**Re: CytoMed Therapeutics Pte. Ltd.**  
**Draft Registration Statement on Form F-1**  
**Submitted September 28, 2021**  
**CIK No. 0001873093**

Dear Mr. CHOO:

We have reviewed your draft offering statement and have the following comments. In some of our comments, we may ask you to provide us with information so we may better understand your disclosure.

Please respond to this letter by providing the requested information and either submitting an amended draft offering statement or publicly filing your offering statement on EDGAR. Please refer to Rule 252(d) regarding the public filing requirements for non-public submissions, amendments and correspondence. If you do not believe our comments apply to your facts and circumstances or do not believe an amendment is appropriate, please tell us why in your response. After reviewing your amended draft offering statement or filed offering statement and the information you provide in response to these comments, we may have additional comments.

Draft Registration Statement on Form F-1 Submitted September 28, 2021

Summary

Our Business, page 19

1. Revise to clarify the current status of your three product candidates. You state on page 19 that you “are in the midst of developing” them, and that you are a preclinical biopharmaceutical company. Revise to further clarify at what stage you are with each product and where you intend to submit them for approval. With respect to CTM-N2D, we note from page 89 you are “close to starting a Phase I trial,” and from page 107 that you submitted a Phase I study to the HSA. Revise to clarify and disclose the correct stage in the summary. Provide similarly specific information about the status of your other two

main product candidates. For example, if the HSA requires an IND application as a first step, like the FDA, disclose the date you anticipate filing the IND for each of your other two product candidates.

Use of Proceeds, page 74

2. Please revise to disclose the amount of proceeds that you intend to allocate toward the development of each product candidate and also how far along in the preclinical or clinical trials you intend to fund with the proceeds.

Management's Discussion and Analysis of Financial Condition and Results of Operations Overview, page 80

3. Revise the disclosure on pages 81 and 86 to disclose for how long you believe the net proceeds from this offering, together with existing cash, will be sufficient to fund your operations.

Business Overview, page 89

4. Revise your pipeline table to include all three Phases of clinical development, and to remove “proof of concept” and “manufacturing process validation” as separate phases of development. Clarify what you mean by “trial application.” Revise the indication for each product candidate to clarify the specific indication for which you will seek regulatory approval. Revise the table to clearly disclose the jurisdiction in which you are seeking regulatory approval, as you are a Singapore company operating primarily in Malaysia seeking to raise capital in the United States.
5. To the extent you are seeking regulatory approval in Singapore, revise your Business section to briefly explain that process and in what category your product candidates fall, that is, whether they require a CTA, CTN or Clinical Trial Certificate, and what procedures you must undertake to conduct human clinical trials. Essentially, explain how the regulations described beginning on page 123 apply to your product candidates.

Strategy, page 90

6. Revise to avoid statements such as having the “competitive edge,” in the disclosure and the table on page 90, where your products are pre-clinical. Where the comparison products are commercialized and yours are yet to be proven, it is premature to address the technology evolution as presented in the graphic, which should be deleted. Similarly, rephrase the “Advantages” of your therapy in the heading on page 102 to clarify they are potential advantages.

CTM-N2D, page 95

7. Revise to clarify the nature of the “deep discussion with a potential clinical trial partner to formally submit a Phase I trial application for CTM-N2D.” Also clarify what it means that HSA “reviewed [your] submission and concluded that it has no major issues with [your] documents.” It is unclear where this places you in the regulatory pathway.

Product Design and Manufacturing of CTM-N2D, page 101

8. As safety and efficacy determinations are solely within the authority of regulators such as the HSA and FDA, and they continue to be evaluated throughout all phases of clinical trials, please remove the reference to your products as “safer” from Figure 10, the reference to “safer ‘drug-like’ product features,” and characterizing the product-candidate as “safe” on page 103, and other statements of safety throughout the prospectus. Also avoid statements of the potency of CTM-N2D, as referenced at the bottom of page 103, on page 105, and elsewhere in the prospectus, as this has yet to be proven. avoid any statements of efficacy in the prospectus. You may present the results of pre-clinical tests without drawing conclusions regarding efficacy or potency.

Gamma delta NKT Cells Recognize and Kill a Broad-spectrum of Cancer Cells, page 111

9. Revise Figure 22 on page 112 so the font is large enough to be legible in each of the tables.

Property, page 113

10. Clarify the importance of the lease beginning March 1, 2008 on the property you recently purchased.

Intellectual Property, page 115

11. Please update your description of the Patent License, Know-How License and K562 Cell License with ATPL to disclose, as applicable:
  - the aggregate amounts paid to date;
  - aggregate milestone payments; andFor the Patent and Know-How Licenses, please quantify the royalty rate or provide a reasonable range not exceeding 10 percentage points, and disclose when the royalty provisions expire.

Foreign Private Issuer Exemptions, page 147

12. You disclose here that you intend to follow the practices of your home country, Singapore, with respect to the practices listed here, rather than the Nasdaq Listing Rules standards, however, for several of these matters, it appears you may meet the Nasdaq Listing standards. For example, you state on page 146 that you will adopt a Code of Business Conduct and Ethics. Also, it appears from page 146 that your compensation

committee will be independent and will have a charter. Please revise the appropriate sections to clarify.

Financial Statements

Audit Report, page F-2

13. Please obtain an audit report which addresses the following issues:

- Revise the language of the opinion paragraph to make clear that the opinion covers the consolidated statements of comprehensive income, changes in equity, and cash flows for both fiscal years ended December 31, 2019 and December 31, 2020;
- Refer to the International Financial Reporting Standards as issued by the International Accounting Standards Board, as per the guidance in Item 17(c) of Form 20-F;
- Include representations, if true, that the audit was conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), and conform the audit report accordingly; and
- Include the date of the audit opinion in accordance with Rule 2-02(a) of Regulation S-X.

You may contact Tracie Mariner at (202) 551-3744 or Daniel Gordon at (202) 551-3486 if you have questions regarding comments on the financial statements and related matters. Please contact Abby Adams at (202) 551-6902 or Celeste Murphy at (202) 551-3257 with any other questions.

Sincerely,

Division of Corporation Finance  
Office of Life Sciences
