VP-Business Systems | Encompass, Sisense BI, All Things FinTech |
Help Define and Improve Business Systems and Processes Through
Data/Tech

Austin, Texas, United States

Summary

With over 20 years in diverse roles in the mortgage industry, I found my calling halfway through in fintech. I apply the knowledge from the variety of roles to defining company processes and goals and use data and technology to create efficiencies and improvements wherever they can be found. I work with any system or platform that is used in the mortgage manufacturing process, and I never get comfortable with the status quo.

- Completed many companywide system rollouts including, but not limited to, Encompass, Floify POS, Blend POS, SimpleNexus POS, help desks, business intelligence, etc.
- Built business intelligence data from the ground up now used daily for departmental efficiencies, transparency, and self-serve analytics
- Collaborated to create and maintain many custom workflows for products such as temporary buydowns, non-QM, HELOCs, lot loans, and construction products
- Always researching and learning to stay on the cutting edge

Let's connect and network to share thoughts and ideas!
