RISK FACTORS

An investment in securities involves a high degree of risk. Before making an investment decision, we urge you to carefully consider the risks described in this section together with all the information contained in this Form C. In addition to the risks specified herein, the Company is subject to same risks that all companies in its business, and all companies in the economy, are exposed to. These include risks relating to economic downturns, political and economic events and technological developments (such as hacking and the ability to prevent hacking). Additionally, early-stage companies are inherently riskier than more developed companies.

Risks associated with an investment in the Assetcoin.

This Offering's primary purpose is the distribution of securities to participants as a mechanism to raise capital. The offering is highly speculative and any return on an investment is contingent upon numerous circumstances, many of which (including legal and regulatory conditions) are beyond the Company's control. There is no assurance that Purchasers will realize any return on their investments or that their entire investment will not be lost. For this reason, each Purchaser should carefully read this Form C and should consult with his or her own attorney, financial and tax advisors prior to making any investment decision with respect to the Company. Purchasers should only make an investment in the Company if they are prepared to lose the entirety of such investment.

This Offering will not provide meaningful funding to the Company, even if the maximum Offering Amount is met, therefore we may need to secure additional funding and may be unable to raise additional capital on favorable terms, if at all.

This Offering's primary purpose is the distribution of securities to participants who believe in the Company's mission, and not as a mechanism to raise capital. Therefore, this Offering will not sustain the operations of the Company and we will need to secure additional funding to further develop our products and services, to market and sell our products and services, for working capital and in order to carry out our business plan. There are no assurances we will be able to obtain such financing on commercially reasonable terms, or at all. If adequate funds are not available, then we may need to reduce or suspend our activities, including product development, marketing, planned expenditures and sales activities. If these risks occur, they could materially adversely impact our business, our financial condition, and our results of operation.

Additionally, even if we raise sufficient capital through equity or debt financings, strategic alternatives or otherwise, there can be no assurance that the revenue or capital infusion will be sufficient to enable us to develop our business to a level where it will be profitable or generate positive cash flow. If we raise additional funds through collaborations and/or licensing arrangements, we might be required to relinquish significant rights and accept terms that are not favorable to us.

The Securities may not be transferable and if they become transferrable, may not provide investors with significant opportunity for liquidity.

The terms of the offering prohibit transfer of the securities. As a result, Purchasers will be required to hold their securities until the date specified in the future. Purchasers will be required to comply with applicable securities laws with respect to resales of both the securities, which includes a one-year holding period, subject to limited exceptions, for resales pursuant to Section 4(a)(6) of the Securities Act and Regulation CF (§ 227.100 et seq.) and Purchasers must be prepared to bear the risk of an investment in securities derived from such until the termination of the securities pursuant to the terms set forth therein, or the transfer of the securities, free of resale restrictions, to Purchasers. Purchasers should also be aware that after the one-year holding period, certain state ("blue-sky") and foreign laws may prevent the free transferability of the securities derived from such.

The tax treatment of the securities, the purchase rights contained therein and the securities is uncertain and there may be adverse tax consequences for Purchasers upon certain future events.

The tax characterization of the securities is uncertain. Transactions involving the securities may be taxable to Purchasers, including the purchase of the securities, the issuance of securities pursuant to the offering, the use or other disposition of the securities, and the repayment of Purchaser's investment amounts. Such tax consequences may include income taxes, withholding taxes, and tax reporting requirements. Each Purchaser should consult with and must rely upon the advice of its own professional tax advisors with respect to the United States and non-U.S. tax treatment of an investment in the securities and the purchase rights contained therein. Prospective Purchasers are urged to review the section below under "Certain United States Federal Income Tax Considerations" with their tax advisors.

The Purchasers of these securities will have voting rights in the company. The securities represent an equity interest in the Company.

The purchase of these securities confers voting rights with respect to the Company. As a result, all governance decisions, including decisions involving our products or services, decisions to sell and price, or to undertake to sell, liquidate or wind up the Company, will be made and decided by vote. These decisions could adversely affect the Purchasers, and the use of any securities the Purchasers own. The Purchasers are entitled to vote for any purpose and on any rights of a shareholder of the Company.

The Company's business may be subject to complex and evolving U.S. and foreign laws and regulations regarding privacy, technology, data protection, alternative trading systems, and other matters. Many of these laws and regulations are subject to change and uncertain interpretation, and could result in claims, changes to the Company's business practices, increased cost of operations or otherwise harm the Company's business.

The Company may be subject to a variety of laws and regulations in the United States and abroad that involve matters related to its business, including user privacy, software, broker dealer, data protection and intellectual property, among others. Foreign data protection, privacy, broker dealer and other laws and regulations are often more restrictive than those in the United States. These U.S. federal and state and foreign laws and regulations are constantly evolving and can be subject to significant change. In addition, the application and interpretation of these laws and regulations are often uncertain, particularly in the new and rapidly evolving industry in which the Company operates.

The growth of the Company's business and its expansion may increase the potential of violating these laws or its internal policies and procedures. The risk of the Company's being found in violation of these, or other laws and regulations is further increased by the fact that many of these laws and regulations may not have been fully interpreted by the regulatory authorities or the courts and are open to a variety of interpretations. Any action brought against the Company for violation of these or other laws or regulations, even if the Company successfully defends against it, could cause the Company to incur significant legal expenses and divert its management's attention from the operation of its business, which could impact its ability to develop, enhance, and grow the Company. If the Company's operations are found to be in violation of any of these laws and regulations, the Company may be subject to any applicable penalty associated with the violation, including civil and criminal penalties, damages and fines, the Company could be required to refund payments received by it, and it could be required to curtail or cease its operations. Any of the foregoing consequences could seriously harm its business and its financial results, which could impact its ability to develop, enhance, and grow the Company. These existing and proposed laws and regulations can be costly to comply with and can delay or impede the development of new products, result in negative publicity, increase its operating costs, require significant management time and attention, and subject the Company to claims or other remedies, including fines or demands that the Company modifies or ceases existing business practices.

Purchasers should guard against third party access to their wallets where they use or hold their securities.

Any third party that gains access to or learns of a Purchaser's wallet login credentials or private keys may be able to dispose of such Purchaser's securities. To minimize this risk, each Purchaser should guard against unauthorized access to his, her or its electronic devices. Best practices dictate that each Purchaser should safely store private keys in one or more backup locations geographically separated from the working location. In addition, each Purchaser is responsible for giving the Company the correct name, address, and other identifying information to send such Purchaser his or her securities. If a Purchaser gives the Company an incorrect information the Company will not be responsible for any loss of securities that may occur.

Risks Related to the Company's Business and Industry

The Company has limited operating history as a venture capital firm or in the mortgage business upon which you can evaluate our performance, and accordingly, our prospects must be considered in light of the risks that any new company encounters. The Company is still in the early-stage, and we are just beginning to implement our business plan. There can be no assurance that we will ever operate profitably. The likelihood of our success should be considered in light of the problems, expenses, difficulties, complications and delays usually encountered by early-stage companies. The Company may not be successful in attaining the objectives necessary for it to overcome these risks and uncertainties.

Global crises such as COVID-19 can have a significant effect on our business operations and revenue projections.

There is an ongoing outbreak of a novel and highly contagious form of coronavirus ("COVID-19"), which the World Health Organization declared a global pandemic on March 11, 2020. The outbreak of COVID-19 has caused a worldwide public health emergency with a substantial number of hospitalizations and deaths and has significantly adversely impacted commercial activity and contributed to both volatility and material declines in equity and debt markets. The global impact of the outbreak is evolving, and many national, state, and local governments have instituted restrictions, closures or reductions of offices, businesses, schools, retail stores, restaurants, and other public venues and/or cancellations, suspensions and/or postponements of certain events and activities, including certain non-essential government and regulatory activities. Businesses have implemented their own precautionary measures, such as temporary or permanent reductions in work force, remote working arrangements, and emergency contingency plans.

If COVID-19 is not fully contained and the new variants continue to spread, we could face another global or regional economic recession of indeterminate duration. This could adversely affect the Company by impacting the value, performance and liquidity of the Company, the Company's ability to source, manage and divest investments; and our ability to achieve our objectives. All of the foregoing could result in significant losses to the investors and, therefore, to the revenues of the Company.

The Company's success depends on the experience and skill of its manager and other key personnel.

In particular, we are dependent on our managers, Rev. Duane A. Quamina, President & CEO; Burena Morris, MBA, COO; Allen Redic, MBA, Executive VP of Construction and Evaluation; and other key personnel, Wayne King, Executive VP of Housing Development; Gregory "Bo" Kimble, Communications Major; Rhonda Coleman, Esq., Shabree Crisdon, MBA, Tracey Johnson, MBA, and Mark Anthony Cook (together, the "**Principals and Board**"). The loss of the Managers, the Principals or any other key personnel could harm the Company's business, financial condition, cash flow and performance. Accordingly, you should not invest in the Company unless you are willing to entrust all aspects of the management of the Company and the investment decisions, we make on the behalf of the Company to the Managers, Principals and Board, which will have considerable discretion in the management of the Company.

Although dependent on certain key personnel, the Company does not have any key person life insurance policies on any such people.

We are dependent on certain key personnel in order to conduct our operations and execute our business plan, however, the Company has not purchased any insurance policies with respect to those individuals in the event of their death or disability. Therefore, if any of these personnel die or become disabled, the Company will not receive any compensation to assist with such person's absence. The loss of such person could negatively affect the Company and our operations. We have no way to guarantee key personnel will stay with the Company, as many states do not enforce non-competition agreements, and therefore acquiring key man insurance will not ameliorate all of the risk of relying on key personnel.

As a portion of the Company's revenues rely on the profitability of the Company, the Company is subject to numerous risks generally related to investing in securities and other investments, and the additional risks associated with investing in non-marketable securities and other non-public companies.

The Company aim to generate attractive risk-adjusted returns for its investors by investing primarily in mortgages or real estate. Although the Company offers the opportunity for significant capital gains, it also involves a high degree of business and financial risk. Most of the Company's investments will be in developing a mortgage operation, which has limited or no operating history, and may experience failures or significant declines in value over time.

The Company has limited investment opportunities.

The mortgage and real estate sector and industries is highly competitive, and therefore, there are no assurances that the business will be able to find a sufficient number of customers, or attractive opportunities to meet the investment objectives of the Company. The competition is financial institutions, large publicly traded companies, and other mortgage companies. Many of them have greater resources than those available to the Company. Moreover, the industry in which the Company intends to participate is a highly competitive arenas, and there are no assurances that any Company will obtain the level of success necessary to obtain any of the Company's objectives.

Damage to our reputation could negatively impact our business, financial condition and results of operations.

Our reputation and the quality of our brand are critical to our business and success and will be critical to our success as we form new partnerships and grow. Any incident that erodes investor confidence in the Company could significantly reduce the Company's value and damage our business. We may be adversely affected by any negative publicity, regardless of its accuracy. Also, there has been a marked increase in the use of social media platforms and similar devices, including blogs, social media websites and other forms of internet-based communications that provide individuals with access to a broad audience. The availability of information on social media platforms is virtually immediate as is its impact. Information posted may be averse to our interests or may be inaccurate, each of which may harm our performance, prospects or business. The harm may be immediate and may disseminate rapidly and broadly, without affording us an opportunity for redress or correct.

Our business could be negatively impacted by cyber security threats, attacks and other disruptions.

We continue to face advanced and persistent attacks on our information infrastructure where we manage and store various proprietary information and sensitive/confidential data relating to our operations. These attacks may include sophisticated malware (viruses, worms, and other malicious software programs) and phishing emails that attack our products or otherwise exploit any security vulnerabilities. These intrusions sometimes may be zero-day malware that are difficult to identify because they are not included in the signature set of commercially available antivirus scanning programs. Experienced computer programmers and hackers may be able to penetrate our network security and misappropriate or compromise our confidential information or that of the Company, their investors, or other third parties, create system disruptions, or cause shutdowns. Additionally, sophisticated software and applications that we produce or procure from third parties may contain defects in design or manufacture, including "bugs" and other problems that could unexpectedly interfere with the operation of the information infrastructure. A disruption, infiltration, or failure of our information infrastructure systems or any of our data centers because of software or hardware malfunctions, computer viruses, cyber-attacks, employee theft or misuse, power disruptions, natural disasters or accidents could cause breaches of data security, loss of critical data and performance delays, which in turn could adversely affect our business.

Security breaches of confidential customer information may adversely affect our business.

Our business requires the collection, transmission, and retention of personally identifiable information, in various information technology systems that we maintain and in those maintained by third parties with whom we contract to provide services. The integrity and protection of that data is critical to us. The information, security and privacy requirements imposed by governmental regulation are increasingly demanding. Our systems may not be able to satisfy these changing requirements and customer and employee expectations or may require significant additional investments or time to do so. A breach in the security of our information technology systems or those of our service providers could lead to an interruption in the operation of our systems, resulting in operational inefficiencies and a loss of profits. Additionally, a significant theft, loss, or misappropriation of, or access to, customers' or other proprietary data or other breach of our information technology systems could result in fines, legal claims or proceedings.

The use of individually identifiable data by our business, our business associates and third parties is regulated at the state, federal and international levels.

The regulation of individual data is changing rapidly, and in unpredictable ways. A change in regulation could adversely affect our business, including causing our business model to no longer be viable. Costs associated with information security – such as investment in technology, the costs of compliance with consumer protection laws and costs resulting from consumer fraud – could cause our business and results of operations to suffer materially. The intentional or negligent actions of affiliates, business associates or third parties may undermine our security measures. As a result, unauthorized parties may obtain access to our data systems and misappropriate confidential data. There can be no assurance that advances in computer capabilities, new discoveries in the field of cryptography or other developments will prevent the compromise of investor personal data. If any such compromise of our security or the security of information residing with our affiliates, business associates or third parties were to occur, it could have a material adverse effect on our reputation, operating results, and financial condition. Any compromise of our data security may materially increase the costs we incur to protect against such breaches and could subject us to additional legal risk.

The Company is not subject to Sarbanes-Oxley regulations and may lack the financial controls and procedures of public companies.

The Company may not have the internal control infrastructure that would meet the standards of a public company, including the requirements of the Sarbanes Oxley Act of 2002. As a privately held (non-public) Company, the Company is currently not subject to the Sarbanes Oxley Act of 2002, and its financial and disclosure controls and procedures reflect its status as a development stage, non-public company. There can be no guarantee that there are no significant deficiencies or material weaknesses in the quality of the Company's financial and disclosure controls and procedures. If it were necessary to implement such financial and disclosure controls and procedures, the cost to the Company of such compliance could be substantial and could have a material adverse effect on the Company's results of operations.

We operate in a highly regulated environment, and if we are found to be in violation of any of the federal, state, or local laws or regulations applicable to us, our business could suffer.

We are also subject to a wide range of federal, state, and local laws and regulations and we expect the costs to maintain compliance to increase going forward. This risk disclosure cannot address or anticipate every possible current or future regulation that might affect the Company. Such regulations may have a significant impact on the Company including restricting the types of investments the Company may make or requiring them to disclose certain confidential information regarding their terms or their investments. The Managers, in their sole and absolute discretion, may cause the Company to be subject to certain regulations if it believes that such business activity is in the Company's best interest, even if such regulations may have a detrimental effect on one or more Investors. The violation of these or future requirements or laws and regulations could result in regulatory, civil, or criminal sanctions against us, which may include fines, a cease-and-desist order against the subject operations or even revocation or suspension of our ability to operate. As a result, we have incurred and will continue to incur capital and operating expenditures and other costs to comply with these requirements and laws and regulations.

Risks Related to the Offering

The U.S. Securities and Exchange Commission does not pass upon the merits of the Securities or the terms of the Offering, nor does it pass upon the accuracy or completeness of any Offering document or literature.

You should not rely on the fact that our Form C is accessible through the U.S. Securities and Exchange Commission's EDGAR filing system as an approval, endorsement or guarantee of compliance as it relates to this Offering. The U.S. Securities and Exchange Commission has not reviewed this Form C, nor any document or literature related to this Offering.

Neither the Offering nor the Securities have been registered under federal or state securities laws.

No governmental agency has reviewed or passed upon this Offering or the Securities. Neither the Offering nor the Securities have been registered under federal or state securities laws. Investors will not receive any of the benefits available in registered Offerings, which may include access to quarterly and annual financial statements that have been

audited by an independent accounting firm. Investors must therefore assess the adequacy of disclosure and the fairness of the terms of this Offering based on the information provided in this Form C and the accompanying exhibits.

The Company's management may have broad discretion in how the Company uses the net proceeds of the Offering.

Unless the Company has agreed to a specific use of the proceeds from the Offering, the Company's management will have considerable discretion over the use of proceeds from the Offering. You may not have the opportunity, as part of your investment decision, to assess whether the proceeds are being used appropriately.

The Company has the right to limit individual Investor commitment amounts based on the Company's determination of an Investor's sophistication.

The Company may prevent any Investor from committing more than a certain amount in this Offering based on the Company's determination of the Investor's sophistication and ability to assume the risk of the investment. This means that your desired investment amount may be limited or lowered based solely on the Company's determination and not in line with relevant investment limits set forth by the Regulation CF rules. This also means that other Investors may receive larger allocations of the Offering based solely on the Company's determination.

The Company has the right to extend the Offering Deadline.

The Company may extend the Offering Deadline beyond what is currently stated herein. This means that your investment may continue to be held in a trust account while the Company attempts to raise the Target Amount even after the Offering Deadline stated herein is reached. While you have the right to cancel your investment in the event the Company extends the Offering Deadline, if you choose to reconfirm your investment, your investment will not be accruing interest during this time and will simply be held until such time as the new Offering Deadline is reached without the Company receiving the Target Amount, at which time it will be returned to you without interest or deduction, or the Company receives the Target Amount, at which time it will be released to the Company to be used as set forth herein. Upon or shortly after the release of such funds to the Company, the Securities will be issued and distributed to you.

The Company may also end the Offering early.

If the Target Offering Amount is met after 21 calendar days, but before the Offering Deadline, the Company can end the Offering by providing notice to Investors at least 5 business days prior to the end of the Offering. This means your failure to participate in the Offering in a timely manner, may prevent you from being able to invest in this Offering – it also means the Company may limit the amount of capital it can raise during the Offering by ending the Offering early.

The Company has the right to conduct multiple closings during the Offering.

If the Company meets certain terms and conditions, an intermediate close of the Offering can occur, which will allow the Company to draw down on half of the proceeds committed and captured in the Offering during the relevant period. The Company may choose to continue the Offering thereafter. Investors should be mindful that this means they can make multiple investment commitments in the Offering, which may be subject to different cancellation rights. For example, if an intermediate close occurs and later a material change occurs as the Offering continues, Investors whose investment commitments were previously closed upon will not have the right to re-confirm their investment as it will be deemed to have been completed prior to the material change.

Although Investors will have no right to voluntarily withdraw capital from the Company or withdraw their Securities, in certain circumstances they may be forced to withdraw from the Company.

An Investor may be forced to withdraw from the Company if the Company reasonably determines that it is necessary or desirable to do so to comply with applicable law or regulations, or to avoid a material adverse effect on the Company or the other holders of securities in the Company.

Investors will have voting rights but no right to control the Company's operations.

The Investors will have no opportunity to control the day-to-day operations of the Company, to safeguard your limited liability for the liabilities and obligations of the Company, you must rely entirely on the Manager and Principals to conduct and manage the business affairs of the Company and to manage the investments of the Company.

Investors will not be entitled to any inspection or information rights other than those required by law.

Investors will not have the right to inspect the books and records of the Company or to receive financial or other information from the Company, other than as required by law. Other security holders of the Company may have such rights. Regulation CF requires only the provision of an annual report on Form C and no additional information. Additionally, there are numerous methods by which the Company can terminate annual report obligations, resulting in no information rights, contractual, statutory, or otherwise, owed to Investors. This lack of information could put Investors at a disadvantage in general and with respect to other security holders, including certain security holders who have rights to periodic financial statements and updates from the Company such as quarterly unaudited financials, annual projections and budgets, and monthly progress reports, among other things.

Investors will be unable to declare the Security in “default” and demand repayment.

Unlike convertible notes and some other securities, the Securities do not have any “default” provisions upon which Investors will be able to demand repayment of their investment. Only in limited circumstances, such as the sale of company or other liquidity event, may Investors be entitled to payment and even then, such payments will be limited to the amount of cash available to the Company.

The Company may never undergo a liquidity event and Investors may have to hold the Securities indefinitely.

The Company may never undergo a liquidity event such as a repurchase of the Securities by the Company or a sale of the Company. If a liquidity event does not occur, Investors could be left holding the Securities in perpetuity. The Securities have numerous transfer restrictions and will likely be highly illiquid, with no secondary market on which to sell them. The Securities limited voting rights and no ability to direct the Company or its actions.

The Securities may be significantly diluted as a consequence of subsequent equity financings.

The Company’s securities will be subject to dilution. The Company may issue additional equity to third-party financing sources in amounts that are uncertain at this time, and as a consequence holders of the Securities will be subject to dilution in an unpredictable amount. Such dilution may reduce the Investor’s economic interests in the Company.

The amount of additional financing needed by the Company will depend upon several contingencies not foreseen at the time of this Offering. Generally, additional financing (whether in the form of loans or the issuance of other securities) will be intended to provide the Company with enough capital to reach the next major corporate milestone. If the funds received in any additional financing are not sufficient to meet the Company’s needs, the Company may have to raise additional capital at a price unfavorable to their existing investors, including the holders of the Securities. The availability of capital is at least partially a function of capital market conditions that are beyond the control of the Company. There can be no assurance that the Company will be able to accurately predict the future capital requirements necessary for success or that additional funds will be available from any source. Failure to obtain financing on favorable terms could dilute or otherwise severely impair the value of the Securities.

The Securities may be substantially different from other equity securities offered or issued by the Company.

The Securities may be materially different from the other equity securities of the Company in many ways, including, but not limited to, liquidation preferences, dividend rights, or anti-dilution protection. The Securities may not provide the holders of such Securities with the same rights, preferences, protections, and other benefits or privileges provided to other investors of the Company.

There is no present market for the Securities and we have arbitrarily set the price.

The Offering price was not established in a competitive market. We have arbitrarily set the price of the Securities with reference to the general status of the securities market and other relevant factors. The Offering price for the Securities

should not be considered an indication of the actual value of the Securities and is not based on our net worth or prior earnings. We cannot guarantee that the Securities can be resold at the Offering price or at any other price.

In the event of the dissolution or bankruptcy of the Company, Investors will not be treated as debt holders and therefore are unlikely to recover any proceeds.

In the event of the dissolution or bankruptcy of the Company, the holders of the Securities will be entitled to distributions as described in the Securities. This means that such holders will only receive distributions once all the creditors and more senior security holders, including any holders of preferred membership interests, have been paid in full. No holders of the Securities can be guaranteed any proceeds in the event of the dissolution or bankruptcy of the Company.

There is no guarantee of a return on an Investor's investment.

There is no assurance that an Investor will realize a return on their investment or that they will not lose their entire investment. For this reason, each Investor should read this Form C and all exhibits carefully and should consult with their attorney and business advisor prior to making any investment decision.

We inadvertently may have made impermissible offers for the Securities.

To offer and sell securities under Section 4(a)(6) of the Securities Act of 1933, an issuer must file a Form C with the SEC. Due to technical miscalculations, we may have inadvertently conducted marketing which discussed the offering and the securities before we filed our Form C. While we believe our communications and marketing did not rise to the level of an offer and therefore was not violative of the Securities Act of 1933, the SEC could disagree and integrate that communication with our current offering, providing investors with a rescission right and possibly causing harm to the Company.

IN ADDITION TO THE RISKS LISTED ABOVE, RISKS AND UNCERTAINTIES NOT PRESENTLY KNOWN, OR WHICH WE CONSIDER IMMATERIAL AS OF THE DATE OF THIS FORM C, MAY ALSO HAVE AN ADVERSE EFFECT ON OUR BUSINESS AND RESULT IN THE TOTAL LOSS OF YOUR INVESTMENT.

Success Factor

I Have A Dream Home is a movement focused on solving real world problems. The lack of homeownership opportunities for black and brown people in America has created a need for more banking and mortgage lending institutions committed to ending systemic racism.

I Have A Dream Home addresses longstanding issues surrounding mortgage discrimination in America.

1930 - Present	The Federal Government encouraged lending institutions to deny mortgages to prospective homebuyers living in neighborhoods with high populations of black people and immigrants. This practice became known as redlining.
1968 - Present	The Federal Government passed the Fair Housing Act which made it illegal to deny someone housing based on race or other protected categories. Despite the law, African American continue to be denied mortgages at a higher rate than their white counterparts and the cases continue to pile up.
January 2017	JP Morgan Chase agreed to a \$55 million dollar settlement with the government over allegations that it discriminated against "thousands" of African American and Latino mortgage borrowers.
December 2019	Wells Fargo Bank. agreed to pay the City of Philadelphia \$10 million to settle a federal lawsuit that alleged that the bank discriminated against minority borrowers.
December 2021	Old National Bank has settled allegations of redlining against Black residents in Indianapolis, agreeing to originate more than \$27 million in loans to qualified Black applicants and contributing more than \$3 million to create programs to help Black home seekers secure mortgages and to invest in majority-Black neighborhoods.
April 2022	A class action lawsuit was filed against Wells Fargo Banks in the Northern District of California alleging discriminatory residential mortgage policies and lending practices against its Black customers.
June 2022	Charles Scharf, CEO, Wells Fargo Speaking at the conference, said the bank is reevaluating and likely scaling back its \$1.8 trillion mortgage servicing operations. He also announced Wells Fargo is eyeing an opportunity in investment banking with its current customers.
November 2022	JP Morgan Chase announced on November 15, 2022 it is about to spend \$1 billion on hundreds of rental homes across the US on the way to becoming a mega landlord,

The racial issues within the banking system have gained more attention in recent years as studies and investigations have repeatedly found that barriers to fair housing exist for minorities across the country.

The success of I Have A Dream Home lies in its solution (business model) to end bias and discriminatory lending practices; here are three main reasons to lend your support and invest:

1. Inequities and Inequality.
2. The lack of trust that black and brown people has in the current financial system, and
3. According to a report issued by the Homeownership Council of America, by successfully lending in underserved communities, lenders stand to conservatively increase their loan volume by at least \$1.5 Trillion.

THE OFFERING AND THE SECURITIES

The Offering

The Company is offering up to **5,000,000** securities/shares in the Company. The Company is attempting to raise a minimum amount of **\$10,000** in this Offering (the “**Minimum Amount**”). The Company must receive commitments from investors in an amount totaling the Minimum Amount by January 31, 2024 (the “**Offering Deadline**”) in order to receive any payments. If the sum of the investment commitments does not equal or exceed the Minimum Amount by the Offering Deadline, no Securities will be sold in the Offering, investment commitments will be cancelled, and information provided as consideration will be destroyed. The Company will accept consideration with a nominal value in excess of the Minimum Amount up to **\$5,000,000** (the “**Maximum Amount**”).

The nominal value assigned to the Securities does not necessarily bear any relationship to the Company’s asset value, net worth, revenues, or other established criteria of value, and should not be considered indicative of the actual value of the Securities, in fact, the securities have no rights to the Company’s assets, revenues or the like. Purchasers’ consideration will be accepted in the representation, delivery and verified receipt of a Purchaser’s personally identifiable information. Until the Minimum Amount has been reached, all forms of consideration that can be provided by a Purchaser to the Company will be directed to the escrow agent, Enterprise Bank & Trust, who will hold such consideration in escrow unless and until the Minimum Amount is met and consideration collected is transmitted to the Company through the Intermediary/Broker Dealer Andes Capital Group, LLC during a Closing.

Purchasers may cancel an investment commitment up until 48 hours after they have made the investment using the cancellation mechanism provided by the Intermediary. The Company and the Intermediary will notify Purchasers when the Minimum Amount has been reached. The Company may conduct an initial closing of the Offering at least five (5) days after reaching the Minimum Amount, but no sooner than twenty-one (21) days after the date of this offering; Purchasers shall be notified of this initial closing. The Company may then conduct a series of additional closings (either with new or existing Purchasers) until the Offering Deadline.

Until the Offering Deadline, the Company will provide notice to Purchasers and identified prospective Purchasers of any material changes to the Offering. Prior to the initial closing, if a Purchaser does not cancel his or her investment commitment before 48 hours, or before 48 hours after a material change is made to the terms of the Offering, the Purchaser’s investment commitment will be considered valid, and the information provided by the Purchaser shall be released to the Company upon closing of the Offering and the Purchaser will receive the Securities in exchange for his or her consideration. Any Purchaser consideration received after the initial closing will be delivered directly to the Company and the Purchaser will receive securities in exchange for his or her investment as soon as practicable thereafter.

A submission of consideration by Purchaser shall not create a binding agreement to issue Securities until accepted by the Company, which reserves the right to reject, in whole or in part, in its sole and absolute discretion, any such submission. If the Company rejects all or a portion of any such submission, the Company shall destroy any information provided as consideration.

The nominal value of the consideration (as determined by Company from time to time and communicated to prospective Purchasers) will be the face amount or par value of the Securities. The minimum nominal number of Securities to be issued to a Purchaser is **10** valued at **\$1.00** each for a total of **\$10.00**. The Company reserves the right to amend the minimum amount that a Purchaser may invest at the Company’s sole discretion.

Events of Default

In addition to the standard events of default such as the Company’s failure or delay in fulfilling or performing any of the term outlined in the Offering Memorandum, including, liquidation of the Company, a voluntary or involuntary bankruptcy proceedings, and there are no other events of default pursuant to the Offering Memorandum. The Company is not liable or responsible to the Purchaser, nor deemed to have defaulted when and to the extent such failure or delay is caused by or results from acts beyond the affected party’s reasonable control.

Voting and Control

The holder of the Securities will have voting rights commensurate with its shareholder class.

Anti-Dilution Rights

The Offering Memorandum does not provide for anti-dilution rights.

Restrictions on Transfer

The Securities may not be transferred by any Purchaser during the one-year holding period beginning when the securities were issued, subject to limited exceptions, for resales pursuant to Section 4(a)(6) of the Securities Act and Regulation CF (§ 227.100 et seq.). Remember, this restriction also applies to any subsequent Securities purchased.

Other Material Terms

The Company has the right to cease operations and purchasers are not guaranteed a return on the consideration provided.

Transfer of Securities

The securities being offered may not be transferred by any purchaser of such securities during the one year period beginning when the securities were issued, unless such securities are transferred: • to the issuer; • to an accredited investor; • as part of an offering registered with the U.S. Securities and Exchange Commission; or to a member of the family of the purchaser or the equivalent, to a trust controlled by the purchaser, to a trust created for the benefit of a member of the family of the purchaser or the equivalent, or in connection with the death or divorce of the purchaser or other similar circumstance. • The term “accredited investor” means any person who comes within any of the categories set forth in Rule 501(a) of Regulation D, or who the seller reasonably believes comes within any of such categories, at the time of the sale of the securities to that person. The term “member of the family of the purchaser or the equivalent” includes a child, stepchild, grandchild, parent, stepparent, grandparent, spouse or spousal equivalent, sibling, mother-in-law, father-in-law, son-in-law, daughter-in-law, brother-in-law, or sister-in-law of the purchaser, and includes adoptive relationships. The term “spousal equivalent” means a cohabitant occupying a relationship generally equivalent to that of a spouse.

Risk to Purchaser

What are the risks to purchasers of the securities relating to minority ownership in the issuer? The company's Certificate of Incorporation or Bylaws can be amended by the holders of a majority of the issued and outstanding shares of the Company. As minority owners, the crowdfunding investors are subject to the decisions made by the majority owners. The issued and outstanding shares of Class B, Executive Stock give management voting control of the company. As a minority owner, you may be outvoted on issues that impact your investment, such as, among other things: (a) the liquidation, dissolution or winding up of the company, or effecting any merger or consolidation; (b) amendment of any provision of the Certificate of Incorporation or Bylaws; (c) creation and issuance of other securities having rights, preferences or privileges senior to the common stock sold to the crowdfunding investors, or increasing the authorized number of shares of stock of the company; or (d) creation of any debt security.

Risks to purchasers associated with corporate actions: 1. Additional issuances of securities 2. Issuer repurchases of securities 3. A sale of the issuer or of assets of the issuer 4. Transactions with related parties The authorization and issuance of additional shares of the company's common stock will dilute the ownership of the crowdfunding investors. As a result, if the company achieves profitable operations in the future, its net income per share will be reduced because of dilution, and the market price of the company's common stock, if there is a market price, could decline as a result of the additional issuances of securities. If the company repurchases securities, so that the above risk is mitigated, and there are fewer shares of common stock outstanding, the company may not have enough cash available for marketing expenses, growth, or operating expenses to reach our goals. If we do not have enough cash to operate and grow, we anticipate the market price of our securities would decline. A sale of the company or of all of the assets of the company may result in an entire loss of your investment. We cannot predict the market value of the company or its assets, and the proceeds of a sale may not be cash, but instead, unmarketable securities, or an assumption of liabilities. It is unlikely that in the near term, a sale would result in a premium that is significant enough over book value to generate a return to our investors. We may need to negotiate with a related party for additional capital. No assurance can be given that such funds will be available or, if available, will be on commercially reasonable terms satisfactory to us. Even if such financing is available, it may be on terms that are materially adverse to your interests with respect to dilution of book value, dividend preferences, liquidation preferences, or other terms.

AUDITOR'S RESPONSIBILITY

My responsibility is to express an opinion on these financial statements based on my audits. I conducted my audits in accordance with generally accepted auditing standards as accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit includes performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. In making those risk assessments, the auditor considers internal control relevant to the Company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, I express no such opinion.

An audit also includes evaluating appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my audit opinion.

- Our mission at I HAVE A DREAM HOME is to deliver homeownership opportunities to those underserved communities.
- We believe that homeownership is the cornerstone of generational wealth.
- Over the decades, inequality & inequity in urban communities has become embedded in the financial system and housing market leaving many communities underdeveloped. These communities are mostly inhabited by minorities or low- and moderate-income earners.
- The big banks simply do not want to service these communities. The big banks have essentially closed their doors to mortgage lending altogether.
- Citigroup released a GPS report stating the economic cost of black Inequality in the U.S. be \$16 trillion dollars in lost GDP over the last 20 years. The report further states, if racial inequity gaps were closed today, the equivalent add to the U.S. economy over the next five years could be \$5 trillion of additional GDP.
- So, inequality & inequity in our nation isn't a white problem, it isn't a black problem, it's an American problem.

Business Description

Serving America's Urban Communities

The **I HAVE A DREAM HOME** movement focuses on underserved communities across America. The company is exempt from registration under the Investment Company Act of 1940 and its securities are not registered under the Securities Act of 1933, as amended. The company raises capital from investors in exchange for equity in the form of Class A Common Stock. The monies raised will help fund operations. The overall mission is to develop underserved communities by way of homeownership through mortgage origination. The aim of the company is to invest wisely, create job opportunities, make a profit, and share those profits with its investors. The company is governed by a strict set of criteria and investment guidelines in accordance with the U.S. Securities and Exchange Commission. Investment advice is provided by the company's Board of Directors and is subject to the discretion and control of the Board of Directors.

Problem 1: Homeownership – Access to Credit

The wealth gap continues to grow; although homeownership is the single greatest asset for many individuals and families today, access to homebuying capital remains a key front-line issue. With black homeownership declining to lows not seen since the 1960s, a large mortgage-ready population remains underserved by financial institutions. These underserved communities represent both the future of this country and a major business opportunity; therefore, to ensure the American Dream of homeownership remains within reach, an unbiased pathway must exist for all qualified homebuyers.

Problem 2: Build Back Better – Racial Inequality

In September 2020, Citigroup released a GPS report that states racial inequality has led to \$16 trillion dollars in lost GDP over the last 20 years. Report authors prognosticate that if racial inequity gaps were closed today, the equivalent add to the U.S. economy over the next five years could be \$5 trillion of additional GDP or an average add of 0.35 percentage points to U.S. GDP growth per year and 0.09 percentage points to global GDP growth per year.

Raymond J. McGuire, former Vice Chairman of Citigroup and Chairman of Banking, Capital Markets, and Advisory at Citi, stated: “Racial inequality has always had an outsized cost, one that was thought to be paid only by underrepresented groups. What this report underscores is that this tariff is levied on us all, and particularly in the U.S., that cost has a real and tangible impact on our country’s economic output. Now, more than ever, we have a responsibility and an opportunity to confront this longstanding societal ill that has plagued Black and brown people in this country for centuries, tally up the economic loss, and as a society, commit to bringing greater equity and prosperity to all.

Solution 1: Homeownership – Access to Credit

Underserved communities represent a missed opportunity for lenders. I HAVE A DREAM HOME has emerged to help those communities waiting in distress for a life-sustaining solution centered around homeownership. Servicing these communities, it could **add \$1.5 trillion to the GDP annually**. We intend to tap into the potential of those communities using our proprietary mortgage lending platform, and Alternative for Collateralized Loan Obligations (ACLO) product. We intend to work closely with banks and Government Sponsored Enterprises (GSEs) to help them achieve their Community Reinvestment Act goals and their responsibilities under the Duty to Serve (DTS) rules. Most importantly, we seek to unlock credit access for these underserved communities which will allow the communities to prosper and grow. It will also allow families and individuals living in those communities to achieve the American dream of homeownership and begin the process of building generational wealth.

Solution 2: Building a Bridge to the Future

I HAVE A DREAM HOME agrees with Raymond J. McGuire and Citigroup, Black and brown lives do matter, and it is time for all of us to tally up the economic loss and commit to bringing greater equity to those communities waiting in distress.

We see ourselves as a catalyst for change and a bridge to the future of homeownership, community renewal, and job creation, in those underserved communities across America.

Proprietary Business Model

Our Proprietary ACLO Product Demands a Place at the Funding Table

I HAVE A DREAM HOME intends to disrupt and expand the financial marketplace by unveiling our proprietary Mortgage Lending Platform and Alternative for Collateralized Loan Obligations (ACLO) product.

Our Platform and ACLO Products are designed to:

- Create opportunities for responsible homeownership and asset acquisition.
- Reduce the risk and cost of asset acquisitions.
- Protect the lender/investor through the life of the loan.
- Incentivize and protects the borrower by providing a wealth-building component to assist or help the borrower guard against future financial crisis.

Become an Investor

Why Invest

Generally, early-stage investment opportunities never reach low-working- and middle-class America, it only reaches this population well after institutional or wealthy investors have positioned themselves ahead of them. I HAVE A DREAM HOME has made it possible for low-working-an-middle-class America to become angel investors today.

The Minimum Investment is \$10.00. I HAVE A DREAM HOME is seeking to raise \$5,000,000 in this seed round. The Current Selling Price is \$1.00 Per Share of Class A Common Stock.

Investment Incentive Bonuses

Seed Round	Investors who invest during the seed round will receive 50% additional shares as a bonus.
Over \$25K	Investors who purchase over \$25,000 worth of stock will receive 25% additional shares as a bonus.
Over \$50K	Investors who purchase over \$50,000 worth of stock will receive 50% additional shares as a bonus.

Note: Bonus shares are all calculated once the offering is completely closed. This benefits investors by allowing them to make multiple investments over time and accumulate investment/bonus totals.

Market Projections

The lack of origination in underserved communities is a missed opportunity for lenders. Homeownership is still affordable for far more people than have been given the opportunity to achieve it. 2021 data set compiled by Freddie Mac, "Who Are the Future Borrowers: A Deep Dive into their Barriers and Opportunities" extrapolates that as of January 2021, there were over 41 million people across the country who were mortgage-ready and have not yet purchased a home.

If a consumer met all the criteria to be "Mortgage Ready" but has a lower credit score between 600 and 660, Freddie Mac considers him or her as "Near Mortgage Ready." In other words, consumers who are "Near Mortgage Ready" are reasonably close in time to being "Mortgage Ready." There were over 13 million people across the country who were Near-mortgage-ready and have not yet purchased a home.

Little has changed in mortgage lending in the past 5 years. There is a wide racial gap in mortgage ownership status between Non-Hispanic Whites and all minority groups. In particular, the Black-White gap is striking (27% vs. 11%). Furthermore, the racial gap in homeownership potential persists as well. While 36% of Non-Hispanic Whites are "Mortgage Ready," only 22%

(approx. 3.4 million) of Black Americans are "Mortgage Ready," the lowest among all racial groups. While the share of "Mortgage Ready" Hispanic Americans is slightly lower than Non-Hispanic Whites (36% vs. 34%), the share of Asian American "Mortgage Ready" is much higher than Non-Hispanic Whites (36% vs. 61%).

I HAVE A DREAM HOME extrapolated that there are 17 million "Mortgage Ready" homebuyers in underserved communities who would qualify under our proprietary mortgage lending platform and Alternative for Collateralized Loan Obligations (ACLO) product. By successfully lending in these underserved communities, **I HAVE A DREAM HOME and other lenders stand to conservatively increase their loan volume by at least \$1.5 Trillion.**
