Pitch

The slide features a green background with a smartphone graphic. The title 'Youzan (WeChat SaaS) on WhatsApp' is prominently displayed. Below the title, a paragraph states: 'Businessonbot aims to help 30 million SMBs & brands in India acquire WhatsApp users and sell to them in their local language. We do this by offering WhatsApp storefront and attribution based marketing.' The slide also mentions 'Backed by Y Combinator' and includes the website 'www.businessonbot.com'. On the right, a screenshot of a WhatsApp chat interface for 'Burger Shop' is shown, displaying a menu with items like burgers, fries, and drinks, along with a welcome message and a list of popular items.

India is a country of 1.3 billion people, of which 490 million are already there on WhatsApp...

... but still no one has been able to help D2C brand or SMBs, effectively acquire users on WhatsApp

The Problem

Businesses are **not able to**

- **directly interact** and create a loyal user base
- **save 25%+ margins** in aggregator commission
- reach vernacular / digitally inactive users in regional parts of India

Using referral campaign on WhatsApp, businesses reduced
user acquisition cost to \$ 0.014

More than **90%** reduction from current paid channel (\$4)

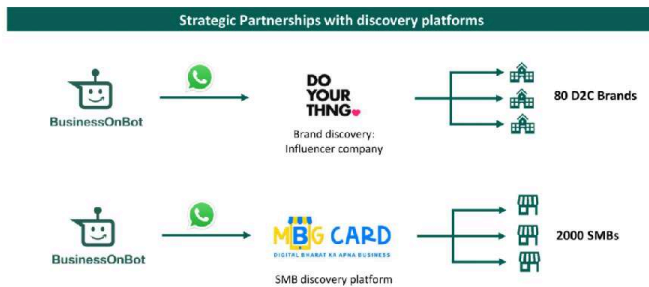

Case study : [WhatsApp referrals](#)

Growing at 25% W-o-W in MRR

- Launched in Jan-end & on-boarded **25 brands** in **1 month**.
- **\$3,000** MRR for March, **\$8,000** for April (booked).

\$ 8,000 in booked MRR

Insight : Voice AI is critical on WhatsApp

70% of vernacular users use voice on
WhatsApp to consume services

Accuracy in transcription : **99%**

Case study : [Vernacular voice AI](#)

Competitive Advantage

- Matured vernacular **voice AI in low resource language** is needed to acquire regional users
Eg: Hindi, Tamil, Malayalam etc.
- Driving customer acquisition and sales by **understanding consumer behaviour**

Global Parallel : WeChat SaaS in China

\$ 7 billion
In transaction volume
via WeChat mini programs to
drive sales and user acquisition for businesses

Eg: Youzan and Weimob

Growth in orders on WhatsApp

A Healthcare brand

	Sessions	Interaction	Exit
Month 1	127	226	0.99%
Month 2	797	1509	0.62%
Month 3	1141	3521	0.82%
