Experience

Professor

The Buck Institute

Sep 2000 – Present · 21 yrs 2 mos

I run a research group studying the basic biology of aging and age-related disease. We have made seminal discoveries including the identification of small molecules that slow aging.

Senior Lecturer

University of Manchester

1995 – 2001 · 6 yrs

I formed a research group studying aging many in the nematode *C. elegans*. I taught courses in genetics, molecular biology and aging. I was mentor to five PhD students, four Post-Doctoral Fellows and numerous Master's and Undergraduate students. We published some prominent publications and helped build the UK's reputation in aging research.

Post-doctoral Fellow

University of Colorado at Boulder

1991 – 1995 · 4 yrs

Post-Doctoral Fellow

Post-doctoral Fellow

Ciba-Geigy

1989 – 1991 · 2 yrs

Basel, Switzerland

Education

University of Glasgow

PhD, Genetics

1985 – 1989

University of Strathclyde

BSC, microbiology

1981 – 1985
