Invest in Pipeline2Space

Now Launching: Get in on the Ground Floor of On- Demand Space Delivery

The space industry is taking off, but when it comes to the biggest opportunities, everyday investors are left on earth. Case in point: SpaceX raised \$750M just last year, but only an elite few had access to that opportunity. We're doing things differently. Join us as a ground-floor shareholder in our transformative space-launch platform as we gear up to disrupt this booming market.

Rapidly Growing Demand to Put Satellites in Space

Our breakthrough technology targets the booming light-lift space launch sector, catering to the surging demand for quick, cost-effective access to space. Traditional rockets are limited, slow, expensive, and can't meet current demand. Our innovative launch platform curated to individual launches promises reliability, increased launch volume, and affordable pricing. Join us on this journey to transform the future of space exploration as the demand for space launch is projected to boom to \$1T by 2040*.

Problem

The Challenges with Traditional Rocket Launch Systems

There's already a growing backlog for space launch capacity to put satellites and cargo in space but fewer than 200 rockets will launch this year. Our technology is capable of launching cargo-to-space flights on-demand and more than 100 times per month.

Revolutionizing Space Access with In-Ground Hypersonic Launch

Our groundbreaking in-ground launch system uses a patented ram accelerator technology to propel payloads to the edge of space. Unlike traditional rockets, we eliminate the need for the massive first-stage booster, making launch efficient, eco-friendly, and cost-effective. With demonstrated hypervelocity speeds, we're breaking boundaries and offering a game-changing solution for on-demand space access.

100+ launches per month

50 to 500kg satellite and cargo
payloads

<\$5,000/kg estimated launch costs

Frequent and Reliable launches

Business Model

Profitable & Sustainable: How We Make Money

We aim to generate revenue through four diverse streams:

Satellite and Cargo Delivery

to Orbit: Competitive pricing for delivering payloads, with future cost projections as low as \$5,000/kg.

Sub-Orbital Drone Launch &

More: Offering sub-orbital launches for various applications.

Government Contracts:[Home](#)[Vision](#)[Perks](#)[Team](#)[FAQ](#)[Discussion](#)[INVEST
NOW](#)

Future Streams: Leasing in-ground launch systems, space depot stations, and orbital/lunar launch services offer flexibility and growth potential.

Our low-cost, resilient, and reusable in-ground hypersonic launch system ensures a strong foothold in the expanding space market.

Equity crowdfunding investments in private placements, and start-up investments in particular, are speculative and involve a high degree of risk and those investors who cannot afford to lose their entire investment should not invest in start-ups. Companies seeking startup investment through equity crowdfunding tend to be in earlier stages of development and their business model, products and services may not yet be fully developed, operational or tested in the public marketplace. There is no guarantee that the stated valuation and other terms are accurate or in agreement with the market or industry valuations. Further, investors may receive illiquid and/or restricted stock that may be subject to holding period requirements and/or liquidity concerns.

DealMaker Securities LLC, a registered broker-dealer, and member of FINRA | SIPC, located at 105 Maxess Road, Suite 124, Melville, NY 11747, is the Intermediary for this offering and is not an affiliate of or connected with the Issuer. Please check our background on FINRA's BrokerCheck.
