You likely can't invest in some of the world's best tech companies.

Industry leaders. Unicorns. AI pioneers.

All *off-limits* for 99% of investors because they haven't IPO'd yet.

Off-limits...until now.

You can invest
in artificial
intelligence

Companies are waiting longer than ever to go public.

That means that value is increasingly accruing in the *private* markets.

And the private markets have been out of reach for normal investors, historically speaking.

We think that's a problem worth solving.

Venture capital has arguably been one of the highest-performing investments for the past 25 years. But for most investors, it was out of reach.

Now, you can invest in some of the world's top tech companies, including those leading the AI revolution, before they go public.

HOW TO

**Invest in the next big
tech company before
it goes public**

Carefully consider the investment objectives, risks, charges and expenses of the Fundrise Innovation Fund before investing. This and other information can be found in the Fund's prospectus at fundrise.com/innovation. Read them carefully before investing.
