$2.6 billion of investment securities available for sale and a \$1.6 billion net increase in loans outstanding which were partially offset by the proceeds from maturities of investment securities available for sale of \$1.3 billion, proceeds from sales of investment securities available for sale of \$755 million and the sale of \$500 million of commercial real estate loans to a third party asset backed conduit. Net cash provided by financing activities of \$884 million primarily consisted of a \$1.3 billion net increase in federal funds purchased and securities sold under agreements to repurchase and \$1.1 billion net increase in FHLB advances and other borrowings reduced by a \$1.6 billion net decrease in time deposits.

Total shareholders' equity at September 30, 2001 was 7.89 percent of total assets compared to 7.23 percent at December 31, 2000 primarily due to a \$112 million increase in retained earnings and a \$137 million increase in accumulated other comprehensive income. The leverage ratio, defined as period-end common equity and the Capital Securities adjusted for goodwill divided by average quarterly assets adjusted for goodwill, was 6.89 percent at September 30, 2001 and 6.90 percent at December 31, 2000. Similarly, the Company's tangible leverage ratio, defined as period-end common equity and the Capital Securities adjusted for all intangibles divided by average quarterly assets adjusted for all intangibles, was 6.83 percent at September 30, 2001 compared to 6.84 percent at December 31, 2000. The decrease in the leverage and tangible leverage ratios is due primarily to growth in assets and the repurchase of approximately \$31 million of the Company's Capital Securities.

During the third quarter of 2001, the Company announced that its board of directors authorized a share repurchase program allowing for the purchase of up to five percent of the Company's outstanding common stock. The timing and amount of purchases under the program will be dependent upon the availability and alternative uses of capital, market conditions and other factors. The Company repurchased 427,500 shares during the third quarter at average cost of \$24.16 per share.

Tier I capital and total qualifying capital (Tier I capital plus Tier II capital), as defined by regulatory agencies, as of September 30, 2001, exceeded the target ratios for well capitalized of 6.00 percent and 10.00 percent, respectively, under current regulations. The Tier I and total qualifying capital ratios at September 30, 2001 were 8.29 percent and 10.90 percent, respectively, compared to 8.33 percent and 11.24 percent at December 31, 2000. Tier II capital includes supplemental capital components such as qualifying allowances for loan losses, certain qualifying classes of preferred stock and qualifying subordinated debt. Increased regulatory activity in the financial industry as a whole will continue to impact the industry; however, management does not anticipate any negative impact on the capital resources or operations of the Company.

The Company’s interest rate risk management policies and practices, along with the assumptions used in the net interest income sensitivity analysis, are described on pages 18 through 20 of its December 31, 2000 Form 10-K. Net interest income sensitivities over a one-year time horizon as of September 30, 2001 and December 31, 2000 are shown below.

	Principal Amount of Earning Assets, Interest Bearing Liabilities and Swaps	Percentage Increase/(Decrease) in Interest Income/ Expense Given Immediate and Sustained Parallel Interest Rates Shifts	
		Down 100 Basis Points	Up 100 Basis Points
September 30, 2001:			
Assets which reprice in:			
One year or less	\$ 7,638,470	(7.80%)	8.59%
Over one year	12,674,043	(4.73)	4.02
	<u>\$20,312,513</u>	(5.88)	5.74
Liabilities which reprice in:			
One year or less	\$12,454,913	(22.93)	23.49
Over one year	4,426,191	(3.43)	3.47
	<u>\$16,881,104</u>	(14.59)	14.93
Total net interest income sensitivity		(0.37)	(0.09)
December 31, 2000 [a]:			
Assets which reprice in:			
One year or less	\$ 6,871,176	(8.77%)	8.55%
Over one year	11,232,479	(3.45)	2.16
	<u>\$18,103,655</u>	(5.65)	4.81
Liabilities which reprice in:			
One year or less	\$11,205,416	(14.32)	13.24
Over one year	4,020,436	(2.64)	3.23
	<u>\$15,225,852</u>	(10.49)	9.96
Total net interest income sensitivity		(0.26)	(0.94)

[a] Amounts for December 31, 2000 have not been restated for the FirstTier merger.

As shown in the table above, the corporation’s net interest income sensitivity decreased from December 31, 2000 to September 30, 2001 in the up 100 basis point rate scenario and remained relatively unchanged in the down 100 basis point rate scenario. The significant decrease in market interest rates since December 31, 2000 has caused projected prepayments on mortgage loans and mortgage-backed securities in the up 100 basis point scenario to be higher than at December 31, 2000. The increase in projected prepayments resulted in more cashflows being reinvested at higher rates, thus increasing income. The bank purchased interest rate floors in the second quarter to help hedge against falling market rates, the floors remain in the money in the current up 100 basis point rate scenario, which reduced the bank’s net sensitivity to rising rates. Higher prepayments and the effect of the floors more than offset a change in liability mix from CD’s to wholesale funding which in and of itself decreased net interest income sensitivity to down rates and increased sensitivity to up rates versus December 31, 2000.
